Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202–755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act(FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).)

Dated: July 27, 1977.

MARTIN H. ROGOFF,
Acting Director,
Registration Division.

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 15 Through July 22, 1977

Notice is hereby given that during the week of July 15 through July 22, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

JULY 28, 1977.

Date	Name and location of applicant	Case No.	Type of submission
July 15, 1977	Colonial Oil Co. Jacksonville, Fla. (If granted: Mr. Paul Bloom, deputy general counsel of the FEA would be designated as the presiding officer for the Colonial Oil hearing being convened to determine whether misleading or erroneous data was submitted to the FEA in connection with an exception application filed by Colonial Oil Co.)	FEX–0175	Supplemental Order in *Colonial Oil Co.*, 6 FEA par. ___ (July 8, 1977).
Do	Smith & Boyd, Inc., Philadelphia, Pa. (If granted: The remedial order issued by FEA region III on June 28, 1977 would be rescinded and Smith & Boyd, Inc. would not be required to refund overcharges made in its sales of No. 2 heating oil to the Philadelphia Electric Co.)	FRA–1306	Appeal of the remedial order issued by FEA region III on June 28, 1977.
July 18, 1977	Continental Oil Co., Houston, Tex. (If granted: Continental Oil Co.'s obligation would not be modified in the buy, sell list.)	FEA–1300	Appeal of the FEA buy sell list.
Do	Getty Oil Co., Los Angeles, Calif. (If granted: Getty Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at its Bay Springs, Cameron, Ennice, Fuller, Hollywood, Marlow, Medicine Lodge, Red Fish Bay, Schafer, Spearman, Velma, and Venice gas processing plants.)	FEE–4419—FEE–4430	Price exception (sec. 212.165).
Do	Great Southern Oil & Gas Co., Inc., Lafayette, La. (If granted: Great Southern Oil & Gas Co., Inc. would receive an extension of the relief granted in the FEA's Mar. 17, 1977 decision and order and would be permitted to sell crude oil produced from the Longman No. 1 well at upper tier ceiling prices for the benefit of the working interest owners.)	FXE 4416	Extension of the relief granted in *Great Southern Oil & Gas Co.*, 6 FEA par. 83,104 (Mar. 17, 1977).
Do	Great Southern Oil & Gas Co., Inc., Lafayette, La. (If granted: Great Southern Oil & Gas Co., Inc. would be permitted to sell crude oil produced from the Castille RA SUA; Breaux No. 1 well located in St. Martin Parish, La. at upper tier ceiling prices.	FEE–4417	Price exception (sec. 212.73).
Do	Petroleum Management, Inc., Wichita, Kans. (If granted: The request, if granted, would allow the purchasers of Petroleum Management, Inc.'s crude oil to fund the escrow account by withholding payment from the working interest owners.)	FRR–0115	Modification of the decision and order in *Petroleum Management, Inc.*, 6 FEA par. ___ (May 31, 1977).
Do	Reading & Bates Oil and Gas Co., Tulsa, Okla. (If granted: Reading & Bates Oil and Gas Co. would be permitted to sell crude oil produced from the Dempsey Mantooth Well No. 2A located in McClain County, Okla. at upper tier ceiling prices.)	FEE–4418	Price exception (sec. 212.73).
Do	Reading & Bates Oil and Gas Co., Tulsa, Okla. (If granted: Reading & Bates Oil and Gas Co. would be permitted to sell crude oil produced from the Schrader Unit Well No. 1 located in McClain County, Okla. at upper tier ceiling prices.)	FEE–4422	Price exception (sec. 212.73).
Do	Sabre Refining, Inc., Bakersfield, Calif. (If granted: The FEA's June 13, 1977 decision and order would be rescinded and Sabre Refining, Inc. would not be required to purchase additional entitlements.)	FXA–1307	Appeal of the FEA's decision and order in *Sabre Refining, Inc.*, 6 FEA par. ___ (June 13, 1977).
Do	Tenneco Oil Co., Houston, Tex. (If granted: The FEA's June 17, 1977 decision and order would be modified to permit Tenneco Oil Co. to reallocate unrecouped increased product costs during the audit period of the Feb. 2, 1977 remedial order.	FRR–0114	Modification of FEA's decision and order in *Tenneco Oil Co.*, 6 FEA par. ___ (June 17, 1977).
July 19, 1977	County of Hawaii, Hilo, Hawaii. (If granted: Distributors of motor gasoline and diesel fuel in Hawaii would be permitted to increase their selling prices to reflect an increase in the county license tax on those fuels.)	FEE–4427	Price exception (sec. 212.93).
Do	Fountain & Associates, San Antonio, Tex. (If granted: Crude oil produced by Fountain & Associates' Austin Chalk-Buda Trend property would be sold at exempt price levels.)	FEE–4426	Price exception (sec. 212.72).
Do	Koch Exploration Co., Wichita, Kans. (If granted: Koch Exploration Co. would be permitted to sell crude oil produced from the Sink Draw No. 1 and Cedar Rim No. 3 leases located in the Altamont-Bluebell Field, Duchesne County, Utah, at upper tier ceiling prices.)	FEE–4423, FEE–4424	Price exception (sec. 212.73).

Date	Name and location of applicant	Case No.	Type of submission
Do.....	Phillips Petroleum Co., Bartlesville, Okla. (If granted: Phillips Petroleum Co. would be permitted to sell crude oil produced from the Foote lease located in Oklahoma County, Okla., at upper tier ceiling prices.)	FEE-4435	Price exception (sec. 212.73).
Do.....	Red Carpet Car Wash Oklahoma City, Okla. (If granted: The FEA's Jan. 26, 1977 decision and order issued by region VI would be modified and Red Carpet Car Wash would be considered a new retail outlet and would receive an assignment of a base period volume and a supplier.)	FMR-0116	Modification of FEA region VI's Jan 26, 1977 decision and order.
Do.....	Rickelson Oil and Gas Co. Tulsa, Okla. (If granted: The Remedial Order issued by FEA region VI on July 5, 1977 would be rescinded and Rickelson Oil & Gas Co. would not be required to refund overcharges received on its sales of crude oil.)	FRA-1399, FRS-1399	Appeal of the remedial order issued by FEA region VI on July 5, 1977. Stay request.
Do.....	Shell Oil Co., Houston, Tex. (If granted: The FEA's June 24, 1977 decision and order would be rescinded and Shell Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of [illegible] at its Pasadena plant.)	FXA-1398	Appeal of FEA's decision and order in *Shell Oil Co.*, case No. FXE-4229 (decided June 24, 1977) (unreported decision).
Do.....	Univar Corp., Seattle, Wash. (If granted: The FEA's Dec. 16, 1976 notice would be modified and the Univar Corp. would be removed from the listing of most energy consumptive corporations in the SIC 20 category and would be exempted from the mandatory requirement of sec. 375(a) that the firm report progress made in energy efficiency to the FEA.)	FMR-0117	Request for modification of Federal Register notice at 41 Fed. Reg. 54077 (Dec. 16, 1976).
July 20, 1977..	American Petroleum Refiners Association, Inc., Washington, D.C. (If granted: All refiners which sold JP-4 and JP-5 jet fuel to the Defense Fuel Supply Center during 1973 would be permitted to use prices set forth in Apr. 1973 contracts with the DFSC to retroactively establish maximum permissible selling prices for their sales of jet fuel to the DFSC.)	FEE-4443	Class exception.
Do	Catholic Cemeteries, Chicago, Ill. (If granted: Catholic Cemeteries would receive an exception from 10 CFR 211.83 to continue to receive its historical volume of propane.)	FEE-4442	Allocation exception (sec. 212.83).
July 21, 1977..	Cities Service Oil Co., Braintree, Mass. (If granted: Cities Service Oil Co. would receive a temporary stay of the remedial order issued by FEA region I on July 11, 1977 pending a determination on its proposed stay request.)	FRT-0045	Temporary stay of the remedial order issued by FEA region I on July 11, 1977.
Do . . .	Cities Service Oil Co., Braintree, Mass. (If granted: The remedial order issued by FEA region I on July 8, 1977 would be rescinded and Cities Service Oil Co. would not be required to reinstate the supplier wholesale purchaser-reseller relationship with 14 lessee dealers.)	FRA-1401	Appeal of the remedial order issued by FEA region I on July 8, 1977.
Do. . . .	Georgetown University Law Center, Washington, D.C. (If granted: The FEA's information request denial would be rescinded and Mr. Douglas Parker would receive access to documents pertaining to the proposed amendments to subpart K of the mandatory petroleum price regulations * * *.)	FFA-1400	Appeal of FEA's information request denial.
Do.....	Kedco Management Corp., Wichita, Kans. (If granted: Crude oil produced by Kedco Management Corp.'s Ayo unit located in Lafourche Parish, La. would be sold at exempt price levels.)	FEE-4447	Price exception (sec. 212.73).
Do.....	Moran Pipe and Supply Co., Inc., Seminole, Okla. (If granted: Moran Pipe and Supply Co. would be permitted to sell crude oil produced from the Cozar lease located in Seminole County, Okla., at upper tier ceiling prices.)	FEE-4444	Price exception (sec. 212.73).
Do.....	Peninsular Gas Co., Omaha, Nebr. (If granted: Peninsular Gas Co. would receive an exception from 211.83(c)(2)(v) and would be permitted to purchase propane for use as a supplement to its natural gas supply on peak days).	FEE-4448	Allocation exception (sec. 211.83).
Do.....	Suburban Aviation Service, Inc., Teterboro Airport, N.J. (If granted: Suburban Aviation Service, Inc. would be permitted to increase its prices for aviation fuel above the maximum levels allowed under the mandatory petroleum price regulations.)	FEE-4445	Price exception (sec. 212.93).

INTERSTATE COMMERCE COMMISSION

[Volume No. 28]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

JULY 29, 1977.

PETITIONS FOR MODIFICATION, INTERPRETATION, OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

The Commission has recently provided for easier identification of substantive petition matters and all documents should clearly specify the "docket", "sub", and "suffix" (e.g. M1, M2) numbers identified by the FEDERAL REGISTER notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rule 247(d) of the Commission's *General Rules of Practice* (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No. MC 19227 (Sub-No. 173) (M1) (Notice of filing of petition to modify territorial description), filed June 20, 1977. Petitioner: LEONARD BROS. TRUCKING CO., INC., 2515 NW. 20th St., Miami, Fla. 33152. Petitioner's representative: Thomas A. Leonard (same address as petitioner). Petitioner holds a motor *common carrier* Certificate in No. MC 19227 (Sub-No. 173) issued June 27, 1975, authorizing transportation, over irregular routes, of *Signs, sign parts*, and *accessories and equipment* used in the installation of signs and sign parts, between the plantsites of Federal Sign and Signal Corporation, located at Los Angeles, Calif., Louisville, Ky., Knoxville, Tenn., and Arlington, Tex., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

By the instant petition, petitioner seeks to modify the territorial description so as to read: Between the plantsites of Federal Sign and Signal Corporation at Cucamonga, Calif.; Louisville, Ky.; Knoxville, Tenn., and Arlington, Tex., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 30787 (Sub-No. 6) M1 (Notice of Filing of Petition to Delete Restriction), filed June 29, 1977. Petitioner: NIAGARA SCENIC BUS LINES, INC., 6 Maelou Dr., Manburg, NY. 14303. Petitioner's representative: S. Harrison Kahn, Suite 733 Investment Building, Washington, D.C. 20005. Petitioner holds a motor *common carrier* Certificate in No. MC 30787 (Sub-No. 6), issued February 13, 1970, authorizing transportation over irregular routes, of *passengers and their baggage*, inthe same vehicle with passengers, in special operations, in round-trip sightseeing or pleasure tours, beginning and ending at points in Niagara and Erie Counties, N.Y., and extending to points in the United States, except Alaska and Hawaii, subject to the following conditions: No transportation will be provided between points in Erie County, N.Y., on the one hand, and, on the other, points in Canada; the operations authorized are subject to the right of the Commission to impose, after final determination of the proceedings in Ex Parte No. MC-29 (Sub-No. 1), *Passenger Transportation in Special Operations*, such terms and conditions, if any, as may be deemed necessary to insure that the operations performed by carrier are limited to bona fide special operations.

By the instant petition, petitioner seeks to delete the restriction in the authority above against providing service between points in Erie County, N.Y., on the one hand, and, on the other, points in Canada.

No. MC 59640 (Sub-No. 40) M1 (Notice of filing of petition to modify territorial description), filed June 27, 1977. Petitioner: PAULS TRUCKING CORPORATION, 3 Commerce Dr., Cranford, N.J. 07016. Petitioner's representative: Charles J. Williams, 1815 Front St., Scotch Plains, N.J. 07076. Petitioner holds a motor *contract carrier* Permit in No. MC 59640 (Sub-No. 40), issued April 11, 1975, authorizing transportation over irregular routes, of *such merchandise* as is dealt in by wholesale, retail, and chain camping and sporting goods stores, and *equipment, materials, and supplies* used in the conduct of such business, (1) between the facilities of Lionel Morsan, Inc., at Mahwah, N.J., on the one hand, and, on the other, points in Hudson, Union, and Essex Counties, N.J.; and (2) between the facilities of Lionel Morsan, Inc., at Mahwah, N.J., on the one hand, and, on the other, New York, N.Y., and points in Nassau, Suffolk, and Westchester Counties, N.Y., and points in New Haven County, Conn., restricted to the transportation in (1) above of traffic having a prior or subsequent movement by water or rail, under a continuing contract, or contracts, with Lionel Morsan, Inc., of Paramus, N.J.

By the instant petition, petitioner seeks to modify the territorial description in (1) above by deleting Mahwah, N.J. and substituting Paramus and Woodbridge, N.J., in lieu thereof, and to modify (2) above by deleting Mahwah, N.J., in the base area and substituting points in New Jersey in lieu thereof, and by adding points in Rockland County, N.Y., and points in Fairfield and Hartford Counties, Conn., in the radial area.

No. MC 102906 M1 (Notice of filing of petition to modify commodity description), filed June 21, 1977. Petitioner: McCONNELL HEAVY HAULING, INC., U.S. Hwy. 65 South, P.O. Box 463, Little Rock, Ark. 72203. Petitioner's representative: W. M. Buttram, 2505 Fair Park Blvd., Little Rock, Ark. 72204. Petitioner holds a motor *common carrier* Certificate in No. MC 102906, issued September 27, 1967, authorizing transportation over irregular routes, of *heavy machinery and equipment* (other than oilfield equipment), which because of its size or weight requires the use of special equipment, between points in Arkansas; and between points in Arkansas, on the one hand, and, on the other, points in Missouri, Oklahoma, Texas, Louisiana, Mississippi, and Tennessee.

By the instant petition, petitioner seeks to modify the above commodity description to read as follows: "commodities, the transportation of which because of size or weight, requires the use of special equipment (other than oilfield equipment), and of related machinery parts and related contractors' materials and supplies, when their transportation is incidental to the transportation which by reason of size or weight require special equipment."

No. MC 113678 (Sub-No. 292) M1 (Notice of Filing of Petition To Remove Restriction), filed May 17, 1977. Petitioner: CURTIS, INC., P.O. Box 16, Stockyards Station, Denver, Colo. 80216. Petitioner's representative: Richard A. Peterson, 521 South 14th St., P.O. Box 81849, Lincoln, Nebr. 68501. Petitioner holds a motor *common carrier* Certificate in No. MC 113678 (Sub-No. 292), issued July 18, 1977, authorizing transportations, as pertinent, over irregular routes, of: *Rugs and carpets*, from points in Georgia, to points in Nevada, Idaho, Utah, Montana, Wyoming, Colorado, New Mexico, Kansas, Texas, and points in that part of Nebraska on and west of U.S. Highway 81, restricted against service to points in Idaho and Utah from Archer, Calhoun, Cartersville, Dalton, Lafayette, La Grange, Lyerly, Rabun Gap, Rome, and White, Ga. By the instant petition, petitioner seeks to remove the restriction as stated, "restricted against service to points in Idaho and Utah from Archer, Calhoun, Cartersville, Dalton, Lafayette, La Grange, Lyerly, Rabun Gap, Rome, and White Ga."

No. MC 116101 (Sub-No. 2) M1 (Notice of filing petition to modify restriction in certificate), filed June 1977. Petitioner: QUICK AIR FREIGHT, INC., Cargo Building, Port Columbus Airport, Columbus, Ohio 43219. Petitioner's representative: Russell S. Bernhard, 1625 K St. NW., Washington, D.C. 20006. Petitioner holds a motor *common carrier* certificate, No. MC 116101 (Sub-No. 2) issued Feb-

ruary 27, 1968, authorizing transportation over irregular routes of *general commodities*, moving in express service, except articles of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, between points in Adams, Allen, Ashland, Athens, Champaign, Clark, Clermont, Clinton, Coshocton, Crawford, Delaware, Fairfield, Fayette, Franklin, Greene, Guernsey, Hardin, Highland, Hocking, Jackson, Knox, Licking, Logan, Madison, Marion, Montgomery, Morgan, Morrow, Muskingum, Perry, Pickaway, Pike, Richland, Ross, Union, Vinton, Wayne, and Wyandot Counties, Ohio, on the one hand, and, on the other, points in Illinois, Indiana, Michigan, (except points in the Upper Peninsula), New York, and Pennsylvania. Restriction: The operations authorized herein are restricted to the exclusive use of one motor vehicle in the transportation of a single shipment, not weighing more than 5,000 pounds, from one consignor at one location to one consignee at one location in any one day.

By the instant petition, petitioner seeks to have the restriction modified by excluding therefrom traffic having a prior or subsequent movement by aircraft.

No. MC 119192 (Sub-No. 10) M1 (Notice of filing of petition to add an additional contracting shipper), filed June 17, 1977. Petitioner: EASTERN DELIVERY SERVICE, INC., 80 Central Ave., Bridgeport, Conn. 06607. Petitioner's representative: Morton R. Kiel, 5 World Trade Center, Suite 6193, New York, N.Y. 10048. Petitioner holds a motor *contract carrier* Permit in No. MC 119192 (Sub-No. 10), issued July 19, 1973, authorizing transportation, over irregular routes, of (1) *Such commodities* as are dealt in by department stores, and *materials, supplies, and equipment* (except in bulk), used in the conduct of such business, from New York, N.Y., and points in Nassau and Westchester Counties, N.Y., Bergen and Essex Counties, N.J., and Fairfield County, Conn., to New York, N.Y., and points in New Jersey and Connecticut, and Westchester, Dutchess, Putnam, Rockland, Orange, Sullivan, Nassau, and Suffolk Counties, N.Y.; and (2) *return shipments* of the commodities specified in (1) above, from New York, N.Y., and points in New Jersey and Connecticut, and Westchester, Dutchess, Putnam, Rockland, Orange, Sullivan, Nassau, and Suffolk Counties, N.Y., to New York, N.Y., and points in Nassau and Westchester Counties, N.Y., Bergen and Essex Counties, N.J., and Fairfield County, Conn., restricted in parts (1) and (2) against the transportation of Traffic originating at and destined to points in Connecticut, under a continuing contract or contracts with B. Altman & Co., New York, N.Y.

By the instant petition, petitioner seeks to add "John Wanamaker, Philadelphia" as an additional contract shipper to the above authority.

No. MC 121060 (Sub-No. 25) M1 (Notice of filing of petition for declaratory order-interpretation of certificate). Petitioner: ARROW TRUCK LINES, INC., 1220 West 3rd Street, P.O. Box 1416, Birmingham, Ala. 35207. Petitioner's representative: William P. Jackson, Jr., 3426 North Washington Boulevard, P.O. Box 1267, Arlington, Va. 22210. Petitioner holds a motor *common carrier* Certificate in No. MC 121060 (Sub-No. 25), issued April 22, 1975, authorizing transportation over irregular routes, of *Ceiling systems, paint, plastic light diffusers, adhesives, furring, fasteners, lighting systems, moldings, steel shapes, steel rods, steel channels, steel ceiling beams, applicators and roofing caps, and materials and supplies* used in the installation of any commodity named above (except in bulk), from the facilities of Litecraft-Luminous Ceilings, Division of the Celotex Corporation, located at or near Scottsboro, Ala., to points in Maine, Michigan, New Hampshire, Minnesota, Virginia, Pennsylvania, Maryland, Delaware, Kansas, New York, Iowa, New Jersey, Mississippi, Arkansas, Missouri, Oklahoma, Connecticut, Ohio, Illinois, West Virginia, Texas, Vermont, Louisiana, Kentucky, Wisconsin, and the District of Columbia. By the instant petition, petitioner seeks an interpretation by the Commission that the term "steel shapes" includes certain types of basic commodities made from steel.

No. MC 126458 (Sub-No. 2) (Notice of filing of petition to modify contracting shipper), filed March 17, 1977. Petitioner: NICHOLAS J. ASCENZO, INC., 1544 Boone Avenue, Bronx, N.Y. 10460. Petitioner's representative: Morton E. Kiel, 5 World Trade Center, Suite 6193, New York, N.Y. 10048. Petitioner holds a motor *contract carrier* Permit in No. MC 126458 (Sub-No. 2), issued February 19, 1974, authorizing transportation, over irregular routes of *Iron and steel articles*, as described in Appendix V to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, and 276, from Philadelphia, Pa., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia, under a continuing contract or contracts, with Nasco Steel, Inc., of Philadelphia, Pa., Taft Steel, Inc., of New York, N.Y., and Cosid, Inc., of New York, N.Y.; and subject to the right of the Commission to impose such terms, conditions, or limitations in the future that carrier's operations shall conform to the provisions of section 210 of the Act. By the instant petition, petitioner seeks to modify its permit by the deletion of Nasco Steel, Inc. as a contracting shipper, and the addition of Federal Steel Corporation.

No. MC 126736 (Sub-No. 48) M1 (Notice of filing of petition to delete restriction), filed June 27, 1977. Petitioner: FLORIDA ROCK & TANK LINES, INC., 155 E. 21st St., P.O. Box 1559, Jacksonville, Fla. 32201. Petitioner's representative: Martin Sack, Jr., 1754 Gulf Life Tower, Jacksonville, Fla. 32207 Petitioner holds a motor *common carrier* Certificate in No. MC 126736 (Sub-No. 48), issued April 4, 1967, authorizing transportation over irregular routes, of *commodities in bulk*, in shipper or water carrier owned vehicles, between Jacksonville, Fla. on the one hand and on the other, points in Florida and Georgia, restricted to the transportation of traffic having an immediately prior or subsequent movement by water; the authority granted shall not be tacked or combined directly or indirectly with any other authority held by carrier for the purpose of providing a through service, to or from points other than those specified above. By the instant petition, petitioner seeks to have deleted from the commodity description the restriction "in shipper or water carrier owned vehicles."

No. MC 128021 (Sub-No. 1) (M1) (Notice of filing of petition to modify territorial description), filed June 24, 1977. Petitioner: DIVERSIFIED TRUCKING CORP., P.O. Box 100, 309 Williamson Avenue, Opelika, Ala. 36801. Petitioner's representative: Robert E. Tate, P.O. Box 517 Evergreen, Ala. 36401. Petitioner holds a motor *contract carrier* Permit in No. MC 128021 (Sub-No. 1) issued February 12, 1968, authorizing transportation over irregular routes, of (1) *Physical fitness, gymnastic, athletic, and sporting goods equipment*, from the plantsite of Diversified Products Corporation of California located at Gardena, Calif., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming; and (2) *equipment, materials, and supplies* used in the manufacture and distribution of the above-described commodites, from points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming to the plantsite of Diversified Products Corporation of California located at Gardena, Calif., under a continuing contract, or contracts, with Diversified Products Corporation of California at Gardena, Calif. By the instant petition, petitioner seeks to modify the territorial description by substituting Compton, Calif. as the location of Diversified Products Corporation of California, in lieu of Gardena, Calif.; and also to modify the location of the contracting shipper to correspond with the above requested modification.

No. MC 128273 (Sub-No. 180) M1 (Notice of filing of petition to broaden commodity description), filed June 15, 1977. Petitioner: MIDWESTERN DISTRIBUTION, INC., 121 Humboldt St., P. O. Box 189, Fort Scott, Kans. 66701. Petitioner's representative: Harry Ross, 58 South Main Street, Winchester, Ky. 40391. Petitioner holds a motor *common carrier* Certificate in No. MC 128273 (Sub-No. 180), issued October 1, 1976, authorizing transporation over irregular routes of (1) *Molybdenum compounds, molybdenum ores, molybdenum concentrates, molybdenum chemicals, molybdenum alloys and sulfuric acid* (except commodities in bulk and commodities which, because of size or weight, require the use of special equipment), from the facilities of Climax Molybdenum Company, a subsidiary of AMAX, Inc., at or near Fort Madison, Iowa, to points in the United States (except Iowa, Alaska, and Hawaii); and (2) *Materials and supplies* used in the production and distribution of the commodities in (1) above (except commodities in bulk and commodities which because of size or weight, require the use of special equipment), from points in the United States (except Iowa, Alaska, and Hawaii), to the facilities of Climax Molybdenum Company, a subsidiary of AMAX, Inc., at or near Fort Madison, Iowa, restricted to the transportation of shipments originating at or destined to the facilities of Climax Molybdenum Company, a subsidiary of AMAX, Inc., at or near Fort Madison, Iowa. By the instant petition, petitioner seeks to broaden the commodity description above by the addition of "tungsten and tungsten concentrates."

No. MC 136857 and MC 136857 (Sub-No. 1) M1 (Notice of filing of petition to broaden commodity description), filed June 20, 1977. Petitioner: ROSELAND TRUCKING CORP., P.O. Box K, Roseland, N.J. 07018. Petitioner's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Petitioner holds *contract carrier* permits in MC 136857 and MC 136857 (Sub-No. 1) issued March 8, 1974 and December 3, 1975, respectively, authorizing transportation over irregular routes in No. MC 136857 of: (1) *Foodstuffs*, (except meat and meat products, and commodities in bulk), from Roseland, N.J., to points in Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Delaware, Maryland, Ohio, Michigan, Illinois, Indiana, and the District of Columbia; and (2) *Materials and supplies* used in the manufacture and packaging of foodstuffs, from the states listed in (1) above to Roseland, N.J. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with M. Polaner and Son, Inc., of Roseland, N.J.; and in No. MC 136857 (Sub-No. 1) *Foodstuffs* (except meat and meat products and commodities in bulk), from Roseland, N.J., to points in Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida, and *Materials and supplies* used in the manufacture and packaging of foodstuffs (except commodities in bulk), from points in Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida, to Roseland, N.J. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts, with M. Polaner and Son, Inc. of Roseland, N.J. By the instant petition, petitioner seeks to add "baker's supplies" and additionally White Cap Preserves, Inc. as contracting shipper in each of the above-numbered permits.

No. MC 138891 (Sub-No. 4) M1 (Notice of filing of petition to add additional radial points), filed May 17, 1977. Petitioner: FRANK TRANSFER & STORAGE, INC., 324 E. 8th Street, Sioux Falls, S. Dak. 57102. Petitioner's representative: A. J. Swanson, 521 South 14th Street, P.O. Box 81849, Lincoln, Nebr. 68501. Petitioner holds a motor *common carrier* Certificate in No. MC 138891 (Sub-No. 4) issued October 15, 1976, authorizing transportation over irregular routes, of *General commodities* (except classes A and B explosives, articles of unusual value, household goods, and commodities in bulk), and *empty trailer and empty marine containers*, between Sioux Falls, S. Dak., on the one hand, and, on the other, points in Plymouth, Siouxand Lyon Counties, Iowa; Rock, Nobles, Pipestone, Murray, Lincoln, and Lyon Counties, Minn., and points in that part of South Dakota east of the Missouri River, restricted to the transportation of shipments having a prior or subsequent movement by rail in trailer-on-flatcar or container-on-flatcar service. By the instant petition, petitioner seeks to include Woodbury, Cherokee, O'Brien, Osceola, Dickinson, Clay, Buena Vista, Pocahontas, Palo Alto, and Emmet Counties, Iowa; Yellow Medicine Lac Qui Parle, Big Stone, Chippewa, Redwood, Cottonwood, Jackson, Martin, Watonwan, Blue Earth, and Brown Counties, Minn., as additional radial points, and also to enlarge its authorized South Dakota territory to embrace the entire state.

No. MC 139495 (Sub-No. 95 (M1) (Notice of filing of petition to modify destination territory), filed June 16, 1977. Petitioner: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Petitioner's representative: Herbert Alan Dubin, Suite 1030, 1819 H Street NW., Washington, D.C. 20006. A Stay Decision and Order of the Commission, Review Board Number 3, dated July 15, 1976, and served July 20, 1976, (not yet certificated), found that the present and future public convenience and necessity require operation by petitioner, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, as pertinent, over irregular routes, in the transportation of *toilet preparations, buffing and polishing compounds, sweetening compounds, and foodstuffs* (except commodities in bulk, in tank vehicles), (1) from the facilities of Alberto-Culver Company at or near Melrose Park, Ill., to Piscataway, N.J., restricted to the transportation of shipments originating at the facilities of Alberto-Culver Company at or near Melrose Park, Ill.

By the instant petition, petitioner seeks to modify the destination territory of this grant of authority to read as follows: (1) from the facilities of Alberto-Culver Company at or near Melrose Park, Ill., to points in Union, Essex, Hudson, Bergen, and Middlesex Counties, N.J., restricted to the transportation of shipments originating at the facilities of Alberto-Culver Company at or near Melrose Park, Ill.

No. MC 140030 (Sub-No. 2) M1 (Notice of filing of petition to modify a contracting shipper), filed June 30, 1977. Petitioner: RAY KURTZ AND LINDA FARLEY, a partnership, doing business as PLASTIC EXPRESS, P.O. Box 5593, Orange, Calif. 92668. Petitioner's representative: Ray Kurtz (same address as applicant). Petitioner holds motor *contract carrier* authority in No. MC 140030 (Sub-No. 2), issued April 4, 1977, authorizing transportation over irregular routes, of *resin pellets*, from Orange, Calif., to points in Arizona, California, Colorado, Nevada, New Mexico, Oregon, Utah, and Washington, with no transportation for compensation on return except as otherwise authorized; and *materials* used in the manufacture of resin pellets, from points in Los Angeles and Orange Counties, Calif., to Orange, Calif., with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with Sterling Plastic Corp., of Orange, Calif.

By the instant petition, petitioner seeks to substitute Cosden Oil and Chemical Co., a Corporation, in lieu thereof Sterling Plastic Corp., of Orange, Calif. as contracting shipper.

Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this Federal Register notice. Such pleading shall comply with Special Rule 247(d) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

No. MC 107403 (Sub-No 993) (Republication), filed December 3, 1976, and published in Federal Register issues of December 30, 1976 and January 27, 1977, and republished this issue. Applicant: MATLACK, INC., Ten West Baltimore Ave., Lansdowne, Pa. 19050. Applicant's representative: John Nelson (same ad-

dress as applicant). An Order of the Commission, Review Board Number 1, dated June 24, 1977, and served July 15, 1977, finds that the present and future public convenience and necessity require operations by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of: *Alloys, ores and minerals* (except salt, lime, limestone, and fluorspar products) dry, in tank or hopper type vehicles, from the plant site of C–E Minerals, located at Wilmington, Del., to points in Ohio and West Virginia; that applicant is fit, willing and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to include West Virginia as a named destination point in lieu of Pennsylvania.

No. MC 113981 (Sub-No. 13) (Republication), filed December 15, 1975, and published in the FEDERAL REGISTER issue of February 12, 1976, and republished this issue. Applicant: VEGAS TRUCKING & MOVING, INC., 2853 Cedar Street, Las Vegas, Nev. 89104. Applicant's representative: William J. Lippman, 1819 H Street NW., Washington, D.C. 20006. An order of the Commission, Division 1, acting as an Appellate Division, dated July 5, 1977, and served July 15, 1977, finds that the present and future public convenience and necessity require operations by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over regular and irregular routes in the transportation of: (A) Regular routes: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, petroleum products in bulk, and commodities requiring special equipment), serving the mine operated by Tenneco Oil Co., located at or near Ryan, Calif., the mill operated by Tenneco Oil Co., located in Nye County, Nev., and the mine and mill operated by Industrial Minerals Ventures, Inc., located in Nye County, Nev., as off-route points in connection with applicant's regular route operations between Las Vegas, Nev., and Bakersfield, Calif., and (B) irregular routes: (1) *non-metallic ore concentrates*, in containers, from points in Nye County, Nev., to points in California, and (2) *mining and milling equipment, materials, and supplies* from points in California to points in Nye County, Nev.; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to include "materials" in (B) (2) as an additional commodity.

No. MC 116101 (Sub-No. 2) M1 (notice of filing petition to modify restriction in certificate), filed June —, 1977. Petitioner: QUICK AIR FREIGHT, INC., Cargo Building, Port Columbus Airport, Columbus, Ohio 43219. Petitioner's representative: Russell S. Bernhard, 1625 K Street NW., Washington, D.C. 20006. Petitioner holds a motor *common carrier* certificate, No. MC 116101 (Sub-No. 2), issued February 27, 1968, authorizing transportation over irregular routes of *general commodities*, moving in express service, except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, between points in Adams, Allen, Ashland, Athens, Champaign, Clark, Clermont, Clinton, Coshocton, Crawford, Delaware, Fairfield, Fayette, Franklin, Greene, Guernsey, Hardin, Highland, Hocking, Jackson, Knox, Licking, Logan, Madison, Marion, Montgomery, Morgan, Morrow, Muskingum, Perry, Pickaway, Pike, Richland, Ross, Union, Vinton, Wayne, and Wyandot Counties, Ohio on the one hand, and, on the other, points in Illinois, Indiana, Michigan (except points in the Upper Peninsula), New York, and Pennsylvania. Restriction: The operations authorized herein are restricted to the exclusive use of one motor vehicle in the transportation of a single shipment, not weighing more than 5,000 pounds, from one consignor at one location to one consignee at one location in any one day. By the instant petition, petitioner seeks to have the restriction modified by excluding therefrom traffic having a prior or subsequent movement by aircraft.

No. MC 121589 (Sub-No. 2) (republication), filed October 1, 1976, published in the FEDERAL REGISTER issue of November 4, 1976, and republished this issue. Applicant: DUANE L. HOBSCHEIDT, doing business as N & W Transfer, P.O. Box 188, Nehawka, Nebr. 68413. Applicant's representative: Larry D. Knox, 900 Hubbell Building, Des Moines, Iowa 50309. An order of the Commission, Review Board No. 2, dated June 28, 1977, and served July 14, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over regular and irregular routes, in the transportation of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), over regular routes, (1) Between Weeping Water, Nebr., and Lincoln, Nebr., serving all intermediate points and the off-route points of Avoca, Nehawka, and Otoe, Nebr.; From Weeping Water, over Nebraska Highway 50A to junction U.S. Highway 34, thence over U.S. Highway 34 to Lincoln, and return over the same route; (2) between Weeping Water, Nebr., and Omaha, Nebr., serving all intermediate points and the off-route points of Manley, Avoca, Nehawka, Otoe, and Springfield, Nebr.: (a) from Weeping Water, over Nebraska Highway 50A to junction Nebraska Highway 1, thence over Nebraska Highway 1 to junction U.S. Highway 75, thence over U.S. Highway 75 to Omaha, and return over the same route; (b) from Weeping Water, over Nebraska Highway 50A to junction Nebraska Highway 31, thence over Nebraska Highway 31 to Omaha, and return over the same route; and (c) from Weeping Water, over Nebraska Highway 50A to junction U.S. Highway 34, thence over U.S. Highway 34 to junction U.S. Highway 75, thence over U.S. Highway 75 to Omaha, and return over the same route;

(3) Between Weeping Water, Nebr., and Auburn, Nebr., serving all intermediate points and the off-route points of Cook, Talmage, Unadilla, Nehawka, Avoca, and Palmyra, Nebr.: (a) From Weeping Water, over Nebraska Highway 50A to junction U.S. Highway 34, thence over U.S. Highway 34 to junction Nebraska Highway 50, thence over Nebraska Highway 50 to Syracuse, Nebr., thence over Nebraska Highway 2 to Nebraska City, Nebr., thence over U.S. Highway 75 to Auburn, and return over the same route; (b) from Weeping Water, Nebr., over Nebraska Highway 50A to junction U.S. Highway 34 thence over U.S. Highway 34 to junction Nebraska Highway 50, thence over Nebraska Highway 50 to junction U.S. Highway 136, thence over U.S. Highway 136 to Auburn, and return over the same route; and (c) from Weeping Water, over Nebraska Highway 50A to junction U.S. Highway 34, thence over U.S. Highway 34 to junction U.S. Highway 77, thence over U.S. Highway 77 to junction Nebraska Highway 2, thence over Nebraska Highway 2 to junction U.S. Highway 75, thence over U.S. Highway 75 to Auburn, and return over the same route; (4) between Omaha, Nebr., and Nebraska City Nebr., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving no intermediate points: From Omaha, over U.S. Highway 75 to Nebraska City, and return over the same route; (5) between Omaha, Nebr., and Lincoln, Nebr., as an alternate route for operating convenience only in connection with carrier's otherwise authorized regular-route operations, serving no intermediate points: From Omaha, over Interstate Highway 80 to Lincoln, and return over the same route; (6) between Weeping Water, Nebr., and Louisville, Nebr., serving all intermediate points, and the off-route points of Cedar Creek and South Bend, Nebr.: From Weeping Water, over Nebraska Highway 50 to Louisville, and return over the same route; and, over irregular routes, (1) between Omaha, Nebr., and points in Dodge, Washington, Saunders, Douglas, Sarpy, Lancaster, Cass, Otoe, Gage, Johnson, Pawnee, Nemaha, and Richardson Counties, Nebr., and those portions of Butler, Seward, and Saline Counties, Nebr., east of Nebraska Highway 15; and (2) between points described in the irregular-route authority in (1) above, on the one hand, and, on the other, points in Nebraska; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the modification in the territorial description in the irregular route section of applicant's grant of authority.

No. MC 139493 (Sub-No. 2) (republication), filed May 7, 1976, published in the FEDERAL REGISTER, issue of June 10, 1976, and republished this issue. Applicant: LESCO TRANSPORTATION CO., INC., 7540 LBJ Freeway, Dallas, Tex. 75240. Applicant's representative: Chandler L. van Orman, 704 Southern Building, Washington, D.C. 20005. An order of the Commission, Division 1, dated July 1, 1977, and served July 14, 1977, orders that K. L. Breeden & Sons, Inc. (Terrell, Tex.), be substituted as applicant in No. MC 139493 (Sub-No. 2) in lieu of Lesco Transportation Co., Inc., and finds that the present and future public convenience and necessity require operation by substituted applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *iron and steel scrap*, from points in Arkansas, Louisiana, Mississippi, and Oklahoma, to the facilities of T & N Lone Star Warehouse Co. at Lone Star, Tex., restricted to traffic originating at the named origins and destined to the indicated destination; that substituted applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the grant of common carrier authority to substituted applicant in lieu of contract carrier authority.

No. MC 141484 (republication), filed October 29, 1975, published in the FEDERAL REGISTER issue of December 24, 1975, and republished this issue. Applicant: HARRY L. ROTHSTEIN, 40 Poplar Street, P.O. Box 1386, Scranton, Pa. 18501. Applicant's representative: Richard M. Goldberg, 700 United Penn Bank Building, Wilkes-Barre, Pa. 18701. An order of the Commission, Division 1, acting as an Appellate Division, dated June 30, 1977, and served July 13, 1977, finds on reconsideration that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *general commodities* (except motor vehicles, articles of unusual value, household goods as defined by the Commission, classes A and B explosives, commodities in bulk, and commodities requiring special equipment), from the facilities of Distribution East, located at or near Scranton, Pa., to points in Pennsylvania and New York (except Binghamton, Endicott, Johnson City, Elmira, and Waverly, N.Y.); that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the grant of common carrier authority in lieu of contract carrier authority.

MOTOR CARRIER, BROKER, WATER CARRIER, AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 200 (Sub-No. 291), filed June 16, 1977. Applicant: RISS INTERNATIONAL CORP., 903 Grand Avenue, Kansas City, Mo. 64106. Applicant's representative: Ivan E. Moody, 903 Grand Avenue, Kansas City, Mo. 64106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between the plant sites and warehouse facilities of Eli Lilly & Co., located at Clinton and Lafayette, Ind., on the one hand, and, on the other, points in the states of Colorado, Connecticut, Delaware, Illinois, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Virginia, West Virginia, and District of Columbia. Restricted to freight originating or destined to the plant site and warehouse facilities of Eli Lilly & Co. in Clinton and Lafayette, Ind.

NOTE.—If a hearing is deemed necessary the applicant requests it be held at Kansas City, Mo., or Chicago, Ill.

No. MC 2860 (Sub-No. 160), filed June 10, 1977. Applicant: NATIONAL FREIGHT, INC., 71 West Park Avenue, Vineland, N.J. 08360. Applicant's representative: John P. Tucker, Jr., 1400 Candler Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers* of less than one gallon capacity, from the manufacturing and warehouse facilities of Midland Glass Co., Inc., located at or near Warner Robins, Ga., to the facilities of Anheuser-Busch, Inc., at or near Williamsburg, Va.

NOTE.—If a hearing is deemed necessary applicant requests that it be held at Philadelphia, Pa.; Atlanta, Ga.; or Washington, D.C. Common control may be involved

No. MC2860 (Sub-No. 162), filed June 13, 1977. Applicant: NATIONAL FREIGHT, INC., 71 West Park Avenue, Vineland, N.J. 08360. Applicant's representative: W. Randall Tye, 1400 Candler Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt in packages, pepper in packages, materials and supplies* used in the agricultural, water treatment, food processing, wholesale grocery, and institutional supply industries in mixed shipments with salt in packages, from the facilities of Morton Salt Co., Division of Morton-Norwich Products, Inc., located at or near Silver Springs (Wyoming County), N.Y., to points in Maine, New Hampshire, Massachusetts, Vermont, Rhode Island, and Connecticut

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Buffalo, N.Y., Rochester, N.Y., or Washington, D.C.

No. MC 2960 (Sub-No. 10), filed June 13, 1977. Applicant: ENGLAND TRANSPORTATION CO. OF TEXAS, a corporation, 2301 McKinney Street, Houston, Tex. 77023. Applicant's representative: E. Larry Wells, P.O. Box 45538, Suite 1125, Exchange Park, Dallas, Tex. 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over ir-

regular routes, transporting: *Electronic equipment, materials and supplies*, from Dallas, Fort Worth, and Mineral Wells, Tex., and their respective commercial zones, to Houston, Tex., restricted to traffic having a subsequent movement by water.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Dallas or Houston, Tex.

No. MC 4483 (Sub-No. 22), filed June 13, 1977. Applicant: MONSON DRAY LINE, INC., Route 1, Red Wing, Minn. 55066. Applicant's representative: Richard L. Gill, 332 Hamm Building, St. Paul, Minn. 55102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Beverages*, carbonated, flavored, and phosphated and *bottling plant supplies*, between points in Minnesota, Wisconsin, South Dakota, and North Dakota.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at St. Paul, Minn.

No. MC 5227 (Sub-No. 27), filed June 13, 1977. Applicant: ECKLEY TRUCKING, INC., P.O. Box 201, Mead, Nebr. 68041. Applicant's representative: Gailyn L. Larsen, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers and parts thereof, and equipment, materials, and supplies used in the manufacture, production and distribution thereof*, between the plantsite and storage facilities of Tote Systems, Division of Hoover Ball and Bearing Co., located at or near Dyersburg, Tenn., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Memphis, Tenn., or Lincoln Nebr.

No. MC-5470 (Sub-No. 125), filed June 16, 1977. Applicant: TAJON INC., R.D. 5, Mercer, Pa. 16137. Applicant's representative: Donald E. Cross, 918–16th Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metals*, in dump vehicles, from points in Michigan to points in Indiana, Kentucky, Maryland, New York, Ohio, Pennsylvania and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Washington, D.C., or Cincinnati, Ohio.

No. MC 11207 (Sub-No. 394), filed June 15, 1977. Applicant: DEATON, INC., 317 Avenue W, P.O. Box 938, Birmingham, Ala. 35201. Applicant's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Charcoal briquetts and charcoal pellets*, from Pachuta, Mississippi to points in Alabama, Florida, Georgia, South Carolina and Tennessee.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Meridian, Miss., or Jackson, Miss.

No. MC 13134 (Sub-No. 46), filed June 20, 1977. Applicant: Grant Trucking, Inc., P.O. Box 256, Oak Hill, Ohio 45656. Applicant's representative: John P. McMahon, Suite 1800, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes in the transportation of, roofing, building and insulating materials (except iron and steel articles and commodities in bulk), from the plantsite and warehouse facilities of Certain-Teed Corp., located in Erie County, Ohio, to points in Kentucky, West Virginia and points in Pennsylvania on and west of U.S. Highway 219.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Columbus, Ohio or Washington, D.C.

No. MC 21866 (Sub-No. 88), filed June 20, 1977. Applicant: West Motor Freight, Inc., 740 S. Reading Ave., Boyertown, Pa. 19512. Applicant's representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Electric storage batteries, junk batteries*, and *materials* and *supplies* used in the manufacture or distribution of electric storage batteries (except commodities in bulk), between the facilities of General Battery Corporation located at or near City of Industry, California, on the one hand, and on the other, points in Arizona.

NOTE.—If a hearing is deemed necessary the applicant requests that it be held at either Washington, D.C. or Philadelphia, Pa.

No. MC 25869 (Sub-No. 134), filed June 10, 1977. Applicant: NOLTE BROS. TRUCK LINE, INC., 6217 Gilmore Avenue, P.O. Box 7184, South Omaha Station, Omaha, Nebr. 68107. Applicant's representative: Donald Stern, Suite 530, Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 107993 (Sub-No. 56), filed June 16, 1977. Applicant: J. J. WILLIS TRUCKING CO., a corporation, P.O. Box 5328, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same address as applicant). Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: Fireplace air heaters and ventilators combined, iron, parts and accessories for fireplace air heaters and ventilators, from Fullerton, Calif., to points in the United States in and west of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Los Angeles, Calif., or Washington, D.C.

No. MC 108341 (Sub-No. 63), filed June 20, 1977. Applicant: MOSS TRUCKING COMPANY, INC., 3027 N. Tryon St., P.O. Box 8409, Charlotte, N.C. 28208. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Air pollution, heating and cooling equipment and parts and accessories* for such commodities, from the plant site and facilities of the Fuller Company, located at Houston, Tex., to points in Alabama, Connecticut, Delaware, District of Columbia, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant does not specify a location.

No. MC 108676 (Sub-No. 105), filed June 8, 1977. Applicant: A. J. METLER HAULING & RIGGING, INC., 117 Chicamauga Avenue, Knoxville, Tennessee 37917. Applicant's representative: Louis J. Amato, P.O. Box E, Bowling Green, Kentucky 42101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting, cooling towers, and accessories, materials, and supplies for cooling towers (except commodities in bulk), from the facilities of E. D. Goodfellow, Inc., at Tulsa, Oklahoma, to points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests that the hearing be held in Dallas, Texas, or Nashville, Tennessee.

No. MC 111231 (Sub-No. 216), filed June 13, 1977. Applicant: JONES TRUCK LINES, INC., 610 East Emma Avenue, Springdale, Ariz. 72764. Applicant's representative: Don A. Smith, P.O. Box 43, Fort Smith, Ariz. 72902. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from points in Benton and Washington Counties, Arkansas, to points in Louisiana, and Mississippi, and points in Tennessee on and west of Interstate Highway 24, restricted to the transportation of shipments originating at the above-specified origins.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Fort Smith, Ark. or New Orleans, La.

No. MC 111231 (Sub-No. 217), filed June 17, 1977. Applicant: JONES TRUCK LINES, INC., 610 East Emma Avenue, Springdale, Arkansas 72764. Applicant's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe and fittings* from Tulsa, Oklahoma to points in Arkansas, Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, New York, North Carolina, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, and Wisconsin.

NOTE.—Applicant is presently authorized to provide the service sought, except to New York and Ohio, by tacking at Siloam Springs or Van Buren, Arkansas or Oklahoma City, Oklahoma. This application seeks to eliminate these gateways. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Tulsa, Oklahoma or Little Rock, Arkansas.

No. MC 111310 (Sub-No. 25), filed June 15, 1977. Applicant: BEER TRANSIT, INC., P.O. Box 352, Black River Falls, Wisconsin 54615. Applicant's representative: Wayne W. Wilson, 329 W. Wilson St., P.O. Box 8004, Madison, Wisconsin 53708. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages and related advertising premiums and materials and dispensing equipment* when shipped therewith from Detroit, Michigan to points in Minnesota and to Menomonie, Hudson, Chippewa Falls, LaCrosse, and Eau Claire, Wisconsin; (2) *Rejected shipments and empty malt beverage containers* from points in Minnesota and Hudson, Menomonie, Chippewa Falls, LaCrosse, and Eau Claire, Wisconsin to Detroit, Michigan.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Madison or Black River Falls, Wisc.

No. MC 111401 (Sub-No. 491), filed June 15, 1977. Applicant: GROENDYKE TRANSPORT, INC., 2510 Rock Island Boulevard, Post Office Box 632, Enid, Oklahoma 73701. Applicant's representative: Alvin L. Hamilton, 2510 Rock Island Boulevard, Post Office Box 632, Enid, Oklahoma 73701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous Ammonia*, in bulk, in tank vehicles, from the plantsite of Farmland Industries, Inc. at Farmland (Grant Parish), Louisiana to points in Texas located east of U.S. Highway 281.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New Orleans, Louisiana or Kansas City, Missouri.

No. MC 111496 (Sub-No. 23), filed June 13, 1977. Applicant: TWIN CITY FREIGHT, INC., 2550 Long Lake Road, Roseville, Minnesota 55113. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, North Dakota 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) Between Wahpeton, North Dakota and Hutchinson, Minnesota; and (2) From Hutchinson, Minnesota to Minneapolis and St. Paul, Minnesota, restricted in (1) and (2) above to the transportation of traffic originating at or destined to plant sites, storage, or other facilities of Minnesota Mining and Manufacturing Company (3M Company) at the above named points, restricted against tacking of the authority sought in (1) with that sought in (2) above; and further restricted against tacking of the authority sought in (1) and (2) above with any other authority held by applicant.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Minneapolis Minnesota.

No. MC 111729 (Sub-No. 707), filed June 14, 1977. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General Commodities* (except articles of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment); (1) between the airports at Bellingham, Kenewick, Moses Lake, Pasco, Pullman, Richland, Seattle, Spokane, Tacoma, Walla Walla, Wenatchee and Yakima, Wash., on the one hand and, on the other, points in Washington, on traffic having a prior or subsequent movement by air; (2) Between points in Washington and Oregon, on traffic having a prior or subsequent movement by air; (3) Between Spokane, Wash. on the one hand and, on the other, points in the Counties of Adams, Asotin, Benton, Chelan, Columbia, Douglas, Ferry, Franklin, Garfield, Grant, Kittitas, Klickitat, Lincoln, Okanogan, Pend Oreille, Spokane, Stevens, Walla Walla, Whitman and Yakima, Wash., restricted against the transportation of shipments weighing in excess of 150 pounds, on traffic having a prior or subsequent movement by rail or motor vehicle.

NOTE.—Applicant holds motor contract carrier authority in MC 112750 and Sub Numbers thereunder, and therefore dual operations may be involved. Common control may be involved. If a hearing is deemed necessary, Applicant requests that it be held in Seattle, Washington or Washington, D.C.

No. MC 111729 (Sub-No. 708), filed June 20, 1977. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Proofs, cuts, copy, artwork, photographs, mechanicals and advertising material;* between Brattleboro, Vt. on the one hand and, on the other, Hartford and Plainfield, Conn.; Amherst, Boston, Holyoke, South Hadley, and Wellesley, Mass.; New Brunswick, N.J.; Ithaca and New York, N.Y.; Bethlehem and Philadelphia, Pa.; and Cranston, R.I.

NOTE.—Applicant holds motor contract carrier authority in MC 112750 and Sub Numbers thereunder, and therefore dual operations may be involved. Common control may be involved. If a hearing is deemed necessary, Applicant requests that it be held at Washington, D.C.

No. MC 112288 (Sub-No. 15), filed June 13, 1977. Applicant: YARBROUGH TRANSFER COMPANY (a corporation), 1500 Doune Street, Winston-Salem, North Carolina 27107. Applicant's representative: Charles Ephraim, Suite 600, 1250 Connecticut Avenue, N.W., Washington, D.C. 20036, Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, which because of size or weight, require the use of special equipment, between points in North Carolina on the one hand and, on the other, points in South Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Greensboro, N.C., Charlotte, N.C. or Washington, D.C.

No. MC 113024 (Sub-No. 149), filed June 13, 1977. Applicant: ARLINGTON J. WILLIAMS, INC., 1398 South Du Pont Highway, Smyrna, Del. 19711. Applicant's representative: Samuel W. Earnshaw, 833 Washington Building, Washington, D.C. 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Synthetic fibre*, in bales, from Front Royal, Va., to Dover, Del., under a continuing contract, or contracts, with International Playtex, Inc.

NOTE.—Applicant holds motor common carrier authority in No. MC 135046 (Sub-No. 3) and other subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 113434 (Sub-No. 79), filed June 15, 1977. Applicant: GRA-BELL TRUCK LINE, INC., 679 Lincoln Avenue, Holland, Michigan 49423. Applicant's representative: Wilhelmina Boersma, 1600 First Federal Building, Detroit, Michigan 48226. NOTE.—The purpose of this republication is to amend the applicant's request of authority in this proceeding. If a hearing is deemed necessary, the applicant requests it be held at Richmond, Va.

FINANCE APPLICATIONS NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, or rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-13245. (Correction) HOLLEBRAND TRUCKING, INC.—Purchase—Fred Carpenter, an individual published in the June 30, 1977, issue of the FEDERAL REGISTER, on page 33430. Prior notice should have read as follows: *From port facilities in New York and in New Jersey within the New York, N.Y. harbor area as defined by the Commission in Ex Parte No. 140, Determination of the Limits of New York Harbor and Harbor Contiguous Thereto, to Scranton, Pa.*

No. MC-F-13272. Authority sought for control and merger by C & S TRUCKING INC., 1983 Old Oakland Highway, San Jose, CA. 95131, of TRAILS TRUCKING INC., 1983 Old Oakland Highway, San Jose, CA., 95131, and for acquisition by Gerald V. Smith, also of San Jose, CA. 95131, of control of such rights through the transaction. Applicants' attorney: William J. Monheim, Registered Practitioner, 15942 Whittier Blvd., P.O. Box 1756, Whittier, CA., 90609. Operating rights sought to be controlled and merged: Under MC 138299 (Sub-No. 5) pending, authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: Mineral wool and mineral wool products; insulating material; insulated air duct; and products, utilized in the installation of the described commodities, from La Mirada and Union City, Calif., to points in Arizona, Idaho, Montana, Nevada, New Mexico, Oregon, Texas, Utah, Washington and Wyoming, under contract with certain-Teed Products Corporation. Under MC-138299 (Sub-No. 8) pending authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: Fiberglas materials and fiberglas products, fibrous glass; mineral wool products, fibrous glass textile materials, fibrous glass textile products and roofing materials, from Santa Clara, Calif., to points in Arizona, California, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming, and El Paso, Tex., under a continuing contract or contracts with Owens-Corning Fiberglas Corporation.

Vendee is authorized to operate as a common carrier in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–13281. Authority sought for purchase by CAROLINA FREIGHT CARRIERS CORPORATION, d.b.a. CAROLINA FREIGHT CARRIERS CORP., P.O. Box 697, Cherryville, N.C., 28021, of a portion of the operating rights of INDIANHEAD TRUCK LINE, INC., Box 3355, St. Paul, MN., 55165, and for acquisition by C. Grier Beam, also of Cherryville, N.C., of control of the rights through the purchase. Applicant vendee's attorney: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Ave. and 13th St., NW., Washington, D.C., 20004; applicant vendor's attorney: Paul C. Gartzke, 121 West Doty Street, Madison, WI., 53703. Operating rights sought to be purchased: General commodities, with exceptions, as a common carrier, over regular routes, between Detroit, Mich., and Toledo, Oh., as more fully described in Certificate No. MC 108449 (Sub-No. 389). Vendee is authorized to operate pursuant to Certificate No. MC 2253 and subs as a common carrier in the states of Alabama, Connecticut, Delaware, the District of Columbia, Florida, Georgia, Illinois, Indiana, Kentucky, Maryland, Massachusetts, New York, New Jersey, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, West Virginia and Wisconsin. Application has not been filed for temporary authority under Section 210a(b).

NOTE.—The authority to be acquired is proposed to be subject to the following restriction: Restricted against traffic originating within the commercial zones of Detroit, Mich., Toledo, Ohio, or an intermediate point and destined to the commercial zones of Detroit, Mich., Toledo, Ohio, or an intermediate point.

No. MC–F–13283. Authority sought for purchase by MUSHROOM TRANSPORTATION CO., INC., 845 East Hunting Park Avenue, Philadelphia, PA., 19124, of the operating rights of FOUTTY FREIGHT, INC., 3128 Massilon Road, Akron, OH., 44308, and for acquisition by Robert G. Cutaiar, 2069 Winthrop Rd., Huntington Valley, Pa., 19006, Robert F. Cutaiar, 7628 Oak Lane Rd., Cheltenhan, PA., 19012, and Richard Cutaiar, Sr., 221 East St. Louis Ave., Wildwood Crest, N.J., 08260, of control of such rights through the purchase. Applicants' attorneys: A. David Millner, P.O. Box 1409, 167 Fairfield Rd., Fairfield, N.J., 07006, Richard Chenoweth, 1 Cascade Plaza, Akron, OH., 44308, and David H. Wilson, 1 Cascade Plaza, Akron, OH., 44308. Operating rights sought to be transferred: Under a certificate of Registration in Docket No. MC 121486 (Sub-No. 1), covering the transportation of General commodities, with exceptions, as a common carrier, over irregular routes, from Cleveland, Ohio to all points in Ohio, from all points in Ohio to Cleveland, Ohio. Approval of the transaction will not result in dual operations or splitting of operating authority. Minor insignificant duplication of authority will result. Vendee is authorized to operate as a common carrier in New York, New Jersey, Pennsylvania, Maryland, and Ohio. Application has not been filed for temporary authority under section 210a(b).

NOTE: MC–???? is a directly related matter.

No. MC–F–13284. Authority sought for purchase by MID-AMERICA EXPRESS, INC., P.O. Box 9, Nebraska City, NB., 68410, of a portion of the operating rights of SOONER EXPRESS, INC., P.O. Box 219, Madill, OK., 73446, and for acquisition by Mark Wurtele, and Fred A. Glover, both of P.O. Box 9, Nebraska City, NB., 68410, of control of such rights through the purchase. Applicants' attorney: Frederick J. Coffman, 521 South 14th Street, P.O. Box 81849, Lincoln, NB., 68501. Operating rights sought to be transferred: Meats and meat by products, and articles distributed by meat packinghouses, as a common carrier irregular routes from St. Joseph, MO., to points in Connecticut, Delaware, Massachusetts, Maryland, Maine, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia, restricted to shipments originating at the facilities of Armour & Co. at or near St. Joseph, Mo.; Meat and meat products, and meat by products and articles distributed by meat packinghouses from Omaha, Nebraska, to Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, Vermont, West Virginia, and the District of Columbia, with the same restrictions. Vendee is authorized to operate as a common carrier in Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–13286. Authority sought for purchase by HAULMARK TRANSFER, INC., P.O. Box 343 Stenersen Lane, Cockeysville, Md., 21030, of the operating rights of LAUREL TRANSPORT CORPORATION, 8408 Elliston Avenue, Philadelphia, Pa., 19118, and for acquisition by F. V. Schmidt and H. F. Schmidt, also of Cockeysville, Md., of control of such rights through the purchase. Applicants' attorneys: William J. Little, Esq., Suite 1212, W. R. Grace Bldg., 10 E. Baltimore St., Baltimore, Md., 21202 and Ira G. Megdal, Esq., 499 Cooper Landing Road, P.O. 459–460, Cherry Hill, N.J., 08002. Operating rights sought to be transferred: General commodities, with exceptions as a common carrier over regular routes between Rio Grande, N.J., and Baltimore, Md., serving no intermediate points, and serving all points in Cape May County, N.J., as off-route points, with restrictions; General commodities, with exceptions as a common carrier over irregular routes between Philadelphia, Pa., on the one hand, and, on the other, points in Cape May County, N.J., between Atlantic City, Linwood, Somers Point, Sea Island City, Strathmere, Ventnor, Margate, and Lengport, N.J. Vendee is authorized to operate as a common carrier in Maryland, the District of Columbia, New Jersey, New York, Pennsylvania, Virginia, West Virginia, and Delaware. Application has been filed for temporary authority under section 210a(b).

No. MC–F–13287. Authority sought for purchase by PENNSYLVANIA TRUCK LINES, INC., 49th Street and Parkside Avenue, Philadelphia, Pa., 19101, of the operating rights of JERSEY CENTRAL TRANSPORTATION COMPANY, Six Penn Center Plaza, Philadelphia, Pa., 19104. Vendee is authorized to operate as a common carrier in Vermont, Maine, Massachusetts, Rhode Island, Connecticut, New York, New Jersey and Pennsylvania. Application has been filed for temporary authority under section 210a(b).

NOTE.—MC 2770 (Sub-No. 20) is a directly related matter.

No. MC–F–13289. Authority sought for control by D.C. JOINT VENTURE, 9200 Talbot Avenue, Silver Spring, Md., 20910, of SKYLINE TRANSPORT, INC., 1910 Russell Street, Baltimore, Md., 21230 and for acquisition by Bernard Dreskin, 22 Rock Spring Ave., W. Orange, N.J., 07052, Richard Dreskin, 2 Sparrow Drive, Livingston, N.J., 07039, Eli W. Fleming, 10002 Branch View Ct., Silver Spring, Md., 20903, Alfred Gold, 13815 Franklin Ave., Flushing, N.Y., 11355, Leo Katzman, 64–24 78th Street, Middle Village, N.Y., 11379, Paul Kopelan, 348 Washington St., Glen Ridge, N.J., 07028, Arnold Siegel, 33 Stone Henge Circle, Baltimore, Md., 21208, and Gordon L. Westkamp, 8406 Loch Raven Blvd., Towson, Md., 21204, of control of such rights through the transaction. Applicants' attorneys: Lawrence E. Lindeman, 425 13th St., N.W., Suite 1032, Washington, D.C., 20004, H. Neil Garson, Fairfax Circle Building, 3251 Old Lee Highway, Fairfax, Va., 22030. Operating rights sought to be controlled: Molasses, in bulk, in tank vehicles, as a common carrier over irregular routes from Baltimore, Maryland, to points in Delaware, North Carolina, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia; liquid and invert sugar, in bulk, in tank vehicles, from Baltimore, Maryland, to points in New Jersey, Delaware, Pennsylvania, Ohio, and North Carolina; Rayon, silk, textiles, chemicals, raw materials, and machinery used in the manufacture of piece goods, as a common carrier over regular routes between Paterson, N.J., and Rocky Mount, N.C., serving the intermediate points of Philadelphia, Pa., Wilmington, Del., Baltimore, Md., Richmond and Waynesboro, Va., and Washington D.C., between Paterson, N.J., and New York, N.Y., serving the intermediate points of Passaic and Newark, N.J.; Such commodities, as are specified above, as a common carrier over regular routes and irregular routes between Nanuet, N.Y., and Paterson, N.J., serving no intermediate points; liquid sugar, invert sugar, corn sirup, dextrose, and blends thereof, in bulk, as a common carrier over irregular routes from Baltimore, Maryland, points in Maryland, and Harland, Hazard, and Pikeville, Ky., with restriction; corn products, in bulk, from the plant site and storage facilities of A. E. Staley Manufacturing Company at or near Morrisville, Penna., to points in Connecticut, Delaware, Florida, Georgia, Indiana, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia and the District of Columbia, restricted to the transportation of traffic originating at the named plant site and storage facilities and destined to the named destination States; corn products, bulk (except corn oil, in bulk), from Dayton, Ohio, to points in Alabama, Connecticut, Delaware, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin and the District of Columbia, and Florida, restricted to the transportation of traffic originating at the plant site and warehouse facilities of Cargill, Incorporated, and Car-Mi, Incorporated, at Dayton, Ohio; maple sugar, in bulk

(1) From Ports of entry on the International Boundary line between the United States and Canada at or near Highgate Springs and Derby, Vt., to Baltimore, Md., Brundidge, Ala., Terre Haute, Ind., and Chicago, Ill.; and from Baltimore, Md., to Brundidge, Ala., Terre Haute, Ind., (2) and Chicago, Ill.; liquid Dextrose, Corn Syrup and Blends thereof, in bulk, from the facilities of Skyline Terminals, Inc. at Baltimore, Md. to Dover, Newark, and Wilmington, Del.; Altoona, Biglerville, Chambersburg, Denver, Gardners, Harrisburg, Lancaster, Norristown, Philadelphia, Reading, Sayre, Shippensburg, Williamsport, and York, Pa.; Atlantic City, Bridgeton, Cedarville, Ocean City, Patterson, and Vineland, N.J.; Charlottesville, Cheriton, Harrisonburg, Parksley, Petersburg, and Richmond, Va. and the District of Columbia; liquid commodities (except asphalt, asphaltic products, paving and surfacing tar, and road oils), in bulk, in tank vericles from the facilities of Skyline Terminals, Inc., at Baltimore, Md., to points in Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania, North Carolina, Virginia, West Virginia, and the District of Columbia, restricted to the transportation of shipments (a) having a prior movement by rail, water or motor carrier and combinations thereof, and (b) destined to the above named points; maple sugar, in bulk, in tank vehicles from Newport, Vermont, to Baltimore, Md.; Brundidge, Ala.; and Terre Haute, Ind.; products derived from Corn and blends containing products derived from corn, in bulk, in tank vehicles from the Clinton Corn Processing Company plantsite located at Montezuma, N.Y., to points in the United States (except Alaska and Hawaii). D.C. JOINT VENTURE holds no authority from this Commission. However, the stockholders of D.C. JOINT VENTURE is also the stockholders of BALTIMORE TANK LINES, INC., a motor common carrier holding certificate No. MC 118899, and is authorized to operate in Virginia, Maryland, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–13290. Authority sought for purchase by KINGSWAY TRANSPORTS, INC., 123 Rexdale Boulevard, Rexdale, Ontario, Canada M9W 1P3, of a portion of the operating rights of QUEENSWAY, INC., 105 North Keyser Avenue, Old Forge, Pa. 18518, and for acquisition by KINGSWAY TRANSPORTS LIMITED, also of 123 Rexdale Boulevard, Rexdale, Ontario, Canada M9W 1P3, of control of the rights through the purchase. Applicants' attorney and representative: S. Harrison Kahn, Suite 733 Investment Building, Washington, D.C. 20005 (vendee), and Joseph F. Hoary, 121 South Main Street, Taylor, PA. 18517 (vendor). Operating rights sought to be purchase: General commodities, with exceptions, as a common carrier, over regular routes between Rochester, New York and New York New York, with service to all intermediate points and certain off-route points, with other limited restrictions and between Buffalo, New York and Rochester, New York, via Lockport, New York, serving all intermediate points and certain off-route points. KINGSWAY TRANSPORTS, INC., holds no authority from this Commission. However, KINGSWAY TRANSPORTS LIMITED, owns 100% of the stock of KINGSWAY TRANSPORT, INC., and under MC–112908 and subs thereunder is authorized to operate as a common carrier within Canada, and between Canada and the United States. It serves the international gateways of Windsor, Ontario and Detroit, Michigan; Niagara Falls, Ontario, and Erie, Ontario, and Niagara Falls, New York, and Buffalo, New York respectively; and Champlain, New York, through the Province of Quebec, Canada. Application has not been filed for temporary authority under section 210a(b).

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS NOTICE

The following operating rights application(s) are filed in connection with pending finance applications under Section 5(2) of the Interstate Commerce Act, or see tacking and/or gateway elimination in connection with transfer applications under Section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 247(d) of the Commission's *General Rules of Practice* (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

Docket No. MC 2770 (Sub-No. 20), filed July 22, 1977. Applicant: SANBORN'S MOTOR EXPRESS, INC., 550 Forest Ave., Portland, Maine 04101. Applicant's Representative: Mary E. Kelley, 11 Riverside Ave., Medford, Mass. 02155. Authority sought to operate as a *common carrier* by motor vehicle, over regular routes, transporting *general commodities* (except those of unusual value, and except dangerous explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment), serving points in Connecticut as intermediate and off-route points to Applicant's existing regular routes.

NOTE.—The purpose of this application is to convert a Certificate of Registration and is a matter directly related to a Section 5 (2) proceeding in MC–F–13288. If a hearing is deemed necessary, Applicant requests it be held at either Boston, Mass. or Hartford, Connecticut. Notice of the application filing in MC–F–13288 appears in a prior section of this FEDERAL REGISTER issue.

No. MC 127602 (Sub-No. 14), filed March 15, 1977. Applicant: DENVER-MIDWEST MOTOR FREIGHT, INC., 5555 E. 58th Avenue, Commerce City, Colo. 80022. Applicant's representative: Earl H. Scudder, Jr., P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: (1) over regular routes, *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Denver, Colo., and Phoenix, Ariz. over the described route and return over the same route, from Denver, Colo., via Interstate Highway 70 to junction U.S. Highway 50, thence over U.S. Highway 50 to Montrase, Colo., thence over U.S. Highway 550, to Durango, Colo., thence over U.S. Highway 160 to junction U.S. Highway 89, thence over U.S. Highway 89 to Flagstaff, Ariz., thence over Interstate Highway 17 to Phoenix, Ariz., and return over the same route, serving no intermediate points; and (2) over irregular routes, *General commodities* (except livestock, household goods as defined by the Commission, and commodities of unusual value), between Boulder, Colo., and points within 50 miles thereof, on the one hand, and, on the other, points in Colorado.

NOTE.—This is a matter directly related to a finance proceeding in MC–F–13162 which appeared in the FEDERAL REGISTER issue of March 31, 1977. If a hearing is deemed necessary, applicant requests it be held at either Phoenix, Ariz. or Denver, Colo.

ABANDONMENT APPLICATIONS

NOTICE OF FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act that orders have been entered in the following abandonment applications which are administratively final and which found that subject to conditions the present and future public convenience and necessity permit abandonment.

A Certificate of Abandonment will be issued to the applicant carriers 30 days after this FEDERAL REGISTER publication unless the instructions set forth in the notices are followed.

[Docket No. AB–33 (Sub-No. 16)]

UNION PACIFIC RAILROAD COMPANY ABANDONMENT OF PORTION OF ONTARIO BRANCH IN WASATCH COUNTY, UTAH

NOTICE OF FINDINGS

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by an Certificate and Order dated July 21, 1977, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *New Orleans Union Passenger Terminal Case*, 231 I.C.C. 271, and those provided pursuant to Section 405 of the Rail Passenger Service Act (45 U.S.C. 565), the present and future public convenience and necessity permit the abandonment by the Union Pacific Railroad Company of that portion of its line of railroad known as the Ontario Branch, extending from milepost 2.45 near Phoston, Utah, southerly to milepost 5.43 near Keetley, Utah, a distance of 2.98 miles located in Wasatch County, Utah. A certificate of public convenience and necessity permitting abandonment was issued to the Union Pacific Railroad Company. Since no investigation was instituted, the requirement of Section 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed, shall contain information required pursuant to Section 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 45 days from the date of this publication.

[Docket No. AB–36 (Sub-No. 3)]

OREGON SHORT LINE RAILROAD COMPANY ABANDONMENT AND ABANDONMENT OF OPERATION—BY UNION PACIFIC RAILROAD COMPANY OF OREGON'S WEST BELT BRANCH BETWEEN MENAN AND EDMONDS, IN JEFFERSON AND MADISON COUNTIES, IDAHO

NOTICE OF FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on June 16, 1977, a finding, which is administratively final, was made by the Commisssion, Commissioner MacFarland stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, and for public use as set forth in said order, the present and future public convenience and necessity permit the abandonment by the Oregon Short Line Railroad Company, and abandonment of operation by Union Pacific Railroad Company, of a portion of the West Belt Branch of Oregon Short Line Railroad Company extending from railroad milepost 16.80 near Menan, Idaho, in a northerly direction to railroad milepost 26.48 near Edmonds, Idaho, a distance of 15.68 miles, in Jefferson and Madison Counties, Idaho. A certificate of abandonment will be issued to the Oregon Short Line Railroad Company and the Union Pacific Railroad Company based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instruction contained in the above-referenced order.

MOTOR CARRIER INTRASTATE APPLICATION(S)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's *General Rules of Practice* (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

Kansas Docket No. 108,833M, Route No. 12332, filed June 29, 1977. Applicant: LIBERAL MOBILE HOMES, INC., East Highway 54, Liberal, Kans. 67901. Applicant's representative: E. Richard Brewster, P.O. Box 5186, Topeka, Kans. 66605. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Mobile homes*, between existing authority under Route 12332, (Starting at a point which is the southwest corner of the State of Kansas; then North along the Kansas-Colorado border to a point which is ten miles north of State Highway No. 96; then east to a point which is ten miles Northeast of Nes City, Kans.; then south staying ten miles East of State Highway No. 283; to a point which is the Kansas-Oklahoma border to a point which was the beginning), on the one hand, and all points and places in the State of Kansas, on the other. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place set for Thursday, September 8, 1977, commencing at 10 a.m., at the State Office Building, 4th Floor, Topeka, Kan. Requests for procedural information should be addressed to the Kansas State Corporation Commission, State Office Building, Topeka, Kans. 66612, and should not be directed to the Interstate Commerce Commission.

Nebraska Docket No. M–12555, filed July 19, 1977. Applicant: DOYT TOPHAM AND BETTY TOPHAM, 51 North Walnut, Red Cloud, Nebr. 68970. Applicant's representative: Duane L. Stromer, 305 N. Hastings Avenue, P.O. Box 165, Hastings, Nebr. 68901. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: *Commodities generally* (except those requiring special equipment, other than refigeration), over regular routes, from Red Cloud to Hastings, Nebr. via U.S. Highway 281, serving the intermediate points of Cowles, Blue Hill and Ayr, Nebr. and the off-route point of Guide Rock, Nebr. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Nebraska Public Service Commission, 301 Centennial Mall, P.O. Box 94927, Lincoln, Nebr. 68509 and should not be directed to the Interstate Commerce Commission.

Wisconsin Docket No. CC–950 (Rev. App. No. 1), filed July 18, 1977. Applicant: JOHN PULVERMACHER, doing business as BELLEVILLE TRUCK LINE, Route 1, Cross Plains, Wis. 53528. Applicant's representative: Rolfe E. Hanson, 121 West Doty Street, Madison, Wis. 53703. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of property over Wisconsin Highway 69 between New Glarus and Monroe, Wis., including service at all intermediate points. Intrastate, interstate and foreign commerce authority sought to serve all points in connection with authority applicant holds over U.S. Highway 18 between Madison and Verona, Wis. and over Wisconsin Highway 69 between Verona and New Glarus, Wis. The purpose of this application is to authorize service between Monticello and Monroe, Wis., on the one hand, and points presently authorized to be served on the other hand, and between Monticello and Monroe, Wis. Hearing: Date, time and place scheduled for September 26, 1977 at 10 a.m. in the County Courthouse, Monroe, Wis., and continuing if necessary September 27th and 28th 1977 at 9:30 a.m. in Room 426, Hill Farms State Office Bldg., 4802 Sheboyan Avenue, Madison, Wis. 53705. Requests for procedural information should be addressed to the Wisconsin Public Service Commission, 432 Hill Farms State Office Building, Madison, Wis. 53702 and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

[AB 18 (Sub-No. 24)]

CHESAPEAKE AND OHIO RAILWAY CO.

Abandonment Within the City Limits of Cincinnati, Hamilton County, Ohio

JULY 26, 1977.

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment by the Chesapeake and Ohio Railway Company of 1.57 miles of its Cheviot Subdivision at Cincinnati, Hamilton Co., Ohio, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that environmental impacts would be minimal since no diversion to motor carrier would result, as all traffic on the line to be abandoned is bridge traffic. Rerouting of bridge traffic should not significantly increase fuel consumption, air pollution, or noise levels. There are no indications of developmental plans relating to continued direct rail access over the line and, therefore, the abandonment should not adversely affect rural and community development.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C., 20423, on or before September 6, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

H. G. HOMME, Jr.,
Acting Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

JULY 29, 1977.

The following letter-notices of proposals to elminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination* Rules (49 CFR 1065), and notice there to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before August 15, 1977. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 1872 (Sub-Nos. E18, E20, E21, E22, E23, E24, E25, E26, E27, E28, E29) published October 28, 1975 (Sub-Nos. E6, E7, E9, E13, 14, E19, E30, E31, E32, E33) published July 6, 1977, (Sub-Nos. E5, E8) published July 7, 1977, (Sub-Nos. E3, E4, E17) published July 13, 1977 and (Sub-Nos. E10, E11, E12, E15, E16) published July 20, 1977. Applicant: ASHWORTH TRANSFER, INC., 1526 S. 700 West St., Salt Lake City, Utah 87104. Applicant's representative: Richard P. Kissinger, P.O. Box 17B, Denver, Colo. 80217. Notice is hereby given that all the above authority was purchased by Noble Transport pursuant to MC-F-12573 and the docket numbers have been changed to MC-141969 (Sub-Nos. E3 through E33). The Commission's records have been so changed.

No. MC 55898 (Sub-No. E3), filed December 9, 1975. Applicant: DECATO BROS., INC., Heater Road, Lebanon, N.H. 03766. Applicant's representative: David M. Marshall, 135 State St., Suite 200, Springfield, Mass. 01103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from points in New Hampshire to points in New York, Cleveland, Ohio, Wilmington, Dela., Baltimore and Sparrows Points, Md., Scranton, Erie, Honesdale, and points in Haverford Township (Delaware County), Pa., and points in that part of Delaware County, Pa., south and east of a line beginning at the Intersection of the western and northern boundaries of Upper Darby Township, and extending southward along Darby Creek to Bishop Avenue, thence along Bishop Avenue to junction U.S. Highway 1, thence west along U.S. Highway 1 to junction Pennsylvania Highway 320, thence south along Pennsylvania Highway 320 to the corporate limits of Chester, thence west along the northern corporate limits of Chester to the easterly boundary of Upper Chichester Township, thence south along eastern boundary thereof to the southern boundary of said Township, thence west along the southern boundary of said township to the Delaware State line, thence south along the Delaware State line to the Delaware River, thence northward along the Delaware River to the city limits of Philadelphia, thence westerly along the city limits of Philadelphia to Upper Darby Township, and thence westerly along the northern boundary of Upper Darby Township to point of beginning. The purpose of this filing is to eliminate the gateways of Woodsville, Lakeport and Salmon Falls, N.H., White River Junction, Vt., and/or points in Vermont.

No MC-55898 (Sub-No. E4), filed December 9, 1975. Applicant: DECATO BROS., INC., Heater Road, Lebanon, N.H. 03766. Applicant's representative: David M. Marshall, 135 State St., Suite 200, Springfield, Mass. 01103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from points in New Hampshire to Trenton, N.H., and points in that part of New Jersey on and north of a line begining at the New Jersey-Pennsylvania State line, and extending eastward along New Jersey Highway 33, thence along New Jersey Highway 33 to the Atlantic Ocean. The purpose of this filing is to eliminate the gateway in the State of Vermont.

No. MC 61825 (Sub-No. E928), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Construction materials, machinery, mine supplies, glassware, paper products* and *hardware*, except commodities in bulk, those of unusual value, class A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, between Zanesville, Ohio, on the one hand, and, on the other, points in North Carolina and Virginia on and southeast of a line beginning at the South Carolina-North Carolina State line and extending north along U.S. Highway 301 to junction North Carolina Highway 87, to junction U.S. Highway 29, to junction Virginia Highway 43, to junction Virginia Highway 122, to junction U.S. Highway 501, to junction U.S. Highway 29, to junction U.S. Highway 60, to junction U.S. Highway 15, to junction U.S. Highway 460, and thence along U.S. Highway 460 to Norfolk, Va., at the Chesapeake Bay. The purpose of this filing is to eliminate the

gateway of Coketown, Brooke County, W. Va. and Lynchburg, Va.

No. MC 61825 (Sub-No. E929), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Construction materials, machinery, mine supplies, glassware, paper products and hardware*, except commodities in bulk, those of unusual value, Class A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, between Oil City, Pa., on the one hand, and, on the other, points in North Carolina and Virginia on and south of a line beginning at the Georgia-North Carolina-Tennessee State line and extending northeast along the North Carolina-Tennessee State line to junction U.S. Highway 421, to the Blue Ridge Parkway, to junction U.S. Highway 21, to junction North Carolina Highway 268, to junction U.S. Highway 601, to junction North Carolina Highway 103, to junction Virginia Highway 103, to junction Virginia Highway 8, to junction U.S. Highway 11, to junction U.S. Highway 460, to the Blue Ridge Parkway, to junction Virginia Highway 130, to junction Virginia Highway 635, to junction U.S. Highway 60, to junction Virginia Highway 26, to junction U.S. Highway 460, to junction Virginia Highway 46, to junction U.S. Highway 58, to junction U.S. Highway 301, to junction North Carolina Highway 125, to junction U.S. Highway 64, to junction North Carolina Highway 94, to junction U.S. Highway 264 to the Pamlico Sound, to the Ocracoke Inlet and thence to the Atlantic Ocean. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va., and Lynchburg, Va.

No. MC 61825 (Sub-No. E1002), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such iron and steel articles as are used as construction materials*, between points in Beaver, Butler, Clarion, Crawford, Erie, Forest, Lawrence, Mercer, Venango, and Warren Counties, Pa., and Pittsburgh, Pa., on the one hand, and, on the other, points in South Carolina. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va. (in the Weirton, W. Va. Commercial Zone), Weirton, W. Va., Clarksburg, W. Va., and Lynchburg, Va.

No. MC 61825 (Sub-No. E1003), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such iron and steel articles as are used as construction materials*, (A) Between points in Cattaraugus, Chautauqua, Erie, Genesee, Livingston, Monroe, Niagara, Orleans, and Wyoming Counties, N.Y., on the one hand, and, on the other, points in South Carolina. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va. (in the Weirton, W. Va., Commercial Zone), Clarksburg, W. Va., and Lynchburg, Va., and Weirton, W. Va.

No. MC 61825 (Sub-No. E1004), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such iron and steel articles as are used as construction materials*, (A) Between points in West Virginia on and north of West Virginia Highway 27, on the one hand, and, on the other, points in South Carolina. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va. (in the Weirton, W. Va., commercial zone), Weirton, W. Va., Clarksburg, W. Va., and Lynchburg, Va.

No. MC 61825 (Sub-No. E1005), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such iron and steel articles as are used as construction materials*, between points in Ashtabula, Carroll, Columbiana, Cuyahoga, Geauga, Jefferson, Lake, Mahoning, Portage, and Trumbull Counties, Ohio, on the one hand, and, on the other, points in South Carolina. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va. (in the Weirton, W. Va., Commercial zone) Weirton, W. Va., Clarksburg, W. Va., and Lynchburg, Va.

No. MC 61825 (Sub-No. E1006), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such iron and steel articles as are used as construction materials*, between Benwood, Glendale, McMechen, and Moundsville, W. Va., points in Ohio County, W. Va., and points in Brooke County, W. Va., south of West Virginia Highway 27, on the one hand, and, on the other, points in South Carolina on and east and south of a line beginning at the South Carolina-North Carolina State line, and extending along U.S. Highway 1 to the South Carolina-Georgia State line. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va. (in the Weirton, W. Va. Commercial zone), Weirton, W. Va., Clarksburg, W. Va., and Lynchburg, Va.

No. MC 61825 (Sub-No. E1007), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Construction materials, machinery, mine supplies, glassware, paper products* and *hardware*, except commodities in bulk, those of unusual value, Class A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, between Lynchburg, Va., on the one hand, and, on the other, points in Ashtabula, Ashland, Belmont, Carroll, Columbiana, Coshocton, Cuyahoga, Geauga, Guernsey, Harrison, Holmes, Huron, Jefferson, Knox, Lake, Licking, Lorain, Mahoning, Medina, Monroe, Morrow, Muskingum, Noble, Portage, Richland, Stark, Summit, Trumbull, Tuscarawas, and Wayne Counties, Ohio, and those points in Crawford, Delaware, Erie, Franklin and Marion Counties, Ohio within 125 miles of Wellsburg, W. Va. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va.

No. MC 61825 (Sub-No. E1008), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Construction materials, machinery, mine supplies, glassware, paper products* and *hardware*, except commodities in bulk, those of unusual value, class A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, between Lynchburg, Va., on the one hand, and, on the other, points in Allegheny, Armstrong, Beaver, Butler, Clarion, Crawford, Erie, Forest, Lawrence, Mercer, and Venango Counties, Pa., and those points in Warren County, Pa., within 125 miles of Wellsburg, W. Va. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va.

No. MC 61825 (Sub-No. E1009), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in New York on and east of a line beginning at the New York-Canadian International Boundary line and extending along New York Highway 374, thence south along New York Highway 374 to junction New York Highway 3, to junction New York Highway 30,

to junction New York Highway 8, to junction New York Highway 28, to junction New York Highway 51, to junction U.S. Highway 20, to junction New York Highway 12, to junction New York Highway 23, to junction New York Highway 26 to the New York-Pennsylvania State line, to points in Arkansas, Oklahoma and Texas on and south of a line beginning at the Tennessee-Arkansas State line and extending along Interstate Highway 40, to junction U.S. Highway 59, to junction Oklahoma Highway 9, to junction U.S. Highway 281, to junction Interstate Highway 40, to junction Oklahoma Highway 6, to junction Oklahoma Highway 152, to junction Texas Highway 152, to junction U.S. Highway 87 to the Texas-New Mexico State line. The purpose of this filing is to eliminate the gateways of Pulaski, Va., and Martinsville, Va.

No. MC 61825 (Sub-No. E1010), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in New York on and bounded by a line beginning at the New York-Canadian International Boundary line and extending along New York Highway 374, thence south along New York Highway 374 to junction New York Highway 3, to junction New York Highway 30, to junction New York Highway 8, to junction New York Highway 28, to junction New York Highway 51, to junction U.S. Highway 20, to junction New York Highway 12, to junction New York Highway 23, to junction New York Highway 26 to the New York-Pennsylvania State line, thence west along the New York-Pennsylvania State line to junction New York Highway 54 near Austinburg, Pa., to junction New York Highway 224, to junction New York Highway 13, to Lake Ontario, thence along the New York-Canadian International Boundary line to the point of beginning, to points in Arkansas, Oklahoma and Texas on and south of a line beginning at the Mississippi-Arkansas State line and extending along U.S. Highway 49, thence west along U.S. Highway 49 to junction Interstate Highway 40, to junction U.S. Highway 70 to the New Mexico-Texas State line. The purpose of this filing is to eliminate the gateway of Pulaski, Va., and Martinsville, Va.

No. MC 61825 (Sub-No. E1011), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in New York on and bounded by a line beginning at the New York-Pennsylvania State line and extending along New York Highway 54, thence north along New York Highway 54 to junction New York Highway 224, to junction New York Highway 13, to Lake Ontario, thence along the shores of Lake Ontario to New York Highway 21, to junction New York Highway 245, to junction New York Highway 408, to junction New York Highway 305, to the Pennsylvania-New York State line, thence east along the Pennsylvania-New York State line to the point of beginning, to points in Texas on and south of a line beginning at the Louisiana-Texas State line and extending along Texas Highway 125, to junction Texas Highway 11, to junction U.S. Highway 380, to junction Texas Highway 199, to junction U.S. Highway 82, to junction Texas Highway 116, to the New Mexico-Texas State line. The purpose of this filing is to eliminate the gateway of Pulaski and Martinsville, Va.

No. MC 61825 (Sub-No. E1012), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, except commodities in bulk, household goods as defined by the Commission, between points in New York on and bounded by a line beginning at Lake Ontario, and extending along New York Highway 13, thence south along New York Highway 13 to junction Interstate Highway 81, to junction New York Highway 13, to junction New York Highway 224, to junction New York Highway 54 to the New York-Pennsylvania State line, thence east along the Pennsylvania-New York State line to New York Highway 282, to junction New York Highway 17C, to junction New York Highway 38, to junction New York Highway 79, to junction New York Highway 26, to junction New York Highway 41, to junction New York Highway 220, to junction New York Highway 319, to junction New York Highway 320, to junction New York Highway 80, to junction Interstate Highway 90, to junction New York Highway 10, to junction New York Highway 8, to junction New York Highway 30, to junction New York Highway 3, to junction New York Highway 374, thence north along New York Highway 374 to the International Boundary line between United States and Canada, thence west along the New York-Canadian International Boundary line to the point of beginning, on the one hand, and, on the other, points in New Mexico on and south of a line beginning at the New Mexico-Texas State line and extending along U.S. Highway 380 to junction U.S. Highway 85, to junction New Mexico Highway 6, to junction U.S. Highway 66, thence along U.S. Highway 66 to the New Mexico-Arizona State line, those points in Arizona on and south of a line beginning at the New Mexico-Arizona State line, and extending along U.S. Highway 66 to junction U.S. Highway 93, to junction U.S. Highway 95, to junction Nevada Highway 58 to the Nevada-California State line, and those points in California on and south and west of a line beginning at the California-Nevada State line, and extending along California Highway 190, to junction California Highway 136, to junction U.S. Highway 395, to junction California Highway 180, to junction California Highway 99, to junction California Highway 12, to junction California Highway 116, to the Pacific Ocean. The purpose of this filing is to eliminate the gateways of Pulaski, Va., Lynchburg, Va., and Smyth County, Va.

No. MC 61825 (Sub-No. E1013), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. [Rev. Service Order No. 1252; I.C.C. Order No. 9, Amdt. No. 2]

MIDDLETOWN AND HUMMELSTOWN RAILROAD CO.

Rerouting or Diversion of Traffic

Upon further consideration of I.C.C. Order No. 9 (Middletown and Hummelstown Railroad Company) and good cause appearing therefor:

It is ordered, That:

I.C.C. Order No. 9 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., July 31, 1977, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement, under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., July 26, 1977.

Interstate Commerce Commission,
Robert S. Turkington,
Agent.

[Notice No. 202]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before September 6, 1977. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77092, filed April 21, 1977. Transferee: CLIFFORD D. ELLIS II, doing business as Crested Butte Truck Line, 206 Whiterock, Crested Butte, Colorado 81224. Transferor: Clifford D. Ellis & Charles L. Stellberger, A Partnership, doing business as Crested Butte Truck Line, Box 167, Crested Butte, Colorado 81224. Applicant's representative: Clifford D. Ellis II, 206 Whiterock, Crested Butte, Colorado 81224. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-98228 (Sub-No. 1) issued January 16, 1973 and Certificate of Registration No. MC-98228 (Sub-No. 2) issued January 16, 1973, as follows: Ore and ore concentrates over a specified regular route from Crested Butte, Colo. to Salida, Colo. serving intermediate and off route points within 10 miles of Crested Butte; and the transportation of general commodities between Gunnison, Colo. and Crested Butte, Colo. over Colorado Highway 135 serving all intermediate points. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77095, filed May 2, 1977. Transferee: FOOTHILLS TRUCKING COMPANY, INC., P.O. Box 192, Conover, North Carolina 28613. Transferor: Guignard Freight Lines, Inc., P.O. Box 26067, Charlotte, North Carolina 28213. Applicant's representative: Edward G. Villalon, 1032 Pennsylvania Building, Washington, D.C. 20004. Authority sought for purchase by transferee of portions of the operating rights of transferor, as set forth in Certificate No. MC-45736 (Sub-No. 43), MC-45736 (Sub-No. 45G) issued April 21, 1976 and December 17, 1976 respectively and MC-45736 (Sub-No. E-12) published in the Federal Register of September 3, 1975, as follows: Furniture from Sumter, S.C. to points in Florida and new furniture from a specified portion of North Carolina to points in Florida. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77129, filed May 12, 1977. Transferee: BROOKS CHARTERS AND TOURS, INC., 2701 Cass Avenue, Detroit, Michigan 48201. Transferor: Brooks Bus Line, Inc., 421 Washington Street, Paducah, Kentucky 42001. Applicant's representative: Harry J. Harman, Attorney at Law, 700 Harrison Building, 143 West Market Street, Indianapolis, Indiana 46204. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC-94818 (Sub-No. 7), issued June 11, 1969 as corrected September 4, 1969, as follows: Passengers and their baggage, in the same vehicle with passengers, in round-trip charter operations, beginning and ending at those points authorized to be served on the routes described in section (A) within the State of Michigan, (Indiana-Michigan State line to Coldwater, Michigan, over U.S. Highway 27, thence over U.S. Highway 27 to junction Michigan Highway 60, thence over Michigan Highway 60 to Jackson, Michigan, thence over Interstate Highway 94 to Ann Arbor, Michigan, and thence over Michigan Highway 14 to Detroit, Michigan, and return over the same route) herein, and extending to points in the United States, (including Alaska but excluding Hawaii). Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77163, filed June 7, 1977. Transferee: LEONARDO TRUCK LINES, INC., 511 S. 1St Street, Selah, Washington 98932. Transferor: Gabrio Livestock Transport, Inc., W. 1448 Sunset Drive, Moses Lake, Washington 98837. Applicant's representative: Ernest Marang, 511 S. 1st Street, Selah, Washington 98942; Lawrence V. Smart, Jr., 419 NW 23rd Avenue, Portland, Oregon 97210. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-134678, issued May 1, 1973, as follows: Cottenseed meal from points in Kern and Fresno Counties, California to points in Washington. Transferee is presently authorized to operate as a common carrier under Certificate No. MC-26377 and subs thereafter. Transferee has not filed an application for temporary authority under Section 210a(b).

No. MC-FC-77166, filed June 6, 1977. Transferee: NORTHEAST REFRIGERATED DISTRIBUTING CO., INC., 1650 Shawsheen Street, Tewksbury, Mass. 01876. Transferor: Milton Monoxelos, DBA Northeast Refrigerated Distributing Co., 1650 Shawsheen Street, Tewksbury, Mass. 01876. Applicant's representative: Kenneth B. Williams, 84 State Street, Boston, Massachusetts 02109. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 141962, issued March 23, 1977, as follows: Meats, etc., in vehicles equipped with mechanical refrigeration, (except commodities in bulk), from the facilities of Northeast Refrigerated Distributing Co., at or near Tewksbury, Mass., to points in Massachusetts. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77173, filed June 13, 1977. Transferee: HARRY GORDON SCOTT, INC., Sebringville, Ontario, Canada. Transferor: Harry Gordon Scott, Sebringville, Ontario, Canada. Applicant's representative: S. Harrison Kahn, Suite 733 Investment Bldg., Washington, D.C. 20005. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 128576, issued November 3, 1967, as follows: Such commodities as are dealt in by printing, embossing, and engraving companies, from Detroit, Mich., to ports of entry on the United States-Canada Boundary line located in Michigan along the Detroit River between St. Clair and Lake Erie, and from Buffalo and Niagara Falls, N.Y., to ports of entry on the United States-Canada Boundary line located in New York along the Niagara River between Lake Erie and Lake Ontario, under a continuing contract or contracts with International Artcrafts Co., Limited, of Stratford, Ontario, Canada. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77176, filed June 15, 1977. Transferee: NAKANO EXPRESS SERVICE, INC., 18924 So. Laurel Park Road, Compton, California 90220. Transferor: Basin Truck Line, Inc., 909 Mahar Avenue, Wilmington, California 90744. Applicant's representative: Henry Y. Ota, Esq., 700 South Flower St. Suite 410, Los Angeles, California 90017. Donald Murchison, Esq., 9454 Wilshire Boulevard Suite 400, Beverly Hills, California 90212. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC-121197 (Sub-No. 1), issued March 18, 1964, as follows: General commodities to, from, and between all points in the Los Angeles Basin Territory. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77179, filed June 22, 1977. Transferee: MOODY TRANS, INC., Route No. 1, Sugar City, Idaho 83448. Transferor: Robert G. Wright, doing business as Star Valley-Jackson Stages and Teton Stage Lines, 1945 Eagle Drive, Idaho Falls, Idaho 83401. Applicant's representative: James G. Oldroyd, Attorney at Law, 485 E Street, Idaho Falls, Idaho 83401. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-105054 (Sub-No. 3), MC-105054 (Sub-No. 6) and MC-105154 (Sub-No. 10), issued October 25, 1963, February 28, 1967 and July 27, 1976 respectively, as follows: Passengers and their baggage over specified regular routes between specified points in Idaho and Wyoming. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b).

No. MC-FC-77185, filed June 21, 1977. Transferee: WALTERS ENTERPRISES, INC., 16935 Hummel Road, Brookpark, Ohio 44142. Transferor: Custom Motor Freight Co., 150 East Broad Street, Columbus, Ohio 43215. Applicant's representative: J. A. Kundtz, Attorney at Law, 1100 National City Bank Building, Cleveland, Ohio 44114. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-141094 (Sub-No. 2), MC-141094 (Sub-No. 3G), and MC-141094 Subs E1, E2, E3, E4, and E5, issued May 26, 1976 and April 15, 1976 respectively; the E letter notices were published in the Federal Register July 10, 1974; August 21, 1974; August 27, 1974; August 27, 1974; and February 18, 1975 respectively. The authorities involve: General commodities over a specified regular route from Akron, Ohio to Cincinnati, Ohio and various specified commodities over irregular routes from, to, or between points in the states of Kentucky, Pennsylvania, Ohio, and West Virginia. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b).

No. MC-FC-77188, filed June 27, 1977. Transferee: ALLEN COAL COMPANY, INC., 351 Main Street, Nelsonville, N.Y. 10516. Transferor: Ernest Allen, Jr., and Earl Allen, A Partnership, DBA Allen Coal Co., 351 Main Street, Nelsonville, N.Y. 10516. Applicant's representative: Neil D. Breslin, 99 Washington Avenue, Suite 1111, Albany, N.Y. 12210. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates Nos. MC 139668 (Sub-No. 3) and MC 139668 (Sub-No. 4), issued May 7, 1975 and July 23, 1976, respectively, as follows: Stone, from Patterson, N.Y., to Byram, Conn. and from Patterson, N.Y., to points in Fairfield and Litchfield Counties, Conn. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77189, filed June 27, 1977. Transferee: THE GOOD MECHANIC AUTO COMPANY, INC., Dba. G & M Auto Company, 7224 Euclid Avenue, Cleveland, Ohio 44103. Transferor: Fred W. Phillips, DBA Akron/Medina Towing, 3330 Medina Road, Medina, Ohio 44256. Applicant's representative: Paul F. Beery, 275 East State Street, Columbus, Ohio 43215. [Notice No. 93]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JULY 27, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information. Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application. A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 381 (Sub-No. 11TA), filed July 11, 1977. Applicant: GENOVA EXPRESS LINES, INC., P.O. Box 136, 484 Clayton Road, Williamstown, N.J. 08094. Applicant's representative: George A. No. MC 134477 (Sub-No. 180TA), filed July 12, 1977. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sleepwear and underclothing* (except in bulk), from the facilities of Munsingwear, Inc. at or near Crossville, Tenn., to Minneapolis, Minn., restricted to the transportation of traffic originating at the above named origin and destined to the above named destination. Supporting shipper(s): Munsingwear, Inc. 718 Glenwood Avenue, Minneapolis, Minn. 55405. Send protests to: Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Court House, 110 S. 4th Street, Minneapolis, Minn. 55401.

No. MC 136285 (Sub-No. 22TA) (Partial correction), filed May 23, 1977, published in the FEDERAL REGISTER issue of June 22, 1977, and republished as published in this issue. Applicant: SOUTHERN INTERMODAL LOGISTICS, INC., P.O. Box 143, 413 Gordon, Ave., Thomasville, Ga. 31792. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Blvd., Arlington, Va. 22210. NOTE.—The purpose of this partial correction is to correct the territorial description in part (2) as to read "*marine cargo containers and chassis therefor*, from Charleston, S.C., and Savannah, Ga., to points in Mississippi, Alabama, Georgia and Tennessee. The rest of the application remains the same.

No. MC 136762 (Sub-No. 14TA), filed July 11, 1977. Applicant: OSBORNE HIGHWAY EXPRESS, P.O. Box 763, Ukiah, Calif. 95482. Applicant's representative: Edward A. Francom, 6400 Village Parkway, Dublin, Calif. 94566. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fireplace logs*, extruded sawdust and parafin combined, from Stockton and Port of Stockton, Calif., to points in Arizona and Nevada for 180 days. Supporting shipper(s): Duraflame, Inc. P.O. Box 49, Stockton, Calif. 95201. Send protests to: District Supervisor A. J. Rodriguez, 211 Main, Suite 500, San Francisco, Calif. 94105.

No. MC 138000 (Sub-No. 32TA), filed July 8, 1977. Applicant: ARTHUR H. FULTON, P.O. Box 86, Stephens City, Va. 22655. Applicant's representative: Edward N. Button, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, Md. 21740. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Apple products and juices*, from Mt. Jackson, Va., and its commercial zone to Detroit, Mich., and its commercial zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Bowman Apple Products Co., Inc. Mt. Jackson, Va. 22842. Send protests to: W. C. Hersman District Supervisor, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Room 1413, Washington, D.C. 20423.

No. MC 140581 (Sub-No. 10TA), filed July 11, 1977. Applicant: TOMMY HAGWOOD, d.b.a. HAGWOOD ENTERPRISES, Route 1, Box 222–A, Trafford, Ala. 35172. Applicant's representative: William P. Jackson, P.O. Box 1267, Arlington, Va. 22210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New automobiles*, from Jacksonville, Fla., to points in Alabama, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Southeast Toyota Distributors, Inc. P.O. Box 1588, Pompano Beach, Fla. 33062. Send protests to: Clifford W. White District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 1616–2121 Building, Birmingham, Ala. 35203.

No. MC 141089 (Sub-No. 2TA), filed July 8, 1977. Applicant: FLOYD WILD, INC., P.O. Box 91, Marshall, Minn. 56258. Applicant's representative: Samuel Rubenstein, 301 North Fifth Street, Minneapolis, Minn. 55403. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Manufactured decorative stone* from points in Lyon County, Minn. to points in Colorado, Iowa, Kansas, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming, for 180 days. Supporting shipper(s): Coronado Stone Prod., Box 9 South Street, Tracy, Minn. Send protests to: Mrs. Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Court House, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 141361 (Sub-No. 3TA), filed July 13, 1977. Applicant: LONSBERG TRUCKING AND MATERIALS, INC., 545 Broadway, Platteville, Wis. 53818. Applicant's representative: A. R. Hanson, 139 W. Wilson Street, Madison, Wis 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in dump vehicles, from Dubuque, Iowa to Platteville, Wis., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The C. Reiss Coal Company, Sheboygan, Wis. 53081. Send protests to: Ronald A. Morken District Supervisor, Interstate Commerce Commission, 139 W. Wilson Street Room 202, Madison, Wis. 53703.

No. MC 142229 (Sub-No. 2TA), filed July 13, 1977. Applicant: MOBERG TRANSPORT, INC., 317 South 2nd Street, Marshall, Minn. 56258. Applicant's representative: Bruce A. Rasmussen, 1110 Northwestern Bank Bldg., Minneapolis, Minn. 55402. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, from the plantsite of PPG Industries, Inc., at or near Wichita Falls, Tex., to the plantsite of PPG Industries, Inc. at or near Marshall Minn., under a continuing contract, or contracts, with PPG Industries, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): PPG Industries, Inc. One Gateway Center, Pittsburgh, Pa. 15222. Send protests to: Marion L. Cheney Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Court House, 110 S. 4th Street, Minneapolis, Minn. 55401.

No. MC 142559 (Sub-No. 2TA) (correction), filed May 24, 1977. Applicant: BROOKS TRANSPORTATION, INC., 30650 Carter Road, Solon, Ohio 44139. Applicant's representative: Henry U Snavely, 410 Pine Street, Vienna, Va 22180. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Water heaters and water heater parts and accessories*, and (2) *materials and supplies* (except commodities in bulk), used in the manufacture or distribution of the commodities in (1) above, between the facilities of the Bradford-White Corporation, at Middleville, Mich., on the one hand, and, on the other, points in the United States (except Alaska and

Hawaii), restricted to the transportation of traffic originating at or destined to the said facilities of the Bradford-White Corporation for 180 days. Supporting shipper(s): Bradford-White Corporation, 24th & Ellsworth Streets, Philadelphia, Pa. 19146. Send protests to: James Johnson District Supervisor, Interstate Commerce Commission, Bureau of Operations, 731 Federal Office Bldg., 1240 East Ninth Street, Cleveland, Ohio 44199. The purpose of this republication is to correct Middleville, Mich., in lieu of Milledgeville, Mich., as was previously published in error.

No. MC 142826 (Sub-No. 1TA), filed July 11, 1977. Applicant: LOUIS H. CHAUVIN, INC., 6081 Mudmill Road, Brewerton, N.Y. 13029. Applicant's representative: Louis H. Chauvin, 6081 Mudmill Road, Brewerton, N.Y. 13029. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Brewers' Wet Grain, spent*, in bulk, in dump vehicles from the Town of Volney, (Oswego County), N.Y. to Orefield, (Lehigh County), Pa., under a continuing contract, or contracts, with The Pillsbury Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Pillsbury Company, 608 2nd Avenue South, Minneapolis, Minn. 55402. Send protests to: Mr. Morris H. Gross, District Supervisor, Interstate Commerce Commission, U.S. Courthouse & Federal Building, 100 South Clinton St., Room 1259, Syracuse, N.Y. 13202.

No. MC 143268 (Sub-No. 1TA) (Correction), filed May 18, 1977, published in the FEDERAL REGISTER issue of June 23, 1977, and republished as corrected this issue. Applicant: TROCHU TRUCKING SERVICE, LTD., 915–48th Avenue SE., Calgary, Alberta, Canada. Applicants representative: Charles E. Johnson, 418 East Rosser Avenue, P.O. Box 1982, Bismarck, N. Dak. 58501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural and ranching equipment and supplies* (except feed and feed ingredients, fertilizer, tractors, and commodities, the transportation of which, because of their size or weight require the use of special equipment) *and building materials*, from points in Mississippi, Alabama, Tennessee, Missouri, Kansas, Nebraska, Iowa, Illinois, Indiana, Texas, Oklahoma, Colorado, Montana, Wyoming, Utah, Idaho and Arkansas to ports of entry located on the International Boundary line between Canada and the United States located in Montana and North Dakota, restricted to a transportation service to be performed under a continuing contract, or contracts, with Thornhill Ranching Products, Ltd., Vulcan, Alberta, Canada; and also restricted to traffic destined to points in Alberta for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Bill Thornhill, President, Thornhill Ranching Products, Ltd., Vulcan, Alberta, Canada. Send protests to: District Supervisor Paul J. Labane, Interstate Comerce Commission, 2602 First Avenue North, Billings, Mont. 59101. The purpose of this correction is to indicate building materials as a part of the commodity description in lieu of commodity exceptions as was previously published in error.

No. MC 143294TA (Partial correction) filed May 19, 1977, published in the FEDERAL REGISTER issue of June 6, 1977, and republished as corrected this issue. Applicant: ADRAIN LEE, d.b.a. CENLA CAB COMPANY, 1401 Murray St., Alexandria, La. 71301. Applicant's representative. Adrain Lee (same address as applicant). NOTE.—The purpose of this partial correct is to add: Send protests to: District Supervisor, Ray C. Armstrong, Jr., Interstate Commerce Commission, 9038 Federal Building, 701 Loyola Ave., New Orleans, La. 70113, which was previously omitted. The rest of the application remains the same.

No. MC 143436 (Sub-No. 1TA), filed July 11, 1977. Applicant: CONTROLLED TEMPERATURE TRANSIT, INC., 9049 Stonegate Road, Indianapolis, Ind. 46227. Applicant's representative: Stephen M. Gentry, 1500 Maine St., Indianapolis, Ind. 46224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Candy and Confectionary items*, requiring transportation in vehicles equipped with mechanical refrigeration from the warehouse facilities utilized by Consolidated Products Systems, Inc., located at or near Indianapolis, Ind. to retail chain department and grocery stores, drug stores and vending machine distributors located in Illinois, Kentucky, Michigan and Ohio, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Consolidated Products Systems, Inc., P.O. Box 72, East McKeesport, Pa. 15035. Send protests to: William S. Ennis, Interstate Commerce Commission, Federal Bldg. and U.S. Courthouse, 46 East Ohio Street, Room 429, Indianapolis, Ind. 46204.

PASSENGER APPLICATION

No. MC 2389 (Sub-No. 2TA), filed July 12, 1977. Applicant: NEVADA CENTRAL MOTOR LINES, INC., 2570 Tacchino Street, Reno, Nev. 89502. Applicant's representative: Lawrence R. Waters, 2570 Tacchino, Reno, Nev. 89512. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their luggage* in the same vehicle with passengers, from points in Contra Costa County, Calif., to points in the Continental United States, including Alaska (excluding Hawaii) and return, for 180 days. Supporting shipper(s): There are approximately 21 statements of support attached to the applications which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: District Supervisor W. J. Huetig, Interstate Commerce Commission, 203 Federal Building, 705 N. Plaza Street, Carson City, Nev. 89701.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 95]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATION

JULY 29, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information. Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application. A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 32967 (Sub-No. 2TA), filed July 7, 1977. Applicant: ATLANTIC COAST EXPRESS, INC., 2170 North Fleet St., Elizabeth, N.J. 07201. Applicant's representative: Galland, 1054 Thirty First St. N.W., Washington, D.C. 20007. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *General commodities*, except motor vehicles, commodities in bulk, Class A & B explosives, household goods, and commodities which because of their size and weight require special equipment, and (2) *containers and container chassis*, between Baltimore, Md., and points in its Commercial Zone as defined in Title 49 CFR 1048.21, restricted to traffic having an immediate prior or subsequent movement by rail or water, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Vicksburg Chemical Company, P.O. Box 3, Vicksburg, Miss. 39180. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Building, Jackson, Miss. 39201.

No. MC 107615 (Sub-No. 10TA), filed July 13, 1977. Applicant: UNTCO, INC., 850 E. Luzerne Street, Philadelphia, Pa. 19124. Applicant's representative: Richard Mehley, 1000 16th Street, NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter, products and materials, and supplies* used in the manufacture and production thereof, between Harrisburg, Pa., on the one hand, and, on the other, points in West Virginia for 180 days. Applicant intends to tack the above sought authority at Harrisburg, Pa., with its existing authority contained in MC 107615 Sub-No. 9 to provide through service between West Virginia points, on the one hand, and, on the other, points in New Jersey, points in Rockland, Westchester, Nassau and Suffolk Counties, N.Y., and New York, N.Y. Supporting shipper(s): There are approximately 9 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch Street, Room 3238, Philadelphia, Pa. 19106.

No. MC 116073 (Sub-No. 360TA), filed July 14, 1977. Applicant: BARRETT MOBILE HOME TRANSPORT, INC., 1825 Main Avenue, P.O. Box 919, Moorhead, Minn. 56560. Applicant's representative: John C. Barrett, P.O. Box 919, Moorhead, Minn. 56560. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Travel trailers, fifth wheel travel trailers, and rent campers*, from the plantsite of Coachman Industries, Inc., at or near Centreville, Mich., to all points in the United States, including Alaska but excluding Hawaii, for 180 days. Supporting shipper(s): Coachman Industries, Inc., P.O. Box 30, Middlebury, Ind. 46540. Send protests to: Ronald R. Mau, District Supervisor, Bureau of Operations, Interstate Commerce Commission, P.O. Box 2340, Fargo, N. Dak. 58102.

No. MC 118806 (Sub-No. 55TA), filed July 15, 1977. Applicant: ARNOLD BROS. TRANSPORT, LTD., 851 Lagimodiere Blvd., 739 Lagimodiere Blvd. Winnipeg, Manitoba, Canada R2J 3K4, R2J OT8. Applicant's representative: Paul R. Bergant, Singer & Sullivan, P.C., 10 South La Salle Street, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural machinery and implements*, (2) *combines*, and (3) *parts and attachments* for the commodities described in (1) and (2), from the ports of entry on the International Boundary Line between the United States and Canada located in New York and Michigan, to points in Alabama, Connecticut, Delaware, Florida, Georgia, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, Vermont and West Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Massey-Ferguson Industries, Ltd., P.O. Box 400, Park Road North, Brantford, Ontario, Canada N3T 5V4. Send protests to: Ronald R. Mau, District Supervisor, Bureau of Operations, Interstate Commerce Commission, P.O. Box 2340, Fargo, N. Dak. 58102.

No. MC 121082 (Sub-No. 14TA), filed July 6, 1977. Applicant: ALLIED DELIVERY SYSTEM, INC., 2201 Fenkell, Detroit, Mich. 48238. Applicant's representative: Robert E. McFarland, 999 West Big Beaver Rd., Suite 1002, Troy, Mich. 48084. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* limited to individual articles not exceeding 100 pounds in weight, moving in shipments not exceeding 500 pounds in weight, from one consignor to one consignee in a single day, on bills of lading of surface, interstate freight forwarder between Cincinnati, Ohio, on the one hand, and, on the other hand, Louisville, Ky. Applicant intends to tack to another authority in MC 121082 (Sub-No. 13TA). Applicant may interline at Louisville, Ky., with other carriers, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: American Delivery Systems, Inc., 300 East Seven Mile Rd., Detroit, Mich. 48203, Sharon Makowski, Vice President, Services. Send protests to: Erma W. Gray, Secretary, Interstate Commerce Commission, Bureau of Operations, 604 Federal Building and U.S. Courthouse, 231 W. Lafayette Blvd., Detroit, Mich. 48226.

No. MC 124078 (Sub-No. 739TA), filed July 1, 1977. Applicant: SCHWERMAN TRUCKING COMPANY, 611 South 28 St., Milwaukee, Wis. 53215. Applicant's representative: Richard H. Prevette (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic materials, flakes, NOIBN, granules, powder or solid mass*, in bulk in tank vehicles, from Brunswick, Ga., to points in Alabama, North Carolina, South Carolina and Tennessee, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Hercules Incorporated, 900 Life of Georgia Tower, Atlanta, Ga. 30308. Send protests to: Gail Daugherty, Transportation Asst., Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East

Wisconsin Ave., Room 619, Milwaukee, Wis. 53202.

No. MC 125699 (Sub-No. 3TA), filed July 15, 1977. Applicant: WILLARD E. DURBIN, doing business as DURBIN AUTO SERVICE, 421 South Mulberry Street, Hagerstown, Md. 21740. Applicant's representative: Daniel B. Johnson, 1123 Munsey Building, 1329 E Street, N.W., Washington, D. C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wrecked, crushed, and shredded automobiles and shredded residues and scrap*, used or to be used in a recycling process, between Hagerstown, Md., on the one hand, and, on the other, points in and east of Wisconsin, Iowa, Missouri, Tennessee and Alabama, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Conservit, Inc., P.O. Box 1517, Hagerstown, Md. 21740. Send protests to: Interstate Commerce Commission, 12th and Constitution Avenue, N.W., Room 1413, W. C. Hersman, District Supervisor, Washington, D.C. 20423.

No. MC 134959 (Sub-No. 9TA) (Partial correction), filed May 12, 1977, published in the FEDERAL REGISTER issue of June 24, 1977, and republished as corrected this issue. Applicant: BEN-K TRUCKING, INC., North 6th Avenue and County Road 64, Greeley, Colo. 80631. Applicant's representative: Charles M. Williams, 1600 Sherman Street, Suite 350 Capitol Life Center, Denver, Colo. 80203. Note.—The purpose of this partial correction is to add parts (6) through (12) which was originally omitted from the previous publication: (6) *Defluorinated food phosphate* (CDP), in bags, or in bulk, except in bulk in tank vehicles, From: Houston, Tex.: To: Points in New Mexico and Colorado, and points in Utah. (7) *Sodium sulfate*, bagged, From: Brownfield, Tex., To: Denver, Colo., and Hastings and Norfolk, Nebr. (8) *Ammonium chloride*, bagged, From: Freeport, Tex. To: Denver, Colo., and Sterling, Colo. To: Points in Colorado and Utah; and (12) *Feed and feed ingredients*, in bulk and in bags, except in bulk in tank vehicles. From: The facilities of Feed Products, at or near Hastings, Nebr. To: Points in Colorado. Restricted to operations performed under a continuing contract or contracts with Feed Products, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Feed Products, Inc., 1000 West 47th Avenue, Denver, Colo. 80211. Send protests to: Roger L. Buchanan District Supervisor, Interstate Commerce Commission, 721 19th Street, 492 U.S. Customs House, Denver, Colo. 80202. The rest of the publication remains the same.

No. MC 126305 (Sub-No. 84TA) filed July 7, 1977. Applicant: BOYD BROTHERS TRANSPORTATION CO., INC., Route 1, Clayton, Ala. 36016. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Particle-board, plywood and/or lumber*, in straight or mixed shipments, from the plant sites of MacMillan Bloedel, Inc. at or near Pine Hill (Wilcox County) and Opelika, Ala.; to points in the States of Arkansas, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, Ohio, Oklahoma, Texas, Vermont, West Virgina, Wisconsin and the District of Columbia, for 180 days. Supporting shipper: MacMillan Bloedel, Inc., 12th Floor, Brown Marx Building, Birmingham, Ala. 35203. Send Protests to: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Rm. 1616 2121 Building, Birmingham, Ala. 35203.

No. MC 128988 (Sub-No. 96TA), filed June 30, 1977. Applicant: JO/KEL, 150 South Seventh Ave., P.O. Box 1249, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Compressors, air conditioners, air conditioning products and equipment;* (2) *parts and accessories* for the commodities named in (1) above, from the facilities of Westinghouse Electric Corporation at or near Verona, Va.; to points in the United States on and west of a line beginning at the mouth of the Mississippi River and extending along the Mississippi River to its junction with the western boundary of Itasca County, Minn. thence northward along the western boundaries of Itasca and Koochiching Counties, Minn. to the International Bounday Line between the United States and Canada; and (3) *Materials, equipment, and supplies*, used in the manufacture, production, and distribution of the commodities named in (1) and (2) above, from points in the above-described destination area to the facilities of Westinghouse Electric Corporation at or near Verona, Va. Restrictions: Restricted against the transportation of commodities which by reason or size or weight require the use of special equipment. Further restricted to a transportation service to be performed under a continuing contract, or contracts, with Westinghouse Electric Corporation, for 180 days. Supporting shipper: Westinghouse Electric Corporation, 290 Leger Rd., North Huntingdon, Pa. 15642. Send protests to: Irene Carlos, Transportation Assistant, Interstate Commerce Commission, Rm. 1321 Federal Building, 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 128988 (Sub-No. 97TA), filed June 30, 1977. Applicant: JO/KEL INC., 159 South Seventh Ave., P.O. Box 1249, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Neb. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Watt hour meters*, from the facilities of Westinghouse Electric Corporation located at or near Raleigh, N.C.; to points in the United States on and west of a line beginning at the mouth of the Mississippi River and extending along the Mississippi River to its junction with the western boundary of Itasca County, Minn.; thence northward along the western boundaries of Itasca and Koochiching Counties, Minn.; to the International Boundary line between the United States and Canada. Restriction: Restricted against the transportation of commodities which by reason of size or weight require the use of special equipment, and commodities in bulk, further restricted to a transportation service to be performed under a continuing contract, or contracts, with Westinghouse Electric Corporation of Pittsbugh, Pa., for 180 days. Supporting shipper: Westinghouse Electric Corporation, 290 Leger Rd., North Huntingdon, Pa. 15642. Send protests to: Irene Carlos, Transportation Assistant, Interstate Commerce Commission, Rm. 1321 Federal Building, 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 133405 (Sub-No. 2TA), filed July 15, 1977. Applicant: BOWIE HALL TRUCKING, INC., P.O. Box 353, Waldorf, Maryland 20601. Applicant's representative: Daniel B. Johnson, 1123 Munsey Building, 1329 E Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, (1) from Jacksonville, Fla. to Ellicott City, Baltimore, Glyndon, Annapolis and Leonardtown, Maryland. (2) from Columbus, Ohio to Ellicott City, Baltimore, Glyndon, Annapolis and Leonardtown, Maryland. (3) from Detroit, Mich. to Baltimore, Maryland, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately 5 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Interstate Commerce Commission, 12th & Constitution Avenue NW., Room 1413, W. C. Hersmand, District Supervisor, Washington, D.C. 20423.

No. MC 134286 (Sub-No. 27TA), filed July 12, 1977. Applicant: ILLINI EXPRESS, INC., P.O. Box 1584, Sioux City, Iowa 51102. Applicant's representative: Charles J. Kimball, Suite 350, Capitol Life Center, 1600 Sherman Street, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Candy, confectionery, seeds, and snackfood products* moving in vehicles equipped with mechanical temperature control devices, between the plantsites and or warehouse facilities of Sunmark Companies at or near Itasca, Ill., and St. Louis, Mo., and from the plantsites and/or warehouse facilities of Sunmark Companies at or near Itasca, Ill., and St. Louis, Mo., to points in the states of Maryland, Massachusetts, New Jersey, New York and Pennsylvania for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): A. M. Brennecke, Traffic Manager, The Sunmark Companies, 10795 Watson Road, St. Louis, Mo. 63127. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 134477 (Sub-No. 181TA), filed July 15, 1977. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foodstuffs* (except commodities in bulk) from the facilities of Great American Basic Commodities, Inc. located at or near Plover, Wis. to points in Massachusetts, New Jersey, New York, Ohio and Pennsylvania, restricted to the transportation of traffic originating at the above named origins and destined to the above named destinations, for 180 days. Supporting shipper(s): Great American Basic Commodities, Inc., 1001 Hoover Road, Plover, Wis. 54467. Send protests to: Mrs. Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building & U.S. Court House, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 135082 (Sub-No. 47TA) (Partial correction), filed May 19, 1977, published in the FEDERAL REGISTER issue of June 8, 1977, and republished as corrected this issue. Applicant: BURSCH TRUCKING, INC., doing business as ROADRUNNER TRUCKING, INC., P.O. Box 26748, 415 Rankin Road NE., Albuquerque, N. Mex. 87125. Applicant's representative: D. F. Jones (same address as applicant). Note: The purpose of this partial correction is (1) to indicate that there are approximately 10 (ten) additional supporting shippers which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below; and (2) to indicate where to send protests which was originally omitted from the previous publication: Send protests to: Darrell W. Hammons, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 1106 Federal Office Building, 517 Gold Ave. S.W., Albuquerque, N. Mex. 87101. The rest of the publication remains the same.

No. MC 136817 (Sub-No. 3TA), filed July 15, 1977. Applicant: HUNTER BROKERAGE, INC., 3910 Richland Drive, Council Bluffs, Iowa 51501. Applicant's representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from Old Monroe and Hannibal, Mo. and points in their commercial zones, to Carson, Calif., under a continuing contract or contracts with McGuffin Lumber, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): James P. McGuffin, President, McGuffin Lumber, Inc., 3142 Central Street, Evanston, Ill. 60201. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 138762 (Sub-No. 14TA), filed July 7, 1977. Applicant: MUNICIPAL TANK LINES, LIMITED, P.O. Box 3500, Calgary, Alberta, Canada T2P 2P9. Applicant's representative: D. S. Vincent (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chloride resins and compounds* in bulk, in tank vehicles, from ports of entry on the United States-Canada International Boundary line in New York to Hazelton, Pa. Restricted to shipments originating at the plantsite and facilities of B. F. Goodrich, Canada Limited in the city of Thorold, Ontario, Canada, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: A. A. Slobodaina, Traffic Manager, B. F. Goodrich Canada Limited, Kitchener, Ontario, Canada N2G 4J5. Send protests to: Paul J. Labane, District Supervisor, Interstate 2602–1st Ave. North, Billings, Mont. 59101.

No. MC 139193 (Sub-No. 66TA), filed July 6, 1977. Applicant: ROBERTS & OAKE, INC., 527 East 52nd Street, North, Sioux Falls, S. Dak. 57101. Applicant's representative: Jacob P. Billig, 2033 K Street NW., Washington, D.C. 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products* (except hides and commodities in bulk, in tank vehicles), as described in Appendix I. *Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from the plant site of Royal Packing Co., at or near National Stockyards, Ill., to Connecticut, Maryland, Massachusetts, Pennsylvania, New Jersey, New York, and Washington, D.C., under a continuing contract, or contracts, with Royal Packing Company, and National Stockyards, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Royal Packing Company, St. Clair Avenue & Ice Plant Road, P.O. Box 156, National Stockyards, Ill. 62071. Marc Sokolik, Vice President—Transportation. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 455, Federal Bldg., Pierre, S. Dak. 57501.

No. MC 139495 (Sub-No. 250TA), filed July 14, 1977. Applicant: NATIONAL CARRIERS, INC., P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, Sullivan, Dubin & Kingsley, Suite 1030, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wheat germ and granola*, (1) from the facilities of International Multifoods Corporation located at or near Manhattan, Kans., to the facilities of International Multifoods Corporation located at or near Carrollton, Mich.; and (2) from the facilities of International Multifoods Corporation located at or near Manhattan, Kans., and Carrollton, Mich., to points in Connecticut, Maryland, Maine, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, and Vermont for 180 days. Supporting shipper(s): International Multifoods Corporation, 1265 Multifoods Building, Minneapolis, Minn. 55402. Send protests to: M. E. Taylor, District Supervisor, Interstate Commerce Commission, 101 Litwin Bldg., 110 North Market, Wichita, Kans. 67202.

No. MC 140212 (Sub-No. 1TA), filed July 5, 1977. Applicant: CRANE RENTAL CO., INC., 205 Main Street, Tewksbury, Mass. 01876. Applicant's representative: James F. Martin, Jr., 69 Milliken Avenue, Franklin, Mass. 02038. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metals*, in dump vehicles, from Tewksbury, Mass., and Madbury, N.H., to Providence, R.I. The above will be performed under continuing contracts with Tewksbury Auto Parts, Inc., Tewksbury, Mass., and Madbury Metals, Inc., Madbury, N.H., for 180 days. Supporting shipper: Madbury Metals, Inc., Knox Marsh Road, Madbury, N.H. 03820, Tewksbury Auto Parts, Inc., 860 East Street Tewksbury, Mass. 01876. Send protests to: Max Corenstein, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 150 Causeway Street, Boston, Mass. 02114.

No. MC 143401 (Sub-No. 1TA), filed July 7, 1977. Applicant: PENSACOLA INDUSTRIAL SERVICES, INC., P.O. Box 8063, Pensacola, Fla. 32305. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Calcined kaolin*, in bulk, in tank vehicles, from the plantsite and storage facilities of Engelhard Minerals & Chemicals Corp. at or near McIntyre, Ga; Freeport Kaolin Co. at or near Gordon, Ga.; Burgess Pigments Co. at or near Sandersville, Ga.; and Kaolin Co. at or near Dry Branch, Ga., to the plant site and storage facilities of Monsanto

Co. located at or near Gonzales, Fla., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Monsanto Co., 800 North Lindbergh Boulevard, St. Louis, Mo. 63166. Send protests to: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 1616, 2121 Building, Birmingham, Ala. 35203.

No. MC 143424 (Sub-No. 1TA), filed July 12, 1977. Applicant: AAA MOVING & STORAGE CO., INC., 2414 University Boulevard, Tuscaloosa, Ala. 35401. Applicant's representative: Harris & Harris, 1406 Union Bank Towers, Montgomery, Ala. 36104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, between all points and places in Bibb, Blount, Cullman, Fayette, Jefferson, Lamar, Marion, Pickens, Shelby, Tuscaloosa, Walker, Calhoun, and Winston Counties, Ala., restricted to the transportation of traffic having a prior or subsequent movement in containers, beyond the points authorized, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating, and decontainerization of such traffic for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Columbia Export Packers, Inc., 19032 South Vermont Avenue, Torrance, Calif. 90502; Department of Defense, Office of the Judge Advocate General, Department of the Army, Washington, D.C. 20310.

No. MC 143429 (Sub-No. 1TA), filed July 8, 1977. Applicant: BILL BARTON, d.b.a. Mac B Co., 2916 Princeton Street, Plano, Tex. 75075. Applicant's representative: Billy R. Reid, P.O. Box 9093, Fort Worth, Tex. 76107. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Rock wool, glass mineral wool, mineral wool paper, bulk mineral wool unsuitable only for machine processing*, in bales and bags, and high temperature cement, from Texarkana, Ark., to points in Texas, Oklahoma, Louisiana, New Mexico, Mississippi, Missouri, and Kansas, under a continuing contract, or contracts, with Mineral Fibers Co., and INSCO (a corporation), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Mineral Fibers Co., P.O. Box 1349, Texarkana, Ark. INSCO (a corporation), P.O. Box 26292, Dallas, Tex. 75226. Send protests to: Opal M. Jones, Transportation Assistant, Interstate Commerce Commission, 1100 Commerce Street, Room 13C12, Dallas, Tex. 75242.

No. MC 143441R (Sub-No. 1TA), filed July 7, 1977. Applicant: AARDEMA CARTAGE, INC., P.O. Box 576, Midlothian, Ill. 60445. Applicant's representative: Philip A. Lee, 120 West Madison Street, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Scrap splits* (a material between hides and leather) from Chicago, Ill., to Milwaukee, Wis.; (2) *splits* (a material between hides and leather) from Fon du lac, Milwaukee, Sheboygan, Wis., and Red Wing, Minn., to Chicago, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: William Grainer, Inc., Thomas B. Weinstein, Assistant Manager, 2252 North Elston Avenue, Chicago, Ill. 60614; Triangle Tanning Co., Joseph A. Burik, General Manager and Treasurer, 1823 West Webster Avenue, Chicago, Ill. 60614. Send protests to Transportation Assistant Patricia A. Roscoe, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1386, Chicago, Ill. 60604.

No. MC 143470TA, filed July 7, 1977. Applicant: ROBERT CLIFFORD CAST, 151 Gratis, Ohio 45330. Applicant's representative: Robert Clifford Cast (same address as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lumber*, on flat bed vehicles, from August, Washington, Greenville, Atlanta, and Lumber City, Ga.; Bruce, Philadelphia, and Meridian, Miss.; and Birminghan, Oplika, Decatur, Haleyville, and Tuscaloosa, Ala., to Gratis, Ohio; (2) *pallets*, on flat bed vehicles, from Gratis, Ohio, to Richmond, Ind., under a continuing contract with Donald E. Tolson. Supporting shipper: Donald E. Tolson, Partner, Tolson & Lawson Pallett Manufacturing, Box 151, Gratis, Ohio 45330. Send protests to Paul J. Lowry, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 5514–B Federal Building, 550 Main Street, Cincinnati, Ohio 45202.

No. MC 143473TA, filed July 7, 1977. Applicant: TRI-COUNTY DELIVERY, INC., 3627 Buena Vista Drive SE., Hubbard, Ohio 44425. Applicant's representative: Lewis S. Witherspoon, 88 East Broad Street, Suite 930, Columbus, Ohio 44425. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Appliances, television sets, radios, and tape recorders*, between Youngstown, Ohio, on the one hand and points and places in Allegheny, Armstrong, Beaver, Butler, Clarion, Crawford, Erie, Lawrence, Mercer, Venango, Washington, and Westmoreland Counties, Pa.; and Doddridge, Hancock, Harrison, Marion, Marshall, Monogalia, Ohio; Pleasants, Ritchie, Wetzel, and Wood Counties, W. Va., under a continuing contract with Hamburg Bros., Inc., for 180 days. Supporting shipper: Hamburg Bros., Inc., 904 Tod Ave., Youngstown, Ohio 44502. Send protests to James Johnson, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 731 Federal Office Building, 1240 East Ninth Street, Cleveland, Ohio 44199.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

FEDERAL MARITIME COMMISSION

SOUTH CAROLINA STATE PORTS AUTHORITY AND MOLLER STEAMSHIP CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by August 24, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Marion S. Moore, Jr., Traffic Manager, South Carolina State Ports Authority, P.O. Box 817, Charleston, South Carolina 29402.

Agreement No. T-3498, between South Carolina State Ports Authority (Authority) and Moller Steamship Company (Moller), as agent for Maersk Line (Maersk), provides for the five-year preferential use (with renewal options) of Berth No. 1 and the lease of 4.04 acres of land at the Columbus Street Terminal in Charleston, South Carolina. The preferential use is limited to Tuesday of each week and may be subject to change upon mutual agreement. Authority will construct a fenced and paved parking lot including other improvements and install an office trailer building. As compensation, Moller will pay: (1) $3,504 per month as rental; (2) wharfage and crane service charges at the published tariff rates effective on the agreement's commencement date; and (3) dockage and any other service charges for any Maersk ship at Authority's tariff rate effective at the time of service. Wharfage paid under the agreement is subject to a minimum annual guarantee of 100,00 short tons for the first year, 125,000 short tons for the second year, and 150,000 short tons for each succeeding year of the agreement and any extension thereof. Moller will pay 75 percent of the tariff rate on wharfage exceeding 150,000 tons annually and 50 percent of the tariff rate on wharfage exceeding 250,000 tons annually. Upon its approval, Agreement No. T-3498 will supersede Agreement No. T-3105, which is between the same parties.

By Order of the Federal Maritime Commission.

Dated: August 1, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. RP77-105]

COLORADO INTERSTATE GAS CO.

Order Accepting for Filing and Suspending Proposed Rate Increase, Rejecting Proposed Revision of PGA Clause, Granting Waiver, Initiating Hearing, and Establishing Procedures

JULY 26, 1977.

On June 30, 1977, Colorado Interstate Gas Company (CIG) tendered for filing proposed changes to its FPC Gas Tariff[1] which, based on the twelve months ended March 31, 1977, as adjusted, would increase jurisdictional revenues by $19,958,671 annually, including purchased gas adjustments and excluding surcharges. CIG requests that the proposed rate increase be permitted to become effective on August 1, 1977. For the reasons stated below, the Commission shall accept the proposed rate increase for filing, suspend it for five months, and set the matter for hearing.

CIG also tendered for filing proposed tariff changes which would permit CIG to alter its method of calculating purchased gas cost adjustments.[2] For the reasons stated below, the Commission shall reject these proposed tariff changes for filing.

Public notice of CIG's filing was issued on July 11, 1977, providing for protests or petitions to intervene to be filed on or before July 22, 1977.

CIG states that the principal reasons for its proposed rate increase are the addition of certain facilities, increased operating costs, the need to increase depreciation rates to 6.2% for storage properties and 4.62% for transmission properties, and the need for a rate of return of 10.89% including a 15.0% allowance on common equity.

Based upon a review of CIG's filing, the Commission finds that the proposed higher rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, or otherwise unlawful. Accordingly, the Commission shall accept CIG's proposed rate increase for filing, suspend its use for five months or until January 1, 1978, when it shall be permitted to become effective, subject to refund, and shall set the matter for hearing.

The Commission notes that CIG tendered for filing both Nineteenth Revised Sheet Nos. 5 and 6 and Alternate Revised Sheet Nos. 5 and 6. The two sets of sheets differ only in that the alternate sheets exclude unrecovered purchased gas cost surcharges totaling 6.41 cents per Mcf which expire before January 1, 1977. CIG requests that should the Commission suspend CIG's proposed rate increase for five months until January 1, 1978, the alternate sheets be accepted for filing and Nineteenth Revised Sheet Nos. 5 and 6, containing provisions for the surcharges, be deemed withdrawn. In light of the action taken herein, the Commission will grant CIG's request.

CIG has included in its claimed rate base costs related to certain facilities which have not been certificated as of the date of filing in this docket. CIG requests waiver of Section 154.63(e)(2)(ii) of the Commission's regulations to permit such inclusion. CIG anticipates receiving all necessary certifications prior to the time its proposed rates become effective. The Commission shall grant the requested waiver of its regulations provided, however, that if such facilities are not certificated and placed in service on the date the proposed rates take effect subject to refund, CIG shall file revised tariff sheets which reflect exclusion of the costs associated with those facilities which have not been certificated and placed in service as of that date. CIG shall, also, submit supplemental costs and revenue data which reflect the elimination of such costs from its cost of service. The revised tariff sheets and supplemental data shall also reflect the actual advance payment balance in Account No. 166 as of December 31, 1977.

The proposed revisions of Tariff Sheet Nos. 63 through 66 and 67 A and B would permit CIG to include in its annual August 15 PGA filings an estimate of the positive or negative balance in its unrecovered purchased gas cost account as of the following September 30 rather than the actual balance in the account as of the preceeding June 30. Section 154.38 of the Commission's regulations does not provide for the use of an estimated rather than actual unrecovered purchased gas cost balance. Good cause does not exist to grant waiver of the regulation. Accordingly, the Commission shall reject CIG's proposed revisions of Tariff Sheet Nos. 63 through 66 and 67 A and B. *Municipal Light Boards* v. *F.P.C.*, 450 F.2d 1341, 1346 (1971).

The Commission finds: (1) It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the increased rates and charges set forth in Alternate Nineteenth Revised Sheet Nos. 5 and 6 as proposed by CIG, and that the same be accepted for filing and suspended as hereinafter ordered.

(2) Good cause exists to reject Second Revised Sheet Nos. 63, 64 and 65, Twelfth Revised Sheet No. 66 and Second Revised Sheet Nos. 67 A and B.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 8, and 15 thereof, and the Commission's rules and regulations, a public hearing shall be held concerning the lawfulness of the increased rates proposed herein by CIG.

(B) Pending hearing and decision, CIG's proposed Alternate Nineteenth Revised Sheet Nos. 5 and 6 are hereby accepted for filing and suspended for five months, or until January 1, 1978, when they shall be permitted to become effective, subject to refund, upon motion

[1] Nineteenth Revised Sheet Nos. 5 and 6; Alternate Nineteenth Revised Sheet Nos. 5 and 6.

[2] Second Revised Sheet Nos. 63, 64, 65, Twelfth Revised Sheet No. 66; Second Revised Sheet Nos. 67A and 67B.

filed by CIG in accordance with the provisions of the Natural Gas Act.

(C) Nineteenth Revised Sheet Nos. 5 and 6 are hereby deemed to be withdrawn by CIG.

(D) Second Revised Sheet Nos. 63, 64 and 65, Twelfth Revised Sheet No. 66 and Second Revised Sheet Nos. 67 A and B are hereby rejected.

(E) The Commission staff shall prepare and serve top sheets on all parties, on or before November 30, 1977.

(F) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (18 CFR 3.5(d)), shall convene a settlement conference in this proceeding to be held within 10 days after the service of top sheets by the staff, in a hearing or conference room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary and to rule upon all motions (except motions to consolidate, sever, or dismiss), as provided for in the rules of practice and procedure.

(G) CIG's request for waiver of Section 154.63(e)(2)(ii) of the Commission's regulations is hereby granted *provided, however*, that CIG file revised tariff sheets and supplemental cost and revenue data on or before January 1, 1978, which shall reflect the exclusion of costs associated with facilities not certificated and placed in service as of December 31, 1977 and which shall reflect the actual advance payment balance in Account No. 166 as of December 31, 1977.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22252 Filed 8-3-77;8:45 am]

[Docket Nos. ER77-411, ER77-412, ER77-413, ER77-414, ER77-415, and ER77-416]

ILLINOIS POWER CO.

Order Waiving Notice Provisions, Accepting for Filing and Suspending Proposed Increased Rates

JULY 26, 1977.

On June 30, 1977, Illinois Power Company (Company) tendered for filing proposed increases in its demand charges for short-term firm capacity and for Maintenance Power Capacity for service to seven municipals.[1] The filing would increase the Company's revenues by $151,148 or 16.67 percent, based on the 12-month period ending April 30, 1977, for this service. Company requests waiver of the notice provisions in order to permit acceptance of its filing effective July 1, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: Good cause exists to waive the notice provision, accept for filing and suspend the proposed increased rates and charges tendered by the Company on June 30, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on June 30, 1977, are hereby accepted for filing effective July 1, 1977, with the request for waiver of the notice provisions hereby granted.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations Under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company on June 30, 1977.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company on June 30, 1977, are hereby suspended and the use thereof deferred until July 2, 1977, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RI77-51]

WALTER K. ARBUCKLE, ET AL.

Order Granting Petition for Special Relief and Permitting Intervention

JULY 26, 1977.

On March 29, 1977, Walter K. Arbuckle, et al. (Arbuckle) filed a petition for special relief pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 C.F.R. § 2.76) for the sale of natural gas to Colorado Interstate Gas Company (CIG) from the UPRR Chace No. 1 Well and the UPRR Irene No. 1 Well, Simpson Ridge Field, Carbon County, Wyoming. Subsequently, Arbuckle filed additional information on June 21, 1977.

Arbuckle is an independent small producer which was issued a small producer certificate in Docket No. CS75-81 on October 4, 1974. Holding a 100 percent working interest in the leases, Arbuckle is presently selling natural gas from the Chace Well to CIG at a rate of 17.9 cents per Mcf at 14.65 psia pursuant to a contract dated September 25, 1967.

In order to increase production to an economically viable level in the Chace Well and to begin production in the Irene Well which is presently shut-in, Arbuckle plans to install, maintain and operate gas compression equipment. Without such equipment, abandonment is imminent. Therefore, Arbuckle requests that the Commission authorize it to collect $1.05 per Mcf for the sale of natural gas to CIG.

In an amendment to their gas purchase agreement, executed March 15, 1977, CIG formally expressed its willingness to increase the price on the compressed gas to compensate seller for the cost of compression and provide a fair return on Arbuckle's interest in the above stated wells.

Notice of Arbuckle's petition for special relief was issued on April 6, 1977 and was published in the FEDERAL REGISTER. CIG filed a timely petition to intervene.

Based on an analysis of data submitted by Arbuckle, Staff estimates that 566,199 Mcf remain to be produced over a period of four years from the Chace Well. Production from the Irene Well has never been established. Staff concludes that the requested special relief is warranted on a cost basis.[1]

After reviewing the costs to be incurred, and the reserves to be recovered, we determine that Arbuckle's petition for special relief is warranted and that it is in the public interest to grant this petition.

The Commission finds: The petition for special relief filed by Arbuckle meets the criteria set forth in Section 2.76 of the Commission's General Policy and Interpretations.

The Commission orders: (A) The petition for special relief of Arbuckle is hereby granted.

(B) Arbuckle is authorized to collect $1.05 per Mcf at 14.65 psia for the natural gas from the Chace Well and the Irene Well, Simpson Ridge Field, Carbon County, Wyoming, effective upon either the date of issuance of this order or the date the remedial work is completed, whichever is later.

(C) The authorization is subject to the following conditions: (1) Within 30 days of the date of issuance of this order, Arbuckle must file the appropriate rate change filings in accordance with Section 154.94 of the Commission's Regulations under the Natural Gas Act (18 C.F.R. §154.94); (2) Within 30 days of the effective date provided in Ordering Paragraph (B) above for the rate authorized herein, Arbuckle must file a statement signed by CIG in Docket No. RI77-51 setting forth the date on which the remedial work was completed.

(D) CIG is permitted to intervene in the above-entitled proceeding, subject to the Rules and Regulations of the Commission; *Provided, however*, that its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene; and *Provided, further*, that the admission of CIG in the manner provided shall not be construed as recognition by the Commission that CIG might be aggrieved because of any order or orders entered in this proceeding, and that CIG agrees to accept the record as it now stands.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-331]

CENTRAL POWER AND LIGHT CO.

Initial Rate Schedule Filing

JULY 28, 1977.

Take notice that on July 11, 1977, Central Power and Light Company ("Company") tendered for filing as initial rate schedules the Company's contracts and service agreements under which it provides wholesale electric service to various electric cooperatives, municipalities, and government agencies. The Company indicates that based on sales, revenue, and cost studies submitted with the filing the Company shows a rate of return of 3.39 percent on wholesale service for the 12-month period ending December 31, 1976. According to the Company copies of the filing have been served on the Company's jurisdictional wholesale customers and upon the Public Utility Commission of the State of Texas.

The Company states that no changes to the rate schedules, contracts, and service agreements are proposed in the initial filing.

Any person desiring to be heard or to protest the application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22340 Filed 8-3-77;8:45 am]

[Docket No. ER76-151]

DELMARVA POWER & LIGHT CO. AND SUBSIDIARIES

Order Approving Settlement

JULY 28, 1977.

On January 17, 1977, the Presiding Administrative Judge in these proceedings certified to the Commission the proposed Settlement Agreement entered into by Delmarva Power & Light Company and Subsidiaries (Delmarva) and the Public Service Commission of the State of Delaware and the State Corporation Commission of the State of Virginia. The Commission finds that with the modifications as stated below, the settlement agreement is in the public interest and accepts and approves it as hereinafter ordered and conditioned.

Proceedings in this docket were initiated on September 29, 1975 when Delmarva Power and Light Company and its wholly owned Maryland and Virginia affiliates filed for an increase in the earned rate of return allowable in the Power Supply Agreement which governs their power pooling transactions on a cost of service basis. The increase proposed would have been from 8.625% to 9.9% including a 15.4% return for common equity at December 31, 1975. By order of October 31, 1975, the Commission accepted the filing, suspended it for ninety days to become effective subject to refund on January 31, 1976. Formal and informal settlement conferences among the parties resulted in the proposed settlement agreement which provides for a system-wide 9.2% overall allowable rate of return.

Public notice of the filing and certification was issued on February 17, 1977, with comments due on or before March 9, 1977. Comments were received from the Public Service Commission of Maryland on February 4, 1977, which stated that it neither supports nor opposes the settlement. Staff filed comments generally supporting the settlement on March 10, 1977, but observing that the agreement does not provide for interest on refunds as required by Commission Order No. 513-A.

Additionally, by supplementary comments of May 31, 1977, Staff recommended that increased monthly payments to the Delaware company for periods prior to the settlement approval be limited to amounts collected subject to refund in ER 76-151. No objections were received to Staff's recommendation. We believe that the recommendations made by Staff are in the public interest and should be adopted.

The Commission finds: The proposed Settlement Agreement should be approved and made effective as hereinafter ordered and conditioned.

The Commission orders: (A) The Settlement Agreement certified to the Commission in these proceedings on January 17, 1977, is hereby accepted as of the date of issuance of this order, incorporated herein by reference and approved, subject to the following conditions.

(B) Within 30 days from the date of this order, Delmarva shall file the revised Power Supply Agreement. This compliance filing shall include monthly billing data under the proposed settlement rates for the period commencing January 30, 1976, to June 30, 1977. Such billing data shall address the following specific considerations:

(a) With respect to that portion of the tax effect of liberalized depreciation which is to be continued on a "flow-thru" basis, the intent is evidently to clarify without affecting the end result. To accomplish this purpose in the proposed billing procedure, it is necessary to apply the appropriate tax factor in determination of the tax effect of "flow-thru" depreciation.

(b) The billing format should be designed to reflect the inclusion of a provision for deferred income taxes applicable to that portion of liberalized depreciation for which normalization is claimed, and clearly delineate the basis upon which normalized is distinguished from "flow-thru" depreciation

(C) Within 30 days after the compliance rate filings are accepted for filing, Delmarva shall refund any excess revenues collected, if any with interest computed at 9% per annum.

(D) Refund obligations to be determined on a monthly basis comparing rates under (1) the proposed increase and (2) settlement rates. Where the proposed rates collected subject to refund in any given month exceed the settlement rates, the excess shall be refunded with interest at 9% as ordered above.

(E) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against PG&E or any person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22347 Filed 8-3-77;8:45 am]

[Docket No. CP77-289]

EL PASO NATURAL GAS CO.

Amendment to Application

JULY 27, 1977.

Take notice that on July 19, 1977, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP77-289 an amendment to its application filed in said docket pursuant to Section 7(c) of the Natural Gas Act so as to provide for the construction and operation of certain compressor and pipeline facilities and the relocation and modification of certain metering facilities and the sale, delivery and transportation of natural gas as necessary to assist Applicant in effectuating the Clay Basin Interim Storage Arrangements for the future protection of service to its East of California (EOC) customers' Priority 1 and 2 requirements, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

It is stated that on March 11, 1977, in Docket No. CP77-289, and on March 10, 1977, in Docket No. CP76-285, Applicant and Mountain Fuel Resources, Inc., (Resources), respectively, filed applications for authorization to commence the immediate installation of those facilities necessary to permit additional injections of gas into Resources' Clay Basin Storage Field (Clay Basin Field), located in Daggett County, Utah, so as to allow Applicant to store natural gas volumes for later use in protecting its EOC customers' Priority 1 and 2 requirements, pursuant to certain storage arrangements between Applicant, Resources and Northwest Pipeline Corporation (Northwest). It is indicated that on March 17, 1977, in Docket Nos. CP77-289 and CP76-285, Applicant and Resources, respectively, received temporary certificates authorizing the construction and installation of those facilities described in their respective applications. It is further indicated that on June 6, 1977, Applicant and Resources each filed with the Commission amendments to their respective applications seeking limited term authorization to operate the Clay Basin Field facilities which were authorized to be constructed under such temporary certificates in order to permit greater injections of gas into the Clay Basin Field for the account of Northwest. On July 1, 1977, Applicant and Resources received temporary certificates authorizing the operation of the subject facilities, it is said.

It is stated that the Clay Basin Interim Storage Arrangements contemplate that (1) during the period commencing May 1, 1977, and extending through April 30, 1978, Applicant will deliver to Northwest, at certain points of interconnection between their respective facilities in the San Juan Basin area of northwest New Mexico and southwest Colorado, for transportation and delivery by Northwest to Resources at a point of interconnection between Northwest's interstate mainline system and Resources' Clay Basin lateral pipeline near Dutch John, Utah, certain quantities of gas which would otherwise be sold and delivered by Applicant in satisfaction of its customers' Priority 3, 4 and 5 requirements, (ii) Resources will receive from Northwest, transport, inject and store such quantities in the Clay Basin Field, and (iii) equivalent quantities will be redelivered by Northwest to Applicant at a delivery point in southwest Colorado from time to time during the period November 1, 1977, through December 31, 1979, and so long thereafter as required to eliminate any imbalances in previous redeliveries.

Additionally, to facilitate the financing of the quantities of gas to be stored in the Clay Basin Field, Applicant has entered into various arrangements with Clay Basin Storage Company (Storage Company) whereby Applicant has assigned its agreements with Northwest and Resources, respectively, to Storage Company for implementation of the Clay Basin Interim Storage Arrangements, and has otherwise provided for the purchase and subsequent disposition by Storage Company of such stored volumes, it is indicated.

Specifically, by this amendment, Applicant seeks authorization to:

(i) Construct and operate certain compressor and pipeline facilities and relocate and modify metering facilities necessary to effectuate the Clay Basin Interim Storage Arrangements;

(ii) Sell certain quantities of gas to Storage Company and deliver such quantities to Northwest, for the account of Storage Company, at existing points of interconnection between the facilities of Applicant and Northwest located in the San Juan Basin; and

(iii) Receive at a point of interconnection with Northwest's facilities in southwest Colorado; transport and deliver to the purchasers thereof, for the account of Storage Company, through use of Applicant's existing interstate system, gas volumes which are redelivered to Applicant by Northwest for Storage Company's account.

Applicant asserts that requested authorization would materially assist it in its efforts to provide for the protection of service for the Priority 1 and 2 requirements of its EOC customers in future winters.

Applicant indicates that it would sell certain quantities of gas to Storage Company and would deliver such quantities to Northwest, for Storage Company's account, as set forth in the Interim Storage Agreement dated July 6, 1977, between Applicant and Storage Company. It is stated that such quantities of gas would be made available by Applicant through the assignment of a system-wide Priority 2 classification to the sales so to be made to Storage Company (and deliveries to be made to Northwest for Storage Company's account), thereby effectively utilizing quantities which would otherwise be available for system-wide sale and delivery by Applicant for use in serving requirements classified in Priorities 3, 4 and 5. It is indicated that Applicant anticipates that it would sell some 16,700,000 Mcf of gas to Storage Company (and deliver such quantity to Northwest for the account of Storage Company) during the period continuing through April 30, 1978. Applicant states that Storage Company would pay it a rate equivalent to the rate in effect at the time of sale under Rate Schedule G of Applicant's FPC Gas Tariff, Original Volume No. 1, for all sales made to it, and that the quantities so purchased by Storage Company would be transported by Northwest and delivered to Resources for injection into the Clay Basin Field.

It is indicated that Applicant and Northwest have entered into a Gas Transportation and Exchange Agreement dated March 24, 1977, which agreement has been assigned to Storage Company. It is stated that pursuant to such agreement Northwest would accept deliveries from Applicant for Storage Company's account on a best efforts basis, at various delivery points in the San Juan Basin area, during the period commencing on the date of first deliveries and extending through April 30, 1978; such deliveries not to exceed the daily capacity available in Northwest's transmission facilities for the receipt and transportation of Storage Company's gas as such capacity may exist from time to time. Applicant states that Northwest would concurrently deliver equivalent quantities on a Btu basis to Resources at a point of interconnection between Northwest's facilities and Resources' Clay Basin lateral pipeline for injection and storage by Resources in the Clay Basin Field for Storage Company's account.

Further, from time to time during the period November 1, 1977, through December 31, 1979, and so long thereafter as required to correct any previous imbalances, Northwest would deliver to Applicant for Storage Company's account, quantities of gas equivalent on a Btu basis to the quantities which Northwest previously so received from Applicant and transported and delivered to Resources for Storage Company's account; such deliveries of gas to Applicant for Storage Company's account to be made at the point of interconnection of Applicant's and Northwest's existing systems situated near Ignacio, Colorado, it is said. It is indicated that by the gas transportation and exchange agreement the redelivery of such equivalent quantities by Northwest to Applicant for Storage Company's account would be made by exchanging volumes otherwise available to Northwest in the San Juan Basin area for the quantities held by Resources for Storage Company's account in the Clay Basin Field. However, it is asserted that in the event that during the term of said agreement, Applicant has an emergency on its system requiring additional volumes to protect service to the Priority 1 and 2 requirements to its EOC customers,

the agreement also provides that Northwest would use its best efforts to effectuate earlier redelivery of such quantities of Storage Company's gas then stored in the Clay Basin Field as can be so redelivered without (i) reducing the aggregate of the quantities of gas then stored in the Clay Basin Field for the accounts of both Storage Company and Northwest below 27,000,000 Mcf, and (ii) prejudicing Northwest's ability to insure deliveries to its own high priority customers.

It is indicated that the parties have agreed that Northwest would be reimbursed for such transportation and exchange service as follows:

(i) Storage Company shall pay Northwest a rate of 16.03 cents per Mcf for transporting gas from the points by Northwest to Resources;

(ii) Storage Company shall purchase from Northwest at Northwest's average cost of purchased gas, as it may be from time to time, all compressor fuel attributable to the transportation of gas which Northwest receives from Applicant for Storage Company's account, including the fuel consumed by Applicant's temporary compression facilities, and the fuel requirements of Resources, which requirements are attributable to the injection of the gas which it receives from Northwest for Storage Company's account; and

(iii) For gas redelivered by Northwest to Applicant for Storage Company's account in the event of an emergency on Applicant's system requiring increased volumes of gas to insure deliveries to meet Priority 1 and 2 requirements of Applicant's EOC customers, Storage Company shall reimburse Northwest for all withdrawal costs incurred by Northwest in connection with such emergency deliveries under Resources's Storage Service Rate Schedule S–1.

Applicant indicates that Resources would accept delivery on a best efforts basis of the gas volumes transported and delivered to Resources by Northwest, for Storage Company's account, and would transport and inject such gas into the Clay Basin Field during the period extending through April 30, 1978. Applicant further indicates that the point at which Resources is to receive such gas from Northwest is the point of interconnection between the pipeline facilities of Resources and Northwest located near Dutch John Daggett County, Utah, and that storage of the gas volumes received by Resources, for the account of Storage Company, would be accomplished pursuant to an agreement dated March 21, 1977, between Storage Company (as Applicant's assignee), Resources and Northwest which is on file with the Commission as Resource's Interim Storage Service Rate Schedule S–2. As set forth in such Rate Schedule S–2, the quantities of gas which Resources has so undertaken to receive from Northwest for Storage Company's account, and to inject and store in the Clay Basin Field, are those quantities up to the maximum volumes of gas which can be injected and stored in excess of those volumes delivered by Northwest to Resources for its own account pursuant to arrangements between those parties, it is stated.

It is stated that upon redelivery by Northwest to Applicant for Storage Company's account, Applicant proposes to transport and deliver the quantities of gas so received by use of its existing interstate system pursuant to the Interim Storage Agreement, and that such arrangements contemplate the use of such quantities either in connection with other, long-term storage projects for the protection of Priority 1 and service to Applicant's EOC customers in future winters, or directly, for the immediate protection of such EOC Priority 1 and 2 requirements during the 1977–78 and 1978–79 winter season, and through December 31, of the 1979–80 winter season, to the extent such quantities can be made available by Northwest during those winter periods under the terms of the gas transportation and exchange agreement.

Applicant states that it and its major EOC distributor customers (Arizona Public Service Company, Southern Union Company, Southwest Gas Corporation and Tucson Gas and Electric Company) have entered into agreements providing for the purchase by said EOC Distributors of such stored supplies under certain terms and conditions which enable the disposition of such stored quantities in a manner which would contribute to the protection of service of the Priority 1 and 2 requirements of all EOC customers. These arrangements contemplate that such quantities of gas would be billed by Storage Company to the EOC Distributors and that Applicant would make a concurrent adjustment in its billings to the EOC Distributors to reflect a portion of the gas which the EOC Distributors received from Applicant as purchased from Storage Company rather than Applicant, it is indicated. It is stated that such sales by Storage Company would be made at a rate equivalent to the rate in effect at the time of delivery for Applicant's own sales of gas to the respective distributor customers at the respective sales point locations.

Applicant states that in addition to the certificate authorization necessary to implement the Clay Basin Interim Storage Arrangement, Applicant would require modification of the currently effective Priorities and curtailment provisions of its FPC Gas Tariff respecting Rules Concerning Storage Operation To Protect Priorities 1 and 2 and Surcharge Related to Storage Operations. These currently effective provisions provide for storage service on Applicant's interstate system for protection of Applicant's EOC customers' Priority 1 and 2 requirements, it is said.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before August 23, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22339 Filed 8-3-77;8:45 am]

[Docket No. ER77-440]

GREEN MOUNTAIN POWER CORP.

Proposed Tariff Change

JULY 28, 1977.

Take notice that Green Mountain Power Corporation (GMPC) on July 12, 1977 tendered for filing proposed changes in its FPC Electric Service Tariff as filed with the Federal Power Commission on May 23, 1972 (Docket No. E–7878). GMPC indicates that the Docket No. E–7878 pertained to a transmission and generation contract between Green Mountain Power Corporation and Central Vermont Public Service Corporation (CVPS). GMPC further indicates that these contracts terminated May 31, 1977. GMPC states that the proposed tariff changes were brought about when both parties (GMBC and CVPS) agreed to extend the terms of the agreements from June 1, 1977 through October 31, 1977, subject to the following changes: the generation and transmission contracts were amended to provide that GMPC would sell and transmit to CVPS, 15 MW of capacity and associated energy from its No. 5 gas turbine plant, located in Berlin, Vermont.

According to GMPC copies of this filing have been sent to the Vermont Public Service Board and to Central Vermont Public Service Corporation.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22342 Filed 8-3-77;8:45 am]

[Docket No. ER77-498]

IOWA-ILLINOIS GAS AND ELECTRIC CO.

Proposed Tariff Change

JULY 28, 1977.

Take notice that Iowa-Illinois Gas and Electric Company (Applicant), on July 5, 1977, tendered for filing pursuant to section 35.13 of the regulations under the Federal Power Act a proposed change in its Rate Schedule WES–M (applicable only to the cities of Buffalo, Callender, and Farnhamville, Iowa), FPC Wholesale Electric Tariff, Original Volume No. 1. The change, proposed to be effective October 1, 1977, would increase revenues from jurisdictional sales and service by $42,425 based on the 1976 test period, according to Applicant.

Applicant states that the reason for the proposed increased revenues is because its operating income has declined to a level which provides an inadequate return. Applicant further states that it is essential in the interest of preserving its financial integrity that its revenues and operating income be restored to a level to adequately meet the operating expenses necessary to provide good electric service and to attract the additional capital needed.

Applicant proposes an effective date of October 1, 1977, and there requests waiver of the Commission's notice requirements.

According to Applicant copies of the filing were served upon the cities of Buffalo, Callender, and Farnhamville, Iowa, and the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22346 Filed 8-3-77;8:45 am]

[Docket No. ER77-427]

MINNESOTA POWER & LIGHT CO.

Order Granting Intervention, Denying Motion to Reject, Denying Motion for Reconsideration, and Establishing Additional Procedures

JULY 28, 1977.

On July 1, 1977, the Commission issued an order in the above-entitled proceeding that, inter alia, accepted for filing the proposed rate increases submitted by the Minnesota Power and Light Company (MPL) to 17 municipalities[1], two rural electric cooperatives[2], MPL's wholly-owned subsidiary[3] and one transmission service customer[4]. In addition, the Commission established certain procedures and suspended the proposed rate increases for 5 months, to become effective December 8, 1977, subject to refund.

On June 28, 1977, several wholesale customers (Petitioners) filed a document entitled "Protest Of Named Wholesale Customers; Request For Rejection Of Tendered Rate Schedules or, In The Alternative, Full Term Suspension Thereof; And Petition To Intervene".

In support of their petition to intervene, the Petitioners state that: (1) Petitioner Stuntz Cooperatives Light & Power Association owns and operates a system for retail distribution of electric power and energy as a REA cooperative; (2) the remaining Petitioners own and operate a municipal electric distribution system and are engaged in the retail distribution of electric power and energy in and around their respective community; and (3) the Petitioners purchase electric power and energy from MPL at wholesale for resale, except the City of Wadena which purchases electric power and energy at wholesale from the United States Bureau of Reclamation, which is transmitted to Wadena over the facilities of Otter Tail Power Company and MPL. Our review indicates that the Petitioners have shown sufficient justification for permitting them to participate as intervenors in this proceeding.

In support of their motion to reject or, in the alternative, suspend for 5 months, the Petitioners have raised several issues concerning the proposed rate increases. We will not reject MPL's filing. For it was noted in *Municipal Light Boards* v. *F.P.C.*, 450 F. 2d 1341, 1346 (1971), that:

> A "rejection" of a filing * * * is more like a motion to dismiss on the face of the pleading, and indeed goes even beyond that. It is appropriate where the filing is so deficient on its face that the agency may properly return it to the filing party without even awaiting a responsive filing by any other party in interest.

In this case, MPL's filing is not deficient on its face and, therefore, rejection is not appropriate. Petitioners alternate request for a five-month suspension period has been mooted by our order of July 1, 1977, which suspended the proposed filing for 5 months. Petitioners have alleged a "price squeeze" issue and to conform with our Order No. 563, additional procedures must be set so as to effectuate these policies. We will direct the Administrative Law Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioners' request for data required to present their case, including a prima facie showing, on the price squeeze issue.

On July 12, 1977, MPL submitted for filing a document entitled "Answer of Minnesota Power & Light Company To Protest And Petition To Intervene of Wholesale Customers" (Answer), and a second document entitled "Motion For Reconsideration." In its Answer, MPL essentially denies the allegations raised by the Petitioners in their pleading. In support of its Motion for Reconsideration of the July 1st Order, MPL states that the Commission failed to consider, that the June 8th filing reflects major changes in MPL's overall costs incurred as the result of the commencement of commercial operation of the Square Butte Project (a 340 million nine-month generating plant and higher voltage system leased and operated by the Square Butte Electric Cooperative). Our July 1st Order found that a hearing should be held on the question of the lawfulness of MPL's filing and suspended that filing for 5 months to become effective December 8, 1977, subject to refund. However, none of the arguments presented convince us that a change in the suspension period is warranted. The length of a suspension period is within the Commission's discretion. *Municipal Light*

[1] See Attachment.

[2] The rural electric cooperative customers and their respective rate schedules are:
Supplement No. 7 to Rate Schedule FPC No. 112 (Supersedes Supplement No. 6). Stuntz Cooperative Light & Power Association—Schedule 86.
Supplement No. 10 to Rate Schedule FPC No. 52 (Supersedes Supplement No. 8). United Power Association—Schedule 86.
Supplement No. 10 to Rate Schedule FPC No. 53 (Supersedes Supplement No. 9). United Power Association (Itasca)—Schedule 86.

[3] MPL's wholly-owned subsidiary and its rate schedules are described and designated as follows:
Supplement No. 11 to Rate Schedule FPC No. 118 (Supersedes Supplement No. 9), Superior Water, Light & Power Company—Schedule 94.
Supplement No. 12 to Rate Schedule FPC No. 118 (Supersedes Supplement No. 10). Rider for Standby Service.
By order dated July 21, 1977, the Commission consolidated Docket Nos. ER77-427 and ER77-473. In Docket No. ER77-473, Superior Water, Light & Power Company (Superior) submitted for filing an increase in rates for service to Dahlberg Light and Power Company. Superior stated that the purpose of the proposed increase is to recover a proportionate share of the increased cost of power purchased from MPL due to MPL's proposed rate increase in Docket No. ER77-427.

[4] The July 1st order states that MPL proposed a rate increase to 3 transmission service customers (City of Wadena, United Power Association and City of Virginia). That statement is inaccurate. MPL proposed a rate increase to one transmission service customer (City of Wadena) inasmuch as MPL's contract to service the City of Wadena permits MPL to unilaterally seek changes in the rates for service to the City of Wadena. MPL is precluded by contract from increasing the transmission service rate to United Power Association (UPA) prior to June 18, 1979. Consequently, no increase in rates to UPA is being sought in this proceeding. In addition, the City of Virginia is not a transmission service customer nor a purchaser of firm power from MPL.

Boards v. *F.P.C.*, 450 F. 2d 1341 (D.C. Cir. 1971). The pleadings before us, in our judgment, sustain the 5 months suspension period.

The *Commission finds:* (1) Good cause exists to deny the motion to reject MPL's filing.

(2) Good cause exists to deny MPL's Motion for reconsideration.

(3) Good cause exists to establish additional procedures to effectuate the Commission's policy announced in Order No. 563.

(3) Good cause exists to establish additional procedures to effectuate the Commission's policy announced in Order No. 563.

(4) The participation in this proceeding of Village of Aitkin, City of Biwabik, City of Brainerd, Village of Buhl, City of Ely, City of Gilbert, Village of Grand Rapids, Village of Hibbing, Village of Keewatin, Village of McKinley, Village of Mountain Iron, Village of Naswauk, City of Staples, City of Two Harbors, City of Virginia, City of Wadena and Stuntz Cooperative Light and Power Association may be in the public interest.

The *Commission orders:* (A) The motion to reject and motion for reconsideration are hereby denied.

(B) The Administrative Law Judge shall convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioners' request for data required to present their case, including a *prima facie* showing, on the price squeeze issue. Also, MPL shall be required to respond to the discovery requests authorized by the Administrative Law Judge within 30 days, and the Petitioners shall file their case-in-chief on the price squeeze issue within 30 days after MPL's response.

(C) The Village of Aitkin, City of Biwabik, City of Brainerd, Village of Buhl, City of Ely, City Gilbert, Village of Grand Rapids, Village of Hibbing, Village Keewatin, Village of McKinley, Village of Mountain Iron, Village of Naskwauk, City Staples, City of Two Harbors, City of Virginia, City of Wadena and Stuntz Cooperative Light and Power Association are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations by the Commission; *Provided, however*, that the participation of such intervenors shall be limited to matters affecting the rights and interests specifically set forth in their petition to intervene; and *Provided, further*, that the admission of such intervenors shall not be construed as recognition that they or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(D) The order of July 1, 1977, issued in this proceeding shall remain in full force and effect except as hereinabove modified.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

Minnesota Power & Light Co., Municipal Rate Schedule Designations
Docket No. 77-427
(Filed June 8, 1977)

	Designations	Descriptions
(1)	Supp. No. 9 to rate schedule FPC No. 103 (supersedes Supp. No. 7).	City of Biwabik—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 103 (supersedes Supp. No. 8).	Rider for standby service.
(2)	Supp. No. 9 to rate schedule FPC No. 96 (supersedes Supp. No. 7).	City of Brainerd—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 96 (supersedes Supp. No. 8).	Rider for standby service.
(3)	Supp. No. 9 to rate schedule FPC No. 104 (supersedes Supp. No. 7).	City of Ely—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 104 (supersedes Supp. No. 8).	Rider for standby service.
(4)	Supp. No. 9 to rate schedule FPC No. 106 (supersedes Supp. No. 7).	City of Gilbert—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 106 (supersedes Supp. No. 8).	Rider for standby service.
(5)	Supp. No. 9 to rate schedule FPC No. 100 (supersedes Supp. No. 7).	Village of Grand Rapids—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 100 (supersedes Supp. No. 8).	Rider for standby service.
(6)	Supp. No. 9 to rate schedule FPC No. 107 (supersedes Supp. No. 7).	Village of Keewatin—schedule 85).
	Supp. No. 10 to rate schedule FPC No. 107 (supersedes Supp. No. 8).	Rider for standby service.
(7)	Supp. No. 9 to rate schedule FPC No. 117 (supersedes Supp. No. 7).	Village of McKinley—schedule 85.
	Supp. 10 to rate schedule FPC No. 117 (supersedes Supp. No. 8).	Rider for standby service.
(8)	Supp. No. 9 to rate schedule FPC No. 123 (supersedes Supp. No. 7).	Village of Mountain Iron—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 123 (supersedes Supp. No. 8).	Rider for standby service.
(9)	Supp. No. 9 to rate schedule FPC No 116 (supersedes Supp. No. 7).	Village of Naskwauk—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 116 (supersedes Supp. No. 8).	Rider for standby service.
(10)	Supp. No. 9 to rate schedule FPC No. 98 (supersedes Supp. No. 7).	Village of Pierz—schedule 85
	Supp. No. 10 to rate schedule FPC No. 98 (supersedes Supp. No. 8).	Rider for standby service.
(11)	Supp. No. 9 to rate schedule FPC No. 115 (supersedes Supp. No. 7).	Village of Proctor—schedule 88
	Supp. No. 10 to rate schedule FPC No. 115 (supersedes Supp. No. 8).	Rider for standby service.
(12)	Supp. No. 9 to rate schedule FPC No. 99 (supersedes Supp. No. 7).	Village of Rondall—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 99 (supersedes Supp. No. 8).	Rider for standby service.
(13)	Supp. No. 14 to rate schedule FPC No. 111 (supersedes Supp. No. 12).	City of Staples—schedule 85.
	Supp. No. 15 to rate schedule FPC No. 111 (supersedes Supp. No. 13).	Rider for standby service.
(14)	Supp. No. 2 to rate schedule FPC No. 124 (supersedes Supp No. 1).	City of Two Harbors—schedule 85.
(15)	Supp. No. 12 to rate schedule FPC No. 119 (supersedes Supp. No. 10).	Village of Aitkin—schedule 85.
	Supp. No. 13 to rate schedule FPC No. 119 (supersedes Supp. No. 11).	Rider for standby service
(16)	Supp. No. 9 to rate schedule FPC No. 121 (supersedes Supp. No. 7).	Villages of Aitkin—schedule 85.
	Supp. No. 10 to rate schedule FPC No. 121 (supersedes Supp. No. 8).	Rider for standby service
(17)	Supp. No. 9 to rate schedule FPC No. 105 (supersedes Supp. No. 8).	Village of Hibbing—schedule 85.

[Docket No. ER77-436]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 28, 1977.

Take notice that Niagara Mohawk Power Corporation, (Niagara), on July 7, 1977, tendered for filing as a rate schedule, an agreement between Niagara and Central Gas & Electric Corporation (CG&E), dated April 12, 1977.

Niagara states that there is presently on file an agreement with CG&E dated February 14, 1975, and that this agreement is designated as Niagara Mohawk Power Corporation Rate Schedule FPC No. 88. Niagara further states that the new agreement is being submitted as a supplement to the existing agreement.

According to Niagara this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-418]

NORTHERN INDIANA PUBLIC SERVICE CO.

Notice of Memorandum

JULY 28, 1977.

Take notice that on July 7, 1977, Northern Indiana Public Service Company (Northern Indiana) tendered for filing Memorandum No. 69 providing for use of release capacity under the Supplemental Electric Service Agreement between Commonwealth Edison Company of Indiana, Inc. and Northern Indiana dated January 1, 1960, as amended.

Northern Indiana requests waiver of the Commission's notice requirements to allow for an effective date of July 1, 1976.

Northern Indiana indicates that copies of the filing were served upon Commonwealth Edison Company of Indiana, Inc. and the Public Service Commission of Indiana.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22341 Filed 8-3-77;8:45 am]

[Docket No. CP77-508]

NORTHERN NATURAL GAS CO.

Application

JULY 25, 1977.

Take notice that on July 13, 1977, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP77-508 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 250 Mcf of natural gas per day for the City of Perryton, Texas (Perryton), and the construction and operation of certain facilities required for the receipt and redelivery of such gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant seeks authorization to transport the proposed volumes of natural gas for Perryton pursuant to a gas transportation agreement dated June 28, 1977, between Applicant and Perryton. Applicant states that Perryton has contracted for the purchase of natural gas from Alpar Resources, Inc. (Alpar), and that such gas would be used by Perryton's high priority customers. It is stated that Perryton has advised Applicant that its current daily entitlements from its supplier, High Plains Natural Gas Company, are not adequate to meet the peak day requirements of the high priority customers served by Perryton. It is asserted that the contract to purchase gas from Alpar and the transportation service requested of Applicant are an effort on the part of Perryton to assure adequate and reliable service to such high priority customers.

Applicant proposes to transport up to 250 Mcf of natural gas per day for Perryton from the point of receipt from Alpar in Hemphill County, Texas and would redeliver equivalent volumes to Perryton in Ochiltree County, Texas. It is indicated that Perryton would pay Applicant 1.0 cent per Mcf for all gas transported and redelivered to Perryton by Applicant pursuant to the terms of the agreement.

Applicant also proposes to construct and operate a side valve and meter at the point of receipt of gas from Alpar in Hemphill County, Texas and a side valve and meter at the point of redelivery to Perryton in Ochiltree County, Texas, in order to accommodate the receipt of gas from Alpar and the redelivery of gas to Perryton. The estimated cost of the proposed facilities is $22,095; Perryton has agreed to reimburse Applicant for the total actual cost of constructing such facilities, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-407]

OHIO EDISON CO.

Proposed Tariff Change

JULY 28, 1977.

Take notice that Ohio Edison Company (Ohio) on July 11, 1977, tendered for filing a proposed change in its FPC electric service tariff FPC No. 66, an Amendment No. 1 to the Interconnection Agreement between The Dayton Power and Light Company and Ohio Edison Company. Ohio indicates that the Amendment provides for a new rate for short term power approximating the cost of such service so as to make sale of such power feasible.

According to Ohio a copy of the filing was served upon The Dayton Power and Light Company with whom the new agreement has been reached and a copy of the filing was also served upon The Public Utilities Commission of Ohio.

Ohio requests an effective date of August 12, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-422]

PUBLIC SERVICE COMPANY OF OKLAHOMA

Order Accepting for Filing and Suspending Notices of Cancellation and Providing for Expedited Hearing; Correction

JULY 7, 1977.

In FR Doc. 77-19500 appearing on page 35204 in the issue for Friday, July 8, 1977, insert under "The Commission orders:"

"(C) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall establish a hearing date on an expedited basis in a hearing or conference room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Said Presiding Administrative Law Judge is hereby authorized to establish all procedural dates and to rule upon all motions (with the exceptions of petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Rules of Practice and Procedure."

Ordering paragraphs "(C)" and "(D)" in the June 30, 1977 order should be redesignated "(D)" and "(E)" respectively. This notice was issued by the Federal Power Commission on June 30, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22348 Filed 8-3-77;8:45 am]

[Project No. 1862, Docket No. E-6454]

CITIES OF TACOMA AND CENTRALIA, WASHINGTON

Order Granting Motions for Joinder and Consolidating Proceedings

JULY 21, 1977.

The City of Tacoma, Washington, on January 26, 1977, as licensee of Project No. 1862 on the Nisqually River, moves the Commission to order the City of Centralia, Washington, to be joined as a necessary party to these proceedings, or alternatively to apply for a project license. Centralia on February 14, 1977, and March 11, 1977, filed responses objecting to the motion. The Commission staff filed a response on February 10, 1977, supporting Tacoma's motion, and the Washington State Department of Fisheries and Department of Game (Fisheries and Game) on February 14, 1977, filed a response opposing Tacoma's motion.

On February 17, 1977, the staff filed a motion in Docket No. E-6454 asking the Commission to issue a show cause order, or other appropriate action, directed to Centralia to require it to show why it should not file an application for a license with respect to its Yelm Project on the Nisqually River, and comments in opposition were filed by Centralia on March 25, 1977. Fisheries and Game petitioned to intervene on March 15, 1977.

On October 14, 1941, the Commission issued a license to the City of Tacoma for Project No. 1862, including the Alder and LaGrande Dams (2 FPC 1052). On December 27, 1974, the Nisqually Indian Tribe filed a petition alleging that it was not notified that the project would involve lands of the reservation and would appropriate its treaty rights to hunt and fish, and also requesting that Tacoma be required to provide fish conserving facilities. By order of October 26, 1976, the Commission ordered a hearing on these matters.

In its motion of January 26, 1977, to which is attached an affidavit of J. D. Cockrell, Superintendent of its Department of Utilities, Light Division, Tacoma alleges that Centralia is the owner and operator of a non-federally licensed diversion dam, canal and hydroelectric generating facilities located downstream from Tacoma's facilities but above the Nisqually Indian Reservation. Tacoma alleges further that the Centralia Project utilizes the River for electric power production and Tacoma is obligated to provide up to 720 cfs of flow for Centralia. However, as a nonlicensed Project owner Centralia is not obligated to maintain sufficient flows in the River for the benefit of the other downstream parties and therefore is a necessary party to the hearings pending. The affidavit states that Centralia is obligated to maintain 150 cfs for fish passage in the main channel but has not always done so and that an increase in the minimum releases from LaGrande would be undesirable both economically and contractually.

Staff argues that the participation of Centralia is necessary for a full consideration and resolution of the matters and issues in this proceeding and contends that the Commission has authority to require that Centralia be joined.

Centralia points out that pursuant to Section 23(b) of the Federal Power Act it filed a declaration of intention to construct its proposed Yelm diversion project and that the Commission issued an order on May 8, 1953, finding that the interests of interstate or foreign commerce would not be affected by the project nor would lands or reservations of the United States. As a non-licensee, Centralia says that the Commission has no authority to impose conditions on it and that there is no basis for joining it, particularly because it has a run-of-the-river project and cannot interfere with the river's natural flow since the diverted waters rejoin the main stream.

Fisheries and Game say the problem here is primarily one of destruction of fish through lowering or fluctuation of water levels. Since Tacoma constructed its facilities after those of Centralia, Fisheries and Game say that it is not inappropriate to require Tacoma to take such measures as are necessary for the protection of the fisheries. This, they say, may include a requirement that Tacoma consider the amount of diversion and provide flows over and above that diversion as necessary to maintain sufficient flows in the river. Tacoma could, it adds, make arrangements to coordinate with Centralia for whatever water in the main channel is required.

In view of the complaint of the Tribe and the effect of the Yelm Project on river flow between the intake and outlet of its diversion facilities it is reasonable that Centralia be required to participate in these proceedings. In that way the relation between the operations of Project No. 1862 and the Yelm Project can be determined along with the needs of the river fishery. We agree with Staff that we have broad powers under Section 309 to perform any and all acts necessary to carry out our responsibilities. See *Niagara Mohawk Power Corp. v. F.P.C.*, 379 F.2d 153 (CADC–1967). This could include bringing other parties into the proceeding as the staff notes in Bangor Hydro-Electric Co., Project No. 2600, issued June 29, 1972. Centralia says that there was no suggestion in the Bangor case that the Commission could impose conditions on the government agencies there required to file testimony. While this may be true and we could not now impose conditions on Centralia, we could do so if its project were subject to our license jurisdiction as contended in the motion for an order to show cause filed by the staff and discussed below.

In its motion to show cause the staff refers to the Commission's order of May 8, 1953, finding that the interests of interstate or foreign commerce would not be "affected" by the Yelm Project noting that at that time the state of the law was such for a project on a non-navigable stream to be jurisdictional it has to affect downstream navigability. However, the staff says in 1965 the Supreme Court found in *F.P.C. v. Union Electric Company* (Taum Sauk) 381 U.S. 90 (1965) that an effect on interstate commerce also refers to an effect through the generation of electricity. It would appear to Staff that the Yelm Project affects interstate commerce by the generation of electricity because it is interconnected with the Bonneville Power Administration's (BPA) transmission system at Centralia's B street substation. The staff further notes that even though the Commission had found no effect on interstate commerce, after *Taum Sauk* it is now subject to license. *Nantahala Power and Light Co. v. F.P.C.*, 384 F.2d 200, 206 (CA4–1967).

Centralia finds speculative the staff's argument that the Commission was operating under an erroneous view when it found that the Yelm Project would not affect the interests of interstate or foreign commerce. Further, Centralia says, the staff's motion is based on an incomplete factual premise, for Centralia purchases all of its power requirements from BPA except for the small amount of power which it generates at its project, which is used completely in Centralia's system. Thus the power from the Yelm Project, it says, is all used within the City and none is sold into interstate commerce over the Bonneville grid.

Centralia's argument does not reflect the implications of the Taum Sauk case which found that, entirely apart from navigation, our licensing jurisdiction extended to where, under Section 23(b) "the interests of interstate or foreign commerce would be affected", embodying the full measure of Congress' authority under the Commerce Clause of the Constitution. Assuming as true that all of Centralia's generation is used by Centralia and none enters the BPA grid, it would appear that interstate commerce on the grid is affected because part of the load that would otherwise be served by BPA is served by Centralia itself. The more energy that Centralia generates the less energy that will have to be supplied by the interstate BPA grid. Therefore Centralia "affects" the interests of interstate commerce.

It should be observed that we are here dealing with language that is different than that in Section 201 of Part II of the Federal Power Act[1] or Section 1 of the Natural Gas Act[2] where "affecting" interstate commerce is not a ground of jurisdiction. Here it is a ground by the wording of the statute and the interpretation of Taum Sauk. The Nantahala case is entirely in point to show that the jurisdiction found by the Court in Taum Sauk applies even though we had previously found no jurisdiction. The Court said:

> When, however, the Commission determines that a change in the underlying facts, or a correct exposition of the applicable law, discloses that the facility does affect commerce, continued maintenance and operation is conditioned upon the procurement of a license.

Under these circumstances and in the interests of an expeditious determination of the issues herein discussed, we believe that a hearing should be set so that the Commission may determine on a record whether Centralia should apply for a license for its Yelm Project. It thus becomes even more appropriate that Centralia be made a party to the proceeding in Project No. 1862. Since these matters are closely interconnected, the proceedings in Project No. 1862 and Docket No. E–6454 will be consolidated.

We are directing the Administrative Law Judge to convene a prehearing conference to explore the facts concerning the question of Commission jurisdiction over the Yelm Project. In the event the parties are able to agree on the facts bearing on jurisdiction, the Presiding Administrative Law Judge shall then require briefs and forward the question to the Commission with his initial decision consistent with Sections 1.29 and 1.30 of the Rules of Practice and Procedure (18 CFR §§ 1.29, and 1.30). If there is disagreement on the issues of fact relating to jurisdiction, the Presiding Judge shall proceed with a hearing on that question.

Any hearing that might be necessary on the issue of Commission jurisdiction over the Yelm Project shall be conducted, to the extent possible, simultaneously with the present ongoing hearing on the complaint of the Nisqually Indian Tribe regarding the effect of Project No. 1862 and the Yelm Project on the fisheries resource and what remedial measures, if any, should be taken.

Furthermore, the Administrative Law Judge shall provide Centralia an opportunity to cross-examine any witnesses who have testified during the phase of the hearing already completed. We leave it to the Presiding Judge to schedule the presentation of evidence by Centralia and any other party on the impact of the Yelm Project on the fisheries resource and also the presentation of evidence by parties, if needed, on the jurisdictional issue.

The Commission further finds: It is necessary and appropriate to carry out the provisions of the Federal Power Act that:

(a) Centralia be joined as a party in these proceedings;

(b) The proceedings in Project No. 1862 be consolidated with those in Docket No. E–6454.

(c) A hearing be set on the question of Commission jurisdiction over the Yelm Project.

The Commission orders: (A) Centralia is hereby joined as a party in these proceedings.

(B) The proceedings in Project No. 1862 are consolidated with those in Docket No. E–6454.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly Sections 4(e), 4(g), and 23(b) thereof, and the Commission's Rules of Practice and Procedure, a hearing shall be held respecing jurisdiction of the unlicensed Yelm Project, owned and operated by the City of Centralia.

(D) The Administrative Law Judge, who has been assigned to conduct hearings on Project No. 1862, shall preside over the consolidated hearings, with authority to establish and change all procedural dates and to rule on all motions with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss, as provided for in the Commission's Rules of Practice and Procedure.

(E) The Commission's Rules of Practice and Procedure shall apply in this proceeding except to the extent they are modified and supplemented herein.

KENNETH F. PLUMB,
Secretary

[Docket No. RI77-1]

UNITED SPECIALTIES CO.

Order Granting Special Relief; Correction

JULY 14, 1977.

In FR Doc. 77-16507 appearing on page 29908 in the issue for Friday, June 10, 1977, change "November 5, 1974" to "March 23, 1975" in paragraph 2, line 8 and in ordering Paragraph (B), line 13.

[1] 16 U.S.C. § 824
[2] 15 U.S.C. § 717

This order was first issued by the Federal Power Commission on June 3, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22350 Filed 8-3-77;8:45 am]

FEDERAL RESERVE SYSTEM

FIRST OF IOWA BANKSHARES, INC.

Formation of Bank Holding Company

First of Iowa BankShares, Inc., Delhi, Iowa, has applied for the Board's approval under § 3(a) (1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of 95 percent or more of the voting shares of Delhi Savings Bank, Delhi, Iowa. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than August 26, 1977.

Board of Governors of the Federal Reserve System, July 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22390 Filed 8-3-77;8:45 am]

U. B. FINANCIAL CORP.

Proposal To Continue To Engage in Insurance Activity

U. B. Financial Corp., Phoenix, Arizona, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to continue to act as broker or agent for the sale, by mail solicitation, of credit related life and accident and health insurance, solely in connection with extensions of credit by H. S. Pickrell Company, Phoenix, Arizona. Notice of the application was published on May 28, 1977, in *the Mesa Tribune*, a newspaper circulated in Mesa, Arizona; on May 30, 1977, in *The Arizona Republic*, a newspaper circulated in Phoenix, Arizona; on June 1, 1977, in *the Tucson Daily Citizen*, a newspaper circulated in Tucson, Arizona; and on June 2, 1977, in *the Daily Herald Dispatch* and *the Daily Bisbee Review*, newspapers circulated in Sierra Vista, Arizona, and Bisbee, Arizona, respectively.

Such insurance activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 26, 1977.

Board of Governors of the Federal Reserve System, July 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

U. B. FINANCIAL CORP.

Proposed Retention of H. S. Pickrell Co.

U. B. Financial Corp., Phoenix, Arizona, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to retain an office of H. S. Pickrell Company, Phoenix, Arizona, located in Mesa, Arizona. Notice of the application was published on June 16, 1977, in the Mesa Tribune, a newspaper circulated in Mesa, Arizona.

Applicant states that H. S. Pickrell engages in the following activities: (1) The organizaiton, making, acquiring, purchasing, arranging for, holding, warehousing and selling, for its own account and for the account of others, loans of all types, and other extensions of credit, secured by mortgages or deeds of trust on real property such as would be made by a mortgage company; and (2) servicing loans and other extensions of credit for any person. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 26, 1977.

Board of Governors of the Federal Reserve System, July 29, 1977.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

HANDICAPPED PERSONNEL PREPARATION

Closing Date for Receipt of Applications

Notice is hereby given that, pursuant to the authority contained in sections 631, 632, and 634 of the Education of the Handicapped Act (20 U.S.C. 1431, 1432, and 1434), the U.S. Commissioner of Education has established a closing date of October 14, 1977 for receipt of applications for new and continuation training grants under Part D of the Act.

Applications must be recived by the U.S. Office of Education Application Control Center on or before the aforementioned date.

A. *Availability of funds and estimated number and amount awards.* The estimated total amount of funds available under this grant program for Fiscal Year 1978 is $45,750,000. An estimated 775 grants will be awarded, with an average totaling $62,000.

B. *Applications sent by mail.* An application sent by mail should beaddressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.451. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than October 11, 1977, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the Office of Education.

C. *Hand-delivered applications.* An application to be hand-delivered must be delivered to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, S.W., Washington, D.C. Hand-delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted by the Application Control Center after 4:00 p.m., Washington, D.C. time on the closing date.

D. *Program information and forms.* Information and applications may be obtained from the Division of Personnel Preparation, Bureau of Education for the Handicapped, U.S. Office of Education, Washington, D.C. 20202.

E. *Applicable regulations.* Awards under the Handicapped Personnel Preparation program will be governed by the Office of Education General Provisions Regulations (45 CFR Parts 100, 100a) and the regulations which apply specifically to this program.

(45 CFR Parts 121 and 121f. Amendments to Part 121f were published in the FEDERAL REGISTER on April 19, 1977, 42 FR 20298–20300).

(20 U.S.C. 1431, 1432, and 1434.)

Dated: August 1, 1977.

(Catalog of Federal Domestic Assistance No. 13.451 Handicapped Personnel.)

ERNEST L. BOYER,
U.S. Commissioner of Education.

[FR Doc.77-22472 Filed 8-3-77;8:45 am]

HANDICAPPED RESEARCH AND DEMONSTRATION

Closing Date for Receipt of Applications

Notice is hereby given that, pursuant to the authority contained in Sections 641 and 642 of Part E of the Education of the Handicapped Act (20 U.S.C. 1441, 1442), applications are being accepted for support for research and related purposes related to education of the handicapped. This announcement covers applications for new awards only for the Student Research program.

Under the Student Research program, the Office of Education is interested in a broad range of student initiated and directed research and research-related projects focusing on the education of handicapped children. Two award cycles are planned for Fiscal Year 1978. Proposals received for the first cycle will not be held over for the second cycle, but may be resubmitted.

Applications must be received by the U.S. Office of Education Application Control Center on or before the following dates: First Cycle, October 10, 1977; and for the Second Cycle, March 17, 1978.

A. *Availability of funds and estimated number and amount of awards.* The estimated total amount of funds available for support of Student Research projects is $250,000. Based on a median grant amount in recent years of approximately $5,000, we anticipate that about 33 new grants will be awarded. The range of funding for student projects has been from $350 to over $20,000. However, the large majority of awards have been for under $7,500.

B. *Multiple Year awards.* While there is no legal limit on the duration of projects, the vast majority of student directed projects are for one year or less due to the limited tenure of students at applicant institutions. In the event that assistance is provided for multiple year projects, grant awards will be made for budget period of a single year's duration with continuation awards made on a non-competitive basis subject to satisfactory performance as determined pursuant to 45 CFR 121h.4(b) and the availability of funds in future fiscal years.

C. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.443A. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than October 5, 1977 for First Cycle, and March 13, 1978 for Second Cycle, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mailrooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mailrooms or other documentary evidence or receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

D. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4 p.m. Washington, D.C. time on the closing date.

E. *Program information and forms.* Further information and application forms may be obtained from the Research Project Branch, Bureau of Education for the Handicapped, Office of Education, 400 Maryland Avenue, S.W., (Donohoe, 3165), Washington, D.C. 20202.

F. *Applicable regulations.* The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Parts 100 and 100a) and the regulations governing Research in the Education of the Handicapped (45 CFR Parts 121 and 121h).

(20 U.S.C. 1441, 1442.)

(Catalog of Federal Domestic Assistance No. 13.443 Handicapped Research and Demonstration.)

Dated: August 1, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

INDIAN TRIBES PERFORMING LAW AND ORDER FUNCTIONS

Determination; Amendment

JULY 21, 1977.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2.

Section 601(d), Title I of the Omnibus Crime Control and Safe Streets Act of 1968—Pub. L. 90–351, 42 U.S.C. 3781(d), placed responsibility on the Secretary of the Interior to determine those Indian tribes which perform law and order functions. The listing published beginning on page 1375 of the May 25, 1973, FEDERAL REGISTER (38 FR 13758) identified all eligible Indian tribes and the specific law and order functions they have responsibility to exercise. Determinations concerning Indian tribes not listed are made on an individual basis upon application by such tribes under provisions of the Regulations of the Law Enforcement Assistance Administration, Department of Justice. The Secretary's authority to make such determinations was delegated to the Commissioner of Indian Affairs by 230 DM 1.

It has been determined by the Commissioner of Indian Affairs that the Bad River Band of Lake Superior Tribe of Chippewa Indians of Wisconsin has responsibility for exercising all of the six law and order functions shown in the published listing.

Therefore, the listing published beginning on page 13758 of the May 25, 1973, FEDERAL REGISTER (38 FR 13758) is amended by revising the entry for the Bad River Band of Wisconsin to read as follows:

Tribal entities recognized by the Federal Government and listed by State	To employ tribal police	To establish a tribal court	To adopt a tribal law and order code	To undertake correction functions	To undertake programs aimed at preventing adult crimes and juvenile delinquency	To undertake adult and juvenile rehabilitation programs
Wisconsin Bad River Band	X	X	X	X	X	X

RAYMOND V. BUTLER,
Acting Deputy Commissioner of Indian Affairs.

[FR Doc.77-22456 Filed 8-3-77;8:45 am]

Bureau of Land Management

CALIFORNIA DESERT CONSERVATION AREA ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with Public Laws 92-463 and 94-579 that the California Desert Conservation Area Advisory Committee to the Buerau of Land Management, U.S. Department of the Interior, will meet September 23-26 in Needles, California, and at various field locations on public lands in the California Desert.

The meetings will be held at the Elks Lodge, 1000 Lily Hill Drive, Needles, California, beginning at 8 a.m. on Friday, September 23 and Saturday, September 24.

The committee will consider the work program for preparation of the California Desert Plan, including impact of the budget reduction, implementation of the resolution adopted by the committee at its previous meeting and the status of the work schedule; public participation in planning, including implementation of the public affairs plan, BLM organizational responsibility for public affairs, and a response to the committee resolution on public involvement; interim management of desert resources, including relationship of interim actions to the desert plan, the Cadiz environmental assessment record, implementation of existing management framework plans and description of other major interim actions to be brought to the committee at its next three meetings; a report on the implementation of wilderness provisions of the Federal Land Policy and Management Act of 1976, Pub. L. 94-579, Section 603; review of the Committee charter, including consideration of standing subcommittees and committee composition; and the management framework plan for the East Mojave Planning Unit, including the relationship of alternative management decisions to the overall plan for the California Desert.

The committee will depart after the meeting for a field review of the Bureau of Land Management's East Mojave Planning Unit, including camping overnight September 24 and 25.

All meetings of the committee and any subcommittees that may be established will be open to the public and participation is invited. Time will be made available beginning at 10 a.m., Saturday, September 24, for brief oral statements by the public on subjects under consideration by the committee. Such statements should be reduced to writing and filed with the committee chairman in order to assure a complete public record. Persons who wish to make oral statements should contact the Chairman, California Desert Conservation Area Advisory Committee, c/o Desert Planning Staff, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507.

Dated: July 27, 1977.

JAMES B. RUCH,
Acting State Director.

[FR Doc.77-22469 Filed 8-3-77;8:45 am]

[SAC 065037]

CALIFORNIA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Bureau of Reclamation, U.S. Department of the Interior, filed application Serial No. SAC 065037 on November 3, 1960, for a withdrawal in relation to the following described lands:

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 32 N., R. 5 W.,
Sec. 20, Lot. 15.
T. 32 N., R. 6 W.,
Sec. 18, $SE^1/_4NW^1/_4$ and $NE^1/_4SW^1/_4$.

The area aggregates approximately 84.61 acres in Shasta County, California.

The applicant desires that the land be withdrawn and reserved in connection with the construction of the Trinity River Division, Central Valley Project.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on April 14, 1961, page 3207, FR Doc. 61-3369.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, on or before September 6, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described land in T. 32 N., R. 5 W., is temporarily segregated from the operation of the public land laws including the mining laws (30 U.S.C., Ch. 2) and the mineral leasing laws. The patented lands in T. 32 N., R 6 W., are segregated by the mining and mineral leasing laws only to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

[FR Doc.77-22466 Filed 8-3-77;8:45 am]

[M 20539]

MONTANA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 26, 1977.

The Department of Agriculture filed application, Serial No. M 20539, on January 7, 1972, for a withdrawal in relation to the following described lands:

PRINCIPAL MERIDIAN, MONTANA

LEWIS AND CLARK NATIONAL FOREST; WOOD LAKE CAMPGROUNDS

Unsurveyed, but probably will be when surveyed:
T. 19 N., R. 9 W.,
Sec. 6, $W^1/_2NW^1/_4SW^1/_4NE^1/_4$, $SW^1/_4SW^1/_4NE^1/_4$, $SE^1/_4NE^1/_4NW^1/_4$, $E^1/_2SW^1/_4NE^1/_4NW^1/_4$, $NE^1/_4SE^1/_4NW^1/_4$, $E^1/_2NW^1/_4SE^1/_4NW^1/_4$, $N^1/_2SE^1/_4SE^1/_4NW^1/_4$, $S^1/_2NW^1/_4NE^1/_4SE^1/_4$, $N^1/_2SW^1/_4NE^1/_4SE^1/_4$, $NE^1/_4NW^1/_4SE^1/_4$, $N^1/_2NW^1/_4NW^1/_4SE^1/_4$, and $N^1/_2SE^1/_4NW^1/_4SE^1/_4$.

The area described contains 80 acres in Lewis and Clark County, Montana.

The applicant desires that the land be reserved for a public campground.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on February 1, 1972, Volume No. 37, Page No. 2459, Document No. 72-1422.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given than an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Montana 59107.

EDGAR D. STARK,
Acting Chief, Branch of Lands and Minerals Operations.

MONTANA

Order Providing for Opening of Public Lands

JULY 28, 1977.

Pursuant to an amendment of claim under Section 316 of the Act of October 21, 1976, 43 U.S.C. 1746, the following lands have been reconveyed to the United States:

PRINCIPAL MERIDIAN, MONTANA

T. 16 N., R. 20 E.,
Sec. 19, Lots 4 and 5.

The area described contains 72.81 acres in Fergus County, Montana.

The subject lands are located in the Judith Mountains approximately 10 air miles northeast of Lewistown. Topography is mainly a high ridge flanked by a very steep west and south slope. Vegetation consists primarily of pine and fur trees, soils are shallow rocky loam with numerous rock outcrops. No surface water exists on the tract. The lands will be managed for multiple resource use with the adjoining public lands.

At 10 a.m. on September 6, 1977, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands will be open to the operation of the public land laws.

The mineral rights in the lands have always been in the United States; therefore, the mineral status of the land is not affected by this order.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

EDGAR D. STARK,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-22468 Filed 8-3-77;8:45 am]

NEVADA

Filing of Plats of Survey and Order Providing for Opening of Lands

1. The Plats of Survey of lands described below will be officially filed at the Nevada State Office, Reno, Nevada, effective 10:00 a.m. on September 29, 1977:

MOUNT DIABLO MERIDIAN, NEVADA

T. $1^1/_2$ N., R. 69 E.
T. 2 N., R. 69 E.

2. The area in T. 2 N., R. 69 E. surveyed and resurveyed is mountainous. The elevation ranges from 5,700 to 6,800 feet above sea level. The soil varies from sandy loam along the creeks to gravel and limestone in the mountains. Vegetation consists of sagebrush and rabbit brush. Timber consists of juniper and pinon. The town of Ursine is in Section 35.

3. The land surveyed in T. $1^1/_2$ N., R. 69 E. ranges from about 5,600 to 5,750 feet above sea level and is rolling land. The soil varies from sandy clay to rocky. Vegetation consists of sagebrush, native grasses and the timber is juniper and pinon. Access into the township is by trail roads.

4. Subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law, the lands are hereby opened to such applications and petitions as may be permitted. All such valid applications received at or prior to 10:00 a.m. on September 29, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

Inquiries concerning these lands shall be addressed to the Nevada State Office, Bureau of Land Management, 300 Booth Street, Reno, NV 89509.

Date signed: July 28, 1977.

LOYD C. MILLER,
Chief, Branch of Records and Data Management.

NEW MEXICO

Application

JULY 29,1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for one $10^3/_4$-inch natural gas pipeline right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 31 N., R. 11 W.,
Sec. 2, $SW^1/_4SW^1/_4$; Sec. 3, Lot 2 $NE^1/_4SE^1/_4$; Sec. 11, $SW^1/_4NE^1/_4$, $N^1/_2NW^1/_4$, $SE^1/_4NW^1/_4$, $NW^1/_4SE^1/_4$, $S^1/_2SE^1/_4$; Sec. 14, $NE^1/_4NE^1/_4$, $SW^1/_4NE^1/_4$, $SE^1/_4SW^1/_4$, $W^1/_2SE^1/_4$; Sec. 23, $E^1/_2NW^1/_4$.
T. 32 N., R. 11 W.,
Sec. 28, $W^1/_2SE^1/_4$ and $SE^1/_4SE^1/_4$; Sec. 33, $NE^1/_4NE^1/_4$; Sec. 34, $W^1/_2NW^1/_4$, $SE^1/_4NW^1/_4$, $E^1/_2SW^1/_4$, and $SW^1/_4SE^1/_4$.

This pipeline will convey natural gas across 4.662 miles of public lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

STELLA V. GONZALES,
Acting Chief, Branch of Lands and Minerals Operations.

(OR16909)

OREGON

Proposed Withdrawal and Reservation of Lands

JULY 28, 1977.

The Corps of Engineers, U.S. Department of the Army, on October 18, 1976, filed application, Serial No. OR 16909, for the withdrawal of the following described lands from settlement, sale, location, or entry under the public land laws, including the mining laws (30 U.S.C. Ch. 2) and the mineral leasing laws, subject to valid existing rights:

WILLAMETTE MERIDIAN

T. 22 S., R. 13 W.,
Sec. 19, lot 1, W½SW¼NW¼, and W½E½SW¼NW¼.

Containing 68.80 acres in Douglas County.

The applicant desires that the lands be reserved for use in connection with its existing civil works projects and facilities at the mouth of the Umpqua River.

On or before September 7, 1977 all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, at the address shown below, on or before September 7, 1977. Upon determination by the State Director that a public hearing will be held, a notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.-16B.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 7, 1977.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's, and reaching agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn and reserved as requested by the applicant agency. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. The Secretary's determination shall, in a proper case, be subject to the provisions of section 204(c) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2752.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws and mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-22455 Filed 8-3-77;8:45 am]

MOTORIZED VEHICLES ON PUBLIC LANDS

Closure to Use

Notice is hereby given that use of motorized vehicles on certain public land within the Rogue Wild and Scenic River boundary in Josephine County, Oregon is prohibited in accordance with the provisions of 43 CFR 6010.4. This closure does not apply to emergency, law enforcement, and federal or other government vehicles while being used for official or emergency purposes, or vehicles authorized by permit or contract.

The area affected by this closure is located approximately 9 miles NW of Grants Pass, Oregon. The legal description of the closed land is:

WILLAMETTE MERIDIAN

T. 36 S., R. 7 W.,
Sec. 11, Tax Lots 100, 1500, and 1600 all lying between Shan Creek and Griffin Park, including the site of the former Riverbanks Mobile Park, total acres 114.13.

The use of this public land by motorized vehicles has caused excessive soil disturbance, is in conflict with other more passive and contemplative uses of the National Wild and Scenic River Corridor, is inflicting adverse indirect impacts on other adjacent lands, and is unacceptable due to the high fire danger.

The closure is effective immediately and will remain in effect no later than December 30, 1978 or sooner when scheduled Activity Planning for the Recreation Section of the Rogue Wild and Scenic River under the administration of the Bureau of Land Management is completed. Prior to a decision on permanent closure of the identified land, public comment will be accepted through scheduled public participation in the formulation of the Activity Plan.

Common points of vehicular access to the area will be posted. Maps showing the area described above are available for examination at the Medford District Office, Bureau of Land Management, 310 West Sixth Street, Medford, Oregon.

Dated: July 28, 1977.

GEORGE C. FRANCIS,
District Manager.

[Serial No. A9224]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Bureau of Reclamation, Department of the Interior filed application Serial No. A 9224 on September 8, 1975, for a withdrawal in relation to the following lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 7 S., R. 14 W.,
Sec. 15, N½SW¼; Sec. 17, S½SE¼; Sec. 19, SE¼; Sec. 20, NW¼; Sec. 30, Lots 1, 2, and 3, NW¼NE¼, E½NW¼, NE¼SW¼.
T. 8 S., R. 15 W.,
Sec. 4, Lot 2; Sec. 6, NW¼NW¼.
T. 7 S., R. 16 W.,
Sec. 22, E½; Sec. 23, Lot 1, N½SW¼, NW¼SE¼; Sec. 24, SE¼NE¼; Sec. 27, Lot 3; Sec. 30, S½NW¼SE¼.
T. 7 S., R. 17 W.,
Sec. 34, NE¼SE¼.
T. 8 S., R. 18 W.,
Sec. 12, NE¼NW¼; Sec. 17, S½SW¼, SE¼; Sec. 19, N½NE¼.
T. 9 S., R. 18 W.,
Sec. 11, S½SW¼; Sec. 12, S½NW¼NW¼; Sec. 15, NW¼NW¼; Sec. 16, S½SE¼NW¼, NW¼SW¼; Sec. 17, S½SW¼SW¼, SE¼SW¼.
T. 9 S., R. 19 W.,
Sec. 24, Lot 1, NW¼NE¼.
T. 8 S., R. 21 W.,
Sec. 3, Lots 1, 2, 3, and 4; Sec. 4, Lot 1.

The areas described aggregate 2,105.42 acres in Yuma County, Arizona.

The applicant desires that the lands be reserved for protection of constructed irrigation works within the Wellton-Mohawk Division of the Gila Project, Arizona.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on October 14, 1975, Volume No. 40, Page No. 48148, Document No. 75-27534, and an amended notice was published in the FEDERAL REGISTER on November 25, 1975, Volume No. 40, Page No. 54593, Document No. 75-31693.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be schedulued and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining and the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204 (g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 28, 1977.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A-9697]

ARIZONA

JULY 28, 1977

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Department of the Army, U.S. Corps of Engineers, Los Angeles District, P.O. Box 2711, Los Angeles, California 90053, filed a withdrawal application, Serial No. A-9697, on September 15, 1976.

The surface of the following described lands has been transferred out of Federal ownership with the minerals reserved to the United States; it is proposed to withdraw the mineral estate from location and entry under the mining laws, including the mineral leasing laws:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 4 N., R. 2 E.,
Sec. 15, lots 1 to 24, inclusive;
Sec. 17, E½NE¼, NE¼NW¼NE¼, NE¼SE¼, and N½SE¼SE¼.

The areas described aggregate 270.00 acres in Maricopa County.

The applicant desires that the lands be reserved for construction, operation, and maintenance of the Adobe Dam, a Congressionally authorized flood control project and proposed recreational development.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on October 12, 1976, Volume No. 41, Page No. 44716, Document No. 76-29747, and a corrected notice was published in the FEDERAL REGISTER on December 1, 1976, Volume No. 41, Page Nos. 52724-52725, Document No. 76-35353.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16B. All previous

comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the mining laws, including the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Forest, U.S. Department of Agriculture filed application Serial No. A 9134 on July 25, 1975, for a withdrawal in relation to the following described lands.

GILA AND SALT RIVER, MERIDIAN ARIZONA

T 3 N., R. 8 E.,
Sec 16, E½ and E½W½.

The area described aggregates 480 acres in Maricopa County.

The applicant desires that the lands be reserved as a Research Natural Area for scientific study of desert vegetation.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on October 14, 1975, Volume No. 40, Page No. 48147, Document No. 75-27535.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 28, 1977.

CORONADO NATIONAL FOREST

ELGIN RESEARCH NATURAL AREA

T 21 S., R. 18 E.,
Sec. 26, W½W½E½NE¼, W½NE¼, E½NW¼, E½SW¼, E½SE¼SW¼SW¼, W½W½NE¼SE¼, and W½SE¼.

The areas described aggregate 355 acres in Santa Cruz County Arizona.

The applicant desires that the lands be reserved as a Research Natural Area for the purpose of conducting scientific studies on natural trends in vegetation change following the removal of domestic livestock.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on January 8, 1976, Volume No. 41, Page 1503, Document No. 76-455.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A 9131 on July 24, 1975, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 22 N., R. 8 E., (Elden Pueblo)
Sec. 32, SE¼NE¼SW¼, N½N½NE¼SE¼SW¼, N½N½NW¼SW¼SE¼, and that part of the SW¼NW¼SE¼ not included in the area withdrawn by Public Land Order No. 3584 for U.S. Highways 89 and 89A roadside zones.
T. 23 N., R. 8 E., (Medicine Fort)
Sec. 7, S½SE¼NW¼SE¼, E½SW¼SE¼, and those parts of the S½SW¼NE¼SE¼ and W½SE¼SE¼ not included in the area withdrawn by Public Land Order No. 3584 for U.S. Highways 89 and 89A roadside zones.
T. 21 N., R. 10 E., (Ridge Ruin)
Sec. 7, SE¼;
Sec. 18, N½NE¼.
T. 22 N., R. 10 E., (LeBarron Ruin)
Sec. 33, SW¼NE¼.

The areas described aggregate approximately 351 acres in Coconino County.

The applicant desires that the lands be reserved and protected for their historic values. The lands contain valuable archaeological ruins and have been nominated to the National Register of Historic Sites.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on October 14, 1975, Volume Number 40, Page Number 48147, Document Number 75-27533.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 27, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A 8985 on March 28, 1975, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

CORONADO NATIONAL FOREST

Pole Bridge Canyon Research Natural Area

Beginning at a point which is located S. 19° 55' E., and 2,075.00 feet from the corner common to secs. 13 and 24, T. 18 S., R. 29 E., and secs. 13 and 24, T. 18 S., R. 29½ E., thence S. 34°38' E., 1446.25 feet; thence S. 26°30' W., 2317.80 feet; thence S. 8°0' E., 1338.27 feet; thence S. 34°50' E., 1246.83 feet; thence S. 37°15' W., 1232.10 feet; thence S. 80°23' W., 642.33 feet; thence N. 40°14' W., 1251.48 feet; thence N. 83°45' W., 842.30 feet; thence S. 88°33' W., 643.18 feet; thence N. 22°5' W., 1407.86 feet; thence N. 4°0' W., 858.05 feet; thence N. 21°54' W., 553.11 feet; thence N. 19°45' E., 2000.81 feet; thence N. 82°5' E., 1112.70 feet; thence N. 53°24' E., 1673.60 feet; thence S. 86°42' E., 656.26 feet; to the point of beginning.

A portion of the tract is surveyed in T. 18 S., R. 29 E., and is situated in the SE¼NE¼, E½SW¼, SE¼ sec. 24 and the NE¼, NE¼NW¼, NE¼SE¼ sec. 25. A portion of the tract is unsurveyed in T. 18 S., R. 29½ E., and when surveyed will probably be located in the W½ sec. 24 and W½ sec. 25.

The area as described contains approximately 460.94 acres in Cochise County, Arizona.

The applicant desires that the lands be reserved for a Research Natural Area to preserve several rare species of Southern Arizona Pine—principally Apache Pine, Arizona Pine and Chihuahua Pine for scientific study.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on June 5, 1975, Volume Number 40, Page Number 24221, Document Number 75-14663.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A 8800]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Forest Service, United States Department of Agriculture, filed application Serial Number A 8800 on November 25, 1974, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 13 N., R. 13 E.,
Sec. 7, Lots 2 to 8 inclusive, Lots 11 and 12.

The area described aggregates 341.13 acres in Coconino County.

The subject lands which lie within the boundaries of the Sitgreaves National

Forest were reconveyed to the United States under section 8 of the Taylor Grazing Act of June 28, 1934, as amended 43 U.S.C. 315g (1970). The lands are presently under Bureau of Land Management jurisdiction and the applicant requests the lands be transferred to the National Forest System.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 19, 1974, Volume No. 39, Page No. 43857, Document No. 74-29533.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

Currently, the above-described lands are administered by the Bureau of Land Management and are not subject to the operation of the public land laws, including the mining and mineral leasing laws. Section 205(c) of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756) provides for transfer of lands within boundaries of the National Forest System to the Secretary of Agriculture which have been acquired pursuant to section 8 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1272; 43 U.S.C. 315g). The withdrawal, if effected, will place the administration of these lands under the Forest Service, Department of Agriculture and the lands will become subject to all laws and regulations applicable to the National Forest System.

In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior. All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A 9339 on January 14, 1976, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 13 N., R. 12 E.,
Sec. 25, $S\frac{1}{2}SW\frac{1}{4}$, $NW\frac{1}{4}SW\frac{1}{4}$;
Sec. 33, $E\frac{1}{2}$, $SE\frac{1}{4}SW\frac{1}{4}$.

The areas described aggregate 480 acres in Coconino County, Arizona.

The subject lands which lie within the boundaries of the Sitgreaves National Forest were reconveyed to the United States under section 8 of the Taylor Grazing Act of June 28, 1934, as amended 43 U.S.C. 315g (1970). The lands are presently under Bureau of Land Management jurisdiction and the applicant requests the lands be transferred to the National Forest System.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on February 19, 1976, Volume No. 41, Page No. 7534, Document No. 76-4742.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforder in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

Currently, the above-described lands are administered by the Bureau of Land Management and are not subject to the operation of the public land laws, including the mining and mineral leasing laws. Section 205(c) of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756) provides for transfer of lands within boundaries of the National Forest System to the Secretary of Agriculture which have been acquired pursuant to section 8 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1272; 43 U.S.C. 315g). The withdrawal, if effected, will place the administration of these lands under the Forest Service, Department of Agriculture and the lands will become subject to all laws and regulations applicable to the National Forest System.

In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

ARIZONA

[A-9682]

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Department of the Army, Los Angeles District, Corps of Engineers, P.O. Box 2711, Los Angeles, California 90053, filed a withdrawal application, Serial No. A-9682, on August 27, 1976.

The applicant proposes to withdraw the following described lands from all forms of appropriation under the public land laws and from all forms of appropriation under the public land laws and from location and entry under the general mining laws, including the mineral leasing laws:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 5, N., R. 1 E.,
Sec. 23, $NW\frac{1}{4}$, $S\frac{1}{2}NE\frac{1}{4}$, $S\frac{1}{2}N\frac{1}{2}NE\frac{1}{4}$, and $NW\frac{1}{4}NW\frac{1}{4}NE\frac{1}{4}$;
Sec. 24, $W\frac{1}{2}SW\frac{1}{4}NW\frac{1}{4}$;
Sec. 27, $NE\frac{1}{4}$, $E\frac{1}{2}NW\frac{1}{4}$, $E\frac{1}{2}W\frac{1}{4}NW\frac{1}{4}$, $NE\frac{1}{4}NE\frac{1}{4}SW\frac{1}{4}$, and $SE\frac{1}{4}$;
Sec. 34, $N\frac{1}{2}N\frac{1}{2}NE\frac{1}{4}NE\frac{1}{4}$.

The areas described aggregate 770.00 acres in Maricopa County.

The surface of the following described lands has been transferred out of Federal ownership with minerals reserved to the United States; it is proposed to withdraw the mineral estate from location and entry under the mining laws, including the mineral leasing laws:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 5 N.,R. 1 E.,
Sec. 23, $S\frac{1}{2}$;
Sec. 24, $W\frac{1}{2}SW\frac{1}{4}$;
Sec. 25, $W\frac{1}{2}NW\frac{1}{4}$, $W\frac{1}{2}E\frac{1}{2}NW\frac{1}{4}$, $NW\frac{1}{4}SW\frac{1}{4}$, and $W\frac{1}{2}SW\frac{1}{4}SW\frac{1}{4}$;
Sec. 26, all;
Sec. 35, $N\frac{1}{2}$.

The area described aggregates 1,540.00 acres in Maricopa County.

The applicant desires that the lands be reserved for construction, operation, and maintenance of a Congressionally authorized flood control project, including the location of the dam and appurtenances, and reservoir uses.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 14, 1976, Volume No. 41, Page No. 54546, Document No. 76-36550.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws and the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A-9590]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A-9590 on May 26, 1976, for a withdrawal in relation to the following described lands:

COCONINO NATIONAL FOREST

RED MOUNTAIN GEOLOGIC AREA: GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 25 N., R. 5 E.,
Sec. 20, $S\frac{1}{2}N\frac{1}{2}$ and $S\frac{1}{2}$;
Sec. 21, Lots 3 to 8, inclusive, and $W\frac{1}{2}SE\frac{1}{4}$;
Sec. 28, $W\frac{1}{2}E\frac{1}{2}$ and $W\frac{1}{2}$;
Sec. 29, all.

The areas described aggregate approximately 1,907.87 acres in Coconino County.

The applicant desires that the lands be reserved to preserve a geologically unique area within the San Francisco Peaks volcanic field.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on June 28, 1976, Volume No. 41, Page 26590, Document No. 76-18585.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on Ocober 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[Serial No. 6630]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Bureau of Land Management, Department of the Interior filed application Serial No. A 6630 on November 22, 1971, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 14 N., R. 11 W.,
Sec. 19, $SE\frac{1}{4}NE\frac{1}{4}$, $E\frac{1}{2}NE\frac{1}{4}NE\frac{1}{4}$, $E\frac{1}{2}SW\frac{1}{4}NE\frac{1}{4}$, $SW\frac{1}{4}SW\frac{1}{4}NE\frac{1}{4}$, $E\frac{1}{2}SE\frac{1}{4}SE\frac{1}{4}NW\frac{1}{4}$, $E\frac{1}{2}NE\frac{1}{4}SW\frac{1}{4}$, $SE\frac{1}{4}SW\frac{1}{4}NE\frac{1}{4}SW\frac{1}{4}$, $E\frac{1}{2}SE\frac{1}{4}SW\frac{1}{4}$, $E\frac{1}{2}W\frac{1}{2}SE\frac{1}{4}SW\frac{1}{4}$, $W\frac{1}{2}SE\frac{1}{4}$, $W\frac{1}{2}E\frac{1}{2}SE\frac{1}{4}$, $W\frac{1}{2}E\frac{1}{2}NE\frac{1}{4}SE\frac{1}{4}$, $NW\frac{1}{4}NE\frac{1}{4}SE\frac{1}{4}SE\frac{1}{4}$;
Sec. 20, $SW\frac{1}{4}NW\frac{1}{4}NW\frac{1}{4}$, $W\frac{1}{2}NW\frac{1}{4}NW\frac{1}{4}$, $NW\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$.

The area described aggregates 310 acres in Mohave County.

The applicant desires that the lands be reserved for their public recreational and scenic values. The site, known as the Burro Creek Campground, has been developed by the Bureau of Land Management for recreation and campground purposes.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on September 30, 1976, Volume No. 41, Page No. 43203, Document No. 76-28586, and a corrected notice was published December 1, 1976, Volume No. 41, Page No. 52725.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All

interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 28, 1977.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations

[Serial Number A 9140]

ARIZONA

Amendment of Right-of-Way Application A 9140 To Include Additional Lands in Right-of-Way

By publication of October 26, 1976, 41 FR 46890, notice was given that El Paso Natural Gas Company, a corporation of El Paso, Texas, had filed an application pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), for a pipeline right-of-way for the transportation of crude oil across certain public lands in the State of Arizona.

Notice is hereby given that said company, on February 3, 1977, filed a request for amendment of the application to include the following described lands:

T. 7 S., R. 12 E., GSR Mer., Arizona
Sec. 29, NW¼SW¼, S½SW¼, SW¼SE¼.

Interested persons should express their interest and views to the State Director, Arizona State Office, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 27, 1977.

ROBERT O. BUFFINGTON,
State Director.

[FR Doc.77-22416 Filed 8-3-77;8:45 am]

[Serial No. A 9683]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Corps of Engineers, Department of the Army, filed application Serial No. A 9683 on August 27, 1976, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 6 S., R. 21 W.,
Sec. 31, all that part lying east of the 650-foot wide right-of-way for the Gila Gravity Main Canal.
T. 7 S., R. 21 W.,
Sec. 5, all that part lying east of the 650-foot wide right-of-way for the Gila Gravity Main Canal and west of a line parallel to and ¼-mile east of said canal;
Sec. 6, all that part lying east of the 650-foot wide right-of-way for the Gila Gravity Main Canal;
Sec. 8, all that part of the north 1800 feet thereof lying east of the 650-foot wide right-of-way for the Gila Gravity Main Canal and west of a line parallel to and ¼-mile east of said canal.

The areas described aggregate approximately 310 acres in Yuma County.

The applicant desires that the lands be reserved for use of the Department of the Army as an integral part of Yuma Proving Ground for military purposes. The land is presently occupied by the Department of the Army under a Memorandum of Understanding with the Bureau of Reclamation.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 14, 1976, Volume No. 41, Page No. 54546-54547, Document No. 76-36551.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining and the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 28, 1977.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations

[FR Doc.77-22417 Filed 8-3-77;8:45 am]

[Serial No. A 7598]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Bureau of Land Management, Department of the Interior filed application Serial No. A 7598 on August 21, 1974, for a protective withdrawal of the mineral estate in relation to the following described lands:

GILDA AND SALT RIVER MERIDIAN, ARIZONA

T. 2 N., R. 3 E.,
Sec. 3, Lots 15 and 16;
Sec. 12, Lots 1, 2, 3, and 4, W½NE¼, W½NW¼.
T. 3 N., R. 3 E.,
Sec. 17, Lot 1;
Sec. 20, Lot 1;
Sec. 26, Lot 1, SW¼SE¼, E½SE¼;
Sec. 34, NE¼NW¼;
Sec. 35, SE¼NE¼, E½SE¼.
T. 2 N., R. 4 E.,
Sec. 4, Lots 3, 4, 5, 6, 9, 10, 11, and 12;
Sec. 5, Lot 1, SE¼NE¼, SE¼SE¼;
Sec. 6, Lots 1 through 7, inclusive, SW¼NE¼, SE¼NW¼, E½SW¼, NW¼SE¼;
Sec. 17, Lots 1, 2, 3, 6, 7, 8, 9, and 12.
T. 3 N., R. 4 E.,
Sec. 30, SE¼SW¼, W½SE¼;
Sec. 31, Lots 1, 2, 4, 5, 6, 7, 8, and 9, SE¼NE¼.

The areas described aggregate 2,537.06 acres of non-public lands in Maricopa County, Arizona.

The applicant desires the mineral estate of the lands be reserved to preclude mining activity and desecration of the lands' recreational values and open space. The surface rights have been transferred out of Federal ownership and most of the lands are within an area designated by the City of Phoenix as the Phoenix Mountain Preserve.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on September 18, 1974, Volume No. 39, Page No. 33581 and 33582, Document No. 74-21577.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: July 28, 1977.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A-9281]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A-9281 on November 3, 1975, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 13 N., R. 13 E.,
Section 7, S½S½S½NE¼ and SE¼.

The area described aggregates 180.00 acres in Coconino County.

The subject lands which lie within the boundaries of the Sitgreaves National Forest were reconveyed to the United States under Section 8 of the Taylor Grazing Act of June 28, 1934, as amended 43 U.S.C. 315g (1970). The lands are presently under Bureau of Land Management jurisdiction and the applicant requests the lands be transferred to the National Forest System.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 24, 1975, Volume No. 40, Page No. 59458-59459, Document No. 75-34690.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

Currently, the above-described lands are administered by the Bureau of Land Management and are not subject to the operation of the public land laws, including the mining and mineral leasing laws. Section 205(c) of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756) provides for transfer of lands within boundaries of the National Forest System to the Secretary of Agriculture which have been acquired pursuant to Section 8 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1272; 43 U.S.C. 315g). The withdrawal, if effected, will place the administration of these lands under the Forest Service, Department of Agriculture, and the lands will become subject to all laws and regulations applicable to the National Forest System.

In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A-9291]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, U.S. Department of Agriculture, filed application Serial No. A-9291 on November 20, 1975, for a withdrawal in relation to the following described lands:

COCONINO NATIONAL FOREST
ELDEN ENVIRONMENTAL STUDY AREA

T. 21 N., R. 7 E., GSR Mer., Arizona,
Sec. 1, S½;
Sec. 2, Lots 7 and 8, and SW¼ (less 14.25 acres in HES 86), and S½SE¼.
T. 21 N., R. 8 E., GSR Mer., Arizona,
Sec. 6, Lots 6 and 7, NE¼SW¼, NW¼SE¼, SW¼, and N½SW¼SE¼SW¼; Sec. 7 Lot 7.

The areas described aggregate approximately 778.00 acres in Coconino County.

The applicant desires that the lands be reserved for conducting science demonstration classes for students of public schools in the area. The lands contain unique geological features, historical and archaeological sites, which make them valuable for educational purposes.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on June 28, 1976, Volume No. 41, Page No. 26591, Document No. 76-18586.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM

Manual Section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when affected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[A-8736]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, United States Department of Agriculture, filed application Serial Number A 8736 on October 11, 1974, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA
CORONADO NATIONAL FOREST
DRAGOON SPRING STAGE STATION HISTORIC SITE

T. 16 S., R. 23 E.,
Sec. 32, SW¼NW¼NW¼SE¼, SE¼NE¼NE¼SW¼, NE¼SE¼NE¼SW¼, NW¼SW¼NW¼SE¼.

The area described contains 10 acres in Cochise County.

The applicant desires that the lands be reserved for their historical value. The site is the old Dragoon Spring Stage Station constructed by the Butterfield-Overland Stage Company in the 1850's. This site has been nominated for inclusion in the National Register of Historic Sites.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on November 29, 1974, Volume Number 39, Page Number 41557, Document Number 74-27886.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with Bureau of Land Management Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregate lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977.

The Forest Service, U.S. Department of Agriculture, filed application Serial No. A-9602 on June 7, 1976, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

TONTO NATIONAL FOREST
BRAZALETES PUEBLO SITE

T 7 N., R. 6 E., Unsurveyed
Beginning at Corner No. 1 which lies N. 60°00'00" E. 15,630 feet from the corner common to T. 7 N., Rgs. 5 and 6 E., and T. 6 N., Rgs. 5 and 6 E.; thence N. 65° 00'00" E., 6,600 feet to Corner No. 2; thence S. 26°20'00" E., 3,000 feet to Corner No. 3; thence S. 64°45'00" W., 6,700 feet to Corner No. 4; thence N. 24°25'48" W., 3,028.57 feet to the point of beginnng.
All of the lands, when surveyed, will be situated in approximately Sections 22, 27, 28, and 33.

The area, as described, aggregates approximately 460.10 acres in Maricopa County, Arizona.

The applicant desires that the lands be reserved as an important archaeological site. The site has been accepted in the National Register of Historical Places, published in the March 11, 1975 FEDERAL REGISTER.

A notice of the proposed withdrawal was published in the Federal Register on July 15, 1976, Volume No. 41, Page No. 29190-29191, Document No. 76-20387, and corrected notice was published in the FEDERAL REGISTER on August 5, 1976, Volume No. 41, Page No. 32764. Document No. 76-22811.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. EARTHQUAKE STUDIES ADVISORY PANEL

Public Meeting

Pursuant to Public Law 92-463, effective January 5, 1973, notice is hereby given that an open meeting of the Earthquake Studies Advisory Panel will be held beginning at 8:30 a.m. (local time) on Monday, September 12, 1977, and continuing through Tuesday, September 13, 1977. The Advisory Panel will meet in the Petroleum Hall of the Green Center, Colorado School of Mines, Golden, Colorado 80401.

(1) *Purpose.* The Advisory Panel was appointed to advise the Geological Survey on earthquake plans and programs which are conducted in cooperation with universities, industry, and other Federal and State government agencies in a coordinated national program for earthquake research.

(2) *Membership.* The Advisory Panel is chaired by Professor Nathan M. Newmark and is composed of persons drawn from the fields of geology, geophysics, engineering, rock mechanics, and socio-economics, primarily from the academic community.

(3) *Agenda.* Review of the program plans forFiscalYear1978.

For more detailed information about the meeting, please call Dr. Robert M. Hamilton, Chief, Office of Earthquake Studies, Reston, Virginia 22092 (703-860-6472).

V. E. MCKELVEY,
Director,
U.S. Geological Survey.

Office of the Secretary

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977

Open Meetings and Briefings

AGENCY: Department of the Interior.

ACTION: Notice of open meetings.

SUMMARY: The Department of the Interior will hold open meetings on August 9 and 10, 1977 concerning the proposed Surface Mining Control and Reclamation Act of 1977. At each meeting the Department will report on the status of its planning to implement the Act and will provide a summary of the major provisions of the Act. The August 9th meeting will particularly address questions from the general public and citizen interest groups. The August 10th meeting will address questions from interested coal mining industry representatives. Both meetings will be open to the public to the extent that space permits.

DATES: The meetings will be held on August 9 and 10, 1977, at 12:30 p.m.

ADDRESS: Department of the Interior Auditorium, 18th & C Streets, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul Reeves, Director, Surface Mining Task Force, 202-343-4237.

JOAN M. DAVENPORT,
Assistant Secretary of the Interior.

[Order No. 2989, Amdt. No. 1]

NORTHERN MARIANA ISLANDS

Trust Territory of Pacific Islands

JULY 22, 1977

Subject: Government of the Northern Mariana Islands of the Trust Territory of the Pacific Islands. It is intended that the provisions of Secretary's Order No. 2989 remain in effect until the articles and sections specified in Section 1003(b) of the Northern Mariana Islands Commonwealth Covenant (P.L. 94-241) including the constitution of the Northern Mariana Islands are made effective by the President. Part XIV of the Order is therefore amended to read as follows:

PART XIV. EFFECTIVE DATE

This Order shall be effective as of April 1, 1976. It shall remain in effect until those articles and sections of the Covenant specified in Section 1003(b)

of the Covenant become effective, or until it is superseded or revoked, whichever occurs first.

JAMES A. JOSEPH,
Acting Secretary of the Interior.

TRUCKEE AND CARSON RIVER BASINS OF CALIFORNIA AND NEVADA—NEWLANDS, TRUCKEE STORAGE, AND WASHOE PROJECTS

Revision of Operating Criteria and Procedures for Coordinated Operation and Control

For the past 10 years, approximately, operating criteria and procedures (OCAP) have been annually prescribed for the coordinated operation of the Newlands, Truckee River Storage, and Washoe Reclamation Projects in the Truckee and Carson River Basins in Nevada and California. These OCAP were published in their entirety in the FEDERAL REGISTER on March 12, 1973 (38 FR 6697), and have been reimplemented in substantially the same form each year since that date.

The current severe drought, now in its second year, complicates the implementation of the OCAP.

In recognition of the legal and climatic circumstances, Section B of the OCAP as published in the FEDERAL REGISTER on March 12, 1973 (33 FR 6697), is hereby temporarily suspended. In the meantime, Stampede Reservoir will be operated to meet the general objectives stated for that reservoir in the present OCAP. The operation of that reservoir and releases of water therefrom will be conducted by the Secretary of the Interior in consultation with the Pyramid Lake Tribe, the Bureau of Reclamation, the Bureau of Indian Affairs, and the U.S. Fish and Wildlife Service. To fulfill the general objectives of the OCAP, the maximum amount of water will be conserved for storage in that reservoir to meet the contingencies of a continued drought. There will be a continuous reassessment of the water requirements of the watershed including requirements of the Pyramid Lake Fishery.

Floriston Rates may be modified temporarily to facilitate better distribution of the drought-limited water supply.

All other provisions of the OCAP as published on March 12, 1973, shall continue in effect for the period ending October 31, 1977, until further notice.

Dated: July 26, 1977.

CECIL D. ANDRUS,
Secretary of the Interior.

INTERNATIONAL TRADE COMMISSION

[337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

Consent Orders and Termination of Investigation

Notice is hereby given that—(1) The Commission hereby issues the attached orders as final orders in this investigation, thereby terminating the investigation. The orders are the subject of agreement between the Commission investigative attorney, the complainants—GTE Sylvania, Inc., and Philco Consumer Electronics Corp., and the respondents—Tokyo Shibaura Electric Co., Ltd.; Toshiba America, Inc.; Hitachi, Ltd.; Hitachi Kaden Hanbai Kabushiki Kaisha; Hitachi Sales Corp. of America; Sharp Corp.; Sharp Electronics Corp.; Sanyo Electric Co., Ltd.; Sanyo Electric, Inc.; Sanyo Electric Trading Co., Ltd.; Mitsubishi International Corp.; and Mitsubishi Electric Sales Corp.

(2) These orders are issued under the authority of sections 337 and 333 of the Tariff Act of 1930, as amended (19 U.S.C. 1337 and 1333), and under the applicable provisions of the Administrative Procedure Act (5 U.S.C. 551 et seq.). The Commission retains jurisdiction under section 337 to enforce these orders in the manner provided therein. These orders are issued on the basis of the consent of the parties, and do not constitute a determination of whether there is a violation of section 337 in this investigation. In entering into these orders, the parties have waived their rights to such a determination to be made after opportunity for a hearing and decision on notice and in accordance with the Administrative Procedure Act and Part 210 of the Commission's rules of practice and procedure, as amended (19 CFR Part 210).

(3) In issuing these orders, the Commission hereby waives the requirement of § 210.51(c) of its rules (19 CFR 210.51(c)) pursuant to § 201.4(b) of the rules (19 CFR 201.4(b)), having determined that there is good and sufficient reason therefor. However, compliance with these orders will be subject to further amendments to the Commission's Rules to govern proceedings of this nature.

(4) These orders do not constitute precedent for any future order of the Commission.

(5) The texts of the orders are attached.

Issued: July 29, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

COLOR TELEVISION RECEIVING SETS

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondents having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondents having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order;

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondents concede that the Commission has, jurisdiction of the subject mater of this investigation and over the respondents signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondent that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III.—DEFINITIONS

As used in this Consent Order: (A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondent" shall mean: (1) Sharp Corporation, and (2) Sharp Electronics Corporation.

(C) "Person" shall mean an individual, or any nongovernmental partnership, firm, association, corporation or other legal or business entity other than the above respondents or their majority owned and/or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States or for import into the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as part of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to each respondent and to each of its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owned business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with Section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

A respondent shall not: (1) Sell any color television receiving set or sets in the United States or for shipment or export to the United States, for resale in the United States at any price in a predatory manner as defined by United States law; or

(2) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reduction of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(3) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

A respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program for the purpose or with the effect of

(1) Raising, lowering, fixing, determining, establishing, controlling, maintaining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up, profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating, apportioning, assigning, limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VII.—REPORTING

With respect to each of the five consecutive fiscal years the first of which begins in 1977, each respondent shall separately review, determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs as defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered, including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor that the independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year: *Provided, however*, That a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year. Further, a special report containing the information provided for in

items (1) through (7) of the first paragraph of this Section VII and covering the period from the effective date of this Consent Order to September 30, 1977, shall be filed with the Commission by December 31, 1977. However, the special report need not include a statement of the independent United States auditor.

All such reports delivered pursuant to the provisions of this Section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven (7) years after the effective date of this Order and thereafter the reports shall be returned to the filing respondents.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondents.

In determining whether a respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VIII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by any respondent.

(B) For the purposes of securing compliance with this Consent Order, each respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined, provided, however, that no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to any respondent made, be permitted access to and the right to inspect and copy in said respondent's principal office during the office hour of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to and the right to inspect and copy the records of respondents' independent United States auditors used in reporting upon respondents' reports required in Section VII hereof.

(D) Each respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondents or their United States counsel.

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit compliance with any order or direction of any government, governmental body or agency having jurisdiction over a respondent: *Provided, however*, That such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which a respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over such respondent.

Compliance by any respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provision of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by any respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law.

XI.—SERVICE OF CONSENT ORDER

Each repondent is ordered and directed to:

(A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States;

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI(A) above, a conformed copy of this Consent Order upon each successor;

(C) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI (A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI (B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. Its provisions shall not apply to color television receiving sets imported and sold by respondents prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII above.

Its provisions also shall not apply to color television receiving sets sold by a respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII, above.

XIII.—MODIFICATION

This consent Order constitutes a settlement and resolution of Investigation No. 337-TA-23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues raised in the proceeding or an admission that any respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By order of the Commission.

Dated: July 29, 1977.

KENNETH R. MASON,
Secretary.

The above Order is Consented to:

For Complainants:

EDWARD J. GOLDSTEIN,
CURTIS, MALLET-PREVOST,
COLT & MOSLE,
PETER FLEMMING, Jr.,
Counsel for GTE Sylvania Inc. and Philco Consumer Electronics Corp.

For Respondents:

WENDER MURASE & WHITE,
PETER J. GARTLAND,
Counsel for Sharp Corp. and Sharp Electronics Corp.

For Commission Investigative Staff.

WILHELM A. ZEITLER,
Commission Investigative Attorney.

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by any respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondents related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondents that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis.[1] It is expressly provided, however, that nothing contained herein shall require any respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to, the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuit board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe benefits such as bonuses and incentives, vacations, holidays, health care, pension, paid sick leave and other time off, group insurance, employee welfare, disability wage continuation, etc.).

3. Factory indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling, freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions/bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies/expenses, tooling and utility costs, occupancy costs, testing gc/burn-in, general overhead, plant management, accounting, personnel, quality control supervision, industrial engineering, production engineering, maintenance, purchasing/procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, interest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

[1] The "Special Report" provided for under Section VII of this Consent Order shall be in accordance with generally accepted United States accounting principles. However, it will not constitute non-compliance with this Consent Order if annual reports prepared subsequent to the Special Report are not prepared on a basis consistent with the Special Report.

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondents having appeared and denied the mterial allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondents having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337") or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order;

It is hereby ordered, That:

I. TARIFF ACT OF 1930

The Commission has, and respondents concede that the Commission has, jurisdiction of the subject matter of this investigation and over the respondents signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II. SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondents that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III. DEFINITIONS

As used in this Consent Order: (A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondents" shall mean: (1) Hitachi, Ltd., (2) Hitachi Kaden Hanbai Kabushiki Kaisha, and (3) Hitachi Sales Corporation of America.

(C) "Person" shall mean an individual, or any nongovernmental partner-

ship, firm, association, corporation or other legal or business entity other than the above respondents or their majority owned and/or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States or for import into the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as part of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to each respondent and to each of its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owned business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with Section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

A respondent shall not: (1) Sell any color television receiving set or sets in the United States or for shipment or export to the United States, for resale in the United States at any price in a predatory manner as defined by United States law; or

(2) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reducation of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(3) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

A respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program, for the purpose or with the effect of:

(1) Raising, lowering, fixing, determining, establishing, controlling, maintaining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating apportioning, assigning limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VII.—REPORTING

With respect to each of the five consecutive fiscal years the first of which begins in 1977, each respondent shall separately review, determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs as defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered, including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor that the independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year: *Provided, however*, That a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year. Further, a special report containing the information provided for in items (1) through (7) of the first paragraph of this Section VII and covering the period from the effective date of this Consent Order to September 30, 1977, shall be filed with the Commission by December 31, 1977. However, the special report need not include a statement of the independent United States auditor.

All such reports delivered pursuant to the provisions of this Section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven (7) years after the effective date of this Order and thereafter the reports shall be returned to the filing respondents.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondents.

In determining whether a respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VIII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by any respondent.

(B) For the purposes of securing compliance with this Consent Order, each respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined: *Provided, however*, That no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to any respondent made, be permitted access to and the right to inspect and copy in said respondent's principal office during the office hour of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to and the right to inspect and copy the records of respondents' independent United States auditors used in reporting upon respondents' reports required in Section VII hereof.

(D) Each respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondents or their United States Counsel.

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit compliance with any order or direction of any government, governmental body or agency having jurisdiction over a respondent, provided, however, that such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which a respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over such respondent.

Compliance by any respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provision of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by any respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law.

XI.—SERVICE OF CONSENT ORDER

Each respondent is ordered and directed to: (A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States:

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI(A) above, a confirmed copy of this Consent Order upon each successor;

(C) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI(A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI(B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII.—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. Its provisions shall not apply to color television receiving sets imported and sold by respondents prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII above.

Its provisions also shall not apply to color television receiving sets sold by a respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII. above.

XIII.—MODIFICATION

This Consent Order constitutes a settlement and resolution of Investigation No. 337-TA-23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues raised in the proceeding or an admission that any respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By Order of the Commission.

Dated: July 29, 1977.

KENNETH R. MASON,
Secretary.

The above Order is Consented to:

For complainants:

EDWARD J. GOLDSTEIN,
CURTIS, MALLET-PROVOST,
(COLT & MOSLE),
PETER FLEMMING, JR.,
Counsel for GTE Sylvania Inc., and Philco Consumer Electronic Corp.

For respondents:

TANAKA, WALDERS & RITGER,
LAURENCE R. WALDERS,
Counsel for Hitachi, Ltd., Hitachi Kaden Hanbai Kabushiki Kaisha, and Hitachi Sales Corp. of America.

For Commission Investigative Staff:

WILHELM A. ZEITLER,
Commission Investigative Attorney.

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by any respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondents related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondents that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis.[2] It is expressly provided, however, that nothing contained herein shall require any respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to, the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuit board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe benefits such as bonuses and incentives, vacations, holidays, health care, pensions, paid sick leave and other time off, group insurance, employee welfare, disability wage continuation, etc.).

3. Factor indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling, freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions/bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies/expenses, tooling and utility costs, occupancy costs, testing/qc/burn-in, general overhead, plant management, accounting, personnel, quality control supervision, industrial engineering, production engineering, maintenance, purchasing/procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, interest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

[2] The "Special Report" provided for under Section VII of this Consent Order shall be in accordance with generally accepted United States accounting principles. However, it will not constitute non-compliance with this Consent Order if annual reports prepared subsequent to the Special Report are not prepared on a basis consistent with the Special Report.

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondents having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondents having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order;

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondents concede that the Commission has, jurisdiction of the subject matter of this investigation and over the respondents signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondents that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III.—DEFINITIONS

As used in this Consent Order:

(A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondents" shall mean

(1) Sanyo Electric Company, Ltd.,

(2) Sanyo Electric, Inc., and (3) Sanyo Electric Trading Company, Ltd.

(C) "Person" shall mean an individual, or any non-governmental partnership, firm, association, corporation or other legal or business entity other than the above respondents or their majority owned and/or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States or for import into the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as part of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to each respondent and to each of its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owned business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with Section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

A respondent shall not:

(1) Sell any color television receiving set or sets in the United States or for shipment or export to the United States, for resale in the United States at any price in a predatory manner as defined by United States law; or

(2) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reduction of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(3) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

A respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program, for the purpose or with the effect of:

(1) Raising, lowering, fixing, determining, establishing, controlling, maintaining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up, profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating, apportioning, assigning, limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VII.—REPORTING

With respect to each of the four consecutive fiscal years the first of which begins in 1977 and the first six months of the fifth consecutive fiscal year, each respondent shall separately review, determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs as defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor that the independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year: *Provided, however*, That a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year. Further, a special report containing the information provided for in items (1) through (7) of the first paragraph of this Section VII and covering the period from the effective date of this Consent Order to November 30, 1977, shall be filed with the Commission by March 1, 1978. However, the special report need not include a statement of the independent United States auditor.

All such reports delivered pursuant to the provisions of this Section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven (7) years after the effective date of this Order and thereafter the reports shall be returned to the filing respondents.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondents.

In determining whether a respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VIII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by any respondent.

(B) For the purposes of securing compliance with this Consent Order, each respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined: *Provided, however*, That no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to any respondent made, be permitted ac-

cess to and the right to inspect and copy in said respondent's principal office during the office hour of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to and the right to inspect and copy the records of respondents' independent United States auditors used in reporting upon respondents' reports required in Section VII hereof.

(D) Each respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondents or their United States counsel.

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit compliance with any order or direction of any government, governmental body or agency having jurisdiction over a respondent: *Provided, however,* That such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which a respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over such respondent.

Compliance by any respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provision of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by any respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law

XI.—SERVICE OF CONSENT ORDER

Each respondent is ordered and directed to: (A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States;

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI (A) above, a conformed copy of this Consent Order upon each successor;

(C) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI (A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI (B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII.—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. It provisions shall not apply to color television receiving sets imported and sold by respondents prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VI above.

Its provisions also shall not apply to color television receiving sets sold by a respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII, above.

XIII.—MODIFICATION

This Consent Order constitutes a settlement and resolution of Investigation No. 337–TA–23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues raised in the proceeding or an admission that any respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By Order of the Commission.

KENNETH R. MASON,
Secretary.

Dated: July 29, 1977.

The above Order is Consented to:

For Complainants:

EDWARD J. GOLDSTEIN,
CURTIS, MALLET-PREVOST,
COLT & MOSLE,
PETER FLEMMING, Jr.,
Counsel for GTE Sylvania Inc., and Philco Consumer Electronics.

For Respondents:

SHARRETTS, PALEY, CARTER & BLAUVELT,
GAIL T. CUMINS,
Counsel for Sanyo Electric Company, Ltd., Sanyo Electric, Inc. and Sanyo Electric Trading Company, Ltd.

For Commission Investigative Staff:

WILHELM A. ZEITLER,
Commission Investigative Attorney.

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by any respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondents related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondents that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis.[3] It is expressly provided, however, that

[3] The "Special Report" provided for under Section VII of this Consent Order shall be in accordance with generally accepted United States accounting principles. However, it will not constitute non-compliance with this Consent Order if annual reports prepared subsequent to the Special Report are not prepared on a basis consistent with the Special Report. nothing contained herein shall require any respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to, the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuit board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe benefits such as bonuses and incentives, vacations, holidays, health care, pension, paid sick leave and other time off, group insurance, employee welfare, disability/wage continuation, etc.).

3. Factory indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling, freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions/bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies/expenses, tooling and utility costs, occupancy costs, testing/qc/burn-in, general overhead, plant management, accounting, personnel, quality control supervision, industrial engineering, production engineering, maintenance, purchasing/procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, interest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

[Investigation No. 337–TA–23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondents having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondents having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order:

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondents concede that the Commission has, jurisdiction of the subject matter of this investigation and over the respondents signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondents that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III.—DEFINITIONS

As used in this Consent Order:

(A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondents" shall mean

(1) Tokyo Shibaura Electric Company, Ltd., and

(2) Toshiba America, Inc.

(C) "Person" shall mean an individual, or any nongovernmental partnership, firm, association, corporation or other legal or business entity other than the above respondents or their majority owned and or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States or for import into the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as part of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to each respondent and to each of its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owned business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with Section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

A respondent shall not:

(1) Sell any color television receiving set or sets in the United States or for shipment or export to the United States, for resale in the United States at any price in a predatory manner as defined by United States law; or

(2) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reduction of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(3) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

A respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program, for the purpose or with the effect of:

(1) Raising, lowering, fixing, determining, establishing, controlling, main-

taining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up, profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating, apportioning, assigning, limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VII.—REPORTING

With respect to each of the five consecutive fiscal years the first of which begins in 1977, each respondent shall separately review, determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs as defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered, including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor that the independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year: *Provided, however,* That a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year. Further, a special report containing the information provided for in items (1) through (7) of the first paragraph of this Section VII and covering the period from the effective date of this Consent Order to September 30, 1977, shall be filed with the Commission by December 31, 1977. However, the special report need not include a statement of the independent United States auditor.

All such reports delivered pursuant to the provisions of this Section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven (7) years after the effective date of this Order and thereafter the reports shall be returned to the filing respondents.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondents.

In determining whether a respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VIII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by any respondent.

(B) For the purposes of securing compliance with this Consent Order, each respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined, provided, however, that no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to any respondent made, be permitted access to and the right to inspect and copy in said respondent's principal office during the office hour of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to and the right to inspect and copy the records of respondents' independent United States auditors used in reporting upon respondents' reports required in Section VII hereof.

(D) Each respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondents or their United States counsel.

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit complaince with any order or direction of any government, governmental body or agency having jurisdiction over a respondent: *Provided, however,* That such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which a respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over such respondent.

Compliance by any respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provisions of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by any respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law.

XI.—SERVICE OF CONSENT ORDER

Each respondent is ordered and directed to:

(A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States;

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI(A) above, a conformed copy of this Consent Order upon each successor;

(C) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI (A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI (B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII.—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. Its provisions shall not apply to color television receiving sets imported and sold by respondents prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII above.

Its provisions also shall not apply to color television receiving sets sold by a respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII, above.

XIII.—MODIFICATION

This Consent Order constitutes a settlement and resolution of Investigation No. 337-TA-23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues raised in the proceeding or an admission that any respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By order of the Commission.

Dated: July 29, 1977.

KENNETH R. MASON,
Secretary.

The above Order is Consented to:

For Complainants:

EDWARD J. GOLDSTEIN,
CURTIS, MALLET-PROVOST,
COLT & MOSLE,
PETER FLEMMING JR.,
Counsel for GTE Sylvania Inc. and Philco Consumer Electronics Corp.

For Respondents:

MUDGE ROSE GUTHRIE
& ALEXANDER,
DAVID A VAUGHN,
Counsel for Tokyo Shibaura Electric Co., Ltd. and Toshiba America, Inc.

For Commission Investigative Staff:

WILHELM A. ZEILTER,
Commission Investigative Attorney.

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by any respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondents related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondents that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis.* It is expressly provided, however, that nothing contained herein shall require any respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to, the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuit board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe benefits such as bonuses and incentives, vacations, holidays, health care, pension, paid sick leave and other time off, group insurance, employee welfare, disability, wage continuation, etc.).

3. Factory indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling, freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions, bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies' expenses, tooling and utility costs, occupancy costs, testing/qc/burn-in, general overhead, plant management, accounting, personnel, quality control supervision, industrial engineering, production engineering, maintenance, purchasing procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, in-

*The "Special Report" provided for under Section VII of this Consent Order shall be in accordance with generally accepted United States accounting principles. However, it will not constitute non-compliance with this Consent Order if annual reports prepared subsequent to the Special Report are not prepared on a basis consistent with the Special Report.

terest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by the respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondent related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondent that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis. It is expressly provided, however, that nothing contained herein shall require the respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuit board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe benefits such as bonuses and incentives, vacations, holidays, health care, pension, paid sick leave and other time off, group insurance, employee welfare, disability/wage continuation, etc.).

3. Factory indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling, freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions/bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies/expenses, tooling and utility costs, occupancy costs, testing/qc/burn-in, general overhead, plant management, accounting, personnel, quality control supervision, industrial engineering, production engineering, maintenance, purchasing/procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, interest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondent having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondent having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order:

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondent concedes that the Commission has, jurisdiction of the subject matter of this investigation and over the respondent who is signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondent that the law had been violated or alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III. SETTLEMENT

It appears that MIC has never engaged in the business of manufacturing color television receiving sets and has not on a continuous and systematic basis engaged in the importation, distribution and/or sale of color television receiving sets in the United States since October 1, 1974. If MIC shall at any time enter into the business of importation and/or distribution, and/or sale of imported color television receiving sets in the United States on a continuous and systematic basis, MIC shall become subject to all of the terms and conditions of the Consent Order entered into by the other respondents to the Complaint and Consolidated Amended Complaint. The Consent Order to which MIC would be subject in such circumstances is attached hereto as Exhibit A.

By order of the Commission.

Dated: July 29, 1977.

KENNETH R. MASON,
Secretary.

The above Order is Consented to:

For Complainants:

EDWARD J. GOLDSTEIN.
CURTIS, MALLET-PREVOST,
COLT & MOSLE,
PETER FLEMMING, JR.,
Counsel for GTE Sylvania Inc. and Philco Consumer Electronics Corp.

For Respondent:

REID & PRIEST.
CHARLES F. SCHIRMEISTER.
Counsel for Mitsubishi International Corp.

For Commission Investigative Staff:

WILHELM A. ZEILTER,
Commission Investigative Attorney.

EXHIBIT A

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation: and

The respondent having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondent having denied any violation of Section

337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order;

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondent concedes that the Commission has, jurisdiction of the subject matter of this investigation and over the respondent signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondent that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III.—DEFINITIONS

As used in this Consent Order: (A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondent" shall mean (1) Mitsubishi International Corporation.

(C) "Person" shall mean an individual, or any nongovernmental partnership, firm, association, corporation or other legal or business entity other than the above respondent or its majority owned and/or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States or for import into the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as pat of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to the respondent and to its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owned business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

The respondent shall not: (1) Sell any color television receiving set or sets in the United States or for shipment or export to the United States, for resale in the United States at any price in a predatory manner as defined by United States law; or

(2) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reduction of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(3) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

The respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program, for the purpose or with the effect of:

(1) Raising, lowering, fixing, determining, establishing, controlling, maintaining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating, apportioning, assigning, limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VII.—REPORTING

With respect to each of the five consecutive fiscal years the first of which begins in 1977, the respondent shall determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs as defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered, including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year, provided, however, that a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year. Further, a special report containing the information provided for in items (1) through (7) of the first paragraph of this Section VII and covering the period from the effective date of this Consent Order to September 30, 1977, shall be filed with

the Commission by December 31, 1977. However, the special report need not include a statement of the independent United States auditor.

All such reports delivered pursuant to the provisions of this section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven years.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondent.

In determining whether the respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VIII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by the respondent.

(B) For the purposes of securing compliance with this Consent Order, the respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined, provided, however, that no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to any respondent made, be permitted access to and the right to inspect and copy in said respondent's principal office during the office hour of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to the right to inspect and copy the records of respondents' independent United States auditors used in reporting upon respondents' reports required in Section VII hereof.

(D) Each respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondents or their United States counsel

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit compliance with an order or direction of any government, governmental body or agency having jurisdiction over the respondent, provided, however, that such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which the respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over the respondent.

Compliance by the respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provision of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by any respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law.

XI.—SERVICE OF CONSENT ORDER

The respondent is ordered and directed to: (A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States;

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI(A) above, a conformed copy of this Consent Order upon each successor;

(c) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI (A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI (B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII.—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. Its provisions shall not apply to color television receiving sets imported and sold by respondents prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII above.

Its provisions also shall not apply to color television receiving sets sold by the respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII, above.

XIII.—MODIFICATION

This Consent Order constitutes a settlement and resolution of Investigation No. 337-TA-23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues

raised in the proceeding or an admission that any respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By Order of the Commission.

Dated:

Secretary.

The above Order is Consented to:

For Complainants:

CURTIS, MALLET-PREVOST, COLT & MOSLE,

For Respondents:

REID & PRIEST, *Counsel for Mitsubishi International Corp.*

For Commission Investigative Staff:

APPENDIX A

This Appendix A is for reporting purposes only and neither this Appendix A, nor anything set forth in this Consent Order, constitutes a concession or admission by any respondent regarding a standard of cost pursuant to which a finding of predatory pricing may be made.

Total costs attributable to color television receiving sets for reporting purposes shall include (1) all costs directly related to the manufacture, marketing and sale of such color television receiving sets, and (2) an appropriate allocation of all costs incurred by respondents related in part to the manufacture, marketing and sale of color television receiving sets and related in part to a product or business other than color television receiving sets, and (3) an appropriate allocation of all other costs incurred by respondents that are not related specifically to any product or business. All costs and all allocated costs shall be determined on the basis of generally accepted United States accounting principles applied on a consistent basis.[5] It is expressly provided, however, that nothing contained herein shall require any respondent to change its existing accounting systems and methods. Consistent with the foregoing, costs shall include, but will not be limited to, the following:

1. Materials (including integrated circuits, transistors, diodes, printed circuits board, resistors (fixed and potentiometers), capacitors (ceramic, electrolytic, wound film), coils and transformers, cathode ray tube, deflection yoke, cabinet, tuner, metal components, plastic components, speaker, and miscellaneous components).

2. Direct labor (including skilled, semi-skilled and unskilled production, technician, testing personnel and an allocation of fringe vacations, holidays, health care, pension, paid sick leave and other time off, group insurance, employee welfare, disability/wage continuation, etc.).

3. Factory indirect labor (including semi-skilled, skilled labor, technicians, craftsmen, foremen, and an appropriate allocation of fringe benefits such as referred to in Paragraph 2 above).

4. Distribution costs outside the United States (including warehousing, handling, transportation and insurance).

5. Export expenses (including cartage/drayage, shipping charge, and brokerage charge).

6. Shipping costs (including ocean freight, insurance, duties and customs clearance charges).

7. Distribution costs in the United States (including warehousing, handling freight-in and insurance).

8. Marketing and sales costs in the United States and outside the United States (including freight-out, commissions/bonuses/sales salaries, incentives, cooperative advertising expense, customer financing, warranty, rebates, sales administration, reserve for bad debts arising from the sale of color television receivers occurring on or after the effective date of this Consent Order, sales returns and allowances and all deductions from revenues not accounted on invoices).

9. Factory overhead (including supplies/expenses, tooling and utility costs, occupancy costs, testing/qc/burn-in, general overhead, plant management, accounting, personnel quality control supervision, industrial engineering, production engineering, maintenance, purchasing/procurement, inventory control, depreciation, taxes other than income taxes, interest, product design, product engineering, and royalties).

10. General administrative costs (including divisional and corporate-wide expenses such as home office administrative costs, interest, taxes other than income taxes, research and development, product design and product engineering, accounting and auditing and legal incurred in the ordinary course of business, public relations and administrative salaries).

[5] The "Special Report" provided for under Section VII of this Consent Order shall be in accordance with generally accepted United States accounting principles. However, it will not constitute non-compliance with this Consent Order if annual reports prepared subsequent to the Special Report are not prepared on a basis consistent with the Special Report.

[Investigation No. 337-TA-23]

CERTAIN COLOR TELEVISION RECEIVING SETS

CONSENT ORDER

Complainants GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, having filed a Complaint and Consolidated Amended Complaint; and

The United States International Trade Commission ("Commission") having initiated an investigation pursuant to Notices of Investigation; and

The respondent having appeared and denied the material allegations of the Complaint and Consolidated Amended Complaint; and

The Commission having determined it has jurisdiction of the subject matter of this proceeding and the Commission having determined that the Consolidated Amended Complaint states a cause of action under Section 337 of the Tariff Act of 1930, 19 U.S.C. Section 1337 and all acts amendatory thereof and supplementary thereto; and

Before the making of any findings of fact or conclusions of law, and before the hearing or adjudication of any issue of fact or law herein, and the respondent having denied any violation of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. Section 1337 ("Section 337"), or as alleged in the Complaint and Consolidated Amended Complaint, and all of the parties hereto having consented to the entry of this Consent Order:

It is hereby ordered, That:

I.—TARIFF ACT OF 1930

The Commission has, and respondent concedes that the Commission has, jurisdiction of the subject matter of this investigation and over the respondent signatory hereto for the purposes of issuing and enforcing this Consent Order, and the Protective Order dated September 17, 1976.

II.—SETTLEMENT PURPOSES ONLY

This Consent Order is for settlement purposes only and does not constitute a determination by the Commission or an admission by respondent that the law has been violated as alleged in the Complaint and Consolidated Amended Complaint or Notices of Investigation or otherwise.

III.—DEFINITIONS

As used in this Consent Order: (A) "Complainants" shall mean GTE Sylvania Incorporated and Philco Consumer Electronics Corporation, and each of them.

(B) "Respondent" shall mean Mitsubishi Electric Corporation.

(C) "Person" shall mean an individual, or any non-governmental partnership, firm, association, corporation or other legal or business entity other than the above respondent or its majority owned and/or controlled subsidiaries, their successors or assigns.

(D) "United States" shall mean the fifty States, the District of Columbia and Puerto Rico.

(E) "Color Television Receiving Set" shall mean any color television receiving set manufactured in any country other than the United States for shipment or export to the United States for resale in the United States. Color television receiving sets shall include:

(1) A finished color television receiving set which at the time of importation is fully assembled, whether or not tested or packaged, for distribution to the purchaser as a color television receiving set; and

(2) A color television receiving set which at the time of importation is not fully assembled, whether or not in the cabinet, but substantially complete as a finished color television receiving set, as defined in Subsection (1) above, at least to the point where the color picture tube is in place as part of the set; and

(3) A kit which at the time of importation contains all of the components necessary to make it a color television receiving set as defined in Subsections (1) and (2) above.

IV.—APPLICABILITY

The provisions of this Consent Order shall apply to respondent and to its officers, directors, employees, controlled (whether by stock ownership or otherwise) and/or majority owner business entities, successors and assigns, and to each of them, and to all other persons who receive actual notice of this Consent Order by service in accordance with Section XI hereof.

V.—INDIVIDUAL CONDUCT PROHIBITED

Respondent shall not: (1) Give to any person a discount, allowance, credit, rebate, gratuity, financing and credit benefit, or any other monetary inducement to purchase, or other deduction or term which results directly or indirectly in a reduction of the price of a color television receiving set sold in the United States or for shipment or export to the United States, for resale in the United States, for which appropriate descriptive financial records are not maintained by respondent; or

(2) Unlawfully hinder, restrict, limit or prevent directly or through another, any company incorporated in the United States or any subsidiary thereof from buying or selling color television receiving sets from or to any other person in the United States or in Japan in a manner which has an effect on United States commerce and which is in connection with the importation of color television receiving sets into the United States or the sale of such imported sets in the United States or for shipment or export to the United States for resale in the United States.

VI.—CONCERTED CONDUCT PROHIBITED

Respondent in connection with the importation of color television receiving sets into the United States or for shipment or export to the United States for resale in the United States shall not unlawfully with any other person or persons, initiate, enter into, adhere to, maintain or further, directly or indirectly, any contract, agreement, combination, conspiracy, understanding, plan or program, for the purpose or with the effect of:

(1) Raising, lowering, fixing, determining, establishing, controlling, maintaining or stabilizing the price, price level, price ceiling, price floor, net price, discount, rebate, allowance, mark-up, profit margin, warranty, or any term or condition of sale at which any other person sells any color television receiving set in the United States or for shipment or export to the United States for resale in the United States; or

(2) Allocating, dividing, rotating, apportioning, assigning, limiting or imposing or attempting to impose any limitations or restrictions respecting (a) the person or persons to whom, or (b) the markets or territories in which, or (c) the volume at which any person may sell color television receiving sets in the United States or for shipment or export to the United States for resale in the United States; or

(3) Hindering, restricting, limiting, or preventing any person from buying or selling color television receiving sets from or to any other person in the United States in a manner which has an effect on United States commerce.

VIII.—REPORTING

With respect to each of the five consecutive fiscal years the first of which begins in 1977, respondent shall separately review, determine and report in English under oath to the Commission, on an annual basis, the following: (1) Total unit volume of all color television receiving sets sold in the United States or for shipment or export to the United States for resale in the United States, (2) total unit volume in each screen size for such color television receiving sets, (3) aggregated revenues for all such color television receiving sets, (4) aggregated revenues in each screen size for such color television receiving sets, (5) total aggregated costs are defined in Appendix A for such color television receiving sets, (6) total aggregated costs as defined in Appendix A in each screen size for such color television receiving sets, and (7) whether any such color television receiving set has been sold for less than the total variable costs of such set.

The reports provided for herein shall contain a statement of the manner in which such review and determination was conducted and the factors that were considered, including the methods or method of cost allocation. All amounts set forth in such reports shall be expressed in United States dollars, with disclosure of any exchange rate(s) used to calculate such dollar amounts, including the date(s) on which such rate(s) were controlling.

In addition, respondent shall provide a statement of its independent United States auditor that the independent United States auditor has reviewed respondent's records in conjunction with its annual audit and that the independent United States auditor has reviewed the report required hereby and on the basis of such annual audit does not find any inconsistency between the data in the report and any information which it learned during its annual audit.

Such report, containing the information provided for in items (1) through (7) of the first paragraph of this Section VII, with the oath of the respondent and the statement of the independent United States auditor, shall be delivered to the Commission not later than one hundred and fifty (150) days after the close of each fiscal year: *Provided, however,* That a preliminary report containing the information required under items (1), (2), (3) and (4) of the first paragraph of this Section VII shall be delivered to the Commission not later than ninety (90) days after the close of each fiscal year.

All such reports delivered pursuant to the provisions of this Section shall be maintained for a period of five (5) years after the date of such delivery but no later than seven (7) years after the effective date of this Order and thereafter the reports shall be returned to the filing respondent.

All such reports shall be deemed to be proprietary and business confidential and no information contained in or obtained from any such report shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of a legal proceeding or as otherwise required by law upon reasonable written notice to the respondent.

In determining whether respondent is in compliance with the provisions of Sections V and VI hereof, the Commission may consider evidence that the information provided in the reporting requirements of this Section VII is incomplete or inaccurate.

VII.—INSPECTION AND COMPLIANCE

(A) In determining whether there has been compliance with the prohibitions of this Consent Order, the Commission may consider evidence of any material differences between the revenues and costs reported pursuant to the reporting requirements of Section VII hereof. Further, in determining whether there has been compliance with the provisions of this Consent Order, the Commission may consider evidence of all special economic and competitive circumstances presented by respondent.

(B) For the purposes of securing compliance with this Consent Order, respondent shall retain any and all records made and received in the usual and ordinary conduct of its color television receiving set business, whether in detail or in summary form, for a period of three (3) years from the close of the fiscal year to which they pertain, and in summary form for a period of seven (7) years from the close of the fiscal year to which they pertain from which the accuracy of the statements and reports described in Section VII above, may be determined: *Provided, however,* That no such record need be retained for more than two years from the close of the last fiscal year for which a report is required.

(C) For the purpose of determining or securing compliance with this Consent Order, and for no other purposes, and subject to any privilege recognized by federal courts of the United States, during the period from filing the first report required herein up to and including two years from the close of the last fiscal year for which a report is required, duly authorized representatives of the Commission shall, upon reasonable written notice by the Commission or its staff, to the respondent made, be permitted access to and the right to inspect and copy in said respondent's principal office during the office hours of said respondent, and in the presence of counsel or other representative if said respondent chooses, all books, ledgers, accounts, correspondence, memoranda, and other records and documents, both in detail and in summary form, in the possession of or under the control of said respondent relating to any of the matters contained in this Consent Order and further shall have access to and the right to inspect and copy the records of respondent's independent United States auditors used in reporting upon respondent's reports required in Section VII hereof.

(D) Respondent shall make available for consultation with the duly authorized representative of the Commission, in the presence of counsel, the individual or individuals who were responsible for the preparation of the report described in Section VII hereof and/or who have knowledge of the substance of the matters contained therein.

(E) No information obtained by the means provided in Section VIII shall be divulged by any representative of the Commission to any person other than a duly authorized representative of the Commission, except as required in the course of legal proceedings to which the Commission is a party for the purpose of securing compliance with this Consent Order or as otherwise required by law, upon reasonable written notice to respondent or its United States counsel.

IX.—GOVERNMENTAL ACTION

This Consent Order shall not prohibit compliance with any order or direction of any government, governmental body or agency having jurisdiction over respondent, provided, however, that such compliance shall not constitute a defense to a violation of this Consent Order except insofar as such a defense is recognized under United States law.

Nothing contained in this Consent Order shall be construed to constitute a waiver of any defense recognized under the laws of the United States, which respondent may have as a result of compliance with any order or directive of any government, governmental body or agency having jurisdiction over such respondent.

Compliance by respondent with any order or directive of the Japanese Government issued in implementation of and in accordance with the provisions of the agreement between the Government of the United States of America and the Government of Japan relating to color television receivers as set forth in notes between said governments dated May 20, 1977, shall not be a violation of this Consent Order.

X.—ENFORCEMENT

Each provision of this Consent Order shall be construed independently of any other provision, and compliance with any one provision shall not excuse a violation of any other provision.

Should the Commission have reason to believe that a violation has occurred, a hearing shall be held upon notice. The issues at the hearing shall be: (a) Whether a violation has occurred in fact, and (b) if so, a determination of the appropriate remedy. In determining whether there has been a violation, the Commission may consider evidence of any special competitive or economic circumstances presented by respondent in defense of the alleged violation.

Nothing contained herein shall limit any right of review provided by law.

XI.—SERVICE OF CONSENT ORDER

Respondent is ordered and directed to:

(A) Serve, within thirty (30) days after the effective date of this Consent Order, a conformed copy of this Consent Order upon each of its respective officers, directors, managing agents, agents, and employees who have any responsibility for the marketing, distribution or sale of such respondent's color television receiving sets in the United States or for shipment or export to the United States for resale in the United States;

(B) Serve, within thirty (30) days after the succession of any of the persons referred to in Section XI(A) above, a conformed copy of this Consent Order upon each successor;

(C) Maintain such records as will show the name, title and address of each such officer, director, managing agent, agent and employee upon whom the Consent Order has been served, as described in Section XI(A) and (B) above, together with the date on which service was made; and

(D) The obligations set forth in Section XI (B) and (C) above shall remain in effect for a period of seven (7) years after the effective date of this Consent Order.

XII.—EFFECTIVE DATE

This Consent Order is to become effective as of the date of its issuance by the Commission. Its provision shall not apply to color television receiving sets imported and sold by respondent prior to such issuance, except that such sets which are imported and sold in the period from the beginning of the fiscal year beginning in 1977 but prior to the issuance of this Consent Order shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII above.

Its provisions also shall not apply to color television receiving sets sold by respondent to a United States customer for importation into the United States prior to such issuance, except such sets which are delivered and paid for in the period from the beginning of the fiscal year beginning in 1977 but prior to such issuance shall be included for the purpose of compliance with items (3) and (5) of the first paragraph of Section VII, above.

XIII.—MODIFICATION

This Consent Order constitutes a settlement and resolution of Investigation No. 337-TA-23 and the Complaint and the Consolidated Amended Complaint, and does not constitute a determination of any of the factual or legal issues raised in the proceeding or an admission that respondent has engaged in the conduct prohibited hereby, or an admission that said conduct violates Section 337. Any of the parties to this Consent Order may apply to the Commission at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Consent Order, for the amendment or modification of any of the provisions thereof, or for the enforcement or compliance therewith.

By Order of the Commission.

Dated:

Secretary.

The above Order is Consented to:

For Complainants:

EDWARD J. GOLDSTEIN,
CURTIS, MALLET-PREVOST,
COLT & MOSLE,
PETER ELEMMING, JR.,
Counsel for GTE Sylvania Inc., and Philco Consumer Electronics Corp.

For Respondent:

BAKER & MCKENZIE,
BURCH E. CLUBB,
Counsel for Mitsubishi Electric Corp.

For Commission Investigative Staff:

WILHELM A. ZEILTER,
Commission Investigative Attorney.

NATIONAL COMMISSION ON NEW TECHNOLOGICAL USES OF COPYRIGHTED WORKS

COPYRIGHT LAW AND PROCEDURE

Extension of Time for Filing Requests for Oral Responses to Reports

The June 21, 1977 issue of the Federal Register at page 31506 included a Notice from the National Commission on New Technological Uses of Copyrighted Works (CONTU) announcing the availability of committee reports on copyright protection for computer software and automated data bases. The Commission is disseminating these reports in order to elicit responses from interested parties. The Commission invited written comments or requests to testify by August 1, 1977.

The time for receipt of such requests has been extended until September 1, 1977. Written comments on the two committee reports and requests to appear should be submitted before September 1, 1977 in order to allow the Commission adequate time to schedule hearings and to consider the responses. Requests and comments should be mailed to Arthur J. Levine, Executive Director, CONTU, Washington, D.C. 20558.

If you are interested in receiving the reports, please write to Carol Risher, Information Officer, CONTU, Washington, D.C. 20558, 202-557-0996.

ARTHUR J. LEVINE,
Executive Director, National Commission on New Technological Uses of Copyrighted Works.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

MUSIC ADVISORY PANEL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a closed meeting of the Music Advisory Panel (Jazz Section) to the National Council on the Arts will be held on August 24-27, 1977, from 9:30 a.m. to 6:00 p.m., in Room 1422, Columbia Plaza Building, 2401 E Street NW., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of March 17, 1977. These sessions may be closed to the public pursuant to subsections (c) (4), (6) and 9(B) of section 552(b) of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

Dated: August 1, 1977.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

[FR Doc.77-22383 Filed 8-3-77;8:45 am]

ARTISTS-IN-SCHOOLS ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Artists-in-Schools Advisory Panel to the National Council on the Arts will be held on August 24, 1977, from 8:30 a.m. to 5 p.m., August 25, from 9 a.m. to 5:30 p.m. and August 26, from 9 a.m. to 12:30 p.m., in the Marriott Inn, Orms and Charles Streets, Providence, Rhode Island 02904.

A portion of this meeting will be open to the public on August 24, 1977, from 8:30 a.m. to 11 a.m. on a space available basis. Accommodations are limited. The agenda for this session will include a discussion of policy.

The remaining session of this meeting August 24, from 1:30 p.m. to 5 p.m., August 25, from 9 a.m. to 5:30 p.m. and August 26, from 9 a.m. to 12:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER March 17, 1977, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(B) of section 552(b) of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call 202-634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and Humanities.

JULY 28, 1977.

LITERATURE ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Literature Advisory Panel to the National Council on the Arts will be held on August 24-26, 1977, from 9 a.m. to 5:30 p.m., and August 27, 1977, from 9 a.m. to 1 p.m., in Room 1422 Columbia Plaza Building, 2401 E Street NW., Washington, D.C. 20506.

A portion of this meeting will be open to the public on August 27, 1977, from 11 a.m. to 1 p.m. on a space available basis. Accommodations are limited. The agenda for this session will include a discussion of policy.

The remaining sessions of this meeting August 24-26, from 9 a.m. to 5:30 p.m. and August 27, from 9 a.m. to 11 a.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER March 17, 1977, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(B) of section 552(b) of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-269, 50-270 and 50-287]

DUKE POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 44, 44, and 41 to Facility Operating License Nos. DPR-38, DPR-47, and DPR-55, respectively, issued to Duke Power Company which revised the Technical Specifications for operation of the Oconee Nuclear Station, Unit Nos. 1, 2 and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

The amendments authorized changes in the Technical Specifications to permit irradiation of the remaining Oconee Nuclear Station, Units Nos. 1, 2 and 3 reactor vessel surveillance specimens at Crystal River Unit 3. An exemption to that provision of Appendix H to Title 10 of the Code of Federal Regulations Part 50, which would have otherwise required irradiation of the Oconee capsules in the Oconee vessels, has also been granted. Such action was in response to a generic failure of first-generation design Surveillance Specimen Holder Tubes (SSHTs) at Oconee and other operating Babcock & Wilcox 177 fuel assembly reactors.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated March 10, 1977, (2) Amendments Nos. 44, 44 and 41 to License Nos. DPR-38, DPR-47 and DPR-55, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Oconee County Library, 201 South Spring Street, Walhalla, South Carolina 29691. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 14th day of July 1977.

For the Nuclear Regulatory Commission.

CHARLES M. TRAMMELL,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.77-22090 Filed 8-3-77;8:45 am]

[Docket No. PRM-30-53]

IDATA, INC.

Withdrawal of Petition for Rule Making

Notice is hereby given that the Nuclear Regulatory Commission has received a letter from Idata, Inc. withdrawing its petition for rule making PRM-30-53.

Idata, Inc. by letter dated April 24, 1973, petitioned the Atomic Energy Commission to amend 10 CFR Part 30 "Rules of General Applicability to Licensing by Byproduct Materials," by adding photo-identification credentials and materials containing not more than 1 microcurie of promethium-147 per item to the list of products whose possession and use are exempt from licensing requirements under § 30.15. The petition also proposed complementary amendments to §§ 32.14, 32.15 and 32.16 to make the substance of those licensing regulations applicable. By letter dated June 1, 1977, the petitioner has withdrawn its petition for rule making from further consideration by the Nuclear Regulatory Commission.

Copies of the petition and the letter withdrawing the petition are available for public inspection at the Commission's Public Document Room at 1717 H Street, Northwest, Washington, D.C.

Dated at Washington, D.C. this 28th day of July, 1977.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-22221 Filed 8-3-77;8:45 am]

[Docket No. 50-309]

MAINE YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 31 to Facility Operating License No. DPR-36, issued to Maine Yankee Atomic Power Company (the licensee), which revised Technical Specifications for operating of the Maine Yankee Atomic Power Station (the facility) located in Lincoln County, Maine. The amendment is effective as of its date of issuance.

The amendment to the Technical Specifications incorporates revised pressure-temperature operating limits based on data obtained from the material surveillance program.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 18, 1976, (2) Amendment No. 31 to License No. DPR-36, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Wiscasset Public Library Association, High Street, Wiscasset, Maine. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 19th day of July 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-22091 Filed 8-3-77;8:45 am]

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO., ET AL.

Order for Modification of License

I. Northeast Nuclear Energy Company, The Hartford Electric Light Company,

Western Massachusetts Electric Company, and Connecticut Light and Power Company, P.O. Box 270, Hartford, Connecticut 06101 (the Licensees), are the holders of Operating License No. DPR-65 which authorizes the operation of a nuclear power reactor known as Millstone Nuclear Power Station, Unit No. 2 (the facility) at steady state reactor power levels not in excess of 2560 megawatts thermal (rated power). The facility is a pressurized water reactor (PWR) located at the Licensees' site in Waterford, Connecticut.

II. In conformance with the evaluation of the performance of the Emergency Core Cooling System (ECCS) of the facility submitted by the Licensees on April 21, 1975, and supplemented on October 7, 1976, the Technical Specifications issued March 2, 1977 for the facility limit the reactor core peak linear heat generation rate to 16.3 kW/ft.

The ECCS performance evaluation submitted by the Licensees was based upon a previously approved ECCS evaluation model developed by Combustion Engineering, Inc. (CE), the designer of the facility, to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50, § 50.46 and Appendix K. The evaluation indicated that with peak linear heat generation rate limited as set forth above, and with the other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform to the criteria contained in 10 CFR § 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long term cooling.

On July 6, 1977, the NRC staff was informed by the Licensees that errors had been discovered by Combustion Engineering (CE) in the small break ECCS analysis for the facility. This analysis is described in CENPD-137P, "Calculative Methods for the CE Small Break LOCA Evaluation Model," August 1974. The errors, consisting of non-conservative input values to the generic small break model are described below:

(1) Peak Linear Heat Generation Rate (PLHGR)—The small break LOCA analysis assumed that the initial PLHGR was 15.25 Kw/ft while the present operating limit for the facility, contained in the Technical Specifications, is 16.30 Kw/ft. It is expected that upon reanalysis, the increase in initial PLHGR will cause an increase in the initial stored energy in the fuel and ultimately increase the peak fuel clad temperature (PCT) predicted for the LOCA.

(2) High Pressure Safety Injection (HPSI) Flow Rate—The small break LOCA analysis assumed a HPSI flow rate which was 12 percent higher than the flow measured at the facility. It is expected that upon reanalysis, the decrease in HPSI flow will decrease the cooling capability of the HPSI system resulting in an increase in the PCT.

CE has made a preliminary evaluation of these errors based on a set of analyses performed for another CE reactor. This analysis showed that for a decrease in HPSI flow of about 13% and an increase in PLHGR of 1.85 Kw/ft, the PCT for the worst small break accident increased 250°F over the previous worst small break PCT. Therefore, it was concluded that a specific Millstone Unit No. 2 analysis would result in less than a 400° F increase in PCT for the worst small break. The previous analysis showed that the PCT for the worst small break was 1606°F. Upon reanalysis it is expected that the small breaks will remain nonlimiting for Millstone Unit No. 2. We concur with CE's conclusions.

Accordingly, the operating limit PLHGR, contained in the Technical Specifications, is still based upon the limiting large break LOCA, the calculation of which is unaffected by these errors. Therefore, the existing PLHGR for the facility remains appropriately conservative.

The staff has instructed the Licensees to provide a revised LOCA analysis for a spectrum of small breaks. The staff expects that when final revised calculations for the facility are submitted using the corrected plant specific model input data they will demonstate that operation with a peak linear heat generation rate of 16.3 Kw/ft will fully conform to the criteria of 10 CFR § 50.46(b). Such revised calculations, fully conforming to the requirements of 10 CFR § 50.46, are to be provided for the facility as soon as possible.

Upon notification by the NRC staff on July 7, 1977, the Licensees promptly confirmed the conservatism of existing operating limits for the facility and committed by letter dated July 7, 1977, to provide a reanalysis to correct the errors. The NRC staff believes that the Licensees' action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

Copies of the following documents are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and are being placed in the Commission's Local Public Document Room, the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut: (1) Letter dated July 7, 1977 from Northeast Nuclear Energy Company to G. Lear, Chief, Operating Reactors Branch No. 3, and (2) This Order for Modification of License. In the Matter of Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company (Millstone Nuclear Power Station, Unit No. 2), Docket No. 50-336.

III. Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *It is ordered*, That Facility Operating License No. DPR-65 is hereby amended by adding the following new provision:

As soon as possible, the Licensees shall submit a re-evaluation of ECCS cooling performance calculated in accordance with Combustion Engineering Company's Evaluation Model approved by the NRC staff and corrected for the errors described herein.

Dated in Bethesda, Maryland this 25th day of July, 1977.

For the Nuclear Regulatory Commission.

HAROLD R. DENTON,
Acting Director, Office of Nuclear Reactor Regulation.

[FR Doc.77-22092 Filed 8-3-77;8:45 am]

[Docket No. 50-245]

NORTHEAST NUCLEAR ENERGY CO., ET AL.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 40 to Provisional Operating License No. DPR-21 issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company, for operation of the Millstone Nuclear Power Station, Unit No. 1, located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications which will provide for (1) a 5% decrease in the allowable Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) for reactor core flow less than 90% of rated flow; (2) an increase in the power level, from 10% to 20%, below which the Rod Worth Minimizer (RWM) must be operable; and (3) changes to the secondary containment test program to delete the 5 mile per hour requirement on wind speed for the secondary containment integrity test and change the completion requirement for the test.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated March 3, March 29, and May 9, 1977, (2) Amendment No. 40 to License No. DPR-21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 26th day of July 1977.

For the Nuclear Regulatory Commission.

STANLEY J. NOWICKI,
Acting Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc.77-22223 Filed 8-3-77;8:45 am]

[Docket No. 50-285]

OMAHA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulator Commission (the Commission) has issued Amendment No. 27 to Facility Operating License No. 40 issued to Omaha Public Power District which revised Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment is effective as of its date of issuance.

The amendment incorporates into the Technical Specifications limiting conditions for operation and surveillance requirements for shock suppressors (snubbers) on safety related systems.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 2, 1976, as supplemented by letter dated December 21, 1976, (2) Amendment No. 27 to License No. DPR-40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Blair Public Library, 1665 Lincoln Street, Blair, Nebraska. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 25th day of July 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch, No. 3, Division of Operating Reactors.

TOPICAL REPORT

Notice of Issuance and Availability

The Nuclear Regulatory Commission has issued a topical report, NUREG-0179, "Regulatory and Other Responsibilities as Related to Transportation Accidents."

NUREG-0179 presents the views and understandings of the author concerning the functional responsibilities of the different parties involved in dealing with transportation accidents that involve radioactive materials. It was prepared in response to numerous inquiries and is based on present practices, existing regulations, discussions with many of the groups involved, and available formal opinions. The establishment of responsibility for new activities and any significant reassignment of responsibility will be effectuated by the Nuclear Regulatory Commission and the Department of Transportation pursuant to a Memorandum of Understanding between these agencies or through rule making, as appropriate, and such responsibilities are unaffected by NUREG-0179.

The report is available for inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Copies may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161. (Paper copy: $3.50, Microfiche: $3.00)

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 26th day of July 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

[Docket No. 50-423]

NORTHEAST NUCLEAR ENERGY CO., ET AL.[1]

Receipt of Additional Antitrust Information; Time for Submission of Views on Antitrust Matters

Northeast Nuclear Energy Company, et al., pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, filed on April 18, 1977 and May 9, 1977, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information adds Central Maine Power Company as an owner of the Millstone Nuclear Power Station, Unit No. 3, and increases the ownership shares in the units for Massachusetts Municipal Wholesale Electric Company and Montaup Electric Company.

The information was filed by Northeast Nuclear Energy Company in connection with their application for a construction permit and operating license for a pressurized nuclear reactor. Northeast Nuclear Energy Company, et. al. was issued a construction permit on August 9, 1974 for the Millstone Nuclear Power Station, Unit No. 3. Construction is underway on a site located on the north shore of Long Island Sound, in the Town of Waterford, New London County, Connecticut.

The original antitrust portion of the application was submitted on October 31, 1972 and the Notice of Receipt of Application for a Construction Permit and Facility License; Time for Submission of Views on Antitrust Matters was published in the FEDERAL REGISTER on March 23, 1973 (38 FR 7595). The Notice of Hearing was also published in the FEDERAL REGISTER on March 23, 1973 (38 FR 7595).

A copy of all of the above stated documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. ATTN: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have his views on the antitrust matters with re-

---

[1] The following are the holders of Construction Permit No. CPPR-113: Ashburnham Municipal Light Plant, Boylston Municipal Lighting Plant, Central Maine Power Company, Central Vermont Public Service Corporation, Chicopee Municipal Lighting Plant, City of Burlington, Vermont, City of Holyoke, Massachusetts Gas and Electric Department, the Connecticut Light and Power Company, Fitchburg Gas and Electric Light Company, Green Mountain Power Corporation, The Hartford Electric Light Company, Marblehead Municipal Light Department, Massachusetts Municipal Wholesale Electric Company, Middleton Municipal Light Department, Montaup Electric Company, New England Power Company, North Attleborough Electric Department, Northeast Nuclear Energy Company, Paxton Municipal Light Department, Peabody Municipal Light Plant, Public Service Company of New Hampshire, Shrewsbury Light Plant, Templeton Municipal Lighting Plant, Town of South Hadley Electric Light Department, The United Illuminating Company, Vermont Electric Cooperative, Inc., Vermont Electric Power Company, Inc., Wakefield Municipal Light Department, West Boylston Municipal Lighting Plant, Western Massachusetts Electric Company, Westfield Gas and Electric Light Department.

spect to the Central Maine Power Company and the Massachusetts Municipal Wholesale Electric Company presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission on or before September 26, 1977.

Dated at Bethesda, Maryland, this 21st day of July, 1977.

For the Nuclear Regulatory Commission.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 77-31]

CASUALTY REPORT; SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

Marine Casualty Report.—A report on the collision between the Norwegian bulk carrier SS BAUNE and the U.S. tankship KEYTRADER in the lower Mississippi River on January 18, 1974, has been made available to the public. The report No. USCG/NTSB-MAR-77-1, was released jointly by the National Transportation Safety Board and the U.S. Coast Guard on July 27.

The report indicates that the bow of the BAUNE penetrated about 20 feet into the two forward cargo tanks on the starboard side of the KEYTRADER. Gasoline spilled from the ruptured cargo tanks onto the maindecks of both vessels and onto the surrounding water and ignited; the flames were not extinguished for 53 hours. The collision and fire damaged both vessels extensively, killed six persons, and injured three others; ten persons are missing.

The Safety Board has determined that the probable cause of this casualty was the failure of the KEYTRADER's pilot to correctly interpret the BAUNE's movements, which led him to make a port turn to position his ship for an improper starboard-to-starboard passing with the BAUNE.

Contributing to the accident were the operation of both vessels at speeds that did not allow sufficient time to establish a radar trackline, compounded by the inadequate use of the shipboard radar to evaluate a safe passing manuever; the failure to establish communications; the inadequacy of sound signals under existing environmental conditions; and the failure of the BAUNE to maintain a lookout.

As a result of its analysis of this accident, the Safety Board on June 15 recommended in recommendation No. M-77-7 that the Maritime Administration of the U.S. Department of Commerce develop a plan covering both Collision Avoidance System (CAS) and Marine Radar Interrogation Transponders (MRIT) for early installation of electronic collision avoidance aids aboard ships that are navigating by radar on inland waterways. The Board believes that CAS or MRIT would have significantly increased the probability of mutual detection of the KEYTRADER and the BAUNE and would have indicated that the BAUNE was moving upriver and not out of an anchorage area—as was assumed by the pilot of the KEYTRADER.

As a further result of its analysis, the Safety Board also on June 15 recommended (M-77-1 through 6) that the Coast Guard: Set guidelines to determine the maximum safe speeds for vessels navigating with radar in limited visibility on inland waters; develop minimum standards for manually processing radar data to evaluate movements of approaching radar contacts on inland waters; develop and disseminate information about drawbacks in using sound signals between vessels, including the effects of environmental conditions on sound; and develop guidelines to determine the maximum strength of a current that can allow two-way movement of vessels navigating by radar in limited visibility. (See 42 FR 31851, June 23, 1977.)

Aviation Safety Recommendations A-77-52 and 53.—Corrective measures to eliminate misunderstandings between pilot and controller regarding altitude or vector assignments have been recommended by the Safety Board as a result of its investigation of the near midair collision last November 17 between TWA Flight 373 (a B-727) and TWA Flight 516 (a DC-9) near Appleton, Ohio. Two crewmembers were injured as the pilot of TWA 516 took evasive action. Investigation of the incident revealed that neither the flightcrew of TWA 373 nor the air traffic controller understood or heard correctly each other's message regarding altitude assignment.

The Safety Board believes that such a communications problem could have resulted in a midair collision, and has focused its investigation on the adequacy of actual communications procedures in the air traffic control system. As a result of this investigation, the Safety Board on July 25 recommended that the Federal Aviation Administration—

Amend the language of ATP Handbook 7110.65 to specify that a controller who issues an altitude assignment and/or a vector heading assignment to an aircraft in flight be required to request readback of the clearance if he does not receive one from the crew. Pilot acknowledgment without readback should not be accepted by the controller. (A-77-52)

Instruct FAA Air Carrier District Office Chiefs and General Aviation District Office Chiefs to alert their personnel to the circumstances surrounding this incident; and require those facilities to take all appropriate action to assure that pilots are made aware of communications procedural requirements and understand why strict adherence to recommended procedures is essential to safe flight. (A-77-53)

Both recommendations are designated "Class II," requesting priority followup.

Aviation Safety Recommendations A-77-54 and 55.—Failure of the main rotor hub tension/torsion strap assembly, P/N 206-010-105-3, caused three Bell Model 206B helicopter accidents within the past 14 months, the Safety Board advised the Federal Aviation Administration on July 26. The strap assembly failures resulted in immediate separation of the main rotor hub and blade installation from the rotorcraft. The Board cited these accidents involving Bell Model 206B helicopters:

On April 17, 1976, N14856 crashed into the Gulf of Mexico; the pilot was killed. The strap assembly had accumulated a total time of 1,811:40 hours when it failed.

On December 11, 1976, N49669 was involved in an accident when the main rotor hub and blade installation separated from the rotorcraft during rotor runup before takeoff from an oil rig platform. The main rotor hub and blade installation was hurled into the Gulf of Mexico. Total time on the failed strap assembly was 2,000 hours.

On March 17, 1977, N90071 crashed into the Gulf of Mexico when its main rotor hub and blade installation separated about one minute after takeoff from an oil rig platform; the pilot died in the crash. Total time on the failed strap assembly was 799:50 hours.

The Safety Board is aware that three Airworthiness Directives have been issued as a result of these accidents. However, in view of the catastrophic consequences that result from such failures and since metallurgical examination of the failed strap wires from these three accidents has disclosed several types of fractures, stretches, and rolls, and evidence of corrosion, the Board believes that further corrective action is necessary. Accordingly, the Board recommends that FAA—

Issue an Airworthiness Directive to reduce the service life of the tension/torsion strap assembly, P/N 206-010-105-3 and -5, from 1,200 hours to 600 hours until the cause of these failures can be determined and eliminated. (A-77-54)

Expedite the development of a tension/torsion strap fabricated from a material less susceptible to fatigue and corrosion than that currently used and require retrofit as soon as the replacement strap is available. (A-77-55)

Both recommendations are designated "Class I," asking for urgent followup action.

RESPONSES TO SAFETY RECOMMENDATIONS

Marine: M-74-2.—U.S. Coast Guard on July 21 responded to one of the recommendations which was issued by the Safety Board following investigation into the collision of the tug CAROLYN and WEEKS Barge No. 254 with the Chesapeake Bay Bridge and Tunnel on September 21, 1972. The recommendation asked that Coast Guard determine the effects of fatigue on personnel error as a cause of marine casualties, with particular reference to the sizes of crews carried on towing vessels. (Report No. USCG/NTSB-Mar-74-2)

Coast Guard reports that in June 1975 Operational Research, Inc., was contracted for a study on personnel practices. In addition to training and qualification standards, the study is to identify practical methods by which Coast Guard can improve human safety performance. Coast Guard notes that as there is no single pattern of behavior which appears to be common to a large number of accidents, it is difficult to demonstrate that a change to the man-machine system is practical. To better understand the problem of human "cause," individual-oriented factors, such as medical or medication problems, complacency, personality conflicts, stress reactions and others will be researched. Coast Guard expects the program will extend over several years in view of the complexity of the program involving task analysis, training specifications, simulator research, and other factors.

Marine: M-77-7.—The Maritime Administration (MarAd) on July 22 advised the Safety Board that it has no authority to establish guidelines to provide for the use of MRIT and CAS by vessels that are navigating by radar on inland waters. The letter is in response to the recommendation issued following investigation of the collision of the SS BAUNE and the tankship KEYTRADER in the lower Mississippi River, January 1974. (See first item of this notice regarding release of report on this accident.)

MarAd's response notes, however, its support in recent years for the use of MRIT and CAS. MarAd states that a mandatory requirement for installing CAS on newly constructed U.S. flag tankers has been an integral part of MarAd's Construction-Differential Subsidy (CDS) Program since 1972. The use of CDS funds to offset the cost of providing other types of U.S. flag vessels with this equipment is encouraged by MarAd.

Performance specifications developed by MarAd and the Radio Technical Commission for Marine Services (RTCM) were recently incorporated in the U.S. Coast Guard's proposed rule requiring all vessels of 10,000 gross tons and over, entering U.S. ports, to have a second radar with a computer-aided CAS which meets RTCM performance specifications. MarAd says that if adopted in its present form, the new rule will provide for the mandatory procurement and installation of this equipment on both U.S. and foreign flag vessels of 10,000 gross tons and over entering U.S. ports.

Further, MarAd reports that its Office of Advanced Ship Operations is now engaged in research and development efforts dealing with MRIT. According to MarAd, this device has been evaluated technically and appears to have significant potential to improve the operation of CAS, and perhaps Vessel Traffic Systems. MarAd states, "The MRIT system could prove to be both operationally feasible and marketable; however, international acceptance of the system will be necessary before the maximum benefit can be realized."

MarAd's ongoing program to improve marine navigational safety is highlighted by research at the Computer-Aided Operations Research Facility at the National Maritime Research Center, Kings Point, New York. MarAd says that this facility is a sophisticated research simulator dedicated exclusively to solving marine oriented problems, and that it is being used to conduct experiments to enhance navigational safety and equipment, especially CAS and MRIT, and to identify human factors which contribute to marine casualties.

MarAd indicates that it will continue its work to prevent or reduce the risk of ship collisions through the expanded use of automated radar detection systems.

Aviation: A-74-105 through 114.—The Safety Board on July 28 requested the Federal Aviation Administration to provide a written status report on the ten recommendations issued as a result of the Board's special study, "Safety Aspects of Emergency Evacuations from Air Carrier Aircraft." FAA's last letter to the Safety Board in response to these recommendations is dated May 9, 1975 (40 FR 24252, June 5, 1975), and the Board is aware that FAA has since taken several actions to resolve the recommendations.

NOTE: The above notice consists of summaries of Safety Board documents made available, and safety recommendation responses received, during the week preceding publication of this notice in the FEDERAL REGISTER. The marine casualty report and safety recommendation letters in their entirety are available to the general public: single copies are obtainable without charge. Copies of the full text of responses to recommendations and any Board correspondence may be obtained at a cost of $4.00 for service and 10¢ per page for reproduction. All requests must be in writing, identified by the recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

SMALL BUSINESS ADMINISTRATION

SALT LAKE CITY DISTRICT ADVISORY COUNCIL

Public Meeting

The Salt Lake City District Advisory Council will hold a public meeting at 9:00 a.m., Thursday, August 25, 1977 in the Federal Building, 128 South State Street, Salt Lake City, Utah, to discuss such matters as may be presented by members, staff of the Small Business Administration, or others present. For further information, write or call Clair R. Hopkins, District Director, U.S. Small Business Administration, 2237 Federal Building, Salt Lake City, Utah 84138, 801-588-5804.

Dated: July 29, 1977.

K. DREW,
Deputy Advocate for Advisory Councils.

DEPARTMENT OF TRANSPORTATION

[CGD 77-138]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Approval Notice

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been granted as herein described during the period from May 9, 1977 to June 1, 1977 (List No. 10-77). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of Title 46, United States Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. The approvals listed in this document shall be in effect for a period of 5 years from the date of issuance, unless sooner cancelled or suspended by proper authority.

DAVITS FOR MERCHANT VESSELS

Approval No. 160.032/206/1, Type SS 5001, 50-person survival capsule launching system (winch-type); approved as an alternate to a lifeboat davit for a maximum working load of 17,000 lbs. on a single-part fall; identified by general arrangement drawing SS 5001, revision A dated March 31, 1977, and drawing list SS 5001, revision E dated April 22, 1977, electrical components determined suitable for use in Class I, Group D hazardous locations as defined by 46 CFR 111.80-5, approved for installation with Lake Shore, Inc. Model LS-1711 E lifeboat winch (Approval 160.015/111/1) for use

on artificial islands, fixed structures, and drilling rigs, both self-propelled and nonself-propelled, manufactured by Whittaker Corporation, 5159 Baltimore Drive, La Mesa, California 92041, effective June 1, 1977. (It supersedes Approval No. 160.032/206/0 dated June 17, 1976 to show new system designation and drawing references.)

INFLATABLE LIFE RAFTS

Approval No. 160.051/50/1, inflatable life raft, 6-person capacity; identified by general arrangement drawing 5RA1053, revision A dated March 8, 1977 and drawing list dated April 26, 1977, canopy supported by cross arch tubes, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/50/0 dated December 23, 1974 to show drawing revision.)

Approval No. 160.051/51/1, inflatable life raft, 15-person capacity; identified by general arrangement drawing 5RA-1060, revision A dated March 8, 1977 and drawing list dated April 26, 1977, canopy supported by center strut-tube, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/51/0 dated December 23, 1974 to show drawing revisions.)

Approval No. 160.051/52/1, inflatable life raft, 20-person capacity; identified by general arrangement drawing 5RA-1069, revision A dated February 22, 1977 and drawing list dated April 26, 1977, canopy supported by center strut-tube, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/52/0 dated December 23, 1974 to show drawing revisions.)

Approval No. 160.051/53/1, inflatable life raft, 25-person capacity with "Ocean Service Equipment"; identified by general arrangement drawing 5RA1063, revision B dated March 8, 1977 and drawing list dated April 26, 1977, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/53/0 dated May 22, 1975 to show drawing revisions.)

Approval No. 160.051/81/1, inflatable life raft, 25-person capacity with "Limited Service Equipment"; identified by general arrangement drawing 5RA1063, revision B dated March 8, 1977 and drawing list dated April 26, 1977, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/81/0 dated May 22, 1975 to show drawing revisions.)

Approval No. 160.051/88/1, inflatable life raft, 10-person capacity; identified by general arrangement drawing 5RA-1010, revision D dated March 8, 1977 and drawing list dated April 26, 1977, canopy supported by center strut-tube, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/88/0 dated February 27, 1976 to show drawing revisions.)

Approval No. 160.051/91/1, inflatable life raft, 8-person capacity; identified by general arrangement drawing 5RA1078, revision A dated March 8, 1977 and drawing list dated April 26, 1977, canopy supported by center strut-tube, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/91/0 dated July 19, 1976 to show drawing revisions.)

Approval No. 160.051/92/1, inflatable life raft, 12-person capacity; identified by general arrangement drawing 5RA-1081, revision A dated March 8, 1977 and drawing list dated April 26, 1977, canopy supported by center strut-tube, manufactured by B. F. Goodrich, Engineered Systems Company, Union, West Virginia 24893, effective May 25, 1977. (It supersedes Approval No. 160.051/92/0 dated July 30, 1976 to show drawing revisions.)

MARINE BUOYANT DEVICE

Approval No. 160.064/162/0, adult large, Model Nos. SSV–75L, SSV–15L, SSV–16L, or SSV–415L, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/162/0 dated May 19, 1972.)

Approval No. 160.064/163/0, adult X-Large, Model Nos. SSV–75XL, SSV–15XL, SSV–16XL, or SSV–415XL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/163/0 dated May 19, 1972.)

Approval No. 160.064/164/0, adult XX-Large, Model Nos. SSV–75XXL, SSV–15XXL, SSV–16XXL, or SSV–415XXL, foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/164/0 dated May 19, 1972.)

Approval No. 160.064/165/0, adult XXX-Large, Model Nos. SSV–75XXXL, SSV–15XXXL, or SSV–16XXXL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/165/0 dated May 19, 1972.)

Approval No. 160.064/166/0, adult small, Model Nos. SSV–75S, SSV–15S, SSV–16S or SV–415S, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/166/0 dated May 19, 1972.)

Approval No. 160.064/167/0, adult medium, Model Nos. SSV–75M, SSV–15M, SSV–16M or SSV–415M, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/167/0 dated May 19, 1972.)

Approval No. 160.064/168/0, adult small, Model Nos. SSV–10S, SSV–70S, SSV–400S, SSV–401S or SSV–402S, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III, PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/168/0 dated May 19, 1972.)

Approval No. 160.064/169/0, adult medium, Model Nos. SSV–10M, SSV–70M, SSV–400M, SSV–401M or SSV–402M, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/169/0 dated May 19, 1972.)

Approval No. 160.064/170/0, adult large, Model Nos. SSV–10, SSV–70, SSV–400, SSV–401 or SSV–402L, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/170/0 dated May 19, 1972.)

Approval No. 160.064/171/0, adult X-large, Model Nos. SSV–10, SSV–70, SSV–400, SSV–401 or SSV–492XL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/171/0 dated May 19, 1972.)

Approval No. 160.064/172/0, adult XX-large. Model Nos. SSV–10, SSV–70, SSV–400, SSV–401, or SSV–402XXL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/172/0 dated May 19, 1972.)

Approval No. 160.064/173/0, adult XXX-large, Model Nos. SSV–10, SSV–70, SSV–400, SSV–401 or SSV–402XXXL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/173/0 dated May 19, 1972.)

Approval No. 160.064/177/0, adult small, Model No. FJB–60S, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/177/0 dated May 19, 1972.)

Approval No. 160.064/178/0, adult medium, Model No. FJB–60M, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/178/0 dated May 12, 1972.)

Approval No. 160.064/179/0, adult large, Model No. FJB–60L, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/179/0 dated May 12, 1972.)

Approval No. 160.064/180/0, adult X-large, Model No. FJB–60XL, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/180/0, dated May 12, 1972.

Approval No. 160.064/181/0 adult small, Model No FJ–50S, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/181/0 dated May 12, 1972.)

Approval No. 160.064/182/0, adult medium, Model No. FJ–50M, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/182/0 dated May 12, 1972.)

Approval No. 160.064/183/0, adult large, Model No. FJ–50L, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL file No. MQ 29, factory location: Highway 10, Saulk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/183/0 dated May 12, 1972.

Approval No. 160.064/184/0, adult X-large, Model No. FJ–50XL, cloth covered unicellular plastic foam "Flotation Jacket", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/184/0 dated May 19, 1972.)

Approval No. 160.064/199/0, adult small, Model No. SSV–500S, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/199/0 dated May 19, 1972.)

Approval No. 160.064/200/0, adult medimum, Model No. SSV–500M, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/200/0 dated May 19, 1972.)

Approval No. 160.064/201/0, adult large, Model No. SSV–500L, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/201/0 dated May 19, 1972.)

Approval No. 160.064/202/0, adult X-large, Model No. SSV–500XL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/202/0 dated May 19, 1972.)

Approval No. 160.064/203/0, adult XX-large, Model No. SSV–500XXL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/203/0 dated May 19, 1972.)

Approval No. 160.064/204/0, adult XXX-large, Model No. SSV–500XXXL, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with U.S.C.G. Specification Subpart 160.064 and UL report file No. MQ 29, factory location: Highway 10, Sauk Rapids, Minnesota 56379, Type III PFD, manufactured by Stearns Manufacturing Company, P.O. Box 1498, St. Cloud, Minnesota 56301, effective June 1, 1977. (It is an extension of Approval No. 160.064/204/0 dated May 19, 1972.)

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS).

TIME AND DATE: 10:00 a.m., Monday, August 8, 1977.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Computer purchased by the Federal Reserve Bank of Richmond.
2. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

Dated: August 1, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board

[S-1042-77 Filed 8-2-77;9:07 am]

7

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS).

TIME AND DATE: 10:00 a.m., Wednesday, August 3, 1977.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. a. Proposed amendments to Regulation H (Membership of State Banking Institutions in the Federal Reserve System) and Y (Bank Holding Companies), to require certain municipal securities dealers to file with the Board information about persons associated with them as municipal securities principals or municipal securities representatives. (Proposed earlier for public comment: Docket No. R-0090).

b. In connection with the proposed amendments to Regulations H and Y, establishment of a system of records under the Privacy Act of 1974 dealing with persons who are or seek to be municipal securities principals or representatives and are associated with certain financial institutions. (Proposed earlier for public comment; Docket No. R-0091).

2. Possible amendments to the Board's Rules Regarding Delegation of Authority to delegate to the Director of the Division of Banking Supervision and Regulation certain authority in connection with administration of Municipal Securities Rulemaking Board rules.

3. A possible Board interpretation of Regulation B (Equal Credit Opportunity) to clarify the meaning of § 202.8, Special Purpose Credit Programs, by defining the phrase "expressly authorized by law". (Proposed earlier for public comment; Docket No. R–0100).

4. Proposal by the Federal Reserve Bank of Atlanta for approval of conceptual design for the Miami Branch building.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202–452–3204.

Dated: July 26, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

8

INDIAN CLAIMS COMMISSION.

TIME AND DATE: 10:15 a.m., August 10, 1977.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open to the Public:

Docket 29–K, *Hannahville Indian Community.*
Docket 226, *Caddo* (two items).
Docket 326–K, *Western Shoshone* (three items).

FOR MORE INFORMATION:

David H. Bigelow, Executive Director, Room 640, 1730 K Street, NW., Washington, D.C. 20006, Telephone 202–653–6184.

[FR Doc.S–1038–77 Filed 8–1–77;3:35 pm]

9

INTERSTATE COMMERCE COMMISSION.

TIME AND DATE: 2:30 p.m., Monday, August 8, 1977.

PLACE: Room 4225, Interstate Commerce Commission Building, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Notice of open meeting.

MATTER TO BE CONSIDERED:

Division 3, Division Chairman Brown and Commissioners MacFarland and Christian voted unanimously to hold a meeting to consider the following agenda:

1. Review of present Division workload.

CONTACT PERSON FOR MORE INFORMATION:

Mrs. Hildred Hersman, Confidential Assistant to Commissioner Brown, telephone 202–275–7535.

Dated: August 1, 1977.

[FR Doc.S–1041–77 Filed 8–1–77;4:09 p.m.]

10

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: 9:30 a.m., Thursday, August 11, 1977 (NM–77–24).

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue SW., Washington, D.C. 20594.

STATUS: Open.

MATTER TO BE CONSIDERED:

1. *Railroad/Highway Accident Report.* Collision of a Burlington Northern Freight Train With a Bus, Stratton, Nebraska, August 8, 1976.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming, 202–755–4930.

[S–1039–77 Filed 8–1–77;3:40 pm]

11

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: Immediately following open meeting, Thursday, August 11, 1977 (NM–77–25).

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue SW., Washington, D.C. 20594.

STATUS: Closed.

MATTER TO BE CONSIDERED:

1. *Opinion and Order.* Administrator v. Overstreet, SE–3581; disposition of appeals of both parties.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming, 202–755–4930.

LAND MOBILE RADIO SERVICES

Consolidation of Regulations

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 89, 90, 91 and 93]

[Docket No. 21348; FCC 77-521]

LAND MOBILE RADIO SERVICES

Consolidation of Regulations

AGENCY: Federal Communications Commission (FCC).

ACTION: Notice of Proposed Rule Making.

SUMMARY: This Notice proposes to consolidate Parts 89, 91 and 93 of the Commissions rules for the purpose of clarification, simplification, and reregulation of the various licensing, technical, and operational requirements in the Private Land Mobile Radio Services operating under those rules.

DATES: Comments due by January 4, 1978, and reply comments by February 2, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Taube, Industrial and Public Safety Rules Division, Safety and Special Radio Services Bureau, (202) 632-6497.

In the matter of amendment of the Commission's rules governing the Private Land Mobile Radio Services to provide a new part 90 that re-regulates and consolidates Parts 89, 91, and 93.

Adopted: July 21, 1977.

Released: July 27, 1977.

1. Notice of Proposed Rule Making is hereby given in the above entitled matter. The purpose of this proceeding is to examine and to consolidate and re-regulate as necessary the Commission's Rules that govern the Private Land Mobile Radio Services. These rules are contained in Parts 89, 91, and 93 of Volume V of the Commission's Rules and cover, respectively, the Public Safety, Industrial, and Land Transportation Radio Services.

BACKGROUND

2. The Commission's Rules for the Private Land Mobile Radio Services are presently in three separate rule parts that contain procedures for obtaining licenses, and the technical standards of those licenses. Part 89 (Public Safety) encompasses local governmental and public emergency radio uses; Part 91 (Industrial) covers radio operations for various commercial, manufacturing, and utility activities; and Part 93 (Land Transportation) combines the radio services for passenger and freight carrying land-based vehicles.

3. The radio services in the separate rule parts are distinguishable with respect to the activities which may be licensed, permissible communications, and most of the available frequencies. However, most of the general provisions in each part are very similar and often are identical both in language and in intent. These provisions include general eligibility requirements, definitions, application procedures, most of the technical and operational standards, emergency operation requirements, and developmental licensing procedures. Additionally, a number of special provisions relating to frequency selection are similar in language and effect in each of the three rule parts. These provisions cover frequency assignment policies, coordination requirements, cooperative-use procedures, and the land-mobile spectrum management program that has been developed in the Chicago Region. Rules for certain specialized uses of land mobile radio facilities also appear on an across-the-board basis. These include provisions for secondary non-voice signalling methods, automatic vehicle monitoring (AVM), and UHF-sharing. Finally, provisions for the use of special frequency bands are included almost identically in each of these rule parts to cover operations in bands from 72-76 MHz to 900 MHz and above.

4. In light of the commonality of major portions of Parts 89, 91, and 93, the Commission has studied the possibility of consolidating these rule parts into one new comprehensive rule part. It appears that consolidation, which can include required re-regulation of the rules, could be readily accomplished and would have many advantages. From the standpoint of simplification, consolidation of the rules should enhance comprehension and facilities referencing and research. Administratively, rule change actions would be less complicated and rules maintenance requirements would be significantly reduced.

5. The rule consolidation effort also provides an excellent opportunity to consider necessary de-regulation of land-mobile radio provisions. Here, we would delete or modify standards, requirements, and limitations that are no longer applicable or no longer serve valid purposes. This aspect alone would appear to warrant that a proceeding of this nature be undertaken.

6. Essentially, the proposals would involve rule changes of both an editorial and substantive nature. The proceeding is not intended, however, to alter the purposes and standards of the various land-mobile radio services; nor are we here concerned with frequency reallocation matters, the authorization of innovative procedures or requirements, or matters dealing with competitive or divergent interests. Nevertheless, the proposals for the indicated re-regulation purposes are unusually complex, extensive, and voluminuos. In light of these factors and to enhance public response, the Commission coordinated the contemplated rule changes with representative groups for the land mobile community to pre-review the proposals as to format, clarity, and effectiveness. One major organization, the Land Mobile Communications Council (LMCC) has provided a number of important suggestions, many of which have been included in the proposals. The LMCC summary report and its recommendations are available to interested persons in the Docket File for this proceeding. Additionally, while it is not feasible to discuss each change involved in this proceeding, the following paragraphs detail the revised rules structure as would appear in Part 90, and significant modifications are specifically noted. Further, Attachment A is a quick-reference summary of the rule changes proposed herein and includes a cross-reference table showing where present rule sections would appear in Part 90. Attachment B is the complete proposed Part 90.

THE PROPOSALS

7. In consideration of the foregoing, the Commission finds that it is appropriate to revise and amend its rules to consolidate Parts 89, 91, and 93 into one new rule part for the land mobile radio services, to be designated as Part 90. A similar rule making action was recently completed for consolidation and re-regulation of private operational-fixed (microwave) radio provisions in new rule Part 94.[1]

8. Part 90 would be divided into seventeen subparts as contrasted to the thirty-four subparts throughout the present Parts 89, 91, and 93. Generally, radio services would no longer be separate subparts as at present but would be included under the broader categories of Public Safety, Industrial, or Land Transportation Services. Two exceptions would be separate subparts for the Special Emergency Service and the Radiolocation Service. The initial subpart (subpart A) contains general information as to the basis and purpose of the private land mobile rules and describes the content and organization of Part 90. One new provision (§ 90.5) would include references to other parts of the Commission's Rules that are often of important to applicants and licensees in the private land mobile services. Definitions are included in this subpart, a number of which are new definitions and others are modified as necessary to reflect current standards. Many matters that appear as "general information" in present Parts 89, 91, and 93 are not considered appropriate for inclusion in this subpart. For example, Part 89, includes application requirements and procedures, technical standards, and operating requirements all as general information. In the proposed Part 90, however, these matters are covered in separate more pertinent rule subparts.

9. Proposed Subparts B, C, D, E, and F cover, respectively the Public Safety, the Special Emergency, the Industrial, the Land Transportation, and the Radiolocation Radio Services. Each Subpart sets forth for each radio service it covers the standards for eligibility, permissible communications, any special conditions, and a listing of the frequencies assignable together with their limitations. One radio service, the State Guard Service would be deleted as a separate service

[1] See the Report and Order in Docket 19869, adopted April 23, 1975 (40 FR 93, May 13, 1975).

with provision made for licensing State Guard functions in the Local Government Radio Service (see § 90.17 (b) and (c)).[2] The only other re-classification in radio services would expand the present Industrial Radiolocation service to become the Radiolocation Radio Service to incorporate all radiolocation functions (see Subpart F).

10. One change in Part 90 that should be helpful is that each radio service would contain for ready-reference virtually every frequency that may be regularly assigned in the particular service involved, as well as those frequencies shared on a secondary basis with licensees in other services, available only on a renewal basis under "grandfathered" provisions, or assignable under limited conditions or for special uses, including developmental uses. The frequencies would be listed in tables supplemented by a description of special additional frequencies assignable. This should greatly simplify an applicant's search for appropriate frequencies, particularly in the Land Transportation services where the frequencies are not presently listed in a table format. The only exception to the frequency lists is the frequency 4883.2 kHz, which is available in all of the services without the necessity of specific authorization, but only in Alaska (see § 90.253). Another change that should aid in frequency selection applies to the limitations on the assignable frequencies. We have eliminated redundant provisions and combined and renumbered many of these limitations, while others are modified to simplify the language. Finally, we have included as a supplement to Part 90, a single complete numerical listing of every frequency assignable together with a description of radio services for the frequency, general uses, and any special uses. Specific comments as to the format and usefulness of this supplemental listing would be particularly helpful.

11. Two modifications of special note applicable to eligibility provisions in the radio services rule parts include § 90.35 (a) in Subpart C. This rule applies to eligibility in the medical services category in the Special Emergency Radio Service, and contains new language to emphasize the present requirements that associations, governmental entities, and governmental agencies may hold licenses for medical operations only when they actively participate in, and provide direct operational control of, the medical services communications activities to be conducted. Another change to note is in the eligibility provisions of the Special Industrial Radio Services in § 90.73 of Subpart D. Here, present provisions have been modified to clarify the categories that may be licensed in this radio service. See also the deletions in the Taxicab Radio Service of limitations on use of communication units in that service that apply to certain specified taxicab-related activities. These units are already countenanced under the rules describing permissible communications.

12. Many provisions that are presently included under individual radio services subparts of Parts 89, 91, and 93, concern matters that will not be included in the services sections in Part 90. These include points of communication, secondary non-voice signalling, requirements for relay and control stations, etc., all of which would appear in other appropriate subparts of Part 90.

13. Proposed subpart G contains the licensing procedures for private land mobile station applications. Provisions therein generally conform to present rule requirements for filing and processing license requests. Some changes to note include the addition of a section (now in Part 1 of the Commission's Rules) as to procedures for Canadian licensees to operate in the United States when permitted under treaty agreements (§ 90.121); the elimination of references to construction permits, as these are no longer issued; and the deletion of requirements, including the use of Form 456, for notification to a Commission field office of commencement of operation, as presently contained in Parts 89, 91, and 93 in numerous sections. In addition, we have extensively expanded the rules concerning procedures for making changes in authorized stations. For example, Section 90.135 describes and clarifies each specific type of change that requires an application for modification of license.

14. The Commission's policies for assignment and use of frequencies in the private land mobile services are now detailed in proposed Subpart H. Important information is included in this subpart with respect to such matters as intersystem interference, frequency coordination, and cooperative use. Note, however, that cooperative use provisions are the subject of the rule making proceeding in Docket 18921, and when action is taken in that proceeding, the new rules will be incorporated into proposed Subpart H. One change from present policy deletes the requirement for applicants to select the highest order of frequencies available as the necessary exceptions to this standard have rendered the requirement relatively meaningless.

15. Technical standards of a general nature are detailed in Subpart I. Of note is new § 90.207 which sets forth not only the emissions that may be authorized under this part, but also the references to the types of operations in which they may be utilized. One present requirement being deleted as unwarranted is that applicants will no longer need to furnish a description of tone codes for non-voice signalling operations. Those technical standards which apply to specialized operations are set forth in Subpart J. That subpart includes secondary non-voice signalling provisions, and the special requirements for radiotelegraphy, radiofacsimile, automatic vehicle monitoring, and radio call boxes. Subpart J also consolidates the various present rule provisions for the authorizations and operation of relay repeater, (including vehicular repeater), and control stations. This should be particularly advantageous in the design of systems for private land mobile operations.

16. There are a number of special frequencies or frequency bands which are available on a general basis in the private land mobile services. They are noted in the frequency tables but the standards applicable to these bands are extensive and, therefore, they have been referenced and included in Subparts K, L, and M. Subpart K contains the special standards for the frequency 4383.8 kHz, and the bands 27.235-27.275 MHz, 72-76 MHz, 216-220 MHz, 450-470 MHz (secondary cross-service fixed), and 1427-1435 MHz. Provisions for substitution of frequencies below 25 MHz are also included in this subpart. Subpart L deals exclusively with the special standards, requirements, and procedures for authorizations in the band 470-512 MHz on the frequencies derived from the Commission's UHF-TV Sharing Program. Similarly, Subpart M governs special licensing and use of frequencies in the 806-821 MHz and 851-866 MHz bands.

17. Subpart N covers operating requirements. Many of these requirements relating to such matters as permissible and prohibited communications, interstation communication limitations, points of communication, and operation of mobile units by persons other than the licensee, presently appear in differing formats, in Parts 89, 91, and 93, either in general provisions or under application procedures, or in the radio services subparts. There is also presently a somewhat random pattern as to where station-identification requirements can be found. Incorporation of each of these operational requirements into one Subpart in Part 90 has enabled us to provide language which is consistent and which should facilitate comprehension and compliance. To the same end, we have combined the various provisions as to control point and dispatch requirements. Another clarifying provision appears in § 90.419(a), concerning the present provisions in Part 89 that permit secondary fixed uses of Public Safety and Special Emergency base station frequencies. Such secondary fixed uses are intended to be authorized only on frequencies below 450 MHz, and this provision reflects this limitation. It also appears to the Commission that present special provisions which allow Industrial and Land Transportation stations to utilize base station frequencies for fixed station communications under certain restricted circumstances involving urgent need to contact mobile units should be extended to the Public Safety and Special Emergency Services on frequencies above 450 MHz. Section 90.419(b) reflects this change. Note, also, the new provision in § 90.341(b), added to permit licensees

[2] There is no apparent need for the eligibility group presently covered by the State Guard Radio Service to be distinguished from other governmental entities as the functions to be served by radio communications can be met in the Local Government Radio Service. The only frequency specifically assignable for State Guard operations is 2726 kHz and this frequency is included in the list available in the Local Government Radio Service.

sharing a tower to appoint one licensee to perform inspection and logging functions. This is not now authorized in the rules but has been allowed on a case-by-case basis.

18. Subpart O sets forth the special requirements for licensing of stations in the Chicago Region under the Chicago Land Mobile Spectrum Management Program. The program applies to major areas in Illinois, Indiana, Iowa, Michigan and Wisconsin.

19. The developmental licensing procedures are contained in Subpart P. The final subpart, Subpart Q, includes the provisions that apply to formalized emergency communications plans for the Industrial and Land Transportation Services. The Industrial plan, the Industrial Communications Emergency Plan (ICEP), contains the requirements recently adopted in Docket 19312 (FCC 75-1285). The Land Transportation Industries Communications Emergency Plan (LATICEP) will be revised in a separate Commission action.

CONCLUSION

20. As stated, the Commission believes that the proposals in this proceeding can contribute substantially to understanding and compliance with rule standards and requirements for the licensing and operation of private land mobile systems. We find, therefore, that proposed rulemaking to adopt these modifications would serve the public interest. It is recognized, however, that in rule changes as voluminous as those proposed herein, there are bound to be provisions that could be further clarified, consolidated, or, in the interest of de-regulation, deleted. Interested persons are urged, therefore, to recommend other possible modifications that can be incorporated within the scope of this rulemaking action. At the same time, it would be helpful if any observed omissions and errors were noted so that they could be corrected. Further, there are and will be a number of concurrent Commission rulemaking proceedings that affect or change specific rules being proposed herein. Such changes will be included at the time final action is taken in this docket.

21. In accordance with the foregoing, Notice of Proposed Rule Making is hereby given to revise Parts 89, 91, and 93 of the Commission's rules by establishment of a new Part 90 that consolidates such rule parts. The specific rule changes proposed are set forth in attachment B. Authority for these proposed amendments are contained in sections 4(i) and 303 of the Communications Act of 1934, as amended.

22. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before January 4, 1976, and reply comments on or before February 2, 1976. In accordance with the provisions of § 1.419(b) of the Commission's rules an original and fourteen copies of all statements, briefs, and comments filed shall be furnished the Commission. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken. The Commission may also take into account other relevant information before it, in addition to specific comments invited by this Notice.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

ATTACHMENT A.—*Cross reference*

Present section No.	Proposed section and title	Summary of changes proposed
89.1	90.1—Basis and purpose	Minor rewording.
89.3	90.7—Definitions	Deletions and additions as necessary—minor reorganization and clarification.
89.5	NA	
89.7	90.415—Prohibited uses	Minor rewording.
89.9	90.115—Ineligibility of foreign governments	Do.
89.11	90.151—Assignment of station authorizations	Do.
89.12	90.243—Mobile relay stations	Relay, repeater and control uses separated under specific sections with minor rewording and clarification.
	90.245—Fixed relay stations	
	90.247—Vehicular repeater stations	
	90.249—Control stations	
89.13 and 89.14.	90.179—Cooperative use of stations	Awaits resolution of docket 18921.
89.15 (a), (b), and (c).	90.175—Frequency coordination requirements	Minor rewording.
89.15 (d) and (e).	90.177—Protection of certain radio receiving locations.	No change.
89.17	90.411—Civil defense communications in the public safety and special emergency radio services.	Do.
89.51	90.113—Station authorization required	Minor rewording
89.53(a)	90.117—Applications for radio station authorizations.	Do.
89.53 (b), (c), and (d).	NA	
89.55(a)	90.117—Applications for radio station authorization.	Minor rewording, added reference to fees information.
89.55(b)	90.127(a)—Filing of applications	Minor rewording, added Chicago filing address information.
89.55(c)	90.119(b)—Application forms 90.127(b)—Filing of applications	Information set forth in 2 new sections with minor rewording.
89.55(d)	90.139—Preliminary processing of applications	No change.
89.55(e)	90.137—Applications for operation at temporary location.	Minor rewording.
89.55(f)	90.129(e)—Supplemental information to be routinely submitted with applications.	Do.
89.56	90.147—Mailing address furnished by licensee	No change.
89.57	90.125—Who may sign applications	Paragraph (c) expanded.
89.59 (a) and (b).	90.119(a)—Application forms	Minor rewording, referenced form 1046, eliminated construction permit.
89.59(d)	90.119(d)—Application forms	Minor rewording.
89.59(e)	90.145—Special temporary authority	Do.
89.59(f)	NA	Requirement to file form 456 deleted.
89.59(g)	90.119(b) Application forms	Minor rewording.
89.60	90.483 Chicago region	No change.
89.61	90.145 Special temporary authority	Minor rewording—added an eligibility statement requirement.
89.63	90.129—Supplemental information to be routinely submitted with applications.	Minor rewording.
89.65	90.143—Grants of application	Do.
89.67	90.139—Preliminary processing of applications	Deleted reference to alien restrictions.
89.69	90.131—Amendment or dismissal of applications	No change.
89.71	90.153—Time in which stations must be placed in operation.	Minor rewording, deleted construction permit requirements.
89.73	90.149—License term	Minor rewording with clarification.
89.75	90.135—Modification of license	Rewritten to specify changes requiring applications to be approved.
89.77	90.155—Discontinuance of station operation	No change.
89.79	90.191(c)—Police radio service	Do.
89.81	90.487—Special provisions relating to frequency assignments in the Chicago region	Do.
89.101(a), (b) (1), and (g).	90.173—Policies governing the assignment of frequencies.	Deletions and additions as necessary—minor rewording and clarification.
89.101(b)(2)	90.253—Use of the frequency 4363.8 kHz	Combines applicable provisions in this and other sections.
89.101(c)	90.257—Assignment and use of frequencies in the band 72-76 MHz.	Do.
89.101(d)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz.	Do.
89.101(e)	90.263—Substitution of frequencies below 25 MHz.	Combines applicable provisions.
89.101 (h),-(i), and (l).	See various frequency tables in subpts. B, C, and F.	Extensive deletions, additions and rearrangements as necessary, minor rewording and clarification.
89.101 (p) and (q).	90.261—Assignment and use of frequencies in the band 450-470 MHz for fixed operations.	No change.
89.102	90.241—Radio call box operations	Minor rewording.
89.103	90.213—Frequency tolerance	Includes part of SSB requirements from sec. 89.124—minor rewording.
89.105	90.207—Types of emission	Reworded to reference each operation with types of emission permitted.
89.107	90.209—Bandwidth limitations	Minor rewording and includes schedule from SSB requirements in sec. 89.124.
89.109	90.211—Modulation requirements	Minor rewording and clarification.
89.111	90.205—Power	Do.
89.113(a)	90.427—Precaution against unauthorized operation.	Minor rewording combined with other sections.
89.113 (b), (c), (d), and (e).	90-429—Control point and dispatch point requirements.	Minor rewording and rearrangement.

Present section No.	Proposed section and title	Summary of changes proposed
89.115	90.215—Transmitter measurements	Minor rewording.
89.117	90.203—Type acceptance required	Combined with other sections.
89.119	do	Do.
89.120	90.239—Interim provisions for operation of Automatic Vehicle Monitoring (AVM) systems.	Minor rewording.
89.122	90.237—Interim provisions for operation of radioteleprinter and radiofacsimile devices.	Do.
89.123	Subpt. L—Authorization in the band 470-512 MHz (UHF-TV sharing).	Combined with other sections.
89.124	NA	Rearranged by including technical standards in other appropriate sections.
89.126	90.235—Secondary fixed tone-signalling and alarm operations.	Minor rewording.
89.151 (a), (b), (d), and (e).	90.403—General operating procedure.	Added priority to safety-of-life-or-property communications.
89.151(c)	90.19(b)—Police radio service	Combined with other sections.
89.153	90.425—Station identification	Combined with rules for industrial and land transportation.
89.155	90.403—General operating procedure	Combined with other sections.
89.156	90.423—Operations on board aircraft	Minor rewording.
89.157	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Combined with other sections.
89.159	90.409—Emergency operation of public safety and special emergency mobile stations at fixed locations.	No change.
89.161(a)	90.417—Interstation communications	Combined with other sections.
89.161(b)	90.253—Use of the frequency 4363.8 kHz	Minor rewording.
89.163 (a), (b), and (e).	90.433—Operator license requirements	Do.
89.163(d)	90.431—Unattended operation	Do.
89.163(f)	90.427—Precautions against unauthorized operation.	Minor rewording, combined with other sections.
89.165	90.435—Posting of operator license	Minor rewording.
89.167	90.437—Posting station licenses and transmitter identification cards or plates.	Do.
89.169	90.439—Inspection of stations	No change.
89.171	90.441—Inspection and maintenance of tower marking and associated control equipment.	Do.
89.173	90.449—Answers to a notice of violation	Minor rewording.
89.175	90.443—Contents of station records	No change.
89.177	90.445—Form of station records	Do.
89.179	90.447—Retention of station records	Do.
89.201	90.503—Eligibility	Minor rewording.
89.203	90.505—Showing required	Do.
89.205	90.507—Limitations on use	Do.
89.207	90.509—Frequencies available for assignment	No change.
89.209	90.511—Interference	Minor rewording.
89.211	90.513—Special provisions	Do.
89.213	90.515—Change or cancellation of authorization without hearing	No change except title.
89.215	90.517—Report of operation	Minor rewording.
89.251, and 89.253.	90.17(a)—Local government radio service	Minor rewording and rearrangement.
89.255	90.419—Points of communication	Combined with other sections.
89.257	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.
89.259 (a) and (f).	90.17(b)—Local government radio service	Combined, renumbered limitations, included all frequencies in table.
89.259(b)	90.173—Policies governing the assignment of frequencies.	Combined with other sections.
89.259(c)	NA	Deleted.
89.259(d)	90.17(e)—Local government radio service	Minor rewording.
89.259(g)	90.17(c)—Local government radio service	Renumbered and reworded with certain exceptions noted for sec. 89.259(g) (4), (5), and (7).
89.259(g)(4)	90.249—Control stations	Combined with other sections.
89.259(g)(5)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
89.259(g)(7)	NA	Deleted.
89.259(h)	NA	Do.
89.301 and 89.303.	90.19(a)—Police radio service	Minor rewording and rearrangement.
89.305 (a), (b), and (c).	90.419—Points of communications	Combined with other sections.
89.305(d)	90.19(b)—Police radio service	Do.
89.307(b)	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.
89.307(c)	90.19(b)—Police radio service	Do.
89.309 (a) and (g).	90.19(d)—Police radio service	Combined, renumbered limitations, included all frequencies in the table.
89.309(b)	90.173—Policies governing the assignment of frequencies.	Combined with other sections.
89.309(e)	90.19 (f) and (g)—Police radio service	Minor rewording
89.309(d)	NA	Deleted.
89.309(e)	90.19(g)—Police radio service	Minor rewording.
89.309(h)	90.19(e)—Police radio service	Renumbered and reworded limitations with certain exceptions noted for secs. 90.304(h) (1), (2), and (4).
89.309(h)(1)	NA	Deleted.
89.309(h)(2)	90.173(d)—Policies governing the assignment of frequencies.	Minor rewording.
89.309(h)(4)	90.249—Control stations	Combined with other sections.
89.309(i)	NA	Deleted.
89.351 and 89.353.	90.21(a)—Fire radio service	Minor rewording and rearrangement.
89.355	90.419—Points of communications	Combined with other sections.
89.357	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.
89.359, (a) and (f).	90.21(b)—Fire radio service	Combined, included all frequencies in the table—renumbered limitations.
89.359(b)	90.173—Policies governing the assignment of frequencies.	Combined with other sections.
89.359(c)	90.21(a)—Fire radio service	Minor rewording.
89.359(d)	NA	Deleted.
89.359(g)	90.21(c)—Fire radio service	Renumbered and reworded limitations with certain exceptions noted for secs. 89.359(g) (1), (3), and (4).
89.359(g)(1)	NA	Deleted.

Present section No.	Proposed section and title	Summary of changes proposed
89.359(g)(2)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
89.359(g)(4)	90.249—Control stations	Combined with other sections.
89.359(h)	NA	Deleted.
89.401 and 89.403.	90.23(a)—Highway maintenance radio service	Minor rewording and rearrangement.
89.405	90.419—Points of communications	Combined with other sections.
89.407(b)	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.
89.407(c)	90.23(e)—Highway maintenance radio service	Included in limitation on particular frequencies.
89.409 (a) and (e).	90.23(b)—Highway maintenance radio service	Combined—included all frequencies in table—renumbered limits.
89.409(b)	NA	Deleted.
89.409(c)	90.23(e)—Highway maintenance radio service	Minor rewording.
89.409(f)	90.23(c)—Highway maintenance radio service	Renumbered and reworded limits except as noted for sec. 89.409(f)(1).
89.409(f)(1)	90.249—Control stations	Combined with other sections.
89.409(g)	90.173—Policies governing the assignment of frequencies.	Do.
89.409(h)	NA	Deleted.
89.451 and 89.453.	90.25(a)—Forestry-conservation radio service	Minor rewording and rearrangement.
89.455	90.419—Points of communications	Combined with other sections.
89.457	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.
89.459 (a) and (d).	90.25(b)—Forestry-conservation radio service	Combined—included all frequencies in table, renumbered limitations.
89.459(b)	NA	Deleted.
89.459(e)	90.25(c)—Forestry-conservation radio service	Renumbered and reworded limits with exception noted for sec. 89.459(e)(1).
89.459(e)(1)	90.249—Control statinns	Combined with other sections.
89.501(f)	90.173(b)—Policies governing the assignment of frequencies.	Do.
89.501(g)	NA	Deleted.
89.501	90.33—Scope	Minor rewording.
89.503	90.35—Medical services	Minor rewording. 1st sentence of (b) deleted.
89.505	90.37—Rescue organization	Minor rewording.
89.507	90.39—Veterinarians	Do.
89.509	90.41—Disaster relief organization	Do.
89.511	90.43—School buses	Do.
89.513	90.45—Beach patrols	Do.
89.515	90.47—Establishments in isolated areas	Do.
89.517	90.49—Communication standby facilities	Do.
89.519	90.51—Emergency repair of public communications facilities.	Do.
89.521	90.419—Points of communication	Combined with other sections, minor rewording.
89.523(a)	90.243—Mobile relay stations	Do.
89.523(b)	NA	Specific requirement for monitoring deleted. See sec. 90.403(c).
89.523(c)	NA	Deleted.
89.523(d)	90.55—Paging operations	Minor rewording.
89.525(a) and (e).	90.53(a)—Frequencies available	Combined—included all frequencies in table. Renumbered limitations.
89.525(b)	NA	Deleted.
89.525(c)	90.53(d)—Frequencies available	Minor rewording.
89.525(d)	90.53(a)—Frequencies available	Do.
89.525(f)	90.53(b)—Frequencies available	Renumbered and reworded limitations except as noted for secs. 89.525(f) (1), (13), and (22).
89.525(f)(1)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
89.525(f)(13)	NA	Deleted.
89.525(f)(22)	90.249—Control station	Combined with other sections.
89.551	90.17(c)—Local government radio service	State guard radio service moved to category of local government radio service.
89.553	90.405—Permissible communications	Combined with other sections.
89.555	90.419—Points of communication	Do.
89.559	90.17 (b) and (c)—Local government radio service.	Included in local government radio service.
89.601	90.351—Scope	Minor rewording and rearrangement.
89.602	90.353—Definitions	No change.
89.603	90.351—Scope	Minor rewording and rearrangement.
89.604	90.355—Eligibility	No change.
89.605	90.387—Station identification	Do.
89.651	90.379—Limitations on power and antenna height.	Do.
89.652	90.381—Restrictions on operational fixed stations	Do.
89.653	90.389—Restriction on interconnection	Do.
89.655	90.385—Restrictions and limitations on permissible communications, on use, and on mode of operation.	Do.
89.656	90.393—Special conditions governing the furnishing of radio equipment by licensees.	Do.
89.657	90.373—Restrictions on licensing manufacturers in the 806–821 MHz, and 851–866 MHz bands.	Do.
89.658	90.383—Acceptability of transmitters for licensing in the 806–821 MHz, and 851–866 MHz bands.	Do.
89.701	90.357—Forms to be used	Do.
89.702	90.359—Supplemental information to be furnished by applicants for facilities under this subpart.	Do.
89.703	90.391—Supplemental reports required of licensees authorized under this subpart.	Do.
89.704	90.363—Processing of applications	Do.
89.751	90.365—Selection and assignment of frequencies	Do.
89.801	90.375—Trunked systems loading requirements	No change (except title).
89.802	90.377—Conventional systems loading requirements.	Do.
89.803	90.369—Other criteria to be applied in assigning channels for use in conventional systems of communication.	No change.
89.804	90.395—Number of systems authorized in a geographical area.	No change (except title).

Present Section Number	Proposed Section and Title	Summary of Changes Proposed
90.305	Limitation on the number of frequencies assignable for conventional systems.	No change.
90.309	90.371—Limitation on the number of frequency pairs assignable for trunked systems and on the number of trunked systems.	Do.
90.307	90.367—Special licensing requirements for radio stations used to provide service to persons other than the licensee	Do.
90.303	90.361—Special limitations on amendment of applications for assignment or transfer of authorizations for radio systems used to provide service to persons other than the licensee.	Do.
91.1	90.1—Basis and purpose	Minor rewording.
91.2	90.415—Prohibited uses	Combined with other sections
91.3	90.7—Definitions	Deletions and additions as necessary. Minor reorganization and clarification.
91.4	90.115—Ineligibility of foreign governments	Minor rewording.
91.5	90.151—Assignment of station authorization	Minor rewording.
91.6	90.17—Cooperative use of radio services	Action deferred for resolution of docket 18921.
91.7	90.243—Mobile relay stations 90.245—Fixed relay stations 90.247—Vehicular repeater stations 90.249—Control stations	Relay, repeater and control uses separated under specific sections with minor rewording and clarification.
91.8(a)	90.173 (a) and (b)—Policies governing the assignment of frequencies.	Minor rewording.
91.8(b)	90.175—Frequency coordination requirements	Do.
91.8(b)	NA	Deleted.
91.8(c)	Various radio services sections under limitation on number of frequencies assignable.	Minor rewording.
91.8(d)	NA	Deleted.
91.8(e)	90.173(g)—Policies governing the assignment of frequencies.	Minor rewording.
91.8(f)	90.173(c)—Policies governing the assignment of frequencies.	Do.
91.8(g)	90.257—Assignment and use of frequencies in the band 72–76 MHz.	Combines applicable provisions in this and other sections.
91.8(h)	90.173(e)—Policies governing the assignment of frequencies.	Minor rewording.
91.8(i)	NA	Deleted.
91.8(j)	Various radio services sections under limitation on number of frequencies assignable.	Minor rewording.
91.8 (k) and (m).	90.177—Protection of certain radio receiving locations.	No change.
91.8(l)	90.261—Assignment and use of frequencies in the band 450–470 MHz for fixed operations.	Do.
91.9	90.179—Cooperative use of radio stations	Action deferred for resolution of docket 18921.
91.80	90.147—Mailing address furnished by licensee	No change.
91.81	90.113—Station authorization required	Minor rewording.
91.82(a)	90.117—Applications for radio station authorization.	Do.
91.82 (b), (c), and (d).	NA	Deleted
91.83	90.145—Special temporary authority	Minor rewording—added a requirement for eligibility statement.
91.84(a)	90.119—Application forms	Combined with other sections.
91.84(b)	90.127(a)—Filing of applications	Minor rewording—added Chicago filing address.
91.84(c)	90.127(b)—Filing of applications	Combined with other sections.
91.84(d)	90.139—Preliminary processing of applications	No change.
91.84(e)	90.137—Applications for operation at temporary location.	Minor rewording.
91.84(f)	90.129(e)—Supplemental information to be routinely submitted with applications.	Do.
91.85	90.125—Who may sign applications	Paragraph (c) expanded.
91.86(a)(b)	90.119(a)—Application forms	Minor rewording—reference to form 104f added—eliminate reference to construction permit.
91.86(d)	90.119(d)—Application forms	Minor rewording.
91.86(e)	90.145—Special temporary authority	Do.
91.86(f)	NA	Requirement deleted.
91.86(g)	90.119(b)—Application forms	Minor rewording.
91.87(a)	90.119(c)—Application forms	Do.
91.87(b)	90.483—Chicago region	No change.
91.88(a)	90.129(f)—Supplemental information to be routinely submitted with applications.	Minor rewording
91.88(a)(1)	90.173—Policies governing the assignment of frequencies.	Do
91.88(b)	Various services sections under limitation on number of frequencies assignable.	Do
91.88(c)	NA	Deleted.
91.88 (d), (e), (f), (g), (h), (i), (j), (k), and (l).	90.129—Supplemental information to be routinely submitted with applications.	Minor rewording—combined with other sections.
91.89	90.143—Grants of applications	Minor rewording.
91.90	90.139—Preliminary processing of applications	Deleted reference to alien restrictions.
91.91	90.131—Amendment or dismissal of applications	No change.
91.92	90.153—Time in which stations must be placed in operation.	Minor rewording—deleted construction permit requirements.
91.93	90.149—License term	Minor rewording and clarification.
91.94	90.135—Modification of license	Rewritten to specify changes.
91.95	NA	Deleted.
91.96	90.155—Discontinuance of station operation	No change
91.97	90.487—Special provisions relating to frequency assignments in the Chicago region.	Do.
91.101(a)	NA	Deleted.
91.101(b)	90.253—Use of the frequency 4383.8 kHz	Combined with other sections.
91.102	90.213—Frequency tolerance	Do.
91.103(a)	90.207(a)—Types of emission	Combined with other sections—referenced each operation with type of emission permitted.
91.103(b)	90.233—Secondary base-mobile nonvoice signalling operations.	Combined with other sections—deleted requirement for submission of coding system.
91.103(c)	NA	
91.104	90.209—Bandwidth limitations	Combined with other sections.
91.105	90.211—Modulation requirements	Do.
91.106	90.205—Power	Do.

Present section No.	Proposed section and title	Summary of changes proposed
91.107(a)	90.427—Precautions against unauthorized operation.	Minor rewording.
91.107 (b), (c), (d), and (e).	90.429—Control point and dispatch point requirements.	Do.
91.108	90.215—Transmitter measurements	Combined with other sections—minor rewording.
91.109 (a) and (b).	90.203—Type acceptance required	Combined with other sections.
91.109(c)	NA	Deleted.
91.110	90.203—Type acceptance required	Combined with other sections.
91.112	NA	Rearranged by including technical standards in other appropriate sections.
91.113	90.237—Interim provisions for operation of radio teleprinter and radio fusimile devices.	Combined with other sections.
91.114	Subpart L—Authorizations in the band 470–512 MHz (UHF–TV Sharing).	Do.
91.116	NA	Deleted.
91.120	90.239—Interim provisions for operation of automatic vehicle monitoring (AVM) systems.	Combined with other sections.
91.151 (a) and (b).	90.405—Permissible communications	Do.
91.151(c)	90.419—Points of communication	Do.
91.151(d)	90.403—General operating requirements	Do.
91.151(e)	90.407—Communications permitted during emergency situations.	Do.
91.151(f)	90.405—Permissible communications	Do.
91.152	90.425—Station identification	Combined with other sections reorganized.
91.153	90.403—General operating procedure	Minor rewording.
91.154	90.433—Operator license requirements	Do.
91.155	90.435—Posting of operator license	Reorganized.
91.156	90.437—Posting station license and transmitter identification cards and plates.	Do.
91.157	90.439—Inspection of stations	Minor rewording.
91.158	90.441—Inspection and maintenance of tower marking and associated control equipment.	Do.
91.159	90.449—Answer to a notice of violation	Do.
91.160	90.443—Content of station records 90.445—Form of station records 90.447—Retention of station records	Separated and reorganized with minor rewording.
91.162	90.423—Operations on board aircraft	No change.
91.201	90.503—Eligibility	Minor rewording.
91.202	90.505—Showing required	Do.
91.203	90.507—Limitations on use	Do.
91.204	90.509—Frequencies available for assignment	No change.
91.205	90.511—Interference	Minor rewording.
91.206	90.513—Special provisions	Do.
91.207	90.515—Change or cancellation of authorization without hearing.	No change except title.
91.208	90.517—Report of operation	Minor rewording.
91.251	90.63(a)—Power radio service	Minor rewording—combined with other sections.
91.251 (d) and (e).	90.61—General eligibility	Combined with other sections.
91.252(a)	90.123—Full disclosures	Do.
91.252(b)	90.63(b)(2)—Power radio service	Minor rewording.
91.252(c)	90.63(e)(4)—Power radio service	Do.
91.252(d)	90.63(b)(1)—Power radio service	Do.
91.252(e)	90.211(e)—Modulation requirements	Do.
91.252(f)	90.233—Secondary base mobile nonvoice signaling operations.	Combined with other sections.
91.253(a)	NA	Not necessary.
91.253 (b) and (c).	90.235—Secondary fixed tone signaling and alarm operations.	Combined with other sections.
91.253(d)	90.421(h)—Operation of mobile units in vehicles not under the control of the licensee.	Minor rewording.
91.254(a)	90.63(c)—Power radio service	Included all frequencies in table. Renumbered limitations.
91.254(b)	do	Renumbered and reworded limitations except as noted for 91.254 (b), (6), (7), (8), (10), (26), (28), (29), (30), and (35).
91.254(b)(6)	NA	Deleted.
91.254(b)(7)	NA	Do.
91.254(b)(8)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording—combined with other sections.
91.254(b)(10)	90.263—Substitution of frequencies below 25 MHz.	Minor rewording.
91.254(b)(26)	90.261—Assignment and use of frequencies in the band 450–470 MHz for fixed operations.	Combined with other sections.
91.254(b)(28)	NA	Deleted.
91.254(b)(29)	90.173—Policies governing the assignment of frequencies.	Minor rewording.
91.254(b)(30)	90.249—Control stations	Combined with other sections.
91.254(b)(35)	90.259—Assignment and use of frequencies in the bands 216–220 MHz and 1427–1435 MHz.	Combined with other sections. Minor rewording.
91.255(a)	NA	Deleted.
91.255(b)	90.63(e)(3)—Power radio service	Minor rewording.
91.301	90.65(a)—Petroleum radio service	Minor rewording. Combined with other sections.
91.302(a)	90.123—Full disclosures	Minor rewording.
91.302(b)	90.65(d)(4)—Petroleum radio service	Do.
91.302(c)	90.211(e)—Modulation requirements	Do.
91.302(d)	90.233—Secondary base mobile nonvoice signalling operations.	Combined with other sections.
91.302(e)	90.65(c)(4)—Petroleum radio service. 90.65(c)(4)—Petroleum radio service.	Made into frequency limitation and exception to limit on number of frequencies.
91.303(a)	NA	Not necessary.
91.303(b)	90.235—Secondary fixed tone signalling and alarm operation.	Combined with other sections.
91.304(a)	90.65(b)—Petroleum radio service	Included all frequencies in table. Renumbered limitations.
91.304(b)	90.65(c)—Petroleum radio service	Renumbered and reworded limits except as noted for secs. 91.304(b) (4), (5), (6), (8), (27), (29), (31), (32), (33), and (37).
91.304(b)(4)	NA	Deleted.
91.304(b)(5)	NA	Do.
91.304(b)(6)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording—combined with other sections.
91.304(b)(8)	90.263—Substitution of frequencies below 25 MHz.	Minor rewording.

Present section No.	Proposed section and title	Summary of changes proposed
91.304(b)(27)	90.259—Assignment and use of frequencies in the bands 216–220 MHz and 1427–1435 MHz.	Combined with other sections.
91.304(b)(29)	90.261—Assignment and use of frequencies in the bands 450–470 MHz for fixed operations.	Do.
91.304(b)(31)	NA	Deleted.
91.304(b)(32)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
91.304(b)(33)	90.249—Control stations	Combined with other sections.
91.304(b)(37)	90.259—Assignment and use of frequencies in the bands 216–220 MHz and 1427–1435 MHz.	Do.
91.305(a)	90.65(d)—Petroleum radio service	Minor rewording.
91.305(b)	90.65(d)—Petroleum radio service	Do.
91.351	90.67(a)—Forest products radio service	Minor rewording combined with other sections.
91.352	90.123—Full disclosures	Combined with other sections.
91.353	NA	Not necessary.
91.354(a)	90.67(b)—Forest products radio service	Included all frequencies in table. Renumbered limitations.
91.354(b)	90.67(c)—Forest products radio service	Reworded and renumbered limitations except as noted for secs. 91.354(b) (4), (5), (6), (7), (8), (29), (31), (32), (33), and (35).
91.354(b) (4) and (5).	NA	Deleted.
91.354(b)(6)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz.	Minor rewording. Combined other sections.
91.354(b)(7) and 91.354(b)(35).	90.259—Assignment and use of the frequencies in the bands 216–220 MHz and 1427–1435 MHz.	Minor rewording. Combined with other sections.
91.354(b)(8)	90.263—Substitution of frequencies below 25 MHz.	Minor rewording.
91.354(b)(29)	90.261—Assignment and use of frequencies in the bands 450–470 MHz for fixed operations.	Combined with other sections.
91.354(b)(31)	NA	Deleted.
91.354(b)(32)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
91.354(b)(33)	90.249—Control stations	Combined with other sections.
91.355(a)	NA	Deleted.
91.355(b)	90.67(d)—Forest products radio service	Minor rewording.
91.401	90.69(a)—Motion picture radio service	Minor rewording. Combined with other sections.
91.402	90.123—Full disclosures	Combined with other sections.
91.403	NA	Not necessary.
91.404(a)	90.69(b)—Motion picture radio service	Included all frequencies in table. Renumbered limitations.
91.404(b)	90.69(c)—Motion picture radio service	Renumbered and reworded limitations except as noted for secs. 91.404(b)(2), (5), and (12).
91.404(b)(2)	90.263—Substitution of frequencies below 25 MHz.	Minor rewording.
91.404(b)(5)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
91.404(b)(12)	90.259—Assignment of frequencies in the bands 216–220 MHz and 1427–1435 MHz.	Do.
91.405(a)	NA	Deleted.
91.405(b)	90.69(b)—Motion picture radio service	Minor rewording.
91.451	90.71(a)—Relay press radio service	Minor rewording. Combined with other sections.
91.452	90.123—Full disclosures	Combined with other sections.
91.454(a)	90.71(b)—Relay press radio service	Included all frequencies in table renumbered limitations.
91.454(b)	90.71(c)—Relay press radio service	Reworded and renumberee limitations except as noted for sec. 91.454(b) (2), (10), (11), (12), and (13).
91.454(b)(2)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.555, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
91.454(b)(10)	NA	Deleted.
91.454(b)(11)	90.173—(i) Policies governing the assignment of frequencies.	Minor rewording.
91.454(b)(12)	90.249—Control stations	Minor rewording. Combined with other sections.
91.454(b)(13)	90.259—Assignment and use of frequencies in the bands 216–220 MHz and 1427–1735 MHz.	Do.
91.455(a)	NA	Deleted.
91.455(b)	90.71(d)—Relay press radio service	Minor rewording.
91.501	90.73(a)—Special industrial radio service	Combined with other sections.
91.502(a)	90.123—Full disclosures	Do.
91.502(b)	90.73(a)—Special industrial radio service	Incorporated into eligibility paragraph.
91.502(c)	90.83(b)—Special industrial radio service	Only change was to delete unenforceable sec. 91.502(c)(4).
91.502(d)	90.73(a)—Special industrial radio service	Minor rewording. Combined with other sections.
91.503(a)	90.243—Mobile relay stations	Combined with other sections.
91.503(b)	90.257—Assignment and use of frequencies in the band 72–76 MHz.	Minor rewording. Combined with other sections.
91.503(c)	90.73(g)—Special industrial radio service	Minor rewording.
91.504(a)	90.73(e)—Special industrial radio service	Included all frequencies in table renumbered limitations.
91.504(b)	90.73(d)—Special industrial radio service	Reworded and remunbered limitations except as noted for secs. 91.504(b), (6), (7), (8), (10), (26), (27), (28), (29), (30), (33), (34), and (36).
91.504(b) (6) and (7).	NA	Deleted.
91.540(b)(8)	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz	Minor rewording. Combined with other sections.
91.504(b)(10)	90.263—Substitution of frequencies below 25 MHz.	Minor rewording.
91.504(b)(26)	90.261—Assignment and use of frequencies in the band 450–470 MHz for fixed operations.	Combined with other sections.
91.504(b)(27)	NA	Deleted.
91.540(b)(28)	90.173(i)—Policies governing the assignment of frequencies.	Minor rewording.
91.504(b)(29)	90.249—Control stations	Minor rewording. Combined with other sections.
91.504(b) (30) and (36).	90.259—Assignment and use of frequencies in the bands 216–220 MHz and 1247–1435 MHz.	Do.
91.504(b)(33)	90.257—Assignment and use of frequencies in the band 72–76 MHz.	Do.
91.504(b)(34)	NA	Deleted.
91.504(c)	90.73(e)(5)—Special industrial radio service	Minor rewording.
91.504(d)	90.73(e)(4)—Special industrial radio service	Do.
91.505	90.73(e)(3)—Special industrial radio service	Do.
91.551	90.75(a)—Business radio service	Minor rewording. Combined with other sections.
91.552(a)	90.75(a)—Business radio service	Do.
91.552(b)	90.123—Full disclosures	Combined with other sections.

Present section No.	Proposed section and title	Summary of changes proposed
91.552(c)	90.173—Policies governing the assignment of frequencies.	Minor rewording.
91.552(d)	NA	Deleted.
91.552 (f) and (g)	90.75(c)—Business radio service	Minor rewording. Included in frequency limitations.
91.553(a)	90.243—Mobile relay stations	Minor rewording. Combined with other sections.
91.553(c)	90.75(f)—Business radio service	Minor rewording.
91.554(a)	90.75(b)—Business radio service	Included all frequencies in table. Renumbered limitations.
91.554(b)	90.75(e)—Business radio service	Reworded and renumbered limitations except as noted for secs. 91.554(b) (6), (7), (8), (34), (35), (38), (45), and (48).
91.554(b) (6) and (7).	NA	Deleted.
91.554(b) (8)	90.257—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
91.554(b) (9)	90.249—Control stations	Do.
91.554(b) (34)	NA	Deleted.
91.554(b) (35)	90.173—Policies governing the assignment of frequencies.	Minor rewording.
91.554(b) (38)	90.261—Assignment and use of frequencies in the band 450-470 MHz for fixed operations.	Combined with other sections.
91.554(b) (45) and (48).	90.259—Assignment of frequencies in the bands 216-220 MHz and 1427-1435 MHz.	Minor rewording. Combined with other sections.
91.554 (c) and (d).	90.75 d—Business radio service	Minor rewording.
91.555	90.217—Exemption from technical standards	No change.
91.556	90.75(d)—Business radio service	Minor rewording.
91.601	90.103—Radiolocation service	Minor rewording. Combined with other sections.
91.602(a)	90.125—Full disclosures	Combined with other sections.
91.602(b)	90.129(c)—Supplemental information to be routinely submitted with applications.	Minor rewording. Combined with other sections.
91.602(c)	NA	Deleted.
91.603(a)	90.203—Type acceptance required	Combined with other sections.
91.603(b)	90.103(a)—Radiolocation service	Minor rewording. Combined with other sections.
91.604 (a)	90.103(b)—Radiolocation service	Renumbered limitations.
91.604(b)	90.103(c)—Radiolocation service	Renumbered and reworded limitations.
91.605	90.103(e)—Radiolocation service	No change.
91.606	90.103(c)(7)—Radiolocation service	Minor rewording. Combined with other sections.
91.726 and 91.727.	90.79(a)—Manufacturers radio service	Combined definition and permissible communications with eligibility.
91.728(a)	90.125—Full disclosures	Combined with other sections.
91.728(b)	90.79(b)—Manufacturers radio service	Minor rewording.
91.729(a)	90.243—Mobile relay stations	Minor rewording. Combined with other sections.
91.729(b)	90.79(b)—Manufacturers radio service	Minor rewording.
91.729(d)	90.257—Assignment and use of frequencies in the band 72-76 MHz.	Combined with other sections.
91.730(a)	90.79(c)—Manufacturers radio service	Included all frequencies in table renumbered limitations.
91.730(b)	90.79 d—Manufacturers radio service	Reworded and renumbered limits except as noted for secs. 91.730(b) (3), (4), (14), (16), (17), (18), (19), and (22).
91.730(b)(3)	90.257—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
91.730(b)(4)	NA	Deleted.
91.730(b)(14)	90.261—Assignment and use of frequencies in the band 450-470 MHz for fixed operations.	Combined with other sections.
91.730(b)(16)	NA	Deleted.
91.730(b)(17).	90.173(d)—Policies governing the assignment of frequencies.	Minor rewording.
91.730(b)(18)	90.249—Control stations	Minor rewording. Combined with other sections.
91.730(b) (19) and 91.730(b)(21).	90.259—Assignment and use of frequencies in the bands 216-220 MHz and 1427-1435 MHz.	Do.
91.751	90.81(a)—Telephone maintenance radio service	Do.
91.752(a)	90.125—Full disclosures	Combined with other sections.
91.752(b) and 91.752(c).	90.81(b)—Telephone maintenance radio service	Minor rewording. Combined with other sections.
91.753	90.243—Mobile relay stations	Do.
91.754(a)	90.81(c)—Telephone maintenance radio service	Included all frequencies in table. Renumbered limitations.
91.754(b)	90.81(d)—Telephone maintenance radio service	Rewording and renumbered limitations except as noted for secs. 91.754(b) (3), (4), (10), (12), (13), (14), (16), and (18).
91.754(b)(3)	90.257—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
91.754(b)(4)	NA	Deleted.
91.754(b)(10)	90.261—Assignment and use of frequencies in the band 450-470 MHz for fixed operations.	Minor rewording. Combined with other sections.
91.754(b)(12).	NA	Deleted.
91.754(b)(13)	90.173(d)—Policies governing the assignment of frequencies.	Minor rewording.
91.754(b)(14)	90.249—Control stations	Minor rewording. Combined with other sections.
91.754(b)(16) and 91.754(b)(18).	90.259—Assignment and use of frequencies in the bands 216-220 MHz and 1427-1435 MHz.	Do.
93.1	90.1—Basis and purpose	Minor rewording.
93.2	90.415—Prohibited uses	Minor rewording. Combined with other sections.
93.3 and 93.4	90.179—Cooperative use	Awaits resolution of docket 18921.
93.5	90.115—Ineligibility of foreign governments	Minor rewording.
93.6	90.151—Assignment of station authorization	Do.
93.7	90.7—Definitions	Deletions and additions as necessary. Minor reorganization and clarification.
93.8(a)	90.173(a)—Policies governing the assignment of frequencies.	No change.
93.8(b)	90.173(g)—Policies governing the assignment of frequencies.	Minor rewording.
93.8(c)	90.173(c)—Policies governing assignment of frequencies.	Do.
93.8(d)	90.257—Assignment and use of frequencies in the band 72-76 MHz.	Combined with other sections.
93.8(e)	90.173(e)—Policies governing the assignment of frequencies.	Minor rewording.
93.8(h)	Various services sections in the frequency limitations.	Do.
93.9(a)	90.175—Frequency coordination requirements	Do.

Present section No.	Proposed section and title	Summary of changes proposed
93.9(b) and 93.9(c)	90.177—Protection of certain radio receiving locations.	No change.
93.10	90.247—Vehicular repeater stations	Minor rewording. Combined with other sections.
93.50	90.147—Mailing address furnished by licensee	No change.
93.51	90.113—Station authorization required	Minor rewording.
93.52(a)	90.117—Applications for radio station authorizations.	Do.
93.52 (b), (c), and (d).	NA	Deleted.
93.53	90.145—Special temporary authority	Minor rewording added an eligibility statement requirement.
93.54(a)	90.117—Applications for radio station authorization.	Minor rewording. Referenced fee information.
93.54(b)	90.127(a)—Filing of applications	Minor rewording. Added Chicago filing address information.
93.54(c)	90.127(b)—Filing of applications	Minor rewording. Combined with other sections.
93.54(d)	90.139—Preliminary processing of applications	No change.
93.54(e)	90.137—Applications for operation at temporary locations.	Minor rewording.
93.54(f)	90.129(e)—Supplemental information to be routinely submitted with applications.	Do.
93.55	90.125—Who may sign applications	Paragraph (c) expanded.
93.56 (a) and (b).	90.119(a)—Application forms	Minor rewording. Referenced form 1046, eliminated reference to construction permit.
93.56(d)	90.119(b)—Application forms	Minor rewording.
93.56(e)	NA	Deleted.
93.56(f)	90.119(b)—Application forms	Minor rewording.
93.56(g)	90.145—Special temporary authority	Do.
93.57(a)	90.119(c)—Application forms	Do.
93.57(b)	90.483—Chicago region	No change.
93.58	90.129—Supplemental information to be routinely submitted with applications.	Minor rewording.
93.59	90.143—Grants of applications	Do.
93.60	90.139—Preliminary processing of applications	Deleted reference of alien restrictions.
93.61	90.131—Amendment or dismissal of applications	No change.
93.62	90.153—Time in which stations must be placed in operation.	Minor rewording. Deleted construction permit.
93.63	90.149—License term	Minor rewording
93.64	90.133—Modification of license	Rewritten to specify changes requiring applications to be approved.
93.65	90.155—Discontinuance of station operation	No change.
93.67	90.487—Special provisions relating to frequency assignment in the Chicago region.	Do.
93.101(a)(1)	NA	Deleted.
93.101(a)(2)	90.253—Use of the frequency 4583.8 kHz	Combined with other sections.
93.101(b)	90.261—Assignment and use of frequencies in the band 440-470 MHz for fixed operations.	Do.
93.102	90.213—Frequency tolerance	Minor rewording. Combined with other sections.
93.103(a)	90.207(a)—Types of emission	Minor rewording. Referenced each operation with types of emission permitted.
93.103(b)	90.233—Secondary base/mobile nonvoice signalling operations.	Minor rewording. Eliminated requirement for submission of coding systems.
93.103(c)	NA	Deleted.
93.104	90.209—Bandwidth limitations	Minor rewording. Combined with other sections.
93.105	90.211—Modulation requirements	Do.
93.106	90.205—Power	Do.
93.107(a)	90.427—Precaution against unauthorized operation.	Minor rewording.
93.107 (b), (c), (d) and (e).	90.429—Control point and dispatch point requirements.	Minor rewording and rearrangement.
93.108	90.215—Transmitter measurements	Minor rewording.
93.109	90.203—Type acceptance required	Minor rewording. Combined with other sections.
93.110	do	Do.
93.112	See various frequency tables in subpts. K and F.	Extensive deletions, additions and rearrangement as necessary. Minor rewording and clarification.
93.113	90.237—Interim provisions for operation of radioteleprinter and radio-facsimile devices.	Minor rewording.
93.114	Subpart L—Authorization in the band 470-512 MHz (UHF-TV sharing).	Combined with other sections.
93.116		Unnecessary.
93.120	90.239—Interim provisions for operation of automatic vehicle monitoring (AVM) systems.	Minor rewording.
93.151(a)	90.405—Permissible communications	Minor rewording. Combined with other sections.
93.151(b)	90.417—Interstation communications	Combined with other sections.
93.151(c)	90.419—Points of communications	Minor rewording. Combined with other sections.
93.151(c)(4)	90.417—Interstation communications	Combined other sections.
93.151(d)	90.409(a)—General operating procedure	Minor rewording.
93.151(e)	90.407—Communications permitted during emergency situations.	Combined with other sections.
93.151(f)	90.405(c)—Permissible communications	Minor rewording. Combined with other sections.
93.151(g)	90.415—Civil defense communications in the fixed radio services	Do.
93.152	90.425—Station identification	Reorganized. Combined with rules for public safety and industrial.
93.153	90.409—General operating procedure	Minor rewording. Combined with other sections.
93.154	90.433—Operator license requirements	Minor rewording.
93.155	90.425—Station identification	Do.
93.156	90.437—Posting station licenses and transmitter identification cards or plates.	Do.
93.157	90.439—Inspection of stations	No change.
93.158	90.441—Inspection and maintenance of tower marking and associated control equipment.	Do.
93.159	90.443—Answer to a notice of violation	Minor rewording.
93.160	90.443—Content of station records	Separated and reorganized. Minor rewording.
	90.445—Form of station records	Do.
	90.447—Retention of station records	Do.
93.161	90.527—Land transportation industries communications emergency plan (LATICEP).	No change.
93.162 and 93.163.		

Present section No.	Proposed section and title	Summary of changes proposed
93.164	90.423—Operations on board aircraft	Minor rewording.
93.201	90.503—Eligibility	Do.
93.202	90.505—Showing required	Do.
93.203	90.507—Limitations on use	Do.
93.204(a)	90.509—Frequencies available for assignment	Do.
93.204(b)	Various land transportation radio services under additional frequencies available, or limitation on number of frequencies assignable.	
93.205	90.511—Interference	Do.
93.206	90.513—Special provisions	Do.
93.207	90.515—Change or cancellation of authorization without hearing.	No change except title.
93.208	90.517—Report of operation	Minor rewording.
93.251(a)	90.89(a)—Motor carrier radio service	Minor rewording. Combined with other sections.
93.251(b)	90.123—Full disclosures	Combined with other sections.
93.252	90.89 (b) and (c)—Motor carrier radio service	Placed frequencies in table form. Minor rewording of limitations.
93.253(a)	90.261—Assignment and use of frequencies in the band 450-470 MHz for fixed operations.	Minor rewording. Combined with other sections.
93.253(b)	90.257—Assignment and use of frequencies in the band 72-76.	Do.
93.253(d)	NA	Deleted.
93.253(e)	90.89(e)(2)—Motor carrier radio service	Minor rewording.
93.254	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
93.255	NA	Deleted.
93.351(a)	90.91(a)—Railroad radio service	Minor rewording. Combined with other sections.
93.351(b)	90.123—Full disclosures	Combined with other sections.
93.352 (a), (c), and (f).	90.91 (c) and (d)—Railroad radio service	Placed frequencies in table form. Minor rewording of limitations.
93.352(b)	90.257—Assignment and use of frequencies in the band 72-76 MHz.	Minor rewording. Combined with other sections.
93.352(d)	90.249—Control stations	Do.
93.352(e)	90.91(e)—Railroad radio service	Minor rewording.
93.353(a)	90.261—Assignment and use of frequencies 450-470 MHz for fixed operations.	Minor rewording. Combined with other sections.
93.353(b)	90.257—Assignment and use of frequencies in the band 72-76 MHz.	Do.
93.353(c)	90.91(c)—Railroad radio service	Included in frequency table. Minor rewording of limitation.
93.353(d)	NA	Deleted.
93.353(e)	90.91(e)(2)—Railroad radio service	Minor rewording.
93.353(f)	90.91(e)—Railroad radio service	Do.
93.355	90.243—Mobile relay stations 90.245—Fixed relay stations 90.247—Vehicular repeater stations 90.249—Control stations	Relay, repeater and control uses separated under specific sections with minor rewording and clarification.
93.356	90.255—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
93.357(a)	90.91(b)—Railroad radio service	Minor rewording.
93.357(b)	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Minor rewording. Combined with other sections.
93.352(e)	90.91(d)(3) and (d)(4)—Railroad radio service	Incorporated as assignment limitations on the appropriate frequencies. Minor rewording.
93.357(d)	90.91(b)—Railroad radio service	No change.
93.401(a)	90.93(a)—Taxicab radio service	Minor rewording. Combined with other sections.
93.401(b)	90.123—Full disclosures	Combined with other sections.
93.402	90.93 (b) and (c)—Taxicab radio service	Placed frequencies in table form. Minor rewording of limitations.
93.403	NA	Deleted.
93.404	90.255 Assignment and use of frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
93.405	90.412—Civil defense communications in the taxicab radio service.	Minor rewording.
93.501(a)	90.95(a)—Automobile emergency radio service	Minor rewording. Combined with other sections.
93.501(b)	90.123—Full disclosures	Combined with other sections.
93.502(a)	90.405—Permissible communications	Minor rewording. Combined with other sections.
93.502(b)	90.95(a)—Automobile emergency radio service	Minor rewording. Combined with eligibility provisions.
93.502(c)	90.95—Automobile emergency radio service	Minor rewording.
93.503	90.95 (c) and (d)—Automobile emergency radio service.	Placed frequencies in table form. Minor rewording of limitations.
93.504	90.225—Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz.	Minor rewording. Combined with other sections.
93.505	90.421—Operation of mobile units in vehicles not under the control of the licensee.	Do.

ATTACHMENT B

A new Part 90 in Volume V of the Commission's Rules is proposed to be added as follows:

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

Subpart A—General Information

Sec.
90.1 Basis and purpose.
90.3 Organization and applicability of the rules.
90.5 Other applicable rule parts.
90.7 Definitions.

Subpart B—Public Safety Radio Services

90.15 Scope.
90.17 Local government radio service.
90.19 Police radio service.
90.21 Fire radio service.
90.23 Highway maintenance radio service.
90.25 Forestry-conservation radio service.

Subpart C—Special Emergency Radio Service

90.33 Scope.
90.35 Medical services.
90.37 Rescue organizations.
90.39 Veterinarians.
90.41 Disaster relief organizations.
90.43 School buses.
90.45 Beach patrols.
90.47 Establishment in isolated areas.
90.49 Communications standby facilities.
90.51 Emergency repair of public communications facilities.
90.53 Frequencies available.
90.55 Paging operations.

Subpart D—Industrial Radio Services

Sec.
90.59 Scope.
90.61 General eligibility.
90.63 Power radio service.
90.65 Petroleum radio service.
90.67 Forest products radio service.
90.69 Motion picture radio service.
90.71 Relay press radio service.
90.73 Special industrial radio service.
90.75 Business radio service.
90.79 Manufacturers radio service.
90.81 Telephone maintenance radio service.

Subpart E—Land Transportation Radio Services

90.85 Scope.
90.87 General eligibility.
90.89 Motor carrier radio service.
90.91 Railroad radio service.
90.93 Taxicab radio service.
90.95 Automobile emergency radio service.

Subpart F—Radiolocation Service

90.101 Scope.
90.103 Radiolocation service.

Subpart G—Applications and Authorizations

90.111 Scope.
90.113 Station authorization required.
90.115 Ineligibility of foreign governments.
90.117 Applications for radio station authorizations.
90.119 Application forms.
90.121 Canadian registration.
90.123 Full disclosures.
90.125 Who may sign applications.
90.127 Filing of applications.
90.129 Supplemental information to be routinely submitted with applications.
90.131 Amendment or dismissal of applications.
90.135 Modifications of license.
90.137 Applications for operation at temporary locations.
90.139 Preliminary processing of applications.
90.141 Resubmitted applications.
90.143 Grants of applications.
90.145 Special temporary authority.
90.147 Mailing address furnished by licensee.
90.149 License term.
90.151 Requests for waiver.
90.153 Assignment of station authorization.
90.155 Time in which station must be placed in operation.
90.157 Discontinuance of station operation.

Subpart H—General Policies Governing the Inter-system Assignment, Coordination, and Use of Frequencies

90.171 Scope.
90.173 Policies governing the assignment of frequencies.
90.175 Frequency coordination requirements.
90.177 Protection of certain radio receiving locations.
90.179 Cooperative use of radio stations.

Subpart I—General Technical Standards

90.201 Scope.
90.203 Type acceptance required.
90.205 Power.
90.207 Types of emission.
90.209 Bandwidth limitations.
90.211 Modulation requirements.
90.213 Frequency tolerance.
90.215 Transmitter measurements.
90.217 Exemption from technical standards.

Subpart J—Non-Voice and Other Specialized Operations

90.231 Scope.
90.233 Secondary base/mobile non-voice signalling operations.
90.235 Secondary fixed tone signalling and alarm operations.

Sec.
90.237 Interim provisions for operation of radioteleprinter and radio-facsimile devices.
90.239 Interim provisions for operation of automatic vehicle monitoring (AVM) systems.
90.241 Radio call box operations.
90.243 Mobile relay stations.
90.245 Fixed relay sations.
90.247 Vehicular repeater stations.
90.249 Control stations.

Subpart K—Standards for Special Frequencies or Frequency Bands

90.251 Scope.
90.253 Use of frequency 4383.8 kHz.
90.255 Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz.
90.257 Assignment and use of frequencies in the band 72-76 MHz.
90.259 Assignment and use of frequencies in the 216-220 MHz and 1427-1435 MHz.
90.261 Assignment and use of frequencies in the band 450-470 MHz for fixed operations.
90.263 Substitution of frequencies below 25 MHz.

Subpart L—Authorization in the Band 470-512 MHz (UHF-TV Sharing)

90.301 Scope.
90.303 Availability of frequencies.
90.305 Location of stations.
90.307 Protection criteria.
90.309 Tables and figures.
90.311 Frequencies.
90.313 Frequency loading criteria.
90.315 Special provisions governing use of frequencies in the 488-494 MHz band (TV Channel 17) in the southern Louisiana Offshore zone.

Subpart M—Special Regulations Governing Licensing and Use of Frequencies in the 806-821 MHz and 851-866 MHz Bands

90.351 Scope.
90.353 Definitions.

APPLICATIONS FOR AUTHORIZATIONS IN THE 806-821 MHz AND 851-866 MHz BANDS

90.355 Eligibility.
90.357 Forms to be used.
90.359 Supplemental information to be furnished by applicants for facilities under this subpart.
90.361 Special limitations on amendment of applications for assignment or transfer of authorizations for radio systems used to provide service to persons other than the licensee.

POLICIES GOVERNING THE PROCESSING OF APPLICATIONS AND THE SELECTION AND ASSIGNMENT OF FREQUENCIES FOR USE IN THE 806-821 MHz AND 851-866 MHz BANDS

90.363 Processing of applications.
90.365 Selection and assignment of frequencies.
90.367 Limitation on the number of frequencies assignable for conventional systems.
90.369 Other criteria to be applied in assigning channels for use in conventional systems of communication
90.371 Limitation on the number of frequency pairs assignable for trunked systems and on the number of trunked systems.
90.373 Restriction on licensing manufacturers in the 806-821 MHz and 851-866 MHz bands.

CHANNEL LOADING REQUIREMENTS FOR TRUNKED AND CONVENTIONAL SYSTEMS OPERATING IN THE 806-821 AND 851-866 MHz BANDS

90.375 Trunked systems loading requirements.
90.377 Conventional systems loading requirements.

TECHNICAL REGULATIONS REGARDING THE USE OF FREQUENCIES IN THE 806-821 MHz AND 851-866 MHz BANDS

90.379 Limitations on power and antenna height.
90.381 Restrictions on operational fixed stations.
90.383 Acceptability of transmitters for licensing in the 806-821 and 851-866 MHz bands.

OPERATING REQUIREMENTS IN THE 806-821 MHz AND 851-866 MHz BANDS

90.385 Restrictions and limitations on permissible communications, on use, and on mode of operation.
90.387 Station identification.
90.389 Restriction on interconnection.
90.391 Supplemental reports required of licensees authorized under this subpart.

OTHER PROVISIONS GOVERNING THE USE OF THE 806-821 MHz AND 851-866 MHz BANDS

90.393 Special conditions governing the furnishing of radio equipment by licensees.
90.395 Number of systems authorized in a geographical area.
90.397 Special licensing requirements for radio systems used to provide service to persons other than the licensee.

Subpart N—Operating Requirements

90.401 Scope.
90.403 General operating requirements
90.405 Permissible communications.
90.407 Communications permitted during emergency situations.
90.409 Emergency operation of public safety and special emergency mobile stations at fixed locations.
90.411 Civil defense communications in the public safety and special emergency radio services.
90.413 Civil defense communications in the taxicab radio service.
90.415 Prohibited Uses.
90.417 Interstation communication.
90.419 Points of communication.
90.421 Operation of mobile units in vehicles not under the control of the licensee.
90.423 Operation on board aircraft.
90.425 Station identification.
90.427 Precautions against unauthorized operation.
90.429 Control point and dispatch point requirements.
90.431 Unattended operation.
90.433 Operator license requirements.
90.435 Posting of operator license.
90.437 Posting station licenses and transmitter identification cards or plates.
90.439 Inspection of stations.
90.441 Inspection and maintenance of tower marking and associated control equipment.
90.443 Content of station records.
90.445 Form of station records.
90.447 Retention of station records.
90.449 Answers to a notice of violation.

Subpart O—Chicago Land Mobile Spectrum Management

90.481 Scope.
90.483 Chicago region
90.485 Applications.
90.487 Special provisions relating to frequency assignments in the Chicago region.

Subpart P—Developmental Operation

Sec.
90.501 Scope.
90.503 Eligibility.
90.505 Showing required.
90.507 Limitations on use.
90.509 Frequencies available for assignment.
90.511 Interference.
90.513 Special provisions.
90.515 Change or cancellation of authorization without hearing
90.517 Report of operation.

Subpart Q—Emergency Communications Pursuant to the Industrial Communications Emergency Plan (ICEP) and the Land Transportation Industries Communications Emergency Plan (LATICEP)

90.525 Industrial Communications Emergency Plan (ICEP).
90.527 Land Transportation Industries Communications Emergency Plan (LATICEP).

Supplement "A"—Alphabetical index
Supplement "B"—Combined frequency list.

Subpart A—General Information

§ 90.1 Basis and purpose.

(a) *Basis.* The rules in this part are promulgated under Title II of the Communications Act of 1934, as amended which vests authority in the Federal Communications Commission to regulate radio transmission and to issue licenses for radio stations. All rules in this part are in accordance with applicable treaties and agreements to which the United States is a party.

(b) *Purpose.* This part states the conditions under which radio communications systems may be licensed and used in the Public Safety, Special Emergency, Industrial, Land Transportation, and Radiolocation Radio Services. These rules do not govern radio systems employed by agencies of the Federal government.

§ 90.3 Organization and applicability of the rules.

The Rules in this part are divided in seventeen subparts as follows:

(a) Subpart A contains general information and definitions for use in this part.

(b) Subparts B, C, D, E, and F set forth the radio services governed under this part and include eligibility provisions, listing of frequencies available for each radio service, and special requirements and limitations applicable to a particular radio service.

(c) Subpart G describes the procedures and requirements for filing applications and licensing radio stations under this part.

(d) Subpart H provides requirements for selection of frequencies.

(e) Subpart I contains general technical standards for use of equipment under this part.

(f) Subpart J contains standards for certain specialized uses.

(g) Subpart K contains standards for the use of certain frequencies or frequency bands.

(h) Subpart L contains special regulations for operation in the 470-512 MHz band.

(i) Subpart M contains special regulations for operation in the 806–821 and 851–866 MHz bands.

(j) Subpart N sets forth system operating requirements.

(k) Subpart O contains special regulations for operation in the Chicago Land Mobile Spectrum Management District.

(l) Subpart P provides regulations for the authorization of developmental operations.

(m) Subpart Q contains regulations for emergency operations in the Industrial Radio Services (ICEP), and in the Land Transportation Radio Services (LATICEP).

§ 90.5 Other applicable rule parts.

Other Commission rule parts of importance that may be referred to with respect to licensing and operations in radio services governed under this part include the following:

(a) Part 0 of the Commission's Rules describes the Commission's organization and delegations of authority. This part also lists available Commission publications, and standards and procedures for access to Commission records, and location of Commission Field Offices.

(b) Part 1 includes rules of practice and procedure for adjudicatory proceedings including hearing proceedings, rule making proceedings; procedures for reconsideration and review of the Commission's actions; provisions concerning violation notices and for forfeiture proceedings; and the requirements for environmental impact statements.

(c) Part 2 contains the table of frequency allocations and special requirements in International regulations, agreements, and treaties. This part also contains standards and procedures concerning marketing of radio frequency devices, and for obtaining equipment type acceptance and type approval.

(d) Part 5 contains standards and procedures for obtaining experimental authorizations.

(e) Conditions under which the operations of incidental and restricted radio devices are permitted are in Part 15.

(f) Part 17 contains detailed requirements for construction, marking, and lighting of antenna towers.

(g) Part 18 deals with the operation of industrial, scientific, and medical (ISM) devices that are not intended for radio communication.

(h) Part 94 governs licensing and operation of private operational-fixed radio stations on frequencies above 952 MHz (Microwave).

§ 90.7 Definitions.

Antenna height above average terrain (AAT). Height of the center of the radiating element of the antenna above the average terrain.

Antenna height above sea level. The height of the topmost point of the antenna above mean sea level.

Antenna structure. Structure on which an antenna is mounted.

Assigned frequency. Center of a frequency band assigned to a station.

Assigned frequency band. The frequency band the center of which coincides with the frequency assigned to the station and the width of which equals the necessary bandwidth plus twice the absolute value of the frequency tolerance.

Authorized bandwidth. The frequency band, specified in kilohertz and centered on the carrier frequency containing those frequencies upon which a total of 99 percent of the radiated power appears, extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power.

Automatic Vehicle Monitoring (AVM). The use of non-voice signalling methods from and to vehicles to make known at fixed points the location of the vehicles. AVM systems may also transmit status and instructional messages related to the vehicles involved.

Average terrain. The average elevation of terrain between 2 and 10 miles from the antenna site.

Base station. A station at a specified site authorized to communicate with mobile stations.

Carrier frequency. The frequency of an unmodulated electromegnetic wave.

Channel loading. The number of mobile transmitters authorized to operate on a particular channel within the same service area.

Control point. Any place from which a transmitter's functions may be controlled.

Control station. An Operational Fixed Station, the transmissions of which are used to control automatically the emissions or operation of another radio station at a specified location.

Developmental operation. A specially licensed operation for the purpose of testing concepts in the use of radio appropriate to the radio services governed by this part.

Dispatch point. Any place from which radio messages can be originated under the supervision of a control point.

Effective radiated power (ERP). The power supplied to an antenna multiplied by the relative gain of the antenna in a given direction.

Fixed relay station. A station at a specified site used to communicate with another station at another specified site.

Frequency advisor. An individual or entity that has been recognized by the Commission for the purpose of coordinating the assignment of frequencies, by recommending, to applicants, upon request, appropriate frequencies for which to apply.

Harmful interference. For the purposes of resolving conflicts between stations operating under this part, any emission, radiation, or induction which specifically degrades, obstructs, or interrupts the service provided by such stations.

Interzone station. A fixed station in the Police Radio Service using radio telegraphy (A1 emission) for communications with interzone stations in other zones and with zone stations within the same zone.

Land mobile radio service. A mobile service between base stations and land mobile stations, or between land mobile stations.

Line A. An imaginary line within the U.S., approximately paralleling the U.S.-Canadian border, north of which Commission coordination with Canadian authorities in the assignment of frequencies is generally required. It begins at Aberdeen, Washington, running by great circle arc to the intersection of 48° N., 120° W., then along parallel 48° N., to the intersection of 95° W., thence by great circle arc through the southernmost point of Duluth, Minn., thence by great circle arc to 45° N., to 85° W., thence southward along meridian 85° W., to its intersection with parallel 41° N., 82° W., thence by great circle arc through the southernmost point of Bangor, Maine, thence by great circle arc through the southernmost point of Searsport, Maine, at which point it terminates.

Line C. An imaginary line is Alaska approximately paralleling the border with Canada, East of which Commission coordination with Canadian authorities in the assignment of frequencies is generally required. It begins at the intersection of 70° N., 144° W., thence by great circle arc to the intersection of 60° N., 143° W., thence by great circle arc so as to include all the Alaskan Panhandle.

Mobile relay station. A base station in the mobile service authorized to retransmit automatically on a mobile service frequency communications which originate on the transmitting frequency of the mobile station.

Mobile service. A service of radiocommunication between mobile and base stations, or between mobile stations.

Mobile station. A station in the mobile service intended to be used while in motion or during halts at unspecified points. This includes hand carried transmitters.

Person. An individual, partnership, association, joint stock company, joint venture, trust, corporation, or local government entity.

Radio call box. A transmitter used by the public to request fire, police, medical, road service, or other emergency assistance.

Radiodetermination. The determination of position, or the obtaining of information relating to position, by means of the propagation of radio waves.

Radiofacsimile. A system of radiocommunication for the transmission of fixed images, with or without half-tones, with a view to their reproduction in a permanent form.

Radiolocation. Radiodetermination used for purposes other than those of radionavigation.

Radionavigation. Radiodetermination used for the purposes of naviation, including obstruction warning.

Radio teleprinting. Radio transmissions to a printing telegraphic instrument having a signal-actuated mechanism for automatically printing received messages.

Secondary operation. Radio communications which may not cause interference to operations authorized on a primary basis and which are not protected from interference from those primary operations.

Signal booster. A device which automatically amplifies and transmits received base station transmissions with no change in frequency or authorized bandwidth.

Station authorization. A license issued by the Commission for the operation of a radio station.

Telecommand. The transmission of non-voice signals for the purpose of remotely controlling a device.

Telemetering (also telemetry). The transmission of non-voice signals for the purpose of automatically indicating or recording measurements at a distance from the measuring instrument.

Vehicular repeater station. A mobile station authorized to retransmit automatically on a mobile service frequency, communications to or from hand-carried mobile units.

Zone station. A fixed station in the Police Radio Service using radio-telegraphy (A–1 emission) for communications with other similar stations in the same zone and with an interzone station in the same zone.

Subpart B—Public Safety Radio Services

§ 90.15 Scope.

The Public Safety Radio Services include the Local Government, Police, Fire, Highway Maintenance and Forestry-Conservation Radio Services. Rules as to eligibility for licensing, frequencies available, and any special requirements as to each of these radio services are set forth in the following sections.

§ 90.17 Local Government Radio Service.

(a) *Eligibility.* Any territory, possession, state, county, city, town, and similar governmental entity, including a district and an authority, but not including a school or park district or authority is eligible to hold authorizations in the Local Government Radio Service to operate radio stations for transmission of communications essential to official activities of the licensee.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Local Government Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section.

Local government radio service frequency table

Frequency or band	Class of station(s)	Limitations
Kilohertz: 1730.	Base or mobile	1
Megahertz:		
37.10	do	2
37.18	do	2
37.30	do	2
39.06	Mobile	2, 3
39.10	Base or mobile	2
39.18	do	2
39.86	do	2
39.90	do	2
39.98	do	2
45.08	do	
45.12	do	
45.16	do	
45.20	do	
45.24	do	
45.28	do	
45.32	do	
45.36	do	
45.40	do	
45.44	do	
45.48	do	
45.52	do	
45.56	do	
45.60	do	
45.64	do	
46.52	do	
46.54	do	
46.56	do	
46.58	do	
72.00 to 76.00	Operational fixed	4
153.740	Mobile	
153.755	do	
153.785	do	
153.800	do	
153.815	do	
153.845	do	
153.860	do	
153.875	do	
153.905	do	
153.920	do	
153.935	do	
153.965	do	
153.980	do	
153.995	do	
154.025	Base or mobile	
154.040	do	5
154.055	do	5
154.085	do	5
154.100	do	5
154.115	do	5
154.4525 to 154.460	Fixed	6
154.965	Base or mobile	
154.980	do	
154.995	do	
155.025	do	
155.040	do	
155.055	do	
155.085	do	
155.100	do

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) This frequency is shared with the Special Emergency Radio Services and is available for assignment to the official state guard or comparable organization of a state, territory, possession, or the District of Columbia which is shown to be duly created by law and subject to the control of the highest official of the governmental entity involved, and may be used for emergency communications and for essential communications related to training and maintenance of an efficient organization. In addition to base and mobile stations, this frequency may be assigned to fixed stations on a secondary basis to base or mobile stations. Upon a showing of need, the use of a second frequency in the band 2505–3500 kHz may be made available to these organizations through appropriate arrangements with Government agencies for restricted area use on a shared basis with maxi-

mum power input, emission, and hours of operation determined on the basis of the technical conditions involved in using the selected frequency in the particular area.

(2) This frequency is shared with the Police Radio Service.

(3) The maximum output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts. Applicants for this frequency need not demonstrate compliance with the frequency coordination provisions of § 90.175.

(4) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(5) This frequency is not available for assignment in this service in Puerto Rico or the Virgin Islands.

(6) This frequency is assignable for fixed stations to provide emergency call box service in accordance with § 90.241(a).

(7) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2 kHz. The carrier frequency must be maintained within 0.0005 percent, and the authorized bandwidth may not exceed 6 kHz.

(8) This frequency is available on a shared basis with several Industrial Radio Services. On this frequency the maximum power output of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, F1, or F2 emission may be authorized, and moble stations used to control remote objects and devices may be operated in the continuous transmit mode. Operational fixed stations communicating with two receiving locations or with three or more receiving locations all of which are located within an angle of azimuth of 160° must employ directional antennas having a front-to-back ratio of at least 20dB. Ominidirectional antennas having unity gain may be employed at other stations.

(9) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.2 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 3 kHz.

(10) The frequencies available for fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land Transportation Radio Services where they are assigned for land mobile operations.

(11) Available for radio call box communications related to safety on highways in accordance with the provisions of § 90.241(c).

(12) This frequency is available in this service on a shared basis with all other Public-Safety Radio Services.

(13) Available for medical services mobile operations in the Special Emergency Radio Service in accordance with § 90.53(b)(13).

(14) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(15) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(16) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(17) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(18) Available only on a shared basis with stations in other services, and subject to no protection from interference from industrial, scientific or medical (ISM) devices.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253.)

(1) Substitution of frequencies available below 25 MHz may be made in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.263.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 MHz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 39.99 to 40.00 MHz and 42.00 to 42.01 MHz, are available for assignment for developmental operation subject to the provisions of Subpart P.

(e) *Limitation on number of frequencies assignable.* Normally only two frequencies or pairs of frequencies in the varied frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with the operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) The frequency 39.06 MHz may be assigned notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.19 Police Radio Service.

(a) *Eligibility.* Any territory, possession, state, county, city, town, and similar governmental entity including a governmental institution authorized by law to provide its own police protection, is eligible to hold authorizations in the Police Radio Service to operate radio stations for transmission of communications essential to official police activities of the licensee.

(b) *Police zone and interzone stations.* (1) Fixed zone and interzone stations may be authorized in the Police Radio Service. An unlimited number of zone stations may be authorized in a single zone, but only one interzone station will be authorized in any zone. (A zone is normally considered to be a single state.) Request to rezone a state to provide more than one interzone station must be supported by an adequate showing of need based upon the volume of traffic or the necessity for more expeditious handling of traffic. In addition, the request shall include a showing that all licensees of all affected zone stations have been notified and afforded an opportunity to comment on the request.

(2) In addition to the points of communication permitted by § 90.419, zone and interzone stations are authorized to intercommunicate in accordance with the operating procedure prescribed by the Commission. Copies of such procedure are available from the Secretary, Federal Communications Commission, Washington, D.C. 20554.

(c) *International police radiocommunication.* Police radio licensees which are located in close proximity to the borders of the United States may be authorized to communicate internationally. Request for such authority shall be written and signed and submitted in duplicate. The request shall include information as to the station with which communication will be conducted, and the frequency, power, emission, etc., that will be used. If authorized, such international communication must be conducted in accordance with Article 5 of the Inter-American Radio Agreement, Washington, D.C., 1949 which reads as follows:

Article 5. *Police radio stations.* When the American countries authorize their police radio stations to exchange emergency information by radio with similar stations of another country, the following rules shall be applied:

(a) Only police radio stations located close to the boundaries of contiguous countries shall be allowed to exchange this information.

(b) In general, only important police messages shall be handled, such as those which would lose their value because of slowness and time limitations if sent on other communcation systems.

(c) Frequencies used for radiotelephone communications with mobile police units shall not be used for radiotelegraph communications.

(d) Radiotelephone communications shall be conducted only on frequencies assigned for radiotelephony.

(e) Radiotelegraph communications shall be conducted on the following frequencies: 2804 kHz calling, 2808 kHz working, 2812 kHz working, 5195 kHz day calling, 5135 kHz day working, 5140 kHz day working.

(f) The characteristics of police radio stations authorized to exchange information shall be notified to the International Telecommunication Union, Geneva, Switzerland.

(g) The abbreviations contained in Appendix 9 of the Atlantic City Radio Regulations shall be used to the greatest possible extent. Service indications are as follows: "P", priority, for messages that are to be sent immediately, regardless of the number of other messages, are to be transmitted in the order of receipt.

(h) The message shall contain the preamble, address, text, and signature, as follows:

Preamble. The preamble of the message shall consist of the following: the serial number preceded by the letters "NR", service indications, as appropriate; the group count according to standard cable count system; the letters "CK", followed by numerals indicating the number of words contained in the text of the message; office and country of origin (not abbreviations); day, month, and hour of filing;

Address. The address must be as complete as possible and shall include the name of the addressee with any supplementary particulars necessary for immediate delivery of the message;

Text. The text may be either in plain language or code;

Signature. The signature shall include the name and title of the person originating the message.

(d) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Police Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (e) of this section:

Police radio service frequency table

(e) Explanation of assignment limitations appearing in the frequency table of paragraph (d) of this section:

(1) The use of this frequency is on a secondary basis to any Canadian station.

(2) The frequency is available for assignment only in accordance with a geographical assignment plan.

(3) Base stations operating on this frequency and rendering service to state police mobile units may be authorized to use a maximum plate input power to the final radio frequency stage in excess of the maximum indicated in § 90.205 but not in excess of 10,000 watts: *Provided*, That such operation is secondary to other stations.

(4) This frequency is available for assignment to zone and interzone stations for use with type A1 emission only and a maximum plate input power of 1000 watts to the final radio frequency stage of the transmitter.

(5) This frequency may be assigned to fixed, stations in Alaska for point-to-point radiotelephone communications, using type A3 emission with a maximum plate input power of 1000 watts to the final radio frequency stage of the transmitter, on a secondary basis to zone and interzone stations and further subject to the condition that no harmful interference is caused to the service of any station, which in the discretion of the Commission may have priority on the frequency with which interference results.

(6) This frequency is authorized for use as a calling frequency; however, the transmission of operating signals or a single short radio telegram is permissible on a secondary basis to any calling signals.

(7) This frequency may be used only during that period of time between 2 hours after local sunrise and 2 hours before local sunset.

(8) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communication, using type A3 emission and a maximum output power of 750 watts.

(9) This frequency is shared with the Local Government Radio Service.

(10) The maximum output power of any transmitter authorized to operate on this frequency, after June 1, 1956, shall not exceed two watts. Licensees holding a valid authorization as of June 1, 1956, for base or mobile station operation on this frequency, with a power in excess of two watts, may continue to be authorized for such operation without regard to this power limitation.

(11) This frequency is reserved for assignment to stations for intersystem operations only: *Provided, however*, That licensees holding a valid authorization to use this frequency for local base or mobile operations as of June 1, 1956, may continue to be authorized for such use.

(12) This frequency is reserved primarily for assignment to state police licensees. Assignment to other police licensees will be made only where the frequency is required for coordinated operation with the state police system to which the frequency is assigned. Any request for such assignment must be supported by a statement from the state police system concerned indicating that the assignment is necessary for coordination of police activities.

(13) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(14) This frequency is available nationwide for use in police emergency communications networks operated under statewide law enforcement emergency communications plans. Operations authorized on this frequency which are not in accordance with this limitation may continue until January 1, 1985.

(15) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land Transportation Radio Services where they are assigned for land mobile operations.

(16) This frequency is available in this service on a shared basis with all other Public-Safety Radio Services.

(17) This frequency is available for assignment, without regard to the coordination requirement of § 90.175 for the development and operation of non-voice systems. F2, F4, or F9 emission will be authorized for use of this frequency, except that telemetry, telecommand, or automatic vehicle location systems may not be operated. F3 emission may also be authorized when required to supplement non-voice operation. Transmitters type-accepted under this part for use of F3 emission may also be used for non-voice operation on this frequency, provided that the audio keying signal is passed through the low pass audio frequency filter required in the transmitter for F3 emission, and provided further that the transmitter is so adjusted and operated that the instantaneous frequency deviation does not exceed the maximum value allowed for F3 emission. Operation on this frequency is exempted from the station identification requirements of § 90.425.

(18) This frequency is shared until March 1, 1986, with Fire Radio Service Licensees authorized for its use prior to July 16, 1974, and operations in the Police Radio Service are on a secondary basis to such Fire Radio Service use.

(19) This frequency is available in this service only for systems licensed in this service prior to April 16, 1976, until March 1, 1986. Use of this frequency is shared with, and is on a primary basis to, operations by licensees in the Special Emergency Radio Service.

(20) Until March 1, 1986, use of this frequency is on a secondary basis to Special Emergency licensees authorized prior to April 16, 1976.

(21) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(22) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(23) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(24) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(25) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(f) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253.)

(1) Substitution of frequencies available below 25 MHz may be made in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 MHz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 33.99 to 40.00 MHz and 42.00 to 42.01 MHz are available for assignment for developmental operation subject to the provisions of Subpart P.

(g) *Limitation on number of frequencies assignable.* Normally only one base and one mobile station frequency, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) The frequency 39.06 MHz may be assigned notwithstanding this limitation.

(3) A licensee may use, without specific authorization from the Commission any mobile service frequency between 40 MHz and 952 MHz listed in paragraph (d) of this section for communications in connection with physical surveillance, stakeouts, raids, and other such activities. Such use shall be on a secondary basis to operations of licensees regularly authorized on the assigned frequencies. The maximum power that may be used for such communications is 2 watts into the antenna. Other provisions of this part, including the requirements for station identification, shall apply.

(4) In addition to the frequencies assigned for mobile service operation, one base station frequency above 152 MHz may be assigned as a common frequency to all licensees in a particular area to permit intersystem communication between base stations or mobile stations or both. This frequency use will not be authorized in any area where all available frequencies are required for independent systems.

(5) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.21 Fire Radio Service.

(a) *Eligibility.* Any territory, possession, state, county, city, town, or similar governmental entity, and persons or organizations charged with specific fire protection activities are eligible to hold authorizations in the Fire Radio Service to operate radio stations for transmission of communications essential to official fire activities of the licensee. Applications from persons or organizations other than governmental entities must be accompanied by a statement from the governmental entity having legal jurisdiction over the area to be served, supporting the request.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Fire Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

Frequency or band	Class of station(s)	Limitations
[illegible]	Base or mobile	
[illegible]	Mobile or fixed	1
[illegible]	Base or mobile	
[illegible]	Mobile	
[illegible]	Base or mobile	
[illegible]	Mobile	
[illegible]	Base or mobile	
[illegible]	do	
[illegible]	do	
[illegible]	do

services and are available only in accordance with the provisions of § 90.257.

(4) This frequency is not available for assignment to stations in this service in Puerto Rico or the Virgin Islands.

(5) This frequency may be assigned to stations in the Fire Radio Service, only at points within 240 km. (150 mi.) of New York, N.Y.

(6) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land Transportation Radio Services where they are assigned for land mobile operations.

(7) This frequency is available in this service on a shared basis with all other Public-Safety Radio Services.

(8) This frequency is available to Fire Radio Service licensees authorized prior to July 16, 1974, until March 1, 1986, on a shared basis with, and primary to operations in the Police Radio Service.

(9) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(10) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(11) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(12) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(13) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) Substitution of frequencies available below 25 MHz may be made in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 Mhz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 39.99 to 40.00 MHz and 42.00 to 42.01 MHz are available for assignment for developmental operation subject to the provisions of Subpart P.

(e) *Limitation on number of frequencies assignable.* Normally only two frequencies or pairs of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with the operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) The assignment of an additional frequency or frequencies may be authorized notwithstanding this limitation for common, intra-county, intra-fire-district, or intrastate fire coordination operations. The frequency or frequencies requested must be in accordance with a frequency utilization plan, for the area involved, on file with the Commission.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.23 Highway Maintenance Radio Service.

(a) *Eligibility.* Any territory, possession, state, county, city, town, and similar governmental entity is eligible to hold authorizations in the Highway Maintenance Radio Service to operate stations for transmission of communications essential to official highway activities of the licensee.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Highway Maintenance Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) This frequency is shared with the Special Emergency Radio Service.

(2) This frequency will be assigned only in accordance with a geographical assignment plan and is reserved primarily for assignment to Highway Maintenance systems operated by states. The use of this frequency by other Highway Maintenance licensees will be authorized only where such use is necessary to coordinate activities with the particular state to which the frequency is assigned. Any request for such use must be supported by a statement from the state concerned.

(3) The frequencies available for use at operational fixed stations in the band

72–76 MHz are listed in § 90.257(a)(1). These frequencies, are shared with other services and are available only in accordance with the provisions of § 90.257.

(4) This frequency is not available for assignment to stations in the Highway Maintenance Radio Service located in Puerto Rico and the Virgin Islands.

(5) This frequency is reserved for assignment for use in highway maintenance systems operated by licensees other than states.

(6) This frequency is only assigned to Highway Maintenance stations licensed for its use prior to April 28, 1952. Such use may continue on a secondary basis to any government or non-government radio operation.

(7) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land Transportation Radio Services where they are assigned for land mobile operations.

(8) This frequency is available in this service on a shared basis with all other Public-Safety Radio Services.

(9) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(10) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(11) Assignment of frequencies for operational-fixed stations in the bands 952 and above is governed by Part 94 of this Chapter.

(12) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(13) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 MHz, 33.00 to 33.01 MHz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 39.99 to 40.00 MHz and 42.00 to 42.01 MHz are available for assignment for developmental operation subject to the provisions of Subpart P.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(e) *Limitation on number of frequencies assignable.* Normally only two frequencies or pairs of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with the operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.25 Forestry-Conservation Radio Service.

(a) *Eligibility.* Any territory, possession, state, county, city, town, and similar governmental entity, or persons or organizations charged with specific forestry-conservation activities are eligible to hold authorizations in the Forestry-Conservation Radio Service to operate radio stations for transmission of communications essential to official forestry-conservation activities of the licensee. Application from persons or organizations other than governmental entities must be accompanied by a statement from the governmental entity having legal jurisdiction over the area to be served, supporting the request.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Forestry-Conservation Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) The use of this frequency is on a secondary basis to any Canadian station.

(2) This frequency is shared with the Motor Carrier Radio Service.

(3) This frequency is available for assignment only in accordance with a geographical assignment plan. This frequency may be used for conservation activities on a secondary basis to any station using the frequency for forest fire prevention, detection and suppression.

(4) This frequency is reserved primarily for assignment to state licensees. Assignments to other licensees will be made only where the frequency is required for coordinated operation with the state system to which the frequency is assigned. Any request for such assignment must be supported by a statement from the state system concerned, indicating that the assignment is necessary for coordination of activities.

(5) The frequencies available for use as operational-fixed stations in the band 72–76 MHz are listed in § 90.257(a) (1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(6) This frequency is not available for assignment to stations in this service located in Puerto Rico or the Virgin Islands.

(7) This frequency is shared with stations in the Special Industrial Radio Service and evidence of interservice coordination is required.

(8) This frequency is shared with the Special Industrial Radio Service in Puerto Rico and the Virgin Islands. All applications for the assignment of a new frequency or to change existing facilities in such a manner as to require frequency coordination as specified in § 90.175 for stations in Puerto Rico or the Virgin Islands, shall be accompanied by evidence of interservice frequency coordination.

(9) This frequency will be assigned only to licensees directly responsible for the prevention, detection, and suppression of forest fires, on a secondary basis to any U.S. Government station.

(10) This frequency will be assigned for use only in areas west of the Mississippi River.

(11) This frequency will be assigned for use only in areas east of the Mississippi.

(12) In addition to agencies responsible for forest fire prevention, detection and suppression, this frequency may be assigned to conservation agencies which do not have forest fire responsibilities on a secondary basis to any U.S. Government stations. *Provided*, That such assignment is necessary to permit mobile relay operation by such agencies.

(13) The frequencies available for use as fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land Transportation Radio Services where they are assigned for land mobile operations.

(14) This frequency is available in this service on a shared basis with all other Public Safety Services.

(15) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(16) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(17) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(18) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(19) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) Substitution of frequencies available below 25 MHz may be made in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27–265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 MHz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 39.99 to 40.00 MHz and 42.00 to 42.01 MHz are available for assignment for developmental operation subject to the provisions of Subpart P.

(e) *Limitation on number of frequencies assignable.* Normally only two frequencies or pairs of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 35 MHz may be assigned in connection with the operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

Subpart C—Special Emergency Radio Service

§ 90.31 Scope.

The Special Emergency Radio Service covers the licensing of the radio communications of the following categories of activities: Medical services, rescue organizations, veterinarians, disaster relief organizations, school buses, beach patrols, establishments in isolated areas, communications standby facilities, and emergency repair of public communications facilities. Rules as to eligibility for licensing, permissible communication, classes and number of stations, and any special requirements as to each of these categories are set forth in the following sections. Frequencies available for these categories of services are shown in a separate frequency table.

§ 90.35 Medical services.

(a) *Eligiblity.* The following persons are eligible to hold authorization to operate radio stations for the delivery or rendition of medical services to the public and on a secondary basis, for transmission of messages related to the efficient administration of organizations and facilities engaged in medical services operations.

(1) Hospital establishments that offer services, facilities and beds for use beyond 24 hours in rendering medical treatment.

(2) Institutions and organizations regularly engaged in providing medical services through clinics, public health facilities, and similar establishments.

(3) Ambulance companies regularly engaged in providing medical ambulance services.

(4) Rescue organizations for the limited purpose of participation in providing medical services.

(5) Associations comprised of two or more of the organizations eligible under paragraph (a) (1), (2), (3), and (4) of this section, for the purpose of active participation in and direct operational control of the medical services communication activities of such organizations.

(6) Physicians, schools of medicine, and oral surgeons, which may include an association of physicians or oral surgeons in a locality (such as a county, city, or metropolitan area), which is chartered by a national or state association of physicians or oral surgeons, provided that such association shall be subject fully to the provisions of § 90.179 governing the cooperative use of radio stations and provided further, that stations authorized to such associations may be used only for messages related to the medical activities of its members. This does not include associations whose primary purpose is to provide a communications service.

(7) Governmental entities and governmental agencies for their own medical activities.

(8) Governmental entities and governmental agencies for providing medical services communications to other eligible persons through direct participation in and direct operational control of the system, such as through central dispatch service.

(b) *Communications plans.* In the event that the applicant is participating in an area-wide medical communications plan, the plan may be filed with the application. A listing of current plans will be made available upon request to applicants and other interested parties in connection with the development of radio communications systems. In addition, copies of plans will be maintained for public inspection in the license records

of the Commission's Washington, D.C. offices.

(c) *Class and number of stations available.* (1) The number and classes of stations which may be authorized will depend upon the frequencies selected and the demonstrated system requirements.

(2) Subject to the provisions of § 90.421, communication units of a mobile station authorized under this section may be installed in a vehicle or be hand-carried for use by any person with whom cooperation or coordination is required for medical services activities.

§ 90.37 Rescue organizations.

(a) *Eligibility.* Persons or organizations operating a rescue squad are eligible to hold authorizations to operate radio stations for transmission of messages pertaining to the safety of life or property and urgent messages necessary for the rendition of an efficient emergency rescue service.

(b) *Class and number of stations available.* Each rescue squad will be authorized to operate one base station, and a number of mobile units (excluding hand carried mobile units) not exceeding the number of vehicles actually used in emergency rescue operations. In addition, each rescue squad will be authorized to operate a number of hand carried mobile units not exceeding two such units for each radio equipped vehicle actually used in emergency rescue operations.

§ 90.39 Veterinarians.

(a) *Eligibility.* A veterinarian, veterinary clinic, or a school of veterinary medicine is eligible to hold authorizations to operate radio stations for the transmission of messages pertaining to the care and treatment of animals.

(b) *Class and number of stations available.* Each licensee may be authorized to operate one base station and two mobile units. Additional base stations or mobile units will be authorized only on a showing of need.

§ 90.41 Disaster relief organizations.

(a) *Eligibility.* Organizations estatblished for disaster relief purposes having an emergency radio communications plan are eligible to hold authorizations to operate radio stations for the transmission of communications relating to the safety of life or property, the establishment and maintenance of temporary relief facilities, and the alleviation of the emergency situation during periods of actual or impending emergency, or disaster, and until substantially normal conditions are restored.

(b) *Special eligibility showing.* The initial application from a disaster relief organization shall be accompanied by a copy of the charter or other authority under which the organization was established and a copy of its communications plan. The plan shall fully describe the operation of the radio facilities and describe the method of integration into other communications facilities which normally would be available to assist in the alleviation of the emergency condition.

(c) *Class and number of stations available.* Disaster relief organizations may be authorized to operate the number of base, mobile, and fixed stations required.

§ 90.43 School buses.

(a) *Eligibility.* Persons or organizations operating school buses on a regular basis over regular routes are eligible to hold authorizations ot operate radio stations for the transmission of messages pertaining to either the efficient operation of the school bus service or the safety or general welfare of the students they are engaged in transporting.

(b) *Class and number of stations available.* Each school bus operator may be authorized to operate one base station and a number of mobile units not in excess of the total of the number of buses and maintenance vehicles regularly engaged in the school bus operation. Additional base stations or mobile units will be authorized only in exceptional circumstances when the applicant can show a specific need.

§ 90.45 Beach patrols.

(a) *Eligibility.* Persons or organizations operating beach patrols having responsibility for life-saving activities are eligible to hold authorizations to operate radio stations for the transmission of messages required for the safety of life or property.

(b) *Class and number of stations available.* Eligibles in this category will be authorized to operate base, mobile, and fixed stations in the stated area served by the beach patrol. The number of such stations requested shall be justified.

§ 90.47 Establishment in isolated areas.

(a) *Eligibility.* Persons or organizations maintaining establishment in isolated areas where public communications facilities are not available and where the use of radio is the only feasible means of establishing communication with a center of population, or other point from which emergency assistance might be obtained if needed, are eligible to hold authorizations to operate radio stations for the transmission of messages only during an actual or impending emergency endangering life, health or property for the transmission of essential communications arising from the emergency. The transmission of routine or non-emergency communications is strictly prohibited.

(b) *Special eligibility showing.* The initial application requesting a station authorization for an establishment in an isolated area shall be accompanied by a statement describing the status of public communication facilities in the area of the applicant's establishment; the results of any attempts the applicant may have made to obtain public communication service, and; in the event radio communications service is to be furnished under subparagraph (d) (2) of this section, a copy of the agreement involved must be submitted.

(c) *Class and number of stations available.* Persons or organizations in this category may be authorized to operate not more than one fixed station at any isolated establishment and not more than one fixed station in a center of population.

(d) *Communication service rendered and received.* (1) The licensee of a station at any establishment in an isolated area shall make the communication facilities of such station available at no charge to any person desiring the transmission of any communication permitted by paragraph (a) of this section.

(2) For the purpose of providing the communications link desired the licensee of a station at an establishment in an isolated area either may be the licensee of a similar station at another location or may obtain communication service under a mutual agreement from the licensee of any station in the Public Safety or Special Emergency Radio Services or any other station which is authorized to communicate with the special emergency fixed station.

§ 90.49 Communications standby facilities.

(a) *Eligibility.* A communications common carrier operating communications circuits that normally carry essential communication of such a nature that their disruption would endanger life or public property is eligible to hold authorizations for standby radio facilities for the transmission of messages only during periods when the normal circuits are inoperative due to circumstances beyond the control of the user. During such periods the radio facilities may be used to transmit any communication which would be carried by the regular circuits.

(b) *Special eligibility showing.* Initial applications for authorization to operate a standby radio facility must include a statement describing radio communication facilities desired, the proposed method of operation, a description of the messages normally being carried, and an explanation of how their disruption will will endanger life or public property.

(c) *Class and number of stations available.* Eligibles in this category may be authorized to operate the number of fixed stations as standby radio facilities required. Any such fixed station may be licensed for operation either at a specified location or for itinerant operation. In the latter case the area of desired operation must be specified by the applicant.

§ 90.51 Emergency repair of public communications facilities.

(a) *Eligibility.* Communications common carriers are eligible in this service for radio facilities to be used in effecting expeditious repairs to interruption of public communications facilities where such interruptions have resulted in disabling intercity circuits or service to a multiplicity of subscribers in a general area. Stations authorized under this section may be used only when no other means of communication is readily available, for the transmission of messages relating to the safety of life and property and messages which are necessary for the efficient restoration of the public communication facilities which have been disrupted.

(b) *Class and number of stations available.* Eligibles in this category may be authorized to operate the number of base, mobile and fixed stations required.

§ 90.53 Frequencies available.

(a) The following table indicates frequencies available for assignment to stations in the Special Emergency Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (b) of this section. (Frequencies below 450 MHz indicated for base or mobile stations may be authorized to fixed stations on a secondary basis to stations in the mobile service):

Special emergency radio service frequency table

Frequency or band	Class of station(s)	Limitations
Kiloherts:		
2000-3000	Fixed	1
2726	Base or mobile	2
3201	do

806 to 821	do	21

(b) Explanation of assignment limitations appearing in the frequency table of paragraph (a) of this section:

(1) Appropriate frequencies in the band 2000–3000 kHz which are designated in Part 83 of this chapter as available to Public Ship Stations for telephone communications with Public Coast Stations may be assigned on a secondary basis to Special Emergency fixed stations for communication with Public Coast Stations only, provided such stations are located in the United States and the following conditions are met:

(i) That such fixed station is established pursuant to the eligibility provisions of § 90.47 and that the isolated area involved is an island or other location not more than 300 statute miles (480 km) removed from the desired point of communication and isolated from that point by water.

(ii) That evidence is submitted showing that an arrangement has been made with the coast station licensee for the handling of emergency communications permitted by § 81.302(b) and § 90.47(d) of this Chapter.

(iii) That operation of the Special Emergency fixed station shall at no time conflict with any provision of Part 83 of this chapter and further, that such operation in general shall conform to the practices employed by Public Ship Stations for radiotelephone communication with the same Public Coast Station.

(2) This frequency is shared with the Local Government Radio Service where it is available for State Guard operations.

(3) This frequency is shared with the Highway Maintenance Radio Service.

(4) This frequency will be assigned only for one-way paging communications to mobile receivers. Transmissions for the purpose of activating or controlling remote objects on this frequency are not authorized.

(5) This frequency is reserved for assignment only to national organizations eligible for disaster relief operation under § 90.41.

(6) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies, are shared with other services and are available only in accordance with the provisions of § 90.257.

(7) This frequency may be authorized only for voice transmission from a portable (hand-held unit) that is not airborne, to an ambulance or other emergency vehicle for automatic retransmission (vehicular repeater) on a regular mobile frequency to a base station facility. Operation on this frequency is limited to 2.5 watts output power.

(8) Any application for use of this frequency shall be accompanied by a signed statement that all licensees in other radio services who operate on a frequency 15 kHz removed and are located 16 to 56 km. (10–35 mi.) from the proposed base station have been notified of the applicant's intent to file, together with an acceptable engineering report indicating that harmful interference to the operation of existing stations will not be caused. In no instance will an application be granted in this service where the distance between the proposed station and existing base stations is less than 16 km. (10 mi.).

(9) This frequency is assignable only to those hospitals described in § 90.35(a)(1) and to those ambulance companies which need to communicate with a hospital authorized on this frequency, while providing an ambulance service.

(10) This frequency is authorized for use under § 90.35(a) for the rendition and delivery of medical services, and may be designated by common consent as an inter-system mutual assistance frequency under an area-wide medical communications plan.

(11) Operations on this frequency are limited to 30 watts transmitter output power.

(12) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Industrial and Land-Transportation Radio Service where they are assigned for land mobile operations.

(13) This frequency is authorized for use under § 90.35(a) for telemetry or voice transmission with maximum transmitter output power of 1 watt from a portable telemetering unit to an ambulance for automatic retransmission (vehicular repeater) to a hospital or other medical care facility. This frequency is also available in the Local Government Radio Service for highway radio call box operations. (See § 90.17 (b) and (c)(11).)

(14) The continuous carrier mode of operation may be used for telemetry transmission on this frequency.

(15) For applications for new radio systems received after August 15, 1974, the eight frequency pairs listed below will only be assigned in a block for shared operations under § 90.35(a) subject to the following:

(i) For uniformity in usage, these frequency pairs may be referred to by channel name as follows:

Frequencies base and mobile	Mobile only (Megahertz	Channel name
Megahertz		
463.000	468.000	MED-1
463.025	468.025	MED-2
463.050	468.050	MED-3
463.075	468.075	MED-4
463.100	468.100	MED-5
463.125	468.125	MED-6
463.150	468.150	MED-7
463.175	468.175	MED-8

(ii) Except as provided in subparagraphs (v) and (vi) of this paragraph, mobile or portable stations must employ equipment which is both wired and equipped to transmit/receive, respectively, on each of these eight frequency pairs with transmitters operated on the 468 MHz frequencies.

(iii) Except as provided in subparagraph (vi) of this paragraph, base or control stations must employe equipment which is both wired and equipped to transmit/receive, respectively, on at least four (three, if bio-medical telemetry operation is not employed in the system) of these eight pairs.

(iv) Multi-channel equipment requirement for use of these frequency pairs are intended to afford capability for alternating use of the individual frequencies, and ability to conduct simultaneous operations is not required. These requirements may be met in a single equipment unit or in any combination of equipment units suitable to a licensee's operations. The multi-channel requirements may be satisfied by several single-channel base stations in a mobile relay system provided that each control station can access all of the base stations and that any mobile unit located anywhere in the area of coverage can activate each of the base frequencies involved.

(v) Portable (hand-held) units operated with a maximum output power 2.5 watt are exempted from the multi-channel equipment requirements specifitd in subparagraph (ii) in this paragraph.

(vi) Stations located in areas above line A, as defined in § 90.7, will be required to meet multi-channel equipment requirements only for those frequencies up to the number specified in subparagraph (ii) and (iii) of this paragraph which have been assigned to the licensee after coordination with Canada in accordance with the applicable U.S.-Canada agreement.

(16) This frequency is primarily authorized for use under § 90.35(a) in the dispatch of medical-care vehicles and personnel for the rendition or delivery of medical services. This frequency may also be assigned for intra-system and inter-system mutual assistance purposes.

(17) This frequency is available in this service only for systems licensed in the service prior to April 16, 1976, until March 1, 1986. Use of this frequency is shared with and is primary to operations in the Police Radio Service.

(18) Until March 1, 1986, use of this frequency is on a secondary basis to Police Radio Service licenses authorized prior to April 16, 1976.

(19) This frequency is primarily authorized for use, under § 90.35(a) for operations in bio-medical telemetry systems. F2, F3, and F9 emissions may be authorized. On a secondary basis, this frequency may be utilized for any other permissible communications consistent with § 90.35.

(20) This frequency is primarily authorized for use under § 90.35(a), for communications between medical facilities vehicles and personnel related to medical supervision and instruction for treatment and transport of patients in the rendition or delivery of medical services. F2 and F3 emissions are authorized. On a secondary basis, this frequency may be utilized for any other permissible communications consistent with § 90.35, including bio-medical telemetry transmissions, and F9 emission may be additionally authorized.

(21) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(22) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(23) This frequency band is available in this service subject to the provisions of § 90.259.

(24) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(c) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) Substitution of frequencies available below 25 MHz may be made in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The frequency bands 31.99 to 32.00 MHz, 33.00 to 33.01 MHz, 33.99 to 34.00 MHz, 37.93 to 38.00 MHz, 39.00 to 39.01 MHz, 39.99 to 40.00 MHz and 42.00 to 42.01 MHz are available for assignment for developmental operation subject to the provisions of Subpart P.

(d) *Limitation on number of frequencies assignable.* Normally only one frequency below 450 MHz will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with the operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) An additional frequency may be assigned for paging operations from those frequencies available under § 90.53(b)(4).

(3) The frequency 155.340 MHz may be assigned as an additional frequency when it is designated as a mutual assistance frequency as provided in § 90.53(b)(10).

(4) Additional frequencies may be assigned for fixed station operations.

(5) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.55 Paging Operations.

Paging operations may be authorized in the Special Emergency Radio Service only on those frequencies available in accordance with § 90.53(b)(4). Paging operations on other frequencies authorized prior to August 15, 1974, may continue for the balance of the license term then effective. In addition, such operations, except those on 162.6625 MHz, may be renewed until January 1, 1980, on a secondary basis to regularly authorized operations in the Special Emergency Radio Service. Paging operations authorized on the frequency 162.6625 MHz prior to May 14, 1975, may continue until the end of the license term then effective

Subpart D—Industrial Radio Services

§ 90.59 Scope.

The Industrial Radio Services include the Power, Petroleum, Forest Products, Motion Picture, Relay Press, Special Industrial, Business, Manufacturers, and Telephone Maintenance Radio Services. Rules as to eligibility for licensing, specific frequencies available, and any special requirements as to each of these radio services are set forth in the following sections.

§ 90.61 General eligibility.

In addition to the eligibility shown in each Industrial Radio Service, eligibility is also provided for any corporation proposing to furnish nonprofit radiocommunication service to its parent corporation, to another subsidiary of the same parent, or to its own subsidiary provided the party served is regularly engaged in any of the eligibility activities set forth in the particular service involved. Eligibility is also provided, except in the Business Radio Service, for a nonprofit corporation or association that is organized for the purpose of furnishing a radiocommunication service to persons actually engaged in any of the eligibility activities set forth in the particular service involved subject to the cooperative use provisions of § 90.179.

§ 90.63 Power Radio Service.

(a) *Eligibility.* Persons primarily engaged in any of the following activities are eligible to hold authorizations in the Power Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee:

(1) The generation, transmission, or distribution of electrical energy for use by the general public or by the members of a cooperative organization.

(2) The distribution of manufactured or natural gas by means of pipe line, for use by the general public or by the members of a cooperative organization, or, in a combination of that activity with the production, transmission or storage of manufactured or natural gas preparatory to such distribution.

(3) The distribution of steam by means of pipe line or, of water by means of pipe line, canal, or open ditch, for use by the general public or by the members

of a cooperative organization, or in a combination of that activity with the collection, transmission, storage, or purification of water or the generation of steam preparatory to such distribution.

(4) The providing of a supporting service by a corporation directly related to activities of its parent corporation, of another subsidiary of the same parent, or of its own subsidiary, where the party served is regularly engaged in any of the eligibility activities set forth in this section.

(b) *Special use of service.* (1) Radio facilities licensed to an electric power entity, in addition to being used primarily for the installation and maintenance of the electric power system, may also be used for the installation and maintenance of any other wireline facilities where such facilities employ in whole or in part the same pole line or duct distribution system as that of the electric power entity and where the licensee has the responsibility to maintain such additional wireline facilities through common ownership or contractual arrangement.

(2) Persons licensed under the provisions of subparagraph (a)(2) of this section may utilize their radio facilities in conjunction with the supplying of liquefied petroleum gas to consumers in areas beyond gas distribution pipe lines.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Power Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (d) of this section:

Power radio service frequency table

Frequency or band	Class of station(s)	Limitations
Kilohertz:		
2202	Base or mobile	1
2505	do	1
4637.5	do	1
Megahertz:		
27.46	Base or mobile

952 and above	Operational fixed	18
1427 to 1435	Base, mobile or operational fixed	19
2450 to 2500	Base or mobile	19
8400 to 8500	do	20
10,550 to 10,680	do	20

(d) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (c) of this section:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

(2) This frequency may be assigned only to stations operating in an interconnected or coordinated utility system in accordance with an operational communications plan which sets forth all points of communications. Authorizations at variance with an established operational communications plan will be made only on a secondary basis.

(3) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(4) This frequency is shared with the Forest Products and Petroleum Radio Services in the States of Arkansas, Louisiana, Oklahoma, and Texas.

(5) This frequency is not available for assignment in this service in the States of Arkansas, Louisiana, Oklahoma, and Texas. In these states, this frequency is available to the Petroleum and Forest Products Radio Services.

(6) This frequency is available primarily for assignment to multiple address fixed stations employing omnidirectional antennas used for Power Utility peak load shaving and shedding and to mobile stations used for the remote control of objects and devices. The maximum power that may be authorized to fixed stations is 300 watts output, and the maximum power that may be authorized for mobile stations is 1 watt output. A1, A2, F1, or F2 emission may be authorized. This frequency may also be assigned to operational fixed stations employing directional antenna systems (front-to-back ratio of 20 dB) when such stations are located at least 120 km. (75 mi.) from the boundaries of any urbanized area of 200,000 or more population, (U.S. Census of Population, 1960, vol. I, fig. 46, p. S36). The maximum power output of the transmitter for such fixed stations may not exceed 50 watts. A1, A2, F1, or F2 emission may be authorized.

(7) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2.0 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 6 kHz.

(8) This frequency is share with Forest Products and Petroleum Radio Services in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas, and Washington.

(9) This frequency is not available for assignment in this service in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas, and Washington. In these states this frequency is available only in the Petroleum and Forest Products Radio Services.

(10) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithsatnding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(11) This frequency is available on a shared basis with other Industrial Radio Services and the Local Government Radio Service. On this frequency the maximum power output of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, F1, or F2 emission may be authorized, and mobile stations used to control remote objects and devices may be operated in the continuous transmit mode. Operational fixed stations communicating with two receiving locations or with three or more receiving locations all of which are located within an angle of azimuth of 160° must employ directional antennas having a front-to-back ratio of at least 20 dB. Omnidirectional antennas having unity gain may be employed at other stations.

(12) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.2 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwith may not exceed 3 kHz.

(13) This band is available to stations operating in this service subject to the provisions of § 90.259.

(14) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(15) This frequency is available on a shared basis in the Power, Petroleum, Forest Products, Manufacturers, and Telephone Maintenance Radio Services. It may be assigned only when all of the frequencies in the 450–470 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 56 km. (35 mi.) of the proposed base station. Applications for this frequency must be coordinated with all five services.

(16) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(17) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(18) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(19) This frequency band is available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(20) Use of this frequency is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253.)

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) Persons eligible under the provisions of subparagraph (a)(2) of this section who are engaged in the distribution of natural gas directly to consumers and who have a substantial requirement for mobile service communication with a gas supplier may be authorized to operate on the Petroleum Radio Service frequency or frequencies assigned to the supplier. However, such operation shall be limited to communications in a local area common to both parties, and shall relate only to gas supply and distribution activities. The application of any person seeking a frequency assignment under the provisions of this paragraph shall be accompanied by a written statement from the natural gas supplier which concurs in the need for such intercommunication and consents to the use by the natural gas distributor of the frequency or frequencies involved.

(f) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for developmental operation by applicants in this service subject to the provisions of Subpart P, notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.65 Petroleum radio service.

(a) *Eligibility.* Persons primarily engaged in prospecting for, producing, collecting, refining, or transporting by means of pipeline, petroleum or petroleum products (including natural gas) are eligible to hold authorizations in the Petroleum Radio Service to operate radio stations for transmissions of communications essential to such activities of the licensee: However, persons engaged solely in the containment or cleanup of oil spills will only be assigned those frequencies designated by limitations (30) and (31) in this section.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Petroleum Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

Petroleum radio service frequency table

Frequency or band	Class of station(s)	Limitations
Kilohertz:		
1014	Base or mobile	1, 2, 3, 4

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

(2) Use of this frequency is limited to an amplitude modulation mode of operation.

(3) This frequency is available for assignment only to stations utilized for geophysical purposes.

(4) Geophysical operations may use tone or impulse signalling for purposes other than indicating failure of equipment or abnormal conditions on this frequency. All such tone or impulse signalling shall be on a secondary basis and subject to the following limitations:

(i) Maximum duration of a single non-voice transmission, may not exceed three minutes.

(ii) The bandwidth utilized for secondary tone or impulse signalling shall not exceed that authorized to the licensee for voice emission on the frequency concerned.

(iii) Frequency loading resulting from the use of secondary tone or impulse signalling will not be considered in whole or in part, as a justification for authorizing additional frequencies in the licensee's mobile service system.

(iv) The maximum transmitter output power for tone or impulse transmissions shall not exceed 50 watts.

(5) This frequency is available for assignment to geophysical stations on a secondary basis to other Petroleum licensees. Geophysical stations must cease operations on this frequency immediately upon receiving notice that interference is being caused to mobile service stations.

(6) This frequency is primarily available for oil spill containment and cleanup operations and for training and drills essential in the preparations for the containment and cleanup of oil spills. It is secondarily available for general base-

mobile operations in the Petroleum Radio Service on a non-interference basis. Secondary users of this frequency are required to be present in their area of operation or upon notice by the Commission or a primary user that harmful interference is being caused to oil spill containment and cleanup activities in other areas.

(7) Operation on this frequency is secondary to stations in the maritime mobile service operating in accordance with the International table of frequency allocations.

(8) This frequency is shared with the Motor Carrier Radio Service.

(9) This Government frequency is available for shared Government/non-Government use by stations engaged in oil spill containment and cleanup operations and for training and drills essential in the preparation for containment and cleanup of oil spills. Such use will be confined to inland and coastal waterways.

(10) This frequency is shared with the Forest Products Radio Service.

(11) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services, and are available only in accordance with the provisions of § 90.257.

(12) This frequency is shared with the Special Industrial Radio Service.

(13) This frequency is shared with the Forest Products and Manufacturers Radio Services.

(14) This frequency is shared with Power and Forest Products Radio Services and is available in this service only in the States of Arkansas, Louisiana, Oklahoma and Texas. Elsewhere this frequency is available in the Power Radio Service.

(15) This frequency is available for assignment in this service only in the States of Arkansas, Louisiana, Oklahoma and Texas. Elsewhere this frequency is available in the Power Radio Service.

(16) The maximum power output of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, F1, or F2 emission may be authorized. Mobile stations used to control remote objects and devices may be operated in the continuous transmit mode. Operational fixed stations communicating with two receiving locations or with three or more receiving locations all of which are located within an angle of azimuth of 160° must employ directional antennas having a front-to-back ratio of at least 20 dB. Omnidirectional antennas having unity gain may be employed at other stations.

(17) This frequency band is shared with the Special Industrial Radio Service.

(18) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2 kHz. The carrier frequency must be maintained within 0.0005 percent of the center of the frequency band, and the authorized bandwidth may not exceed 6 kHz.

(19) This frequency is limited to a maximum power of 20 watts.

(20) This frequency is shared with Power and Forest Products Radio Services and is available in this service only in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas and Washington. Elsewhere, this frequency is available only in the Power Radio Service.

(21) This frequency is available for assignment in this service only in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas and Washington. Eleswhere it is available in the Power Radio Service.

(22) This frequency is limited to a maximum power of 75 watts.

(23) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithstanding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(24) This frequency band is shared with Power, Forest Products, Special Industrial, Petroleum, Manufacturers, Business and with the Local Government Radio Service.

(25) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.2 kHz. The carrier frequency must be maintained within 0.0005 percent, and the authorized bandwidth may not exceed 3 kHz.

(26) This band is available to stations operating in this service subject to the provisions of § 90.259.

(27) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(28) This frequency is available on a shared basis in the Power, Petroleum, Forest Products, Manufacturers, and Telephone Maintenance Radio Services. It may be assigned only when all of the frequencies in the 450–470 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 56 km. (35 mi.) of the proposed base station. Applications for this frequency must be coordinated with all five services.

(29) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(30) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(31) Assignment of frequencies to operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(32) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(33) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.255.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available for assignment in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) Persons eligible in this service who are engaged in the transportation of natural gas by pipeline and who have a substantial requirement for mobile service communication with a public utility company purchasing such gas for distribution to the consumer may be authorized to operate on the Power Radio Service frequency or frequencies assigned to such distributor(s). However, such operation shall be limited to communications in the local area common to both parties and shall relate only to gas supply and distribution activities. The application of any person seeking a frequency assignment under the provisions of this paragraph shall be accompanied by a written statement from the natural gas distributor which concurs in the need for such intercommunication, and consents to the use by the natural gas supplier of the frequencies involved.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the [illegible] 30.57 MHz, 30.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for developmental operation by applicants in this service subject to the provisions of subpart P notwithstanding this limitation.

(3) Authorizations for multiple frequencies for geophysical operations will be granted on the frequencies governed by the limitations in subparagraphs (c)(3) and (c)(4) of this section notwithstanding this limitation. However, each geographical exploration party may only use a maximum of four frequencies at any one time.

(4) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.67 Forest products radio service.

(a) *Eligibility.* Persons primarily engaged in any of the following activities are eligible to hold authorizations in the Forest Products Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee:

(1) Tree logging, tree farming, or related woods operations, including related hauling activities, if the hauling activities are performed under contract to, and exclusively for, persons engaged in woods operations;

(2) Manufacturing lumber, plywood, hardboard, or pulp and paper products from wood fiber by persons eligible under the provisions of subparagraph (1) of this paragraph.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Forest Products Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

Forest products radio service frequency table

Frequency or band	Class of station(s)	Limitations

(c) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (b) of this section:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

(2) This frequency is shared with the Petroleum Radio Service.

(3) This frequency is shared with the Special Industrial Radio Service.

(4) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(5) This frequency is available in this service and in the Special Industrial Radio Service on a secondary basis to one-way paging Communications authorized in the Business Radio Service.

(6) This frequency is shared with the Petroleum and Manufacturers Radio Services.

(7) This frequency is shared with the Power and Petroleum Radio Service and is available in this service only in the States of Arkansas, Louisiana, Oklahoma and Texas. Elsewhere it is available in the Power Radio Service.

(8) This frequency is available for assignment in this service only in the States of Arkansas, Louisiana, Oklahoma, and Texas. Elsewhere, this frequency is available in the Power Radio Service.

(9) Authorizations to operate on this frequency will be issued for A2 or F2 emission for tone signalling or for a combination of such emission with A3 or F3 emission with a maximum bandwidth of 20 kHz. The output power shall not exceed 2 watts. The maximum distance between any transmitter and the center of the radiating portion of its antenna shall not exceed 8 m. (25 ft.) Operation on this frequency is secondary to stations in the Business Radio Service.

(10) This frequency is shared with Power and Petroleum Radio Services and is available in this service only in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas and Washington.

(11) This frequency is available for assignment in this service, only in the States of Arkansas, Louisiana, Oklahoma, Oregon, Texas and Washington. Elsewhere it is available in the Power Radio Service.

(12) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithstanding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(13) This frequency is available on a shared basis with the Local Government Radio Service and Industrial Radio Services as follows: Special Industrial, Business, Power, Protection, Manufacturers, Forest Products, Industrial Radio Location, Motion Picture, Relay Press, and Telephone Maintenance. On this frequency the maximum power output of the transmitter may not exceed 50 watts for fixed stations and 3 watts for mobile stations. A1, A2, F1, or F2 emissions may be authorized, and mobile stations used to control remote objects and devices may be operated in the continuous transmit mode. Operational fixed stations communicating with two receiving locations or with three or more receiving locations all of which are located within an angle of azimuth of 160° must employ directional antennas having a front-to-back ratio of at least 20 dB. Omnidirectional antennas having unity gain may be employed at other stations.

(14) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum deviation may not exceed 2.5kHz. For AM transmitters the highest modulating frequency may not exceed 2 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 6 kHz.

(15) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.2 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 3 kHz.

(16) This band is available to stations in this service subject to the provisions of § 90.259.

(17) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(18) This frequency is available on a shared basis in the Power, Petroleum, Forest Products, Manufacturers, and Telephone Maintenance Radio Services. It may be assigned only when all of the frequencies in the 450–470 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 56 km. (35 mi.) of the proposed base station. Applications for this frequency must be coordinated with all five services.

(19) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(20) Subpart M contains rules for assignment of frequencies in the 806–821 MHz and 851–866 MHz bands.

(21) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(22) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(23) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service (See also § 90.253.)

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.253.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(e) Limitation on number of frequencies assignable. Normally only one frequency or pair of frequencies in the pair frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for developmental operation by applicants in this service subject to the provisions of Subpart P notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operations of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.69 Motion picture radio service.

(a) *Eligibility.* Persons primarily engaged in the production or filming of motion pictures are eligible to hold authorizations in the Motion Picture Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Motion Picture Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

Motion picture radio service frequency table

Frequency or band	Class of station(s)	Limitations
Kilohertz:		
1626	Base or mobile	1
1652	do	1
2292	do	1
2388	do	1
4637.5	do	1
Megahertz:		
72 to 76	Operational fixed	3
152.87	Base or mobile	3
152.90	do	3
152.93	do	3
152.96	do	3
152.99	do	3
153.02	do	3
173.225	do	4
173.275	do	4
173.325	do	4
173.375	do	4
806 to 821	Mobile	5

Frequency or band	Class of station(s)	Limitations
Megahertz:		
851 to 866	Base or mobile	5
952 and above	Operational fixed	6
1427 to 1435	Base, mobile or operational fixed.	7
2450 to 2500	Base or mobile	8
8400 to 8500	do	9
10,550 to 10,680.	do	

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

(2) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(3) This frequency is shared with the Special Industrial Radio Service.

(4) This frequency is shared with the Relay Press Radio Service.

(5) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(6) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this chapter.

(7) This band is available in this service subject to the provisions of § 90.259.

(8) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(9) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service.

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available for in accordance with § 90.255.

(3) Frequencies in the band 73–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permited.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be asisgned in connection with operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for assignment for developmental operation to applications in this service subject to the provisions of Subpart P notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz, may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.71 Relay press radio service.

(a) *Eligibility.* Persons primarily engaged in the publication of a newspaper or in the operation of an established press association are eligible to hold authorizations in the Relay Press Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Relay Press Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section:

Relay press radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
72.0 to 76.0	Operational fixed	1
173.225	Base or mobile	2
173.275	do	2
173.325	do	2
173.375	do	2
452.975	do	
453.000	do	
457.975	Mobile	
458.000	do	
806 to 821	do	3
851 to 866	Base or mobile	3
952 and above.	Operational fixed	4
1427 to 1435	Operational fixed, base or mobile.	5
2450 to 2500	Base or mobile	6
8400 to 8500	do	7
10,550 to 10,680.	do	

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) The frequencies available in the band 72-76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(2) This frequency is shared with the Motion Picture Radio Service.

(3) Subpart M contains rules for assignment of frequencies in the 806-821 and 851-866 MHz bands.

(4) Assignment of frequencies for operational fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(5) This band is available in this service subject to the provisions of § 90.259.

(6) Available only on a shared basis with stations in other services and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(7) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See Section 90.253.)

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available for in accordance with § 90.255.

(2) Frequencies in the band 73–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single application in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for assignment to applicants in this service subject to the provisions of Subpart P notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.73 Special industrial radio service.

(a) *Eligibility.* Persons primarily engaged in any of the following activities are eligible to hold authorizations in the Special Industrial Radio Service to operate radio stations for the transmission of only those communications essential to such activities of the licensee. (Persons engaging in some activities which are eligible under this paragraph and in some which are not, and desiring to use radio in connections with both types of activities should apply for authorization in the Business Radio Service.)

(1) The operation of farms, ranches, or similar land areas, for the quantity production of crops or plants; vines or trees (excluding forestry operations); or for the keeping, grazing or feeding of livestock for animal products, animal increase, or value enhancement. Persons establishing eligibility under this subparagraph may use their radio facilities in connection with the gathering or

processing of products grown or raised for them by others.

(2) Plowing, soil conditioning, seeding, fertilizing, or harvesting for agricultural activities.

(3) Spraying or dusting of insecticides, herbicides, or fungicides, in areas other than enclosed structures.

(4) Livestock breeding service.

(5) The operation of a commercial business regularly engaged in the construction of roads, bridges, sewer systems, pipelines, airfields, or water, oil, gas, or power productions, collection, or distribution systems. Other engineering projects, normally classified as heavy construction activities, will be considered on the merits of the showing made, however, the construction of buildings is not included in this category.

(6) The operation of mines for the recovery of solid fuels, minerals, metal, rock, sand and gravel from the earth or the sea, including the exploration for and development of mining properties.

(7) Maintaining, patrolling or repairing gas or liquid transmission pipelines, tank cars, water or waste disposal wells, industrial storage tanks, or distribution systems of public utilities. Persons establishing eligibility under this subparagraph may use their radio facilities in connection with the containment and cleanup of industrial liquid spillage.

(8) Acidizing, cementing, logging, perforating, or shooting activities, and services of a similar nature incident to the drilling of new oil or gas wells, or the maintenance of production from established wells.

(9) Supplying chemicals, mud, tools, pipe, and other materials or equipment unique to the petroleum and gas production industry, as the primary activity of the applicant if delivery, installation or application of these materials requires the use of specifically fitted conveyances.

(10) The delivery of ice or fuel to the consumer for heating, lighting, refrigeration or power generation purposes, by means other than pipelines or railroads when such products are not to be resold following their delivery. Persons establishing eligibility under this subparagraph may use their radio facilities in connection with the servicing of the equipment that uses or consumes the products delivered.

(11) The delivery and pouring of ready mixed concrete or hot asphalt mix.

(b) *Special limitation on use of service.* Communications relating to any of the following shall not be transmitted by any station licensed in the Special Industrial Radio Service.

(1) Sales reports or the dispatching of salesmen;

(2) Payrolls, accounts, or inventory controls.

(3) Any mesage relating to the retail delivery of any item or product, except where such retail delivery is specifically included in the eligibility provisions of this section.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Special Industrial Radio Service together with the class of station(s) to which they are normally assigned, and the specific assignment limitations which are explained in paragraph (d) of this section

Special industrial radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz		
151.490	Base or mobile	2, 8

156.545	do	2, 10
156.560	do	7

(d) Explanation of assignment limitations appearing in the frequency table of paragraph (c) of this section:

(1) Frequencies below 25 MHz will be assigned to base or mobile stations in this service only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant.

(2) This frequency will be assigned only for operation in a permanent area, normally within 120 km. (75 mi.) of a specified reference point.

(3) Operation on this frequency is limited to a maximum output of 2 watts; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may provide the operational functions of a base or fixed station, on a secondary basis to mobile service operations provided that the separation between the control point and the center of the radiating portion of the antenna of any units so used does not exceed 25 feet (7.6 m).

(4) This frequency will be assigned only to stations used in itinerant operations.

(5) This frequency is shared with the Forest Products Radio Service.

(6) The frequencies available in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(7) This frequency is available on a shared basis in the Manufacturers, Special Industrial, and Railroad Radio Services and interservice coordination is required. All communications must be conducted within the boundaries or confines of plant, factor, shipyard, mill, mine, farm, ranch, or construction area. All operations on this frequency are subject to the provisions of § 90.257(b).

(8) This frequency is not available to stations in Puerto Rico or the Virgin Islands. Elsewhere, this frequency is shared with the Forestry-Conservation Radio Service and interservice coordination is required.

(9) This frequency is available in this service and in the Forest Products Radio Service on a secondary basis to one-way paging communications authorized in the Business Radio Service.

(10) This frequency is shared with the Motion Picture Radio Service.

(11) This frequency band is shared with the Petroleum Radio Service.

(12) In this frequency band the maximum output power of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, F1, or F2 emission may be authorized. Mobile stations used to control remote objects and devices may be operated in the continuous transmit mode. Operational fixed stations communicating with two receiving locations or with three or more receiving locations all of which are located within an angle of azimuth of 160° must employ directional antennas having a front-to-back ratio of at least 20 dB. Ominidirectional antennas having unity gain may be employed at other stations.

(13) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters, the highest modulating frequency may not exceed 2.0 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 6 kHz.

(14) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithstanding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(15) This frequency band is shared with other Industrial Radio Services as follows: Power, Forest Products, Special Industrial, Petroleum, Manufacturers, Business, and the Local Government Radio Service.

(16) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.2 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 3 kHz.

(17) This frequency band is available to stations in the service subject to the provisions of § 90.259.

(18) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(19) Operational fixed assignments on this frequency will only be made to an itinerant fixed control or relay station on a secondary basis to land-mobile stations in this service, provided that the fixed relay or control station is to be associated with base and mobile facilities authorized to use other frequencies available for itinerant operation in this service. All such use of these frequencies for fixed systems is limited to locations 161 or more km. (100 mi.) from the center of any urbanized area of 200,000 or more population, except that the distance may be 120 km. (75 mi.) if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. The centers of urbanized areas of 200,000 or more population are determined from the appendix, page 226, of the U.S. Commerce publication, "Air Line Distance Between Cities in the United States." Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, volume 1, table 23, page 1–50.

(20) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(21) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(22) Assignment of frequencies for operational-fixed stations in the bands 952 and above is governed by Part 94 of this chapter.

(23) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(24) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service: (See also § 90.253)

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265 and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(4) The following frequencies are available only in Puerto Rico and the Virgin Islands. These "Base and Mobile" and "Mobile Only" frequencies are available on a shared basis in the Forestry-Conservation Railroad Radio Services, respectively. These "Mobile Only" frequencies may be assigned to a control station associated with a mobile relay system if it is also assigned to the associated mobile station. All applications for the assignment of a new frequency, or to change existing facilities in such a manner as to require frequency coordination as specified in section 90.175, shall be accompanied by evidence of frequency coordination with the sharing service.

Base and mobile:	*Mobile only*
159.240	160.410
159.255	160.425
159.270	160.440
159.285	160.455
159.300	160.470
159.315	160.485
159.330	160.500
159.345	160.515
159.360	160.530
159.375	160.545
159.390	160.560
159.405	160.575
159.420	160.590
159.435	160.605

(5) Land mobile service frequencies above 152 MHz which are listed elsewhere in this part as available to the Petroleum, Forest Products, and Manufacturers Radio Services, are also available, with the exception of the frequency 154.57 MHz, for assignment in this service for use in Hawaii, Puerto Rico, and the Virgin Islands, subject to the same limitations as apply in the Petroleum, Forest Products, and Manufacturers Radio Services. Operation on such frequencies is secondary to stations operating in the Petroleum, Forest Products, or Manufacturers Radio Services and their use will be terminated if they are needed in the areas concerned in any of those services.

(f) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz and 37.00–37.01 MHz are available for assignment to applicants in this service subject to the provisions of Subpart P notwithstanding this limitation.

(3) Authorization for more than one mobile frequency in the band 72–76 MHz will be issued notwithstanding this limitation.

(4) Frequencies in the 25–30 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

(g) *Limitation on itinerant operation.* Base or mobile stations being utilized in itinerant operation will be authorized only on base or mobile frequencies that are not restricted to a permanent area of use by the limitation of subparagraph (d)(2) of this section.

§ 90.75 Business radio service.

(a) *Eligibility.* Persons primarily engaged in any of the following activities are eligible to hold authorizations in the Business Radio Service to operate stations for transmission of communications necessary to such activities of the licensee:

(1) The operation of a commercial activity.

(2) The operation of educational, philanthropic, or ecclesiastical institutions.

(3) Clergymen activities.

(4) The operation of hospitals, clinics or medical associations.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Business Radio Service together with the class of station(s) to which they are normally assigned, and the specific assignment limitations, which are explained in paragraph (c) of this section.

Business radio service frequency table

1427 to 1435	Operational fixed, base or mobile.	21
10,550 to 10,680.	Base or mobile	

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) Operation on this frequency is limited to a maximum output power of 110 watts.

(2) This frequency will be assigned only for operation in a permanent area, normally within 120 km. (75 mi.) of a specified reference point.

(3) This frequency will be assigned only to stations used in itinerant operations.

(4) Operation on this frequency is limited to a maximum output power of 2 watts; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may provide the operational functions of a base or fixed station on a secondary basis to mobile service operations, provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used does not exceed 8 m. (25 ft.).

(5) Reserved.

(6) Operation on this frequency is limited to a maximum output power of 1 watt and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may provide the operational functions of a base or fixed station on a secondary basis to mobile service operations, provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used does not exceed 8 m. (25 ft.).

(7) The frequencies available in the band 72–76 MHz are listed in §90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(8) Use of this frequency in this service is limited to stations located in Puerto Rico and the Virgin Islands.

(9) This frequency is shared with the Taxicab Radio Service and is available for assignment in the Business Radio Service only to stations which are used exclusively in areas outside of Standard Metropolitan Statistical Areas of 50,000 or more population (1950 Census). Operations on this frequency are on a secondary basis to operations in the Taxicab Radio Service.

(10) This frequency is assigned only for one-way paging communications to mobile receivers. Only A2, A3, F2, or F3 emissions may be authorized.

(11) This frequency is also available for base or mobile stations in the Special Industrial and Forest Products Radio Services on a secondary basis to paging operations in the Business Radio Service.

(12) This frequency will not be assigned to stations for use at temporary locations.

(13) This frequency may be used for mobile operation for radio remote control and telemetering functions. A1, A2, F1, or F2 emission may be authorized and mobile stations used to control remote objects or devices may be operated in the continuous carrier transmit mode.

(14) This frequency may be used for mobile operation for radio remote control and telemetering functions. A1, A2, F1, or F2 emission may be authorized. The use of the continuous carrier transmit mode for these purposes is permitted only for stations authorized and continuously licensed since before May 21, 1971.

(15) Operation on this frequency is limited to a maximum output power of 20 watts.

(16) Operation on this frequency is limited to a maximum output power of 75 watts.

(17) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithstanding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(18) This frequency is available on a shared basis with other Industrial Radio Services as follows: Power, Forest Products, Special Industrial, Petroleum, Manufacturers, Business, and the Local Government Radio Service and may be used in this service only for the purpose of remote control and telemetering. The maximum power output of the transmitter may not exceed 1 watt. Only A1, A2, F1, or F2 emission may be authorized and mobile stations used to control remote objects and devices may be operated in the continuous carrier transmit mode.

(19) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2.0 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 6 kHz.

(20) For FM transmitters the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 1.7 kHz, and the maximum frequency deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1.5 kHz. The carrier frequency must be maintained within 0.0005 percent and the authorized bandwidth may not exceed 3 kHz.

(21) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(22) This frequency may not be used aboard aircraft in flight.

(23) This frequency is used on a shared and cooperative basis with on board stations in the maritime mobile service, and may be used for communications concerned with cargo handling from a dock, or cargo handling facility, to a vessel alongside. Any number of the frequencies covered by this limitation may be authorized to one licensee for this purpose. Mobile relay stations may be temporarily installed at or in the vicinity of a dock or cargo handling facility and used when a vessel is alongside the dock or cargo handling facility in the following manner:

For on-vessel mobile relay use:

457.525 MHz, 457.550 MHz, 457.575 MHz, 457.600 MHz.

For associated mobile use:

467.750 MHz, 467.775 MHz, 467.800 MHz, 467.825 MHz.

The following frequencies are to be used for single-frequency simplex:

457.525 MHz, 457.550 MHz, 457.575 MHz, 457.600 MHz.

The effective radiated power (ERP) on this frequency shall not exceed 2 watts. For an on-vessel mobile relay station the center of the radiating portion of the antenna shall be over 3 m. (10 ft.) above the vessel's highest working deck.

(24) Operation on this frequency is limited to a maximum power output of 20 watts.

(25) This frequency is available for assignment to stations located on or near airports serving urbanized areas of 200,000 or more population. U.S. Census of Population, 1960, vol. 1, table 23, page 1–50, and may be assigned only to persons engaged in furnishing commercial air transportation service, or to a nonprofit corporation or association for the purpose of furnishing radio communications service to persons so engaged on a nonprofit cost-sharing basis. Stations on this frequency may be used only in connection with the servicing and supplying of aircraft at the airport.

(i) The amplified signal is retransmitted only on the exact frequency of the originating base station.

(ii) The booster is equipped with automatic gain control circuitry which will limit the total output of the booster to 500 milliwatts under all conditions.

(iii) All such devices are installed with sufficient isolation between receiving and retransmitting circuits to prevent oscillation.

(iv) The power of any emission, except on frequencies within the 460.6375–460.8875 MHz band or on which there is an input signal to the booster, shall be attenuated at least 35 decibels below the total power output of the booster.

(v) In the event control of the booster is impaired due to its activation by signals other than those intended by the licensee to be retransmitted, the licensee shall provide the booster with means of control such that it will be activated only by signals intended to be retransmitted, and boosters so provided with such means of control shall also be provided with an automatic time-delay or clock device which will deactivate the booster not more than three minutes after its activation.

(vi) If signal boosters are to be used in conjunction with other facilities, the number of such boosters must be stated on the license application.

This frequency may also be assigned to low power (2 watts or less) stations in the Business Radio Service for use in areas removed by 8 km. (5 mi.) from the boundaries of airports serving any urbanized areas of 200,000 or more population, U.S. Census of Population, 1960 vol. 1 table 23, page 1–50. All such use is restricted to confines of an industrial complex or manufacturing yard area. Finally, this frequency is also available for assignment to stations in the Business Radio Service for use at locations removed by 120 or more km. (75 mi.) from the boundaries of airports in urbanized areas of 200,000 or more population, U.S. Census of Population, 1960, vol. 1 table 23, page 1–50. Maximum permissible output power is 110 watts for this use.

(26) This frequency may be assigned to fixed stations in the Business Radio Service in accordance with the provisions of § 90.261.

(27) Within the boundaries of urbanized areas of 200,000 or more population as defined in the U.S. Census of Population, 1960, vol. 1, table 23, page 1–50, this frequency may be assigned only to persons rendering a central station commercial protection service.

(28) This frequency may be assigned only to persons rendering a central station commercial protection service.

(29) This frequency will be assigned only to stations whose control point location is within 805 m. (½ mi. direct) of the transmitter location. Maximum power output may not exceed 110 watts, and the overall height of the antenna above ground may not exceed 30 m. (100 ft.).

(30) Operation on this frequency is limited to a maximum output power of 35 watts.

(31) Maximum permissible power output for stations on airports is 3 watts. Each station authorized on this frequency will be classified and licensed as a mobile station. Any units of such a station, however, may provide the functions of a base station on a secondary basis to mobile service operations provided that the vertical separation between the control point or ground level and the center of the radiating portion of the antenna of any units so used shall not exceed 8 m. (25 ft.).

(32) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(33) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(34) Assignment of frequencies to operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service. (See also § 90.253).

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new station will be authorized in this band, nor will expansion of existing systems be permitted.

(3) Licensees holding a valid authorization on January 1, 1973, to operate on the frequencies 406.025, 406.075 MHz may continue to be authorized for such operations until the expiration of their present license on a secondary basis to stations operating in accordance with the table in Section 2.106 of this Chapter.

(4) Frequencies separated by 12.5 kHz from regularly assigned frequencies in the 457.525–460.650, 460.875–464.975, and 465.875–469.975 MHz bands may be assigned for use by mobile stations of two watts or less output power which may also serve the function of a base, fixed, or mobile relay station. All operation shall be on a secondary, non-interference basis to regularly assigned adjacent frequency operations and shall be entitled to no protection from such stations. Wide area operations will not be authorized. The area of normal day-to-day operation shall be described in the application in terms of a maximum distance from its approximate geographic center (latitude and longitude). Mobile stations, when used as fixed stations, shall be exempt from the limitations of Section 90.75(e). Antennas of mobile stations used as fixed stations communicating with one or more associated stations located within 45 degrees of azimuth shall be directional and have a front to back ratio of at least 15 dB. Except as provided below, the height of the antenna used at any mobile station serving as a base, fixed or mobile relay station may not exceed 7 m. (20 ft.) above the ground.

(i) No limit shall be placed on the length or height above ground of any commercially manufactured radiating transmission line when the transmission line is terminated in a non-radiating load and is routed at least 7 m. (20 ft.) interior to the edge of any structure or is routed below ground level.

(ii) Sea-based stations may utilize antennas mounted not more than 7 m. (20 ft.) above the man-made supporting structure, excluding antenna structures.

(5) Low-power mobile stations of 100 mW or less output power may be assigned any frequency separated by 12.5 kHz from a regularly assigned frequency in the bands 460.650–460.875 MHz and 465.650–465.875 MHz listed in paragraph (c) of this section, for one-way, non-voice biomedical telemetry operations in hospitals, or in medical or convalescent centers.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for assignment to applicants in this service subject to the provisions of Subpart P, notwithstanding this limitation.

(3) Frequencies in the 457 and 467 MHz bands may be assigned collectively as provided by paragraph (c) (23) of this section notwithstanding this limitation.

(4) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequencies bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239 notwithstanding this limitation.

(f) *Limitation on intinerant operation.* Base or mobile stations being utilized in itinerant operation will be authorized only on base or mobile frequencies that are not restricted to a permanent area of use by the limitation of paragraph (c) (2) of this section.

§ 90.79 Manufacturers radio service.

(a) *Eligibility.* Persons primarily engaged in any of the following manufacturing activities are eligible to hold authorizations in the Manufactuers Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee:

(1) The mechancal or chemical transformation of substances into new products within such establishments as plants, factories, shipyards, or mills which employ, in that process, power-driven machines and materials-handling equipment.

(2) The assembly of components of manufactured products within such establishments as plants, factories, shipyards, or mills where the new product is neither a new structure nor other fixed improvement. Establishments primarily engaged in the wholesale or retail trade, or in service activities, even though they fabricate or assemble any or all the products or commodities handled, are not eligible in this service.

(3) The providing of supporting services or materials by a corporation to its parent corporation, to another subsidiary of its parent or to its own subsidiary, where such supporting services or materials are directly related to those regular activities of such parent or subsidiary which constitute the basis for eligibility in this service.

(b) *Special limitations on use.* The following limitations are applicable to the use of stations in this service:

(1) Authorized stations may be used only for the transmission of communications related to the operation of the plant, such as for security, production control or materials-handling. Communications related to the retail distribution of the licensees products are not permitted.

(2) Base station will only be authorized in this service for operation at specified and permanent locations.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Manufacturers Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (d) of this section:

Manufacturers radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
72.02	Mobile	1, 2
72.04	do	1, 2
72.06	do	1, 2
72.08	do	1, 2, 3
72.10	do	1, 2

(d) **Explanation of assignment limitations appearing in the frequency tabulation of paragraph (c) of this section:**

(1) This frequency is shared with fixed stations in other services and is subject to no protection from interference.

(2) All communications on this frequency must be conducted within the boundaries or confines of plant, factory, shipyards, mill, or other manufacturing area. All operations on this frequency are subject to the provisions of § 90.257(b).

(3) This frequency is shared with the Radio Control (R/C) Service, part of the Personal Radio Services, where it is used solely for the radio control of models.

(4) This frequency is available on a shared basis in the Manufacturers, Special Industrial and Railroad Radio Services and interservice coordination is required.

(5) This frequency is shared with the Forest Products and Petroleum Radio Services. The output power of all transmitters operating on this frequency shall not exceed 110 watts.

(6) For FM transmitters the sum of the highest modulating frequency in hertz and the amount of frequency deviation or swing in hertz may not exceed 2800 Hz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2000 Hz. The carrier frequency must be maintained within 0.0005 percent of the center of the frequency band, and the authorized bandwidth may not exceed 6 kHz.

(7) In this frequency band the maximum power output of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, F1, or F2 emission may be authorized, and mobile stations used to control remote objects and devices may be operated in the continuous transmit mode.

(8) For FM transmitters the sum of the highest modulating frequency in hertz and the amount of frequency deviation or swing in hertz may not exceed 1700 Hz and the maximum deviation may not exceed 1.2 kHz. For AM transmitters the highest modulating frequency may not exceed 1200 Hz. The carrier frequency must be maintained within 0.0005 percent of the center of the frequency band, and the authorized bandwidth may not exceed 3 kHz.

(9) This frequency band is available on a shared basis with the Local Government and several Industrial Radio Services. Evidence of interservice coordination is required.

(10) Operational fixed stations must employ directional antennas having a front-to-back ratio of at least 20 db. Omnidirectional antennas having unity gain may be employed for stations communicating with at least three receiving locations separated by 160° of azimuth.

(11) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(12) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is on a secondary basis to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(13) This frequency is available on a shared basis in the Power, Petroleum, Forest Products, Manufacturers, and Telephone Maintenance Radio Services. It may be assigned only when all of the frequencies in the 450–470 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 56 km. (35 mi.) of the proposed base station. Applications for this frequency must be coordinated with all five services.

(14) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(15) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(16) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(17) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(18) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service: (See also 90.253.)

(1) Frequencies may be substituted for those available below 25 MHz in accordance with the provisions of § 90.263.

(2) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(3) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(f) *Limitation on number of frequencies assignable.* Normally only one frequency or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for assignment to applicants in this service subject to the provisions of Subpart P notwithstaning this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239 notwithstanding this limitation.

§ 90.81 Telephone maintenance radio service.

(a) *Eligibility.* Communications common carriers primarily engaged in rendering a wire-line or wire-line and radio communications service to the public for hire, and radio communications common carriers authorized in the Point-to-Point Microwave Radio Service under Part 21 are eligible to hold authorizations in the Telephone Maintenance Radio Service to operate radio stations for transmission of communications in accordance with paragraph (b) of this section.

(b) *Special limitations on use.* The facilities authorized in this service shall only be used for transmission of communications directly related to the construction, repair, maintenance or operation of communications common carrier facilities. The facilities authorized in this service shall not be used for administrative or other sales related business activities of the licensee, nor for the transmission of any common carrier or public correspondence communication.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Telephone Maintenance Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in parargaph (d) of this section:

Telephone maintenance radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
35.16	Base or mobile	1
43.16	Mobile	1
151.985	Base or mobile	1
158.34	Mobile	1
216 to 220	Base or mobile	2
450 to 470	Fixed	3

462.525	do	4
467.475	Mobile	1
467.525	do	1
470 to 512	Base or mobile	6
806 to 821	Mobile	7
851 to 866	Base or mobile	7
952 and above	Operational fixed	8
1427 to 1435	Operational fixed, base or mobile	2
2450 to 2500	Base or mobile	9
8400 to 8500	do	10
10,550 to 10,680	do	

(d) Explanation of assignment limitations appearing in the frequency table of paragraph (c) of this section:

(1) This frequency may be assigned only to a communications common carrier primarily engaged in rendering a wire-line or wire-line and radio communications service to the public for hire.

(2) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(3) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Land Transportation Radio Services where they are assigned for land mobile operations.

(4) This frequency is available on a shared basis in the Power, Petroleum, Forest Products, Manufacturers, and Telephone Maintenance Radio Services. Except for assignments made to non-wire-line radiocommunications common carriers authorized in the Point-to-Point Microwave Radio Service under Part 21, it may be assigned only when all of the base and mobile frequencies in the 450–470 MHz band for which the applicant is primarily eligible are assigned within 35 miles (56 km) of the proposed base station. Applications for this frequency must be coordinated with all five services.

(5) This frequency may be assigned to auxiliary test stations.

(6) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(7) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(8) Assignment of frequencies to operational-fixed stations in the bands 952 and above is governed by Part 94 of this Chapter.

(9) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(10) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service: (See also 90.253)

(1) The frequencies 27.235, 27.245, 27.255, 27. 265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(f) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation;

(2) Frequencies in the ranges 30.56–30.57 MHz, 35.00–35.01 MHz, 35.99–36.00 MHz, and 37.00–37.01 MHz are available for assignment of applicants in this service subject to the provisions of Subpart P. notwithstanding this limitation.

(3) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

Subpart E—Land Transportation Radio Services

§ 90.85 Scope.

The Land Transportation Radio Services include the Motor Carrier, Railroad, Taxicab and Automobile Emergency Radio Services. Rules as to eligibility for licensing, permissible communications, assignable frequencies, and any special requirements as to each of these radio services are set forth in the following sections.

§ 90.87 General eligibility.

In addition to the eligibility shown in each Land Transportation Radio Service, eligibility is also provided for any corporation proposing to furnish nonprofit radiocommunication service to its parent corporation, to another subsidiary of the same parent, or to its own subsidiary provided the party served is regularly engaged in any of the eligibility activities set forth in the particular service involved. Eligibility is also provided for a nonprofit corporation or association that is organized for the purpose of furnishing a radiocommunication service to persons actually engaged in any of the eligibility activities set forth in the particular service involved subject to the cooperative use provisions of § 90.179.

§ 90.89 Motor carrier radio service.

(a) *Eligibility.* Persons primarily engaged in providing a common or contract motor carrier transportation service in any of the following activities are eligible to hold authorizations in the Motor Carrier Radio Service to operate radio stations for transmission of communications essential to such activities of the licensee. For purposes of this rule, an urban area is defined as being one or more contiguous, incorporated or unincorporated cities, boroughs, towns, or villages, having aggregate population of 2500 or more persons.

(1) The transportation of passengers between urban areas.

(2) The transportation of property between urban areas.

(3) The transportation of passengers within a single urban area.

(4) The transporation, local distribution or collection of property within a single urban area.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Motor Carrier Radio Service, together with the class of station(s) to which they are normally assigned; and the specific assignment limitations, which are explained in paragraph (c) of this section:

Motor carrier radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
30.66	Base or mobile	1, 2
30.74	do	1, 2
30.82	do	1, 2
30.86	do	1, 3
30.90	do	1, 3
30.94	do	1, 3
30.98	do	1, 3
31.02	do	1, 3
31.06	do	1, 3
31.06	do	1

457.650	do	
457.675	do	
457.700	do	
457.725	do	
457.750	do	
457.775	do	10
457.800	do	
457.825	do	10
457.850	do	
457.875	do	10
470 to 512	Base or mobile	11
806 to 821	Mobile	12
851 to 866	Base or mobile	12
952 and above	Operational fixed	13
1427 to 1435	Operational fixed, base or mobile	14
2450 to 2500	Base or mobile	15
8400 to 8500	do	16
10,550 to 10,680	do	

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) This frequency is available for assignment in this service only to common and contract motor carriers of passengers within a single urban area.

(2) This frequency is available on a shared basis with the Petroleum Radio Service.

(3) This frequency is available on a shared basis with stations in the Forestry-Conservation Radio Service.

(4) This frequency is available for assignment in this service only to common and contract motor carriers of passengers between urban areas.

(5) This frequency is available for assignment in this service only to common and contract motor carriers of property between urban areas.

(6) In addition to single frequency operation, this frequency is available to base and mobile stations for the paired frequency mode of operation. For two frequency systems, the separation between base and mobile transmit frequencies is 500 kHz with the base stations transmitting on the higher of the two frequencies.

(7) The frequencies available for use at operational fixed stations in the band 72–76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(8) This frequency is available for assignment in this service only to common and contract motor carriers of property.

(9) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public Safety and Industrial Radio Services where they are assigned for land mobile operations.

(10) This frequency is shared in the Motor Carrier and Railroad Radio Services. It may be assigned only when all of the frequencies in the 450–460 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 35 miles (56 km) of the proposed base station. Applications for these frequencies must be coordinated with all services involved.

(11) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(12) Subpart M contains rules for assignment of frequencies in 806–821 and 851–866 MHz bands.

(13) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(14) This frequency is available to stations in this service subject to the provisions of § 90.259.

(15) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(16) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Additional frequencies available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service: (See also § 90.253).

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(3) The frequency band 33.00–33.01 MHz may be used for developmental operations subject to the provisions of Subpart P. Any type of emission other than pulsed emission may be used if the bandwidth occupied by the emission is contained within the assigned frequency band.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247, notwithstanding this limitation.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands

and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

§ 90.91 Railroad radio service.

(a) *Eligibility.* Railroad common carriers which are regularly engaged in the transportation of passengers or property when such passengers or property are transported over all or part of their route by railroad are eligible to hold authorizations in the Railroad Radio Service to operate radio stations for transmission of communications and to assure safety of operations essential to such activities of the licensee.

(b) The following limitations are applicable to the use of stations licensed in this service:

(1) Stations licensed in this service may be used to provide communications service for the operation of land motor vehicles that are engaged in the pick-up, delivery, or transfer between railroad stations of property that is shipped, continued in, or destined for shipment by railroad common carriers. When such operations are conducted on frequencies in the 160–162 MHz band, they are on a secondary basis to regular railroad radio communications.

(2) Operational Fixed stations licensed to operate in this service may be used by railroads notwithstanding the provisions of § 90.415(b) to handle public telegraph messages as agents of telegraph common carriers in those instances where such public telegraph service cannot be efficiently provided through other railroad facilities.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Railroad Radio Service, together with the class of stations(s) to which they are normally assigned; and the specific assignment limitations, which are explained in paragraph (d) of this section:

Railroad radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
72.0 to 76.0	Operational fixed	1
72.44	Mobile	2
72.48	do	2
72.52	do	2

10,550 to 10,680	do	

(d) Explanation of assignment limitations appearing in the frequency table of paragraph (c) of this section:

(1) The frequencies available for assignment to operational fixed stations in the band 72.0 to 76.0 MHz are listed in § 90.257(a)(1). These frequencies which are shared with other services, are available only in accordance with the provisions of § 90.257.

(2) This frequency is available on a shared basis in the Manufacturers, Special Industrial, and Railroad Radio Services and interservice coordination is required. All communications must be conducted within the boundaries or confines of railroad terminals or yards. All operations on this frequency are subject to the provisions of § 90.257(b).

(3) This frequency may be used for the following:

(i) End-to-end, fixed point-to-train, or train-to-train communications in connection with the operation of railroad trains over a track or tracks extending through yards and between stations upon which trains are operated by timetable, train order, or both, or the use of which is governed by block signals.

(ii) Intercommunication between adjacent base stations, provided interference is not caused to communications involving radio stations aboard railroad rolling stock.

(iii) Transmission of tone signals for signalling purposes or for remote control of locomotives, including slave locomotives placed within a train to assist the lead locomotive by providing, among other functions auxiliary starting, pulling and braking actions; and radio controlled cab indicator devices that are placed within a locomotive to give visual signals to the operator of the locomotive.

(4) This frequency may also be used for the transmission of tone or voice communications, including such communications when prerecorded, for purposes of automatically indicating abnormal conditions of trackage and railroad rolling stock when in motion, on a secondary basis to other stations on this frequency. All such operations shall be subject to the following:

(i) The output power shall not exceed 30 watts.

(ii) The bandwidth used shall not exceed that authorized to the licensee for voice transmissions on the frequency concerned.

(iii) The station shall be so designed and installed that it can normaly be activated only by its associated automatic control equipment and, in addition, it shall be equipped with a time delay or clock device which will deactivate the station within three (3) minutes following activation by the last car in the train.

(iv) Stations authorized pursuant to the provisions of this subparagraph are exempt from the station identification requirements of § 90.425.

(5) This frequeney is shared with and must be coordinated with the Special Industrial Radio Service in Puerto Rico and the Virgin Islands.

(6) In Puerto Rico and the Virgin Islands only, this frequency is available on a shared basis with remote pickup broadcast stations.

(7) In Puerto Rico and the Virgin Islands only, this frequency is not available to stations operating in the Railroad Radio Service.

(8) This frequency will be assigned only for transmitting hydrological or meteorological data. The use of this frequency is on a secondary basis to Federal Government stations, and the hydrological or meteorological data being handled must be made available on request to governmental agencies. Other provisions of this part notwithstanding, an operational fixed station operating on this frequency shall not engage in communications with any station in the mobile service unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations on this frequency should communicate with the Commission for instructions concerning the procedure to be followed in filing formal application.

(9) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to status in the Public Safety and Industrial Radio Services where they are assigned for land mobile operations.

(10) This frequency is shared in the Motor Carrier and Railroad Radio Services. It may be assigned only when all of the frequencies in the 450–460 MHz band allocated to the service in which the applicant is primarily eligible are assigned within 35 miles (56 km) of the proposed base station. Applications for this frequency must be coordinated with all services involved.

(11) This frequency may be assigned primarily for stations used for the purpose of controlling slave locomotives that are placed within a train to assist the lead locomotive by providing, among other functions, auxiliary starting, pulling, and braking actions. Additionally, on a secondary basis this frequency may be assigned for remote control of all types of locomotives and, within a railroad yard or terminal area, for remote control of cab indicator devices placed with a locomotive to give visual signals to the operator of the locomotive. (A1, A2, F1 or F2 emissions may be authorized).

(12) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(13) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(14) Assignment of frequencies for operational-fixed stations in the band 952 MHz and above is governed by Part 94 of this Chapter.

(15) This frequency band is available to stations in this services subject to the provisions of § 90.259.

(16) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(17) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Additional frequency available.* In addition to the frequencies shown in the frequency table of this section, the following frequencies are available in this service: (See also 90.253).

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the band 73.0–74.6 MHz may be assigned to stations authorized their use on or before December 1, 1961, but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(3) Base and mobile stations authorized as of April 1, 1968, to operate on frequency 161.61 MHz may continue to be authorized for such operation on a secondary basis to the Maritime Mobile service. The licensees of such stations may renew, modify, reinstate, or assign their licenses in those cases where such assignment accompanies a change of ownership of the licensee's business to the assignee, and may expand existing systems when using that frequency; however, they will not be authorized to establish any new systems on the frequency.

(4) Stations authorized for operation on or before June 11, 1962, on the frequencies 169.575, 170.375, 171.175, 171.975, or 406.050 MHz may continue to be authorized for such operation on a secondary basis to Government stations.

(5) The frequency band 33.00–33.01 MHz may be used for developmental operation subject to the provisions of Subpart P. Any type of emission other than pulsed emission may be used if the bandwidth occupied by the emission is contained within the assigned frequency band.

(f) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that:

(1) Additional frequencies above 25 MHz may be assigned in connection with operation of vehicular repeaters in accordance with § 90.247 notwithstanding this limitation.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation

§ 90.93 Taxicab radio service.

(a) *Eligibility.* Persons regularly engaged in furnishing to the public for hire a nonscheduled passenger land transportation service (which may also include the occasional transport of small items of property) not operated over a regular route or between established terminals are eligible to hold authorizations in the Taxicab Radio Service to operate radio stations for the transmission of communications essential to such activities of the licensee.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Taxicab Radio Service, together with the class of station(s) to which they are normally assigned; and the specific assignment limitations, which are explained in paragraph (c) of this section:

Taxicab radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
152.270	Base or mobile	
152.285	do	1
152.300	do	1, 2
152.315	do	1
152.330	do	2
152.345	do	1
152.360	do	1, 2
152.375	do	2
152.390	do	
152.405	do	1
152.420	do	1, 2
152.435	do	1
152.450	do	
157.530	Mobile	
157.545	do	1
157.560	do	1, 2
157.575	do	
157.590	do	
157.605	do	1
157.620	do	1, 2
157.635	do	1
157.650	do	
157.665	do	1
157.680	do	1, 2
157.695	do	1
157.710	do	
450 to 470	Fixed	
452.050	Base or mobile	
452.100	do	
452.150	do	
452.200	do	
452.225	do	
452.250	do	
452.275	do	
452.300	do	
452.350	do	
452.400	do	
452.450	do	
452.500	do	
457.050	Mobile	
457.100	do	
457.150	do	
457.200	do	
457.225	do	
457.250	do	
457.275	do	
457.300	do	
457.350	do	
457.400	do	
457.450	do	
457.500	do	
470 to 512	Base or mobile	4

Frequency or band	Class of station(s)	Limitations
Megahertz:		
806 to 821	Mobile	5
851 to 866	Base or mobile	5
952 and above.	Operational fixed	6
1427 to 1435	Base, mobile, or operational fixed	7
2450 to 2500	Base or mobile	8
5650 to 5925	....do	9
10,500 to 10,680	....do	

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) This frequency is available for assignment only to base or mobile stations operating wholly within standard Metropolitan Areas having 50,000 or more population (1950 Census).

(2) This frequency is available on a secondary basis to Business Radio Service licensees for use at stations outside Standard Metropolitan Areas having 50,000 or more population (1950 Census).

(3) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public-Safety and Industrial Radio Services where they are assigned for land mobile operations.

(4) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(5) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(6) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(7) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(8) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific or medical (ISM) devices.

(9) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(d) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area. The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that: (See also § 90.253)

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

(3) The frequency band 33.00–33.01 MHz may be used for developmental operation subject to the provisions of Subpart P. Any type of emission other than pulsed emission may be used if the bandwidth occupied by the emission is contained within the assigned frequency band.

§ 90.95 Automobile emergency radio service.

(a) *Eligibility.* Persons regularly engaged in any of the following activities are eligible to hold authorizations in the Automobile Emergency Radio Service to operate radio stations for transmission of communications required for dispatching repair trucks, tow trucks or other road service vehicles to disabled vehicles.

(1) The operation of a private emergency road service for disabled vehicles by associations of owners of private automobiles.

(2) The business of providing to the general public an emergency road service for disabled vehicles.

(b) *Special permissible communications.* On a secondary basis, the transmission of communications by associations of owners of private automobiles which provide emergency road service for the purpose of reporting traffic conditions is authorized.

(c) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Automobile Emergency Radio Service, together with the class of station(s) to which they are normally assigned; and the specific assignment limitations which are explained in paragraph (c) of this section:

Automobile emergency radio service frequency table

Frequency or band	Class of station(s)	Limitations
Megahertz:		
150.815	Base or mobile	1, 2, 3
150.830	....do	1, 2, 3
150.845	....do	1, 2, 3
150.860	....do	1, 2, 3
150.875	....do	1, 2, 3
150.890	....do	1, 2, 3
150.905	....do	3, 4
150.920	....do	3, 4
150.935	....do	3, 4
150.950	....do	3, 4
150.965	....do	3, 4
157.470	....do	5, 6
157.485	....do	5, 6
157.500	....do	5, 6
157.515	....do	5, 6
460 to 470	Fixed	7
455.525	Base or mobile	8
455.550	....do	8
462.575	....do	8
462.600	....do	8
470 to 512	Base or mobile	9
806 to 821	Mobile	10
851 to 866	Base or mobile	10
952 and above.	Operational fixed	11
1427 to 1435	Operational fixed, base, or mobile.	12
2450 to 2500	Base or mobile	13
5650 to 5925	....do	14
10,500 to 10,680	....do	

(d) Explanation of assignment limitations appearing in the frequency table of paragraph (c) of this section:

(1) This frequency is available only for stations (other than those aboard aircraft) which are operated by or on behalf of persons who provide to the general public an emergency road service for disabled vehicles.

(2) Only one of the frequencies 150.815, 150.830, 150.845, 150.860, 150.875, or 150.890 MHz may be assigned to the same licensee in a given area.

(3) This frequency is not available to stations in this service in Puerto Rico or the Virgin Islands.

(4) This frequency is available for assignment to base stations and to mobile stations (other than those aboard aircraft) which are operated by or on behalf of associations of owners of private automobiles.

(5) This frequency is available for assignment to stations, other than those aboard aircraft, which are operated by or on behalf of persons who provide to the general public an emergency road service for disabled vehicles: Except that; at the discretion of the Commission this frequency may also be operated by or on behalf of associations of owners of private automobiles upon a showing that all other frequencies available for assignment to such stations are currently assigned to other stations for use in the area concerned and that the use of the requested frequency, in each case, will be less likely to result in mutual harmful interference than would the use of a frequency otherwise available to the station.

(6) Only one of the frequencies 157.470, 157.485, 157.500, or 157.515 MHz may be assigned to the same licensee in a given area.

(7) The frequencies available for use at fixed stations in this band, and the requirements for assignment are set forth in § 90.261. Operation on these frequencies is secondary to stations in the Public-Safety and Industrial Radio Services where they are assigned for land mobile operations.

(8) This frequency is available for assignment to stations which are operated by or on behalf of associations of owners of private automobiles for single-frequency operation.

(9) Subpart L contains rules for assignment of frequencies in the 470–512 MHz band.

(10) Subpart M contains rules for assignment of frequencies in the 806–821 and 851–866 MHz bands.

(11) Assignment of frequencies for operational-fixed stations in the bands 952 MHz and above is governed by Part 94 of this Chapter.

(12) This frequency band is available to stations in this service subject to the provisions of § 90.259.

(13) Available only on a shared basis with stations in other services, and subject to no protection from interference due to the operation of industrial, scientific, or medical (ISM) devices.

(14) Use of this frequency band is limited to developmental operation and is subject to the provisions of Subpart P.

(e) *Limitation on number of frequencies assignable.* Normally only one frequency, or pair of frequencies in the paired frequency mode of operation, will be assigned for mobile service operations by a single applicant in a given area.

The assignment of an additional frequency or pair of frequencies will be made only upon a satisfactory showing of need, except that: (See also § 90.253.)

(1) The frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz are available in accordance with § 90.255.

(2) Frequencies in the 25–50 MHz, 150–170 MHz, and 450–512 MHz bands, and the frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–027 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

(3) The frequency band 33.00–33.01 MHz may be used for developmental operation subject to the provisions of Subpart P. Any type of emission other than pulsed emission may be used if the bandwidth occupied by the emission is contained within the assigned frequency band.

Subpart F—Radiolocation Service

§ 90.101 Scope.

The Radiolocation Service accommodates the use of radio methods for determination of direction, distance, speed, or position for purposes other than navigation. Rules as to eligibility for licensing, permissible communications, frequencies available, and any special requirements are set forth in the following section, except that the operation of Automatic Vehicle Monitoring (AVM) systems is governed by interim provisions set forth in § 90.239.

§ 90.103 Radiolocation service.

(a) *Eligibility.* The following persons are eligible for authorizations in the Radiolocation Service to operate stations to determine distance, direction, speed, or position by means of radiolocation devices, for purposes other than navigation:

(1) Persons having a requirement to provide a radiolocation service in connection with their own activities.

(2) A corporation or association that will furnish radiolocation service to other persons.

(3) A corporation that will furnish a nonprofit radio communication service to its parent corporation, to another subsidiary of the same parent, or to its own subsidiary where the party to be served is regularly engaged in any of the eligibility activities set forth in this paragraph.

(b) *Frequencies available.* The following table indicates frequencies available for assignment to stations in the Radiolocation Service, together with the class of station(s) to which they are normally assigned, and the specific assignment limitations, which are explained in paragraph (c) of this section:

Radiolocation service frequency table

Frequency or band	Class of station(s)	Limitations
Kilohertz:		
70 to 90	Radiolocation land or mobile.	1
90 to 110	Radiolocation land	
110 to 130	Radiolocation land or mobile.	2
1605 to 1715	....do	4, 5, 6
1715 to 1750	....do	5, 6
1750 to 1800	....do	5, 6, 7
3230 to 3400	....do	6, 8
Megahertz:		
2450 to 2500	....do	9
2600 to 3100	....do	10, 11
3100 to 3300	....do	11
3300 to 3500	....do	12, 13
3500 to 3700	....do	13
5250 to 5350	....do	13
5350 to 5460	....do	10, 14
5460 to 5470	....do	10, 15
5470 to 5600	....do	10, 11
5600 to 5650	....do	10, 16
8500 to 8600	....do	12, 17
9000 to 9200	....do	10, 14
9200 to 9300	....do	12
9300 to 9500	....do	10, 15, 18
9500 to 10,000	....do	12
10,000 to 10,500	....do	12, 13, 19
10,500 to 10,550	....do	20
10,550 to 14,000	....do	12
15,700 to 17,700	....do	12
24,050 to 24,500	....do	12
33,400 to 36,000	....do	12

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) This frequency band is shared with and stations operating in this frequency band in this service are on a secondary basis to stations licensed in the International Fixed Service (Part 23 of the Commission's Rules).

(2) This frequency band is shared with and stations operating in this frequency band in this service are on a secondary basis to the LORAN Navigation System; all operations are limited to radiolocation land stations in accordance with Footnote US104, Section 2.106 of this Chapter.

(3) This frequency band is shared with and stations operating in this frequency band in this service are on a secondary basis to stations licensed in the International Fixed Service (Part 23 of this Chapter) and the Maritime Mobile Service (Part 83 of this Chapter).

(4) Non-Government radiolocation service in this band is on a secondary basis to stations in the aeronautical radionavigation service operating on 1638 or 1708 kHz.

(5) Station assignments on frequencies in this band will be made subject to the conditions that the maximum output power shall not exceed 375 watts and the maximum authorized bandwidth shall not exceed 2 kHz.

(6) Because of the operation of stations having priority on the same or adjacent frequencies in this or in other countries, frequency assignments in this band may either be unavailable or may be subject to certain technical or operational limitations. Therefore, applications for frequency assignments in this band shall include information concerning the transmitter output power; the type and directional characteristics of the antenna and the minimum hours of operation (GMT).

(7) This band is shared with the Disaster Communications Service (Part 99) and operations are on a secondary basis to that service between local sunset and local sunrise, or at any time during an actual or imminent disaster. Local sunrise and sunset times shall be derived from the 1946 American Nautical Almanac. Each frequency assignment in this band is on an exclusive basis within the daytime primary service area to which assigned. The daytime primary service area is the area where the signal intensities are adequate for radiolocation purposes during the hours from sunrise to sunset from all stations in the radiolocation system of which the station in question is a part; that is, the primary service area of the station coincides with the primary service area of the system. The normal minimum geographical separation between stations of different licensees shall be at least 580 km. (360 mi.) when the stations are operated on the same frequency or on different frequencies separated by less than 3 kHz. Where geographical separation of less than 580 km. (360 mi.) is desired under these circumstances it must be shown that the desired separation will result in protection ratio of at least 20 decibels throughout the daytime primary service area of other stations. Applications in this band are placed on Public Notice in accordance with Section 1.962 of this Chapter. Where the number of applicants requesting authority to serve an area exceeds the number of frequencies available for assignment; or where it appears that fewer applicants or licensees than the number before it should be given authority to serve a particular area; or where it appears that an applicant, either directly or indirectly, seeks to use more than 25 kHz of the available spectrum space in this band, the applications may be designated for hearing.

(8) Frequencies in this band may only be assigned to radiolocation stations which are also assigned frequencies in the 1605–1800 kHz band, provided the use of frequencies in this band is necessary for the proper functioning of the particular radiolocation system. Operations in this band are on a secondary basis to stations operating in accordance with the Commission's Table of Frequency Allocations contained in § 2.106 of this Chapter.

(9) This band is allocated to the radiolocation service on a secondary basis to other fixed or mobile services and must accept any harmful interference that may be experienced from such services or from the industrial, scientific, and medical (ISM) equipment operating in accordance with Part 18 of this Chapter.

(10) Speed measuring devices will not be authorized in this band.

(11) This frequency band is shared with and is on a secondary basis to the Maritime Radionavigation Service (Part 83) and to the Government Radiolocation Service.

(12) This frequency band is shared with and is on a secondary basis to the Government Radiolocation Service.

(13) Operations in this band are limited to survey operations using transmitters with a peak power not to exceed 5 watts into the antenna.

(14) This frequency band is shared with and is on a secondary basis to the Aeronautical Radionavigation Service (Part 87) and to the Government Radiolocation Service.

(15) The non-Government Radiolocation Service in this band is secondary to the Maritime Radionavigation Service (Part 83), the Aeronautical Radionavigation Service (Part 87) and the Government Radiolocation Service.

(16) This frequency band is shared with and is on a secondary basis to the Maritime Radionavigation Service (Part 83) and the Government Meteorological Aids Service.

(17) Operation in this frequency band is on a secondary basis to airborne Doppler radars at 8800 MHz.

(18) Radiolocation installations will be coordinated with the Government Meteorological Aids Service, and insofar as practicable, will be adjusted to meet the needs of that service.

(19) Operations in this band are on a secondary basis to the Amateur Radio Service (Part 97). Pulsed emissions are prohibited.

(20) This band is restricted to radiolocation systems using type A0 emission with a power not to exceed 40 watts into the antenna.

(21) Non-Government pulse-ranging radiolocation stations in this band are secondary to the Government Radiolocation Service, the Amateur Radio Service and the Amateur Satellite Service. Stations authorized pursuant to this footnote must cease operation on or before January 1, 1981. All power and antenna height specifications shall be made on a case-by-case basis.

(d) *Additional frequencies for automatic vehicle monitoring (AVM) systems.* The frequency bands 903–904 MHz, 904–912 MHz, 918–926 MHz, and 926–927 MHz may be assigned for AVM operations in accordance with § 90.239 except that for corporations rendering service to others under paragraph (a) (2) of this section, such operations are limited to the 904–912 MHz and 918–926 MHz bands.

(e) *Other additional frequencies available.* Radiolocation stations in this service may be authorized, on request, to use frequencies allocated exclusively to Federal Government stations, in those instances where the Commission finds, after consultation with the appropriate Government agency or agencies, that such assignment is necessary or required for coordination with Government activities.

Subpart G—Applications and Authorizations

§ 90.111 Scope.

This subpart contains the procedures and requirements for the filing of applications for authority to operate radio facilities under this part.

§ 90.113 Station authorization required.

No radio transmitter shall be operated in the services governed by this part except under and in accordance with a proper authorization granted by the Commission.

§ 90.115 Ineligibility of foreign governments.

No station authorization in the radio services governed by this part shall be granted to or held by a foreign government or its representative.

§ 90.117 Applications for radio station authorizations.

Persons desiring a radio station authorization must first submit an appropriate application. Prescribed application forms are listed in § 90.119. They may be obtained from the Washington, D.C., office of the Commission, or from any of its engineering field offices. (See § 90.145 for information regarding special temporary authorizations.)

§ 90.119 Application forms.

The following application forms shall be used—

(a) Except as provided for in paragraph (c) of this section, Form 400 shall be used to apply:

(1) For new base, fixed, or mobile station authorizations governed by this part.

(2) For modification or for modification and renewal of an existing authorization. (See § 90.135.)

(3) For the Commission's consent to the assignment of an authorization to another person or entity. In addition, the application shall be accompanied by a letter from the assignor setting forth his desire to assign all right, title, and interest in and to such authorization, stating the call sign and location of the station, and that the assignor will submit his current station authorization for cancellation upon completion of the assignment. Form 1046 may be used in lieu of this letter.

(b) Except as provided for in paragraph (c) of this section, Form 405–A shall be used to apply for a renewal without modification of a station license.

(c) Form 425 shall be used in lieu of Form 400 and 405(a) to submit applications specifying any frequency in the band 470–512 MHz.

(d) A separate application shall be submitted on FCC Form 703 whenever it is proposed to change, as by transfer of stock ownership, the control of a corporate licensee.

§ 90.121 Canadian registration.

Form 410 shall be filed by Canadian licensees desiring to operate in the United States under the terms of Article 2 and 3 of the Convention between the United States and Canada concerning Operation of Certain Radio Equipment or Stations (which entered into force May 15, 1952). This form may be obtained from the Department of Communications, Ottawa, Canada. That department should also be consulted by U.S. licensees desiring to operate in Canada.

§ 90.123 Full disclosures.

(a) Each application shall contain full and complete disclosures with regard to the real party or parties in interest and as to all matters required to be disclosed by the application forms.

(b) Each application shall be clear and complete in itself without cross reference to information previously filed. An application for modification of an existing station must show in precise detail all particulars of the desired operation, including those not affected by the modification.

§ 90.125 Who may sign applications.

(a) Except as provided in paragraph (b) of this section, applications, amendments thereto, and related statements of fact required by the Commission shall be personally signed by the applicant, if the applicant is an individual; by one of the partners, if the applicant is a partnership; by an officer, if the applicant is a corporation; or by a member who is an officer, if the applicant is an unincorporated association. Applications, amendments, and related statements of fact filed on behalf of eligible government entities, such as states and territories of the United States and political subdivisions thereof, the District of Columbia, and units of local government, including incorporated municipalities, shall be signed by such duly elected or appointed officials as may be competent to do so under the laws of the applicable jurisdiction.

(b) Applications, amendments thereto, and related statements of fact required by the Commission may be signed by the applicant's attorney in fact in case of the applicant's physical disability or of his absence from the United States. The attorney shall in that event separately set forth the reason why the application is not signed by the applicant. In addition, if any matter is stated on the basis of the attorney's belief only (rather than his knowledge), he shall separately set forth his reasons for believing that such statements are true.

(c) Only the original of applications, amendments, or related statements of fact need be signed; copies must, however, conform in all other particulars to such originals.

(d) Applications, amendments, and related statements of fact need not be signed under oath. Willful false statements made therein, however, are punishable by fine and imprisonment, U.S. Code, Title 18, Section 1001, and by appropriate administrative sanctions, including revocation of station license pursuant to Section 312(a)(1) of the Communications Act of 1934, as amended.

§ 90.127 Filing of applications.

(a) All applications for station authorizations and related correspondence shall be submitted to the Commission's Office at Washington, D.C. 20554, directed to the attention of the Secretary.

(b) Unless otherwise specified, an application should be filed at least sixty days prior to the desired date of Commission action. Applications for renewal should be filed no more than 90 days nor less than 30 days prior to the end of the license term. When timely and sufficient application for renewal of the license has been made, the license shall not expire until Commission action on the application has been completed.

§ 90.129 Supplemental information to be routinely submitted with applications.

Each application shall be accompanied by the appropriate information listed below:

(a) Evidence of frequency coordination as required by § 90.175.

(b) Description of any equipment proposed to be used if it does not appear on the Commission's current Radio Equipment List, Equipment Acceptable for Licensing, and designated for use under this part.

(c) A functional system diagram and a detailed description of the manner in which the interrelated stations will operate, if the station is part of a system involving two or more stations at different fixed locations.

(d) Agreements and statements required under § 90.179 if the stations will be cooperatively shared with others under the provisions of that section.

(e) Applicants proposing to construct a radio station in the vicinity of radio astronomy observatories in West Virginia or in the vicinity of a radio receiving zone in Colorado must submit the statements prescribed by § 90.177.

(f) Statements required in connection with developmental operation, as specified in § 90.505.

(g) The narrative statement required by Subpart I, Part 2 of this chapter concerning environmental impact, if required. See Section 1.1101–1.1319.

(h) Requests for authorization to communicate with foreign stations in accordance with § 90.19(c) or § 90.417;

(i) Showings required in connection with the use of frequencies in the band 806–866 MHz as specified in Subpart M.

(j) Any statements or showings required in connection with the use of the frequency requested.

(j) Any other statements or other data specifically required under special circumstances which are set forth in the applicable subpart of this part, by the particular form on which the application is filed or upon request by the Commission.

(k) If the applicant proposes to use a shared (community) repeater, the name of the owner of the shared repeater, (2) the names and call signs of the other licensees of that repeater, and (3) the identification (if any) assigned the repeater by the Commission.

§ 90.131 Amendment or dismissal of applications.

(a) Any application, except for mutually exclusive applications or those against which a petition to deny has been filed, may be amended as a matter of right at any time prior to the time the application is granted or designated for hearing. Each amendment to an application shall be signed and submitted in the same manner as required for the original application. The procedures for amending applications mutually exclusive under this part, applications against which a petition to deny has been filed, and applications designated for hearing are set forth in § 1.918.

(b) Any application may, upon written request signed by the applicant or his attorney, be dismissed without prejudice as a matter of right prior to the time the application is granted or designed for hearing.

§ 90.135 Modification of license.

(a) The following changes in authorized stations require an application for modification of license:

(1) Any change in frequency.

(2) Any change in the type of emission.

(3) Any increase in power beyond that authorized.

(4) Any increase in antenna height beyond that authorized.

(5) Any increase in the number of transmitters or control points beyond that authorized.

(6) Any change in the authorized location of the base or fixed transmitter or control point or the area of mobile operation

(7) Any change in ownership, control or corporate structure.

(8) Any change in class of station.

(b) The following changes do not require an application for modification of license:

(1) Change in mailing address of licensee.

(2) Change in name only of licensee, without changes in the ownership, control, or corporate structure.

(3) Any other change not listed in Paragraph (a) of this section.

(4) In case of a change listed in Subparagraph (1) or (2) of this paragraph, the licensee shall promptly notify the Commission of such change.

The notice, which may be in letter form, shall contain the name and address of the licensee as they appear in the Commission's records, the new name or address, the call signs and classes of all radio stations authorized to the licensee under this part and the radio service in which each station is authorized. The notice shall be sent to the Secretary, Federal Communications Commission, Washington, D.C. 20554, and to the Engineer in Charge of the Radio District in which the station is located, and a copy shall be maintained with the license of each station until a new license is issued.

§ 90.137 Applications for operation at temporary locations.

(a) An application for authority to operate a base station or a fixed station at temporary locations may be submitted in accordance with the following:

(1) When one or more individual transmitters are to be operated by a licensee as a base station or as a fixed station as unspecified or temporary locations for indeterminate periods, such transmitters may be considered to comprise a single station intended to be operated at temporary locations.

(2) The application must specify the general geographic area within which the operation will be confined. The area may be specified as a city, a county or counties, a state or states or other definable geographic area.

(b) When any unit or units of a base station or fixed station which are authorized for operation at temporary locations actually remain or are intended to remain at the same location for more than one year, an application for a separate authorization specifying the fixed location shall be made as soon as possible, but not later than thirty days after the expiration of the one year period.

§ 90.139 Preliminary processing of applications.

(a) Applications received for filing are given a file number. The assignment of a file number to an application is for administrative convenience and does not indicate the acceptance of the application for filing and processing.

(b) Applications which are incomplete with respect to answers, supplementary statements, execution, or other matters of a formal character shall be deemed to be defective and may be returned to the applicant with a brief statement as to such defects. In addition, if an applicant is requested by the Commission to file any additional documents or information not included in the prescribed application form, failure to comply with such request will be deemed to render the application defective, and such application may be dismissed. Applications will also be deemed to be defective and may be returned to the applicant in the following cases:

(1) Statutory disqualification of applicant;

(2) Proposed use or purpose of station would be unlawful;

(3) Requested frequency is not allocated for assignment for the service proposed.

(c) Applications which are not in accordance with the provisions of this chapter, or other requirements of the Commission, will be considered defective and may be dismissed unless accompanied by a request in accordance with § 90.151 of this part.

§ 90.141 Resubmitted applications.

Any application which has been returned to the applicant for correction will be processed in its original position in the processing line if it is resubmitted and received by the Commission within 30 days (45 days outside continental United States) from the date on which it was returned to the applicant. Otherwise it will be treated as a new application for the purpose of processing considerations.

§ 90.143 Grants of applications.

(a) The Commission will grant an application for a station authorization

without a hearing if it is in proper form, and conforms with all rule requirements, and would serve the public interest, convenience or necessity.

(b) The Commission may grant any application in part, or add privileges, terms, or conditions not requested. When such action is taken without a hearing, the applicant may accept the authorization as granted, or may return it to the Commission along with a written request for a hearing. Any such request for hearing must be made within 30 days from the date of the grant, or from its effective date, if a later date is specified. Upon receipt of a request for hearing, the Commission will vacate the grant and designate the application for hearing in the usual manner.

§ 90.145 Special temporary authority.

(a) In circumstances requiring the temporary use of radio facilities, the Commission may issue special temporary authority for new or modified operations. A request for special temporary authority may be made in letter form signed in accordance with § 90.125 of this part. It should be submitted, in duplicate, at least 10 days prior to the date of the proposed operation. However, in cases of emergency involving danger to life or property, or due to damage to equipment, the request may be made by telephone or telegraph under the condition that a letter request is submitted within the following 10 days. All requests for special temporary authority shall be clear and complete within themselves and shall not rely on any pending application.

(b) Every request for special temporary authority should contain the following information:

(1) Name and address of the applicant;

(2) Need for special action, including a description of any emergency or damage to equipment;

(3) Type of operation to be conducted (such as field test, dispatching, etc.);

(4) Purpose of operation;

(5) Times and dates of operation;

(6) Class of station and name of radio service;

(7) Location, including geographical coordinates if known, of transmitter and/or mobile area of operations;

(8) Number of fixed transmitters and number of mobile units;

(9) Operating frequency;

(10) Output power of the transmitter;

(11) Type of emission;

(12) Description of antenna, including height above ground and power gain;

(13) Statement of eligibility for a radio service under this part.

§ 90.147 Mailing address furnished by licensee.

Each application shall set forth and each licensee shall furnish the Commission with an address in the United States to be used by the Commission in serving documents or directing correspondence to that licensee. Unless any licensee advises the Commission to the contrary, the address contained in the licensee's most recent application will be used by the Commission for this purpose.

§ 90.149 License term.

(a) Licenses for stations authorized under this part will normally be issued for a term of five years from the date of original issuance, modification, or renewal, except that, in some instances, a term of from one to five years will be applied, the term varying as may be necessary to permit the orderly scheduling of renewal applications.

(b) Authorizations for stations engaged in developmental operation under subpart P of this part will be issued upon a temporary basis for a specific period of time, but in no event to extend beyond one year from date of original issuance, modification or renewal.

§ 90.151 Requests for waiver.

Requests for waiver shall show the nature of the waiver or exception desired, and set forth the reasons in support thereof to include a showing that unique circumstances are involved and that there is no reasonable alternative solution within existing rules. Applications may be dismissed if the accompanying petition for waiver of rules does not set forth reasons which, sufficient if true, would justify a waiver or exception.

§ 90.153 Assignment of station authorization.

A station authorization and the rights it grants shall not be transferred, assigned, or in any manner disposed of to any person, unless the Commission shall, after obtaining full information, decide that the transfer, assignment, or disposal is in the public interest, convenience or necessity and give its consent in writing.

§ 90.155 Time in which station must be placed in operation.

All stations authorized under this part must be placed in operation within eight months from the date of grant or the authorization shall be invalid and must be returned to the Commission for cancellation.

§ 90.157 Discontinuance of station operation.

If a station licensed under this part discontinues operation on a permanent basis, the licensee shall forward the station license to the Commission for cancellation. A copy of the request for cancellation shall be sent to the Engineer in Charge of the district in which the station is located. For the purposes of this section, any station which has not operated for one year or more is considered to have been permanently discontinued.

Subpart H—General Policies Governing the Intersystem Assignment Coordination and Use of Frequencies

§ 90.171 Scope.

This Subpart contains detailed information concerning the policies under which the Commission assigns frequencies for the use of licensees under this part, frequency coordination procedures, and procedures under which licensees may cooperatively share radio facilities.

§ 90.173 Policies governing the assignment of frequencies.

(a) The frequencies which ordinarily may be assigned to stations in the services governed by this part are listed in Subparts B, C, D, E, and F of this part. Except as otherwise specifically provided in this part, frequencies assigned to land mobile stations are available on a shared basis only and will not be assigned for the exclusive use of any licensee.

(b) All applicants and licensees shall cooperate in the selection and use of frequencies in order to reduce interference and make the most effective use of the authorized facilities. Licensees of stations suffering or causing harmful interference are expected to cooperate and resolve this problem by mutually satisfactory arrangements. If the licensees are unable to do so, the Commission may impose restrictions including specifying the transmitter power, antenna height, or area or hours of operation of the stations concerned. Further the use of any frequency at a given geographical location may be denied when, in the judgment of the Commission, its use in that location is not in the public interest; the use of any frequency may be restricted as to specified geographical areas, maximum power, or such other operating conditions, contained in this part or in the station authorization.

(c) Frequencies allocated for Federal government radio stations under Executive Order of the President may be authorized for the use of stations in these services upon appropriate showing by the applicant that such assignment is necessary for inter-communication with government stations or required for coordination with activities of the Federal Government, and where the Commission finds, after consultation with the appropriate government agency or agencies, that such assignment is necessary.

(d) The radio facilities authorized under this part are intended for use in connection with and as an adjunct to the primary governmental or business activities of the licensee.

(e) Persons requesting authority to operate in the band 25–50 MHz should recognize that this band is shared with various services in other countries and that harmful interference may be caused by the propagation of signals in this band from distant stations. No protection from such harmful interference generally can be expected.

(f) In the 150–170 MHz band, no application will be granted which proposes a base station located less than 16 km. (10 mi.) from an existing base station on a frequency 15 kHz removed. In the Taxicab Radio Service, the minimum separation is 12 km. (7 mi.).

(g) In the states of Alaska and Hawaii, and in areas outside the continental limits of the United States and the adjacent waters, the frequencies above 150.8 MHz which are listed elsewhere in this part as available for assignment to base stations or mobile stations in the Industrial and Land Transportation Radio Services, are also available for assignment to operational fixed stations in the same service, on a secondary basis.

(h) In the Local Government, Police, and Fire Radio Services, base stations may be authorized to operate on frequencies below 450 MHz which are available to mobile stations. In the Forestry-Conservation and Highway Maintenance Radio Services, base stations may be authorized to operate on any frequencies which are available to mobile stations. Such base station operation will be on a secondary basis only, and should it result in harmful interference to mobile stations, the base stations will be required to vacate such mobile-only frequency, if the interference cannot otherwise be eliminated.

(i) In the 450–470 MHz band, the frequencies are ordinarily assigned in pairs, with the mobile station transmit frequency 5 MHz above the paired base station transmit frequency. A mobile station may be assigned the frequency which would normally be assigned to a base station for single-frequency operation. However, this single-frequency operation may be subject to interference that would not occur to a two-frequency system.

§ 90.175 Frequency coordination requirements.

Except for applications listed in paragraph (e) of this section, each application: (1) for a new frequency assignment, or (2) for a change in existing facilities by increasing the authorized power, raising the authorized antenna height, or changing the authorized station location or the location of the antenna; or (3) for the addition of a base station within the licensee's existing area of operation, shall include a showing of frequency coordination as set forth in either paragraph (a) or (b) of this section.

(a) For frequencies below 470 MHz:

(1) A report based on a field study indicating the degree of probable interference to all existing co-channel stations within 120 km. (75 mi.) of the proposed station, together with a statement that all such co-channel licensees have been notified of the applicant's intention to apply. In addition, for frequencies in the range 150–170 MHz, a report based on a field study indicating the degree of probable interference to existing stations located between 16 and 56 km. (10 and 35 mi.) (12 and 56 km. for taxicabs) from the proposed station, operating on a frequency 15 kHz removed, and a statement that the licensee of all such stations have been notified of the applicant's intention to apply. Or,

(2) A statement from a frequency coordinating committee recommended the frequency which, in the opinion of the committee, will result in the least amount of interference to all existing stations operating in the particular area. The Committee's recommendations may appropriately include comments on technical factors such as power, antenna height and gain, terrain, and other factors which may serve to mitigate any contemplated interference. If the frequency recommended is in the 150–170 MHz band, is 15 kHz removed from a frequency which is available to another radio service, and is assignable only after coordination, the committee's statement shall affirmatively show that coordination with a similar committee for the other service has been accomplished.

(b) For frequencies between 470 and 512 MHz:

(1) A report showing that the frequencies applied for are available for assignment in accordance with the applicable loading and separation standards, as specified in § 90.317 and § 90.303, or:

(2) A statement from a frequency coordinating committee recommending specific frequencies which are available for assignment in accordance with the loading standards and mileage separations applicable to the specific radio service involved.

(c) Any recommendation submited in accordance with Subparagraphs (a)(2) or (b)(2) of this section is purely advisory in character and is not binding on either the applicant or the Commission. The recommendation may not contain statements implying that anyone other than the Commission has the power to grant or deny applications. Applicants are advised not to purchase radio equipment on specific frequencies until a valid authorization has been obtained.

(d) Applications for facilities near the Canadian border north of line A or east of line C in Alaska may require coordination with the Canadian government. See Section 1.955 of this chapter.

(e) The following applications need not be accompanied by evidence of frequency coordination:

(1) Applications in the Police, Highway Maintenance, or Forestry Conservation Radio Services from States requesting frequencies available only in accordance with a geographical assignment plan.

(2) Applications in the Special Emergency Radio Service, except as required by § 90.53(b)(8).

(3) Applications for a Federal Government frequency.

(4) Applications for a frequency allocated primarily for the operation of and affording no protection from industrial, scientific, and medical (ISM) devices, (27 MHz band).

(5) Applications for a frequency in the 72–76 MHz band for operational fixed stations.

(6) Applications for a frequency in the band 216–220 MHz.

(7) Applications for a frequency below 25 MHz.

(8) Applications for a frequency above 512 MHz.

(9) Applications for a frequency allocated primarily for developmental operation.

(10) Applications in the Business Radio Service for a frequency below 450 MHz where both frequencies immediately adjacent (± 20 or 30 kHz) are available for assignment in that service, or where the frequency is available pursuant to § 90.75(d)(4).

(11) Applications in the Special Industrial Radio Service or the Business Radio Service specifying an itinerant operation only.

(12) Application in the Radiolocation Radio Service.

§ 90.177 Protection of certain radio receiving locations.

This section pertains to applications for new or modified authorizations in the vicinity of the National Radio Astronomy Observatory, Green Bank, Pocahontas County, West Virginia, the Naval Radio Research Observatory, Sugar Grove, Pendleton County, West Virginia, or the Table Mountain Radio Receiving Zone, Boulder County, Colorado.

(a) Any applicant for a new permanent base or fixed station, or for a modification of an existing authorization which would change the frequency, power, antenna height, directivity, or location within the boundaries described in paragraph (b) of this section shall notify the Director, National Radio Astronomy Observatory, P. O. 2, Green Bank, West Virginia 24944, in writing, of the technical parameters of the proposal.

(1) The notification shall be made prior to, or simultaneously with the filing of the application with the Commission.

(2) The notification shall state the geographical coordinates of the antenna, antenna height, antenna directivity, proposed frequency, type of emission and effective radiated power.

(3) After receipt of such applications the Commission will allow a period of 20 days for comments or objections in response to the notifications indicated. If an objection to the proposed operation is received during the 20 day period from the National Radio Astronomy Observatory for itself or on behalf of the Naval Radio Research Observatory, the Commission will consider all aspects of the problem and take whatever action is deemed appropriate.

(4) The provisions of this paragraph do not apply to applications for mobile, temporary base, or temporary fixed stations.

(b) The area of concern for the National Radio Astronomy Observatory or the Naval Radio Research Observatory is the area bounded by 39°15′ N. on the north, 78°30′ W. on the east, 37°30′ N. on the south, and 80°30′ W. on the west.

(c) Protection for Table Mountain Radio Receiving Zone, Boulder County, Colorado. Applicants for a station authorization to operate in the vicinity of Boulder County, Colorado, under this part are advised to give due consideration, prior to filing applications, to the need to protect the Table Mountain Radio Receiving Zone from harmful interference. These are the Research Laboratories of the Department of Com-

merce, Boulder County, Colorado. To prevent degradation of the present ambient radio signal level at the site, the Department of Commerce seeks to ensure that field strengths at 40°07'50" N. Latitude, 105°14'40" W. Longitude, resulting from new assignments (other than mobile stations) or from modification or relocation of existing facilities do not exceed the following values:

Frequency range	Field strength (millivolt per meter) in authorized bandwidth of service	Power flux density [1] (decibel watt per square meter) in authorized bandwidth of service
Below 540 kHz	10	-65.8
540 to 1600 kHz	.50	-91.8
1.6 to 470 MHz	10	-65.8
470 to 890 MHz	.50	-78.2
Above 890 MHz	1	-85.8

[1] Equivalent values of power flux density are calculated assuming a free space characteristic impedance of 376.7≈120 π ohms.

(1) Advance consultation is recommended particularly for those applicants who have no reliable data indicating whether the field strength or power flux density figures in the above table would be exceeded by their proposed radio facilities. In such instance, the following is a suggested guide for determining whether coordination is appropriate:

(i) All stations within 2.4 km. (1.5 statute miles.)

(ii) Stations within 4.8 km. (3 statute miles) with 50 watts or more effective radiated power (ERP) in the primary plane of polarization in the azimuthal direction of the Table Mountain Radio Receiving Zone;

(iii) Stations within 16 km. (10 statute miles) with 1 kW or more ERP in the primary plane of polarization in the azimuthal direction of Table Mountain Receiving Zone;

(iv) Stations within 80 km. (50 statute miles) with 25 kW or more ERP in the primary plane of polariaztion in the azimuthal direction of Table Mountain Receiving Zone.

(2) Applicants concerned are urged to communicate with the Radio Frequency Management Coordinator, Department of Commerce, NOAA/OT/NBS, Time and Frequency Division, Boulder Laboratories, Boulder, Colorado 80302; in advance of filing their applications with the Commission.

(3) The Commission will not screen applications to determine whether advance consultation has taken place. However, applicants are advised that such consultation can avoid objections from the Department of Commerce or proceedings to modify any authorization which, in fact, permits a signal at the reference point in excess of the field strength specified herein.

§ 90.179 Cooperative use of radio stations.

This section will be composed in accordance with the decision in Docket 18921, now pending.

Subpart I—General Technical Standards

§ 90.201 Scope.

This subpart sets forth the general technical requirements for use of frequencies and equipment in the radio services governed by this part. Such requirements include standards for acceptability of equipment, frequency tolerance, modulation, emissions, power, and bandwidths. Special additional technical standards applicable to certain frequency bands and certain specialized uses are set forth in Subparts J, K, M, and N.

§ 90.203 Type acceptance required.

(a) Except as specified in paragraph (b) of this section, each transmitter utilized for operation under this part and each transmitter marketed as set forth in Section 2.803 (of Part 2) must be of a type which is included in the Commission's current Radio Equipment List as type accepted or type approved for use under this part; or, be of a type which has been type accepted or type approved by the Commission for use under this part in accordance with the procedures in subparagraph (2) of this paragraph.

(1) The Commission periodically publishes a list of equipment entitled "Radio Equipment List, Equipment Acceptable for Licensing." Copies of this list are available for public reference at the Commission's offices in Washington, D.C., and at each of its field offices. This list includes type accepted and type approved equipment and, also, until such time as it may be removed by Commission action, other equipment which appeared in this list on May 16, 1955.

(2) Any manufacturer of radio transmitting equipment (including signal boosters) to be used in these services may request type acceptance or type approval for such equipment following the procedures set forth in Subpart J of Part 2 of this chapter. Type acceptance or type approval for an individual transmitter or signal booster also may be requested by an applicant for a station authorization by following the procedures set forth in Part 2 of this chapter. Such equipment if approved or accepted will not normally be included in the Commission's "Radio Equipment List" but will be individually enumerated on the station authorization.

(b) Type acceptance is not required for the following:

(1) Transmitters used in developmental operations in accordance with Subpart P.

(2) Transmitters used for police zone and interzone stations authorized as of January 1, 1965.

(3) Transmitting equipment used in the band 1427–1435 MHz.

(4) Transmitters used in radiolocation stations in accordance with Subpart F authorized prior to January 1, 1974, for Public Safety and Land Transportation applications (Old Parts 89 and 93).

(5) Transmitters used in radiolocation stations in accordance with Subpart F authorized for industrial applications (Old Part 91).

(c) Radiolocation transmitters for use in Public Safety and Land Transportation applications marketed prior to January 1, 1974, must meet the applicable technical standards in this part, pursuant to Section 2.805 of this chapter.

(d) Radiolocation transmitters for use in Public Safety and Land Transportation applications marketed after January 1, 1974, must comply with the requirements of paragraph (a) of this section.

§ 90.205 Power.

(a) The power which may be used by a station in these services shall be no more than the minimum required for satisfactory technical operation commensurate with the size of the area to be served and local conditions which affect radio transmission and reception. In cases of harmful interference, the Commission may order a change in power or antenna height or both. Applications for authorizations must specify no more power than the actual power necessary for satisfactory operation.

(b) Except where otherwise specifically provided, the maximum power that will be authorized is as follows:

Frequency range (megahertz)	Maximum output power	Maximum effective radiated power (watts)
1.3 to 3	[1] 1500	
3 to 25	[1] [2] 750	
25 to 100	300	
100 to 216	[3] 350	
216 to 220	[3] [4] 350	[4]
220 to 470	[3] 350	
470 to 512		1000
806 to 821	[5]	[6]
851 to 866	[7]	[6]
1427 to 1435	[8]	
2450 to 2500	5	
2500 to 10,550	[6]	[6]
10,550 to 10,680	3	[6]
Above 10,680	[6]	[6]

[1] For single sideband operations (A3J emission) below 10 MHz, the authorized power shall be stated in terms of peak envelope power, which is the average power supplied to the antenna transmission line by a transmitter during 1 radio frequency cycle at the highest crest of the modulation envelope taken under conditions of the modulation envelope taken under conditions of normal operation. The maximum peak envelope power permitted is 2 kW.

[2] In the frequency band 3 to 6 MHz, stations in the industrial services and the radiolocation radio service may be authorized up to 1500 W.

[3] Except as noted in footnote 5 the maximum output power in the motor carrier, taxicab, railroad, and auto emergency radio services is 75 W.

[4] To be specified in the authorization.

[5] In the frequency band 450 to 470 MHz, stations in the land transportation radio services are limited to 75 W, however, they may be authorized up to 350 W for developmental operations in accordance with subpt. P.

[6] Specified in subpt. M.

[7] The output power of a transmitter on any authorized frequency in this band shall not exceed 200 W.

(c) The output power shall not exceed by more than 20 percent either the output power shown in the Radio Equipment List (available in accordance with Section 90.203(a)(1)) for transmitters included in this list or when not so listed, the manufacturer's rated output power for the particular transmitter specifically listed on the authorization.

§ 90.207 Types of emissions.

Normally operations authorized in the services governed by this part are intended to provide voice communications between stations. Accordingly, except as otherwise provided for in the following paragraphs, stations in these services will be authorized to use only A3 or F3 emission.

(a) Authorizations to use A3 or F3 emission also include the use of emissions for tone signals or signalling devices whose sole functions are to establish and to maintain communications and for operations in the Public Safety and Special Emergency Radio Services, to activate emergency warning devices used solely for the purpose of advising the general public or emergency personnel of an impending emergency situation.

(b) The use of F3 emission in these services will be authorized only on frequencies above 25 MHz.

(c) Only A3J emission will be authorized for telephony systems on frequencies below 25 MHz.

(d) For tone paging operations only A1, A2, F1, or F2 emission will be authorized.

(e) For radioteleprinter operations that may be authorized in accordance with § 90.237, only F2 or F9 emission will be authorized.

(f) For radiofacsimile operations that may be authorized in accordance with § 90.237, only F4 emission will be authorized.

(g) For AVM systems that may be authorized in accordance with § 90.239, only F1, F2, F3, F9, or P9 emission will be authorized.

(h) For telemetry operations only A1, A2, F1, F2, or F9 emission will be authorized.

(i) For call box operations that may be authorized in accordance with § 90.241, only A1, A2, F1, F2, or F3 emissions will be authorized.

(j) For radiolocation operations as may be authorized in accordance with Subpart F, unless otherwise provided for any type of emission may be authorized upon a satisfactory showing of need.

§ 90.209 Bandwidth limitations.

(a) Each authorization issued to a station licensed under this part will specify the maximum authorized bandwidth to be occupied by the emission. The bandwidth in kilohertz will appear as a prefix to the emission classification. The specified band will contain those frequencies upon which 99 percent of the radiated power appears, extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power.

(b) The maximum authorized bandwidth of emission corresponding to the type of emission specified in § 90.207 of this part and the maximum authorized frequency deviation in the case of frequency or phase modulated emission shall be as follows:

(1) For all type A1 emission, the maximum authorized bandwidth shall be 0.25 kHz.

(2) Except as noted in subparagraph 3, the maximum authorized bandwidth for type A3 emission shall be 8 kHz.

(3) For type A3J operations below 10 MHz, the bandwidth occupied by the emission shall not exceed 3500 Hz. The frequency coinciding with the center of the authorized frequency band of emission shall be the assigned frequency. Both the authorized carrier frequency and assigned frequency shall be specified in the authorization. The authorized carrier frequency shall be 1400 Hz lower in frequency than the assigned frequency. Only upper sideband emission shall be used. In the case of regularly available double sideband radiotelephone channels, and assigned frequency for A3J emission is available either 1.6 kHz below or 1.4 kHz above the double sideband radiotelephone assigned frequency.

(4) For all F3 emission, on frequencies below 947 MHz, the maximum authorized bandwidth shall be 20 kHz and the maximum authorized frequency deviation shall be 5 kHz. However, stations authorized for operation on or before December 1, 1961, in the frequency band 73.0–74.6 MHz may continue to operate with a bandwidth of 40 kHz and a deviation of 15 kHz. For stations operating on frequencies above 947 MHz, except as provided in subparagraph (5), of this section the maximum authorized bandwidth and frequency deviation will be specified in the station authorization.

(5) The maximum authorized bandwidth shall be 25 MHz in the frequency band 10,550–10,680 MHz and 50 MHz in the frequency bands above 16,000 MHz.

(6) For all other types of emissions the maximum authorized bandwidth shall not be more than that normally authorized for voice operations.

(c) Except as noted in paragraph (d), the mean power of emissions shall be attenuated below the mean output power of the transmitter in accordance with the following schedule:

(1) On any frequency removed from the assigned frequency by more than 50 percent, but not more than 100 percent of the authorized bandwidth: at least 25 decibels;

(2) On any frequency removed from the assigned frequency by more than 100 percent, but not more than 250 percent of the authorized bandwidth: at least 35 decibels;

(3) On any frequency removed from the assigned frequency by more than 250 percent of the authorized bandwidth: at least 43 plus 10 $\log_{10}$ (mean output power in watts) decibels or 80 decibels, whichever is the lesser attenuation.

(d) For single sideband operations (A3J) below 10 MHz, the carrier frequency power shall be at least 40 dB below the peak envelope power and the mean power of emissions shall be attenuated below the mean output power of the transmitter in accordance with the following schedule:

(1) On any frequency removed from the assigned frequency by more than 1.75 kHz up to and including 5.25 kHz: At least 25 dB;

(2) On any frequency removed from the assigned frequency by more than 5.25 kHz and up to and including 8.75 kHz: At least 35 dB;

(3) On any frequency removed from the assigned frequency by more than 8.75 kHz: At least 43 plus 10 $\log_{10}$ (mean output power in watts) dB.

(e) When radiation in excess of that specified in paragraphs (c) and (d) of this section results in harmful interference, the Commission may require appropriate technical changes in equipment to alleviate the interference.

§ 90.211 Modulation requirements.

(a) For those transmitters subject to the provisions of paragraph (d) of this section, the maximum audio frequency required for satisfactory radiotelephony intelligibility in the radio services governed by this part is considered to be 3000 Hertz. (2800 Hz for single sideband operations below 25 MHz) For all others, the overall frequency response of the audio and modulating circuits may correspond approximately with that required for satisfactory intelligibility.

(b) When amplitude modulation is used for radiotelephony, the modulation percentage shall be sufficient to provide efficient communication and normally should be maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(c) Each transmitter shall be equipped with a device which automatically prevents modulation in excess of that specified in this subpart which may be caused by greater than normal audio level. This requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

(d) Each transmitter in the frequency ranges 25 to 50, 72.0 to 73.0, 75.4 to 76, 150.8 to 174, 450 to 512, 806 to 821, and 851 to 866 MHz which is equipped with a modulation limiter in accordance with paragraph (c) of this section shall be equipped with an audio low-pass filter. Such filter shall be installed between the modulation limiter and the modulated stage and shall meet the specifications contained in paragraph (e) or (f) of this section. The provisions of this paragraph do not apply to transmitters of licensed radio-communications systems operating wholly within the limits of one or more of the territories or possessions of the United States or Alaska, or Hawaii, except those systems operating in the frequency ranges 806 to 821 MHz and 851 to 866 MHz.

(e) Except as provided in paragraph (f) of this section, at audio frequencies between 3 kHz and 15 kHz, the low-pass filter required by the provisions of paragraph (d) of this section shall have an attenuation greater than the attenuation at 1 kHz by at least

$$40 \log_{10} (f/3) \text{ decibels}$$

where "f" is the audio frequency in kHz. At audio frequencies above 15 kHz, the attenuation shall be at least 28 decibels greater than the attenuation at 1 kHz

(f) For stations authorized in the 450–470 MHz band on or after November 1, 1967, and for all stations authorized in the 470–512, 806–821, and 851–866 MHz bands, at audio frequencies between 3 kHz and 20 kHz, the low-pass filter required by the provisions of paragraph (d) of this section shall have an attenuation greater than the attenuation at 1 kHz by at least:

60 $\log_{10}$ (f/3) decibels.

where "f" is the audio frequency in kHz. At audio frequencies above 20 kHz, the attenuation shall be at least 50 decibels greater than the attenuation at 1 kHz.

§ 90.213 Frequency tolerance.

(a) A licensee in the services governed by this part shall maintain the carrier frequency of each authorized transmitter within the following percentage of the assigned frequency:

Frequency range	Fixed and base stations		Mobile stations	
	Over 200 W	200 W or less	Over 2 W	2 W or less
	Percent	*Percent*	*Percent*	*Percent*
Megahertz:				
Below 25 [1]	[2] 0.01	0.01	0.01	0.02
25 to 50	.002	.002	.002	.005
50 to 450	[3] .0005	.0005	.0005	.005
450 to 470	[4] [5] .00025	[4] [6] .00025	.0005	[6] .0005
470 to 512	[5] .00025	[5] .00025	.0005	.0005
806 to 821	[7] .00015	[7] .00015	.00025	.00025
851 to 866	.00015	.00015	.00025	.00025
1427 to 1435	[5] .03	[5] .03	.03	.03
2450 to 2500	([8] [9])		([8] [9])	
2500 to 10,550	([8] [9])		([8] [9])	
10,550 to 10,680	([8] [9])		([8] [9])	
Above 10,680	([8] [9])		([8] [9])	

[1] For single sideband radiotelephony operations below 30 MHz, the carrier frequency shall be maintained within 50 Hz of the authorized carrier frequency.
[2] Radiolocation stations operating in frequency bands above 130 kHz must operate with a frequency tolerance of 0.005 pct.
[3] Stations in the petroleum radio service used in geographical operations and employing nonvoice techniques must operate with a frequency tolerance of 0.005 pct.
[4] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73.0–74.6 MHz may operate with a frequency tolerance of 0.006 pct.
[5] Operational fixed stations controlling mobile relay stations, (through use of the associated mobile frequency) may operate with a frequency tolerance of 0.0005 pct.
[6] A frequency tolerance of 0.0005 pct is permitted in the railroad radio service for base stations operating on 452.925, 452.950, 457.925, or 457.950 MHz and used for remote control purposes in railroad yard and terminal areas.
[7] For control stations, the frequency tolerence is 0.00025 pct.
[8] For fixed stations with a power above 200 W, the frequency tolerence is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power at 120 W or less and using time division multiplex the frequency tolerence may be increased to 0.05 pct.
[9] To be specified in the station authorization.
[10] Radiolocation equipment using pulse modulation shall meet the following frequency tolerance: The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where T is the pulse duration in microseconds.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this section, the power of a transmitter shall be the maximum rated output power as specified by the manufacturer.

§ 90.215 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of two watts is maintained within the tolerance prescribed in Section 91.213. This determination shall be made, and the results entered in the station records in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the carrier frequency or its stability;

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorizations stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may increase the transmitter power input;

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter, which is authorized to operate with an output power in excess of two watts, does not exceed the limits specified in this part. This determination shall be made and the following results entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the modulation characteristics.

(d) The determinations required by paragraphs (a), (b), and (c) of this section may, at the opinion of the licensee, be made by a qualified engineering measurement service, in which case the required record entries shall show the name and address of the engineering measurement service as well as the name of the person making the measurements.

(e) In the case of mobile transmitters, the determinations required by paragraphs (a) and (c) of this section may be made at a test or service bench: Provided, That the measurements are made under load conditions equivalent to actual operating conditions; and provided further, that after installation in the mobile unit the transmitter is given a routine check to determine that it is capable of being received satisfactorily by an appropriate receiver.

§ 90.217 Exemption from technical standards.

Transmitters used at stations licensed in the Business Radio Service which have an output power not exceeding 120 milliwatts are exempt from the technical requirements set out in this subpart: Provided, however, that the sum of the bandwidth occupied by the emitted signal plus the bandwith required for frequency tolerance shall be so adjusted that any emission appearing on a frequency 40 kHz or more removed from the assigned frequency is attenuated at least 30 dB below the unmodulated carrier. Such transmitters may operate in the continuous carrier transmit mode.

Subpart J—Non-Voice and Other Specialized Operations

§ 90.231 Scope.

This subpart sets forth requirements and standards for licensing and operation of non-voice and other specialized radio uses (other than radiolocation). Such uses include secondary signalling, radioteleprinter, radiofacsimile, automatic vehicle monitoring (AVM), radio call box, relay, vehicular repeater, and control station operations.

§ 90.233 Secondary base/mobile non-voice signalling operations.

On a secondary basis to voice operations, the use of A2, A9, F2, or F9 emission may be authorized to base/mobile operations in accordance with the following limitations and requirements:

(a) Authorizations are limited to mobile service frequencies below 950 MHz.

(b) Maximum duration of a transmission for each distinct non-voice message, including automatic repeats of the message, may not exceed two seconds. There must be a break in the carrier between each such transmission.

(c) Required station identification for non-voice operations must be made by F3 or A3 emission and may be given by the base station for a base/mobile system.

(d) Secondary non-voice operations under this section may not be authorized for tone paging, telemetry, radiolocation, AVM, radioteleprinter, radiofacsimile, or radio call box operations. These operations are authorized under other sections of this part.

§ 90.235 Secondary fixed tone signalling and alarm operations.

In the Local Government, Police, Fire, Highway Maintenance, Forestry Conservation, Power, and Petroleum Radio Services, fixed operations may be authorized for tone or impulse signalling on mobile service frequencies above 25 MHz within the area normally covered by the licensee's mobile system on a secondary basis to the primary mobile service operation of any other license for the purposes described in paragraphs (a) and (b):

(a) In the Public Safety Radio Services, the only purposes for which such secondary signalling may be used are:

(1) Indication of equipment malfunction.

(2) Actuation of a device to indicate the presence of an intruder, fire, or other hazardous condition on the property under the protection of the licensee.

(3) Indication of an abnormal condition in facilities under the jurisdiction of the licensee that, if not promptly reported, would result in danger to human life.

(4) Transmissions that may be necessary to verify status of equipment; adjust operating conditions; correct any abnormal condition; or to activate devices that alert the public to a condition affecting the imminent safety of life or property.

(5) Confirmation of status, when an operation or correction has been accomplished, or when an alerting device has been activated.

(b) In the Power and Petroleum Radio Services, the only purposes for which such secondary signalling may be used are:

(1) Indication of failure of equipment or service used in the facilities of the licensee.

(2) Indication of an abnormal condition in the production, transmission, collection, distribution, refining, or transporting facilities of the licensee, which if not promptly corrected would result in failure of the equipment affected.

(3) Transmission from the point where alarms or other operational data are received as may be necessary to verify status of equipment or processes; verify or adjust operating conditions; restore lost service; place standby equipment in operation; or to correct any abnormal conditions which would otherwise result in the immediate or continued failure in the licensee's operations.

(4) Confirmation of status or operating conditions, or that an operation or correction intended to be accomplished in subparagraph (3) of this paragraph has occurred.

(c) All such secondary signalling shall be subject to the following technical requirements:

(1) The bandwidth shall not exceed that authorized to the licensee for the primary operations on the frequency concerned.

(2) The output power shall not exceed 30 watts (at the remote site).

(3) A1, A2, A9, F1, F2, and F9 emission may be authorized. In the Police Radio Service A3 or F3 emission may also be authorized.

(4) For systems authorized in the Public Safety Services after June 20, 1975, to be used for the purposes outlined in paragraph (a) of this section, the maximum duration of any one non-voice signal may not exceed two seconds and shall not be transmitted more than three times. The maximum duration of any one voice alarm shall not exceed six seconds and shall not be transmitted more than three times. For systems authorized prior to this date, any one alarm or warning may be transmitted a maximum of five times and each transmission shall not exceed six seconds; such system to include existing facilities and additional facilities which may be authorized as a clear and direct expansion of the existing system.

(5) For systems authorized in the Petroleum Radio Service after June 1, 1976, each transmission for any one alarm, warning, corrective action, or requirement, positive confirmation, checkback, or other purpose set forth in paragraph (b) of this section, shall be limited to a maximum duration of two seconds and shall not be repeated more than three times. For systems authorized prior to June 1, 1976, any one alarm or warning may be transmitted a maximum of five times and each transmission may not exceed six seconds.

(6) For systems authorized in the Power Radio Service after June 1, 1976, each transmission for any one alarm, warning corrective action, or requirement, positive confirmation, check-back, or other purpose set forth in paragraph (b) of this section, shall be limited to a maximum duration of two seconds and shall not be repeated more than five times. For systems authorized prior to June 1, 1976, any one alarm or warning may be transmitted a maximum of five times and each transmission may not exceed six seconds.

(7) Systems employing automatic interrogation shall be limited to non-voice techniques and shall not be activated for this purpose more than ten seconds out of any 60 second period. This ten second time frame includes both transmit and response times.

(8) Frequency loading resulting from the use of secondary signalling will not be considered in whole or in part as a justification for authorizing additional frequencies in the licensee's mobile system.

(9) A mobile service frequency may not be used exclusively for secondary signalling.

(10) Automatic means shall be provided to deactivate the transmitter in the event the carrier remains on for a period in excess of three minutes.

(11) Operational fixed stations authorized pursuant to the provisions of this paragraph are exempt from the requirements of Sections 90.137(b), 90.425, and 90.429.

(12) Base, mobile relay, or mobile stations may transmit secondary tone or impulse signals to receivers at fixed locations subject to the conditions, and for the purposes set forth in this section.

§ 90.237 Interim provisions for operations of radioteleprinter and radiofacsimile devices.

These provisions authorize and govern the use of radioteleprinter and radiofacsimile devices for base station use (other than on mobile-only or paging-only frequencies) in the radio services (except inthe Radiolocation and Special Emergency Radio Services) in this part. In the Business Radio Service the authority extends only to those frequencies subject to the coordination requirements set forth in 90.175.

(a) Information must be submitted with an application to establish that the minimum separation between a proposed radioteleprinter or radiofacsimile base station and the nearest co-channel base station of another licensee operating a voice system is 120 km. (75 mi.) for a single frequency mode of operation, or 56 km. (35 mi.) for a two frequency mode of operation. Where this minimum mileage separation cannot be achieved, either agreement to the use of F2, F4, or F9 emission must be received from all existing co-channel licensees using voice emission within the applicable mileage limits, or if agreement was not received, the licensee of the radioteleprinter or radiofacsimile system is responsible for eliminating any interference with pre-existing voice operations. New licensees of voice operations. New licensees of voice operations will be expected to share equally any frequency occupied by established radioteleprinter or radiofacsimile operations.

(b) The application must list the manufacturer and model number of the radioteleprinter or radiofacsimile system to be employed, or contain a detailed technical description of the system.

(c) Transmitters type-accepted under this part for use of F3 emission may also be used for F2, F4, or F9 emission for radioteleprinter or radiofacsimile, provided the keying signal is passed through the low pass audio frequency filter required for F3 emission. The transmitter must be so adjusted and operated that the instantaneous frequency deviation does not exceed the maximum value allowed for F3.

(d) Frequencies will not be assigned exclusively for F2, F4, or F9 emission for radioteleprinter or radiofacsimile (except where specifically provided for in the frequency limitations).

(e) The requirements in this part applicable to the use of F3 emission are also applicable to the use of F2, F4, or F9 emission for radioteleprinter and radiofacsimile transmissions.

(f) The station identification required by § 90.425 must be given by voice.

§ 90.239 Interim provisions for operation of automatic vehicle monitoring (AVM) systems.

(a) These provisions authorize, to persons eligible in the radio services of this part, the licensing of Automatic Vehicle Monitoring (AVM) systems that utilize non-voice radio techniques to determine the location of vehicles. Authority is also provided for the transmission of

voice and/or non-voice messages relating to vehicles being located.

(b) The use of F1, F2, F3, F9, or P9 emissions is authorized for operaiton of transmitters in AVM systems subject to paragraph (e)(2)(iii) of this section.

(c) Frequencies for AVM operations are assignable as follows:

(1) Licensees for pulse-ranging AVM systems, requiring 8 MHz bandwidth may be authorized in the 904-912 MHz or 918-926 MHz band provided that:

(i) A licensee will not be assigned a second frequency band in the same geographic area until showing is made that the frequency band already assigned is being used to provide location data for not less than 5,000 vehicles.

(ii) Operations will not cause interference to government stations which operate in these bands and can tolerate interference from industrial, scientific, and medical (ISM) devices and from government stations which operate in these bands.

(2) AVM systems requiring bandwidths not exceeding 1 MHz may be authorized in the 903-904 or 926-927 MHz bands on a developmental basis in accordance with subpart P.

(3) Applicants requiring not more than 25 kHz bandwidth per frequency in the 25–50 MHz, 150–170 MHz and 450–512 MHz bands may either utilize base-mobile frequencies presently assigned the applicant, or be asisgned base-mobile frequencies available in the service in which eligibility has been established, provided that:

(i) For transmission between vehicles and base stations, each frequency in a single-frequently mode of operation will provide location data for approximately 200 vehicles, or both frequencies in a two-frequency mode of operaiton will provide location data for approximately 400 vehicles, except that for frequencies in the 450–512 MHz band that are assigned in pairs in accordance with the allocation plan for the band, the requirement is that location data be provided for approximately 200 vehicles for each frequency pair; and a showing is made that 50 percent of the vehicles will be in operation within the system by the end of the second year of the initial license term, and 70 percent will be in operation within the system by the end of the initial license term; except that if these vehicle loading standards will not be met, frequencies will be assigned only on a secondary non-interference basis to any authorized radiotelephony operation.

(ii) The minimum separation between a proposed AVM station and the nearest co-channel base station of another licensee operating a voice system is 75 miles (120 km) for a single frequency mode of operation or 35 miles (56 km) for a two-frequency mode of operation. Where the minimum mileage separation cannot be achieved, agreement to the use of F1, F2, F9, or P9 emission must be received from all existing co-channel licensees using voice emissions within the applicable mileage limits. If there is interference with voice operations and required agreement was not received, or operation was authorized on a secondary non-interference basis, the licensee of the AVM system is responsible for eliminating the interference.

(iii) Frequencies additional to any assigned under subparagraph (i) of this paragraph will not be assigned to the same licensee in the same geographic area until each of such licensee's frequencies for AVM operation is shown to accommodate not less than 90 percent of the frequency loading requirements specified in subparagraph (i) of this paragraph.

(d) Each application to license an AVM system shall include the following supplemental information:

(1) A detailed description of the manner in which the system will operate, including a map or diagram.

(2) For wide band frequency operation, the necessary or occupied bandwidth of emission whichever is greater.

(3) The data transmission characteristics as follows:

(i) The vehicle location update rates;

(ii) Specific transmitter modulation techniques used;

(iii) For codes and timing scheme: A table of bit sequences and their alphanumeric or indicator equivalents, and a statement of bit rise time, bit transmission rates, bit duration, and interval between bits;

(iv) A statement of amplitude-versus-time of the interrogation and reply formats, and an example of a typical message transmission and any synchronizing pulsts utilized.

(4) A plan to show implementation schedule during the initial license term.

(e) Technical standards.

(1) AVM stations authorized for operation below 512 MHz must comply with the technical standards applicable to the frequency band prescribed in this chapter, including the requirement for type acceptance of equipment used.

(2) Pending final development of technical standards, utilization of non-type accepted transmitters by stations authorized for operation above 512 MHz will be permissible provided that:

(i) The output power of transmitters used in pulse ranging systems shall not exceed 1 kW PEP;

(ii) The output power of transmitters used in non-pulse ranging systems shall not exceed 300 watts.

(iii) Emissions will be authorized on a case-by-case basis dependent on the requirements of the specific technique utilized.

(3) Transmitters to be operated at signposts, or from vehicles to signposts for location signalling purposes may be employed with output power not to exceed 250 milliwatts, and their operation is secondary to regular co-channel operations on the frequency being utilized.

(4) Pending development of further specific technical standards for AVM systems, the Commission, on a case-by-case basis, may impose additional appropriate technical requirements to assure efficient and effective frequency utilization.

(f) VM stations are exempted from the identification requirements of § 90.425; however, the Commission may impose automatic station identification requirements when determined to be necessary for monitoring and enforcement purposes.

§ 90.241 Radio call box operations.

(a) The frequencies in the 72–76 MHz band listed in § 90.17(b) may be assigned in the Local Government Radio Service for operation of radio call boxes to be used by the public to request fire, police, ambulance, road service, and other emergency assistance, subject to the following conditions and limitations:

(1) Maximum transmitter power will be either 2.5 watts plate input to the final stage or 1 watt output.

(2) Antenna gain shall not exceed zero dBd (referred to a half-wave dipole) in any horizontal direction.

(3) Only vertical polarization of antennas shall be permitted.

(4) The antenna and its supporting structure must not exceed 20 feet (6.1 meters) in height above the ground.

(5) Only A1, A2, F1, or F2 emission shall be authorized.

(6) The transmitter frequency tolerance shall be 0.005 percent.

(7) Except for test purposes, each transmission must be limited to a maximum of two seconds and shall not be automatically repeated more than two times at spaced intervals within the following 30 seconds. Thereafter, the authorized cycle may not be reactivated for one minute.

(8) All transmitters installed after December 10, 1970, shall be furnished with an automatic means to deactivate the transmitter in the event the carrier remains on for a period in excess of three minutes. The automatic cutoff system must be designed so the transmitter can be only manually reactivated.

(9) Frequency selection must be made with regard to reception of television stations on channels 4 (66–72 MHz) and 5 (76–82 MHz) and should maintain the greatest possible frequency separation from either or both of these channels, if they are assigned in the area.

(b) Frequencies in the band 154.4525 to 154.460 MHz may be assigned to fixed stations in the Local Government Radio Service for the purpose of providing emergency call box service. The maximum power output of the transmitter is 20 watts. A1, A2, F1, or F2 emission may be authorized. The authorized bandwith may not exceed 6 kHz. For FM transmitters, the sum of the highest modulating frequency in hertz and the amount of frequency deviation or swing in hertz may not exceed 2800 Hz and the maximum frequency deviation may not exceed 2.5 kHz. For AM transmitters the highest modulating frequency may not exceed 2000 Hz. The carrier frequency must be maintained with 0.0005 percent of the center of the frequency band.

(c) Frequencies in the 450–470 MHz band which are designated as available for assignment to central control stations and radio call box installations in § 90.17(b) or § 90.17(e)(11) may be assigned in the Local Government Radio Service for highway call box systems subject to the following requirements:

(1) Call box transmitters shall be installed only on limited access highways and may communicate only with central control stations of the licensee.

(2) Maximum transmitter power for call boxes will be either 2.5 watts input to the final amplifier stage or one watt output. The central control station shall not exceed 25 watts effective radiated power (ERP).

(3) The height of a call box antenna may not exceed 7 meters (20 feet) above the ground, the natural formation, or the existing man-made structure (other than an antenna supporting structure) on which it is mounted. A central station transmitting antenna, together with its supporting structure shall not exceed 15 m. (50 ft.) above the ground surface.

(4) Only F1, F2, F3, or F9 emission may be authorized for non-voice signalling, radiotelephony, and multiplexed voice and non-voice use. The provisions in this part applicable to the use of F3 emission are also applicable to the use of F1, F2, or F9 emission for call box transmitters.

(5) The station identification required by § 90.425 shall be by voice and may be transmitted for the system from the central control station. Means shall be provided at each central control station location to automatically indicate the call box unit identifier when a call box unit is activated.

(6) Call box installations must be so designed that their unit identifier is automatically transmitted when the handset is lifted.

(7) Each application for a call box system must include a description of the non-voice transmitting equipment. This description shall specify the character structure, bit rate, modulating tone frequencies, identification codes, and the method of modulation (i.e., frequency shift, tone shift, or tone phase shift).

(8) Call box installations may be used secondarily for the transmission of information from roadside sensors. Central control station transmitters may be used secondarily to interrogate call box roadside sensors and for the transmission of signals to activate roadside signs.

(9) Each call box transmitter must be provided with a timer which will automatically deactivate the transmitter after 2 minutes unless the central control station operator reactivates the timer cycle.

(10) The central control station must include facilities that permit direct control of any call box in the system.

(11) Call box transmitter frequency tolerance shall be 0.001 percent.

(12) Transmitters type-accepted under this part for use of F3 emission may be used for F1, F2, or F9 emission provided that the audio tones or digital data bits are passed through the low pass audio filter required to be provided in the transmitter for F3 emission. The transmitter must be adjusted and operated so that the instantaneous frequency deviation does not exceed the maximum value allowed for F3 emission.

(d) In addition to the frequencies available pursuant to § 90.17(b) the frequencies set forth in § 90.17(c)(11) may be used for central control station and call box installations in areas where such frequencies are available for fixed system use subject to the requirements and limitations of that section and subject to the provisions of subdivisions (1), (4), (5), (6), (7), (8), (9), (10), and (12) of paragraph (c) of this section.

(e) In accordance with subpart P of this Part, the frequencies available pursuant to § 90.17(b) and § 90.17(c)(11) for central control station and call box installations may be assigned for developmental operation as part of a highway safety communication program which is designed to provide radio communications directly with motorists to and from their motor vehicles.

§ 90.243 Mobile relay stations.

(a) Mobile relay stations under this part may be authorized only as follows.

(1) On frequencies below 450 MHz, mobile relay stations may be authorized to operate only in the Police, Fire, Local Government, Highway Maintenance, Forestry Conservation, Power, Petroleum, Forest Products, Telephone Maintenance, and Railroad Radio Services.

(2) Mobile relay stations will be authorized on frequencies between 450 MHz and 470 MHz in all of the services governed by this part except for the Radiolocation, Motor Carrier, Taxicab and Automobile Emergency Radio Services.

(3) Mobile relay stations will be authorized on frequencies between 470 MHz and 512 MHz in all of the services that have been allocated such frequencies.

(b) Special provisions for mobile relay operations:

(1) In the Special Emergency Radio Service, Medical Services systems in the 150–160 MHz band are permitted to be cross-banded for mobile and central station operations with mobile relay stations authorized to operate in the 450–470 MHz band.

(2) In the Business Radio Service, mobile relay stations operating on frequencies below 450 MHz will only be authorized when all control and mobile stations are operated on frequencies designated for low power operation (2 watts or less). For such operations the maximum output power shall not exceed 1 watt and the mobile relay antenna system shall not be more than 13 m. (40 ft.) above ground.

(3) In the Railroad Radio Service, mobile relay operation shall be on a secondary basis to other co-channel operations.

(4) Except where specifically precluded, a mobile relay station may be authorized to operate on any frequency available for assignment to base stations.

(5) A mobile station associated with mobile relay station(s) may not be authorized to operate on a frequency below 25 MHz.

(c) Technical requirements for mobile relay stations.

(1) Each new mobile relay station with an output power of more than one watt, and authorized after January 1, 1972, that is activated by signals below 50 MHz shall deactivate the station upon cessation of reception of the activating continuous coded tone signal. Licensees may utilize a combination of digital selection and continuous coded tone control where required to insurance selection of only the desired mobile relay station.

(2) Mobile relay stations controlled by signals above 50 MHz or authorized prior to January 1, 1972, to operate below 50 MHz are not required to incorporate coded signal or tone control devices unless the transmitters are consistently activated by undesired signals and cause harmful interference to other licensees. If activation by undesired signals causes harmful interference, the Commission will require the installation of tone control equipment within 90 days of a notice to the licensee.

(3) Except in the Railroad Radio Service, each new mobile-relay station authorized after January 1, 1972, shall be equipped for automatic deactivation of the transmitter within 5 seconds after the signals controlling the station cease.

(4) Except in the Railroad Radio Service, each new mobile relay station authorized after January 1, 1972, during periods that it is not controlled from a manned fixed control point; shall have an automatic time delay or clock device that will deactivate the station not more than 3 minutes after its activation by a mobile unit.

(5) In the Railroad Radio Service, each mobile relay station, regardless of the frequency or frequencies of the signals by which it is activated shall be so designated and installed that it will be deactivated automatically when its associated receiver or receivers are not receiving a signal on the frequency or frequencies which normally activate it.

(6) Multiple mobile relay station radio systems shall use wireline or radio stations on fixed service frequencies of any necessary interconnect circuits between mobile relay stations for the purpose of permitting automatic intercommunications on fixed service frequencies for any spective communication ranges.

§ 90.245 Fixed relay stations.

Except where specifically provided for, fixed relay stations shall be authorized to operate only on frequencies available for use by operational fixed stations.

§ 90.247 Vehicular repeater stations.

A mobile station authorized to operate on a mobile service frequency above 25 MHz may be used as a vehicular repeater to extend the communications range of hand-carried units subject to the following:

(a) Vehicular repeaters and or associated hand-carried transmitters may be assigned separate base mobile frequen-

cies for this use (including, in the Railroad Radio Service, any "base only" frequency in the 450–470 MHz range) in addition to the number of frequencies normally assignable to the licensee.

(b) In the Business and Special Industrial Radio Services on frequencies below 450 MHz, only low-power frequencies (2 watts or less output power) may be assigned for use by vehicular repeaters or by hand-carried transmitters whose communications are directed to vehicular repeaters, when separate frequencies are assigned for that purpose.

(c) Except as provided in paragraph (d) of this section, hand-carried transmitters whose communications will be automatically relayed by mobile stations shall be limited to a maximum output power of 2.5 watts.

(d) In the Railroad Radio Service, use of vehicular repeaters is on a secondary basis to the stations of any other licensee. Hand-carried units used in connection with vehicular repeaters in the Railroad Radio Service may operate only above 150 MHz and are limited to a maximum output power of 6 watts. The frequency and maximum power shall be specified in the station authorization.

(e) In the Railroad Radio Service, the output power of a mobile repeater station, when transmitting as a repeater station on the frequency used for communication with its associated park-carried or hand-carried units, shall not exceed 6 watts except when the same frequency is also used by the same station for direct communication with vehicular mobile units or with one or more base stations.

(f) When automatically retransmitting messages originated by or destined for hand-carried units, each mobile station shall activate the mobile transmitter only with a continuous coded tone, the absence of which will de-activate the mobile transmitter. The continuous coded tone is not required when the mobile unit is equipped with a switch that activates the automatic mode of the mobile unit and an automatic time-delay device that de-activates the transmitter after any uninterrupted transmission period in excess of three minutes.

§ 90.249 Control stations.

Control stations associated with land mobile stations under this part shall be authorized to operate subject to the following:

(a) *Frequencies for control stations.* (1) Control stations may be authorized to operate on frequencies available for use by operational fixed stations.

(2) A control station associated with mobile relay station(s) may, at the option of the applicant, be assigned the frequency of the associated mobile station. In the Railroad Radio Service such a control station may be assigned any mobile service frequency available for assignment to mobile stations in that service. Such operation is on a secondary basis to use of the frequency for regular mobile service communications. In the band 450–470 MHz, such operation is subject to the provisions of paragraph (b) of this section.

(3) Control and fixed stations in the Public Safety and Special Emergency Radio Services may be authorized on a temporary basis to operate on frequencies available for base and mobile stations between 152 and 450 MHz, where there is an adequate showing that such operations cannot be conducted on frequencies allocated for assignment to operational fixed stations. Such operation will not be authorized initially or renewed for periods in excess of one year. Any such authorization shall be subject to immediate termination if harmful interference is caused to stations in the mobile service, or if the particular frequency is required for mobile service operations in the area concerned.

(b) Control station operating on frequencies in the band 450–470 MHz shall comply with the following requirements if they are located within 120 km. (75 mi.) of the center of urbanized areas of 200,000 or more population as defined in the U.S. Census of Population, 1960, Vol. 1, Table 23, Page 50. The centers of urbanized areas are determined from the Appendix, Page 226 of the U.S. Commerce Publication "Airline Distance Between Cities in the United States".

(1) If the station is used to control one mobile relay station or two or more mobile relay stations located within 45 degrees of azimuth, a directional antenna having a front-to-back ratio of at least 15 dB shall be used at the control station. For other situations where a directional antenna cannot be used, a cardioid, directional or omnidirectional antenna may be employed. In each case, the antenna used must, be consistent with reasonable design, produce a radiation pattern that provides only the coverage necessary to permit satisfactory control of each mobile relay station, and limit radiation in other directions to the extent feasible.

(2) The strength of the signal of a control station, controlling a single mobile relay station, may not exceed by more than 6 dB, the signal strength produced by a unit of the associated mobile station at the antenna terminal of the mobile relay receiver. When the station controls more than one mobile relay station, the 6 dB control-to-mobile signal difference need be verified at only one of the mobile relay station sites. The measurement of the signal strength of the mobile unit must be made when such unit is transmitting from the control station location or, if that is not practical, from a location within one-fourth mile (0.4 km) of the control station site.

(c) A base station which is used intermittently as a control station for one or more associated mobile relay stations of the same licensee shall operate only on the mobile service frequency assigned to the associated mobile relay station when operating as a base station and on the mobile service frequency assigned to the associated mobile station when operating as a control station. Authority for such dual classification and use must be shown on the station authorization. When operating as a control station, the licensee must meet all control station requirements. In the Railroad Radio Service, base stations used intermittently as control stations shall operate only on a mobile service frequency which is available for assignment to base stations.

Subpart K—Standards for Special Frequencies or Frequency Bands

§ 90.251 Scope.

This subpart sets forth special requirements applicable to the use of certain frequencies (4383.8 kHz) or frequency bands. (27.235–27.275, 72–76, 216–220, 450–470, and 1427–1435 MHz).

§ 90.253 Use of the frequency 4383.8 kHz.

The frequency 4383.8 kHz may be used by any station authorized under this part, to communicate with any other station in the state of Alaska for emergency communications. The maximum power permitted is 150 watts peak envelope power (PEP). Airborne operations will not be permitted. All stations operating on this frequency must be located in or within 50 nautical miles (92.6 km) of the state of Alaska.

§ 90.255 Assignment and use of the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz.

(a) Effective September 10, 1976, station authorizations for the use of 27.235, 27.245, 27.255, 27.265, and 27.275 MHz will be issued only to applicants in the Personal Radio Services. Licenses in the Radio Services under this part authorizing the use of these frequencies shall remain valid until December 31, 1979, or, if such licenses expire prior to December 31, 1979, they may be renewed and will be given expiration dates of December 31, 1979. Licenses issued under this subpart for frequencies between 26.96 and 27.41 MHz should be modified prior to December 31, 1979, to permit operation on other authorized frequencies.

(b) Prior use of these frequencies is subject to the following limitations:

(1) The bandwidth of emission shall not exceed 8 kHz.

(2) The output power shall be limited to no more than 20 watts.

(3) All operation is subject to interference from the operation of industrial, scientific, and medical devices on the frequency 27.12 MHz.

(4) The frequency 27,255 MHz is shared with the Citizens Radio Service.

§ 90.257 Assignment and use of frequencies in the band 72–76 MHz.

(a) The following criteria shall govern the authorization and use of frequencies within the band 72–76 MHz by fixed stations. (for call box operations see § 90.-241).

(1) The following frequencies in the band 72–76 MHz may be used for fixed operations:

Megahertz

72.02	72.04	72.06	72.08	72.10	72.12	72.14	72.16
72.18	72.20	72.22	72.24	72.26	72.28	72.30	72.32
72.34	72.36	72.38	72.40	72.42	72.46	72.50	72.54
72.58	72.62	72.64	72.66	72.68	72.70	72.72	72.74
72.76	72.78	72.80	72.82	72.84	72.86	72.88	72.90
72.92	72.94	72.96	72.98	75.42	75.46	75.50	75.54
75.58	75.62	75.64	75.66	75.68	75.70	75.72	75.74
75.76	75.78	75.80	75.82	75.84	75.86	75.88	75.90
75.92	75.94	75.96	75.98				

(2) All authorizations are subject to the condition that no harmful interference will be caused to television reception on channels 4 and 5.

(3) The applicant must agree to eliminate any harmful interference caused by his operation to TV reception on either channel 4 or 5 that might develop by whatever means are necessary. Such action must be taken within 90 days of notification by the Commission. If such interference is not eliminated within the 90-day period, operation of the fixed station will be discontinued.

(4) Vertical polarization must be used.

(5) Whenever it is proposed to locate a 72–76 MHz fixed station less than 128 km. (80 mi.) but more than 16 km. (10 mi.) from the site of a TV transmitter operating on either channel 4 or 5, or from the post office of a community in which such channels are assigned but not in operation, the fixed station shall be authorized only if there are fewer than 100 family dwelling units (as defined by the U.S. Bureau of the Census), excluding units 112 or more km. (70 mi.) distant from the TV antenna site, located within a circle centered at the location of the proposed fixed station. The radius shall be determined by use of the following chart entitled, "Chart for Determining Radius From Fixed Station in 72–76 MHz Band to Interference Contour Along Which 10 Percent of Service From Adjacent Channel Television Station Would be Destroyed". Two charts are available, one for channel 4, and one for channel 5. The Commission may, however, in a particular case, authorize the location of a fixed station within a circle containing 100 or more family dwelling units upon a showing that:

(i) The proposed site is the only suitable location.

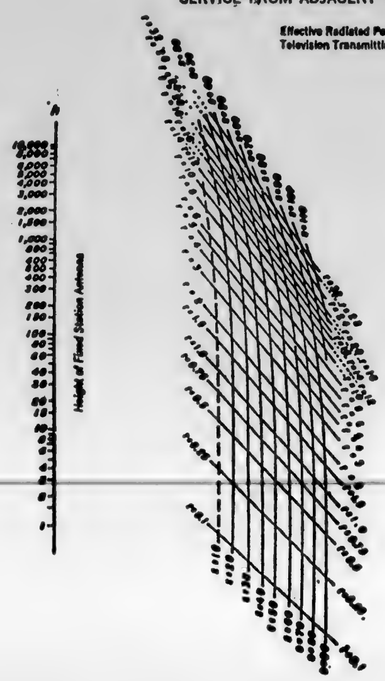
(ii) It is not feasible, technically or otherwise, to use other available frequencies.

(iii) The applicant has a plan to control any interference that might develop to TV reception from his operations.

(iv) The applicant is financially able and agrees to make such adjustments in the TV receivers affected as may be necessary to eliminate any interference caused by his operations.

(v) All applications seeking authority to operate with a separation of less than 16 km. (10 mi.) will be returned without action.

(b) The following criteria shall govern the authorization and use of frequencies within the band 72–76 MHz by mobile stations in the Special Industrial, Manufacturers, and Railroad Radio Services.



(1) Mobile operation on frequencies in the 72 to 76 MHz band is subject to condtion that no interference is caused to the reception of television stations operating on channels 4 or 5. Interference will be considered to occur whenever reception of a regularly used television signal is impaired by signals radiated by stations operating under these rules in the 72 to 76 MHz band regardless of the quality of such reception or the strength of the signal used. In order to minimize the hazard of such interference, it shall be the duty of the licensee to determine whether interference is being caused to television reception, wherever television receivers other than those under the control of the licensee, are located within 31m. (100 ft.) of any point where the stations licensed under these rules may be operated. In any case, it shall be the responsibility of the licensee to correct, at its own expense, any such interference and if the interference cannot be eliminated by the application of siutable techniques, the operation of the offending transmitter shall be suspended. If the complainant refuses to permit the licensee to apply remedial techniques which demonstrably will eliminate the interference without impairment of the original reception, the licensee is absolved of further responsibility.

(2) The maximum transmitter output power that will be authorized is .6 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on these frequencies must be directly mounted or installed upon the transmitting unit: Except that when permanently installed aboard a vehicle, antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a halfwave dipole. The maximum bandwidth that will be authorized is 20 kHz. Tone control transmissions are permitted.

FOR CHANNEL 4

CHART FOR DETERMINING RADIUS FROM FIXED STATION IN 72–76 MHz BAND TO INTERFERENCE CONTOUR ALONG WHICH 10% OF SERVICE FROM ADJACENT TELEVISION STATION WOULD BE DESTROYED

Effective Radiated Power of TV Station.....100 kw.
Television Transmitting Antenna Height.....500 ft.

EXPLANATION OF SCALE HEADINGS:

P—effective radiated power of fixed 72–76 MHz station in watts and equals the power output of the transmitter adjusted for transmission line loss and antenna gain. In symbols
P = PoLG
where Po = output of transmitter in watts
L = transmission line efficiency, %
G = power gain of the antenna with respect to a half wave dipole in free space.
For a directional antenna use the power in the main lobe.

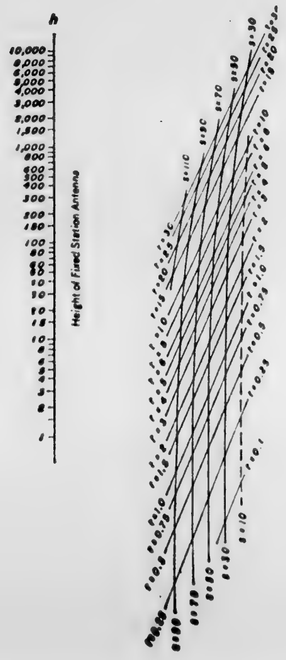
h—height in feet of the center of the transmitting antenna array of the fixed 72–76 MHz station with respect to the average level of the terrain between 2 and 10 miles from such antenna in the direction of the TV station. (The method for determining this height is explained in detail in the TV Broadcast Rules.)

s—separation in miles between the television station antenna and the 72–76 MHz fixed station antenna.

r—distance in miles from the 72–76 MHz fixed station antenna to the contour at which the TV service area is reduced by 10%. This distance is measured from the 72–76 MHz antenna in the direction of the TV antenna.

f—frequency in MHz of 72–76 MHz fixed stations.
NOTE: frequencies included in cross hatched area are not available for assignment.

DIRECTIONS FOR USING THIS CHART:



1. Draw a straight line connecting P and h for the 72–76 MHz fixed station and continue to the Q axis.
2. From the intersection of the P-h line and the Q axis, draw another straight line to f.
3. Where the second line intersects the S–r curve, read the value of r for the appropriate value of S.

REVISED JANUARY 1963

FOR CHANNEL 5

CHART FOR DETERMINING RADIUS FROM FIXED STATION IN 72–76 MHz BAND TO INTERFERENCE CONTOUR ALONG WHICH 10% OF SERVICE FROM ADJACENT TELEVISION STATION WOULD BE DESTROYED

Effective Radiated Power of TV Station.....100 kw.
Television Transmitting Antenna Height.....500 ft.

EXPLANATION OF SCALE HEADINGS:

P - effective radiated power of fixed 72–76 MHz station in watts and equals the power output of the transmitter adjusted for transmission line loss and antenna gain. In symbols
P = PoLG
where Po = output of transmitter in watts
L = transmission line efficiency, %
G = power gain of the antenna with respect to a half wave dipole in free space
For a directional antenna use the power in the main lobe.

h - height in feet of the center of the transmitting antenna array of the fixed 72–76 MHz station with respect to the average level of the terrain between 2 and 10 miles from such antenna in the direction of the TV station. (The method for determining this height is explained in detail in the TV Broadcast Rules.)

s - separation in miles between the television station antenna and the 72–76 MHz fixed station antenna.

r - distance in miles from the 72–76 MHz fixed station antenna to the contour at which the TV service area is reduced by 10%. This distance is measured from the 72–76 MHz antenna in the direction of the TV antenna.

f - frequency in MHz of 72–76 MHz fixed stations
NOTE: frequencies included in cross hatched area are not available for assignment.

DIRECTIONS FOR USING THIS CHART:

1. Draw a straight line connecting P and h for the 72–76 MHz fixed station and continue to the Q axis.
2. From the intersection of the P-h line and the Q axis, draw another straight line to f.
3. Where the second line intersects the S–r curves, read the value of r for the appropriate value of S.

REVISED JANUARY 1963

§ 90.259 Assignment and use of frequencies in the bands 216–220 MHz and 1427–1435 MHz.

Frequencies in the bands 216–220 MHz and 1427–1435 MHz may be assigned to applicants under this part provided the band is listed in the individual radio service under which they establish eligibility. Use of these bands is limited to telemetering purposes only and all operation is secondary to Federal Government operations. Base stations authorized in this band shall be used to perform telecommand functions with associated mobile telemetering stations. Base stations may also command actions by the vehicle itself, but will not be authorized solely to perform this function. Airborne use will not be authorized. Each application will be coordinated with the Federal Government by the Federal Communications Commission and is subject to such technical and operational limitations as may be imposed by the government. Each application should include precise information concerning emission characteristics, transmitter frequency deviation, output power, type and directional characteristics, if any, of the antenna, and the minimum necessary hours of operation.

§ 90.261 Assignment and use of frequencies in the band 450–470 MHz for fixed operations.

The following frequencies may be assigned for fixed operations, on a secondary basis to land mobile operations, to eligibles in the services indicated. All such use of these frequencies for fixed systems is limited to locations 85 or more miles (136.79 or more km) from the center of any urbanized area of 600,000 or more population, except that the distance may be 65 miles (104.6 km), if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems, the separation between transmit-receive frequencies is 5 MHz. The centers of urbanized areas are determined from the Appendix, Page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States." Urbanized areas of 600,000 or more population are defined in the U.S. Census of Population, 1970, Vol. 1, table 20, pages 1–74.

(a) The following frequencies may be assigned to fixed stations in the Public Safety and Special Emergency Radio Services, on a secondary basis to land mobile operations in the Industrial (except Business) and Land Transportation Radio Services.

453.475	457.025	460.500	

(d) Frequencies subject to section 90.75(c)(26) may be used secondarily for fixed operations subject to the technical limitations of this section.

§ 90.263 Substitution of frequencies below 25 MHz.

Frequencies below 25 MHz when shown in radio service frequency listings under this part will be assigned to base or mobile stations only upon a satisfactory showing that, from a safety of life standpoint, frequencies above 25 MHz will not meet the operational requirements of the applicant. These frequencies are available for assignment in many areas; however, in individual cases such assignment may be impracticable due to conflicting frequency use authorized to stations in other services by this and other countries. In such cases, a substitute frequency, if found to be available, may be assigned from the following bands 1605–1750, 2107–2170, 2194–2495, 2505–2850, 3155–3400, or 4438–4650 kHz. Since such assignments are in certain instances subject to additional technical and operation limitations, it is necessary that each application also include precise information concerning transmitter output power, type and directional characteristics, if any, of the antenna, and the minimum necessary hours of operation. (This section is not applicable to the Radiolocation Radio Service, Subpart F.)

Subpart L—Authorization in the Band 470–512 MHz (UHF–TV Sharing)

§ 90.301 Scope.

This subpart governs the authorization and use of frequencies by land mobile stations in the band 470–512 MHz on a geographically shared basis with Television Broadcast stations. Under this special sharing plan, different radio services are allocated different specific frequencies in this band depending upon the geographic urban area involved as fully detailed in the following rule sections.

§ 90.303 Availability of frequencies.

(a) Frequencies in the band 470–512 MHz are available for assignment in the urbanized areas listed below. The specific frequencies available to each radio service are listed in Section 90.311.

Frequency availability for land mobile use

Urbanized area	Geographic center: North latitude	Geographic center: West longitude	Channel	Frequencies (megahertz)
Boston, Mass.	42°21'24"	71°03'24"	14	470-476
			16	482-488
Chicago, Ill.[1]	41°50'08"	87°38'02"	14	470-476
			15	476-482
Cleveland, Ohio[2]	41°29'51"	81°41'50"	14	470-476
			15	476-482
Dallas/Fort Worth, Tex.	32°47'09"	96°47'30"	16	482-488
Detroit, Mich.[3]	42°19'48"	83°02'57"	15	476-482
			16	482-488
Houston, Tex.	29°45'26"	95°21'37"	17	488-494
Los Angeles, Calif.	34°03'15"	118°14'28"	14	470-476
			20	506-512
Miami, Fla.	25°46'57"	80°11'32"	14	470-476
New York	40°45'00"	73°59'39"	14	470-476
Northeastern N.J.			14	470-482
Philadelphia, Pa.	39°56'58"	75°09'21"	14	470-476
			20	506-512
Pittsburgh, Pa.	40°26'19"	80°00'41"	14	470-476
			18	494-500
San Francisco	37°46'39"	122°24'40"	14	470-476
Oakland, Calif.			15	476-482
Washington, D.C.	38°53'51"	77°00'33"	17	488-494
Maryland			18	494-500
Virginia				

[1] In the Chicago, Ill., urbanized area, channel 15 frequencies may be used for paging operations in addition to low power base/mobile usages, where applicable protection requirements for ultrahigh frequency television stations are met.
[2] Channels 14 and 15 are not available in Cleveland, Ohio, until further order from the Commission.
[3] Channels 15 and 16 are not available in Detroit, Mich., until further order from the Commission.

§ 90.305 Location of stations.

(a) The transmitter site(s) for base station(s), including mobile relay stations, shall be located not more than 80 km. (50 mi.) from the geographic center of the urbanized area listed in § 90.303.

(b) Mobile units shall be operated within 48 km. (30 mi.) of their associated base station or stations. Such units may not be operated aboard aircraft in flight.

(c) Control stations must be located within the area of operation of the mobile units.

(d) Base and control stations shall be located a minimum of 1.6 km. (1 mi.) from local television stations operating on UHF TV channels separated by 2, 3, 4, 5, 7, and 8 TV channels from the television channel in which the base station will operate.

§ 90.307 Protection criteria.

The tables and figures listed in § 90.309 shall be used to determine the proper power (ERP) and antenna height of the proposed land mobile base station and the proper power (ERP) for the associated control station (control station antenna height shall not exceed 31 m. (100 ft.) above average terrain (AAT)).

(a) Base stations operating on the frequencies available for land mobile use in any listed urbanized area and having an antenna height (AAT) less than 152 m. (500 ft.) shall afford protection to co-channel and adjacent channel television stations in accordance with the values set out in Tables A and E of this subpart, except for Channel 15 in New York, N.Y., and Cleveland, Ohio, and Channel 16 in Detroit, Mich., where protection will be in accordance with the values set forth in Tables B and E.

(b) For base stations having antenna heights between 152–914 meters (500–3,000 ft.) above average terrain, except as noted in paragraph (f), the effective radiated power must be reduced below 1 kilowat in accordance with the values shown in the power reduction graph in Figure A, except for Channel 15 in New York, N.Y., and Cleveland, Ohio, and Channel 16 in Detroit, Mich., where the effective radiated power must be reduced in accordance with Figure B. For heights of more than 152 m. (500 ft.) above average terrain, the distance to the radio path horizon will be calculated assuming smooth earth. If the distance so determined equals or exceeds the distance to the Grade B contour of a co-channel TV station, (Grade B contour defined in Section 73.683(a)) an authorization will not be granted unless it can be shown that actual terrain considerations are such as to provide the desired protection at the Grade B contour, or that the effective radiated power will be further reduced so that, assuming free space attenuation, the desired protection at the Grade B contour will be achieved.

(c) Mobile units and control stations operating on the frequencies available for land mobile use in any given urbanized area shall afford protection to co-channel and adjacent channel television stations in accordance with the values set forth in Table C and paragraph (d) of this section except for Channel 15 in New York N.Y., and Cleveland, Ohio, and Channel 16 in Detroit, Mich., where protection will be in accordance with the values set forth in Table D and paragraph (d) of this section.

(d) The minimum distance between a land mobile base station and a protected adjacent channel television is 90 miles (145 km) when mobile units are associated with it.

(e) The television stations to be protected (co-channel, adjacent channel, IM, and IF) in any given urbanized area, in accordance with the provisions of subparagraphs (a), (b), (c), and (d) of this paragraph, are identified in the Commission's publication "TV stations to be considered in the preparation of Applications for Land Mobile Facilities in the Band 470–512 MHz." The publication is available at the offices of the Federal Communications Commission at Washington, D.C. or upon the request of interested persons.

(f) For stations in the Los Angeles urbanized area with antenna elevations of 457 m. or more (1,500 ft.) above sea level, the maximum authorized effective radiated power (ERP) shall be in accordance with the following table:

Antenna height (above sea level)	Power, effective radiated power (watts)
1,500 to 2,000 ft (457 to 609 m)	155
2,000 to 2,500 ft (609 to 762 m)	100
2,500 to 3,000 ft (762 to 914 m)	70
3,000 to 3,500 ft (914 to 1,066 m)	50
3,500 to 4,000 ft (1,066 to 1,219 m)	40
4,000 to 4,500 ft (1,219 to 1,371 m)	30
Above 4,500 ft (1,371 m)	25

NOTE.—Existing stations may continue to use presently authorized powers until Jan. 1, 1980.

§ 90.309 Tables and figures.

(a) *Directions for using the tables.*

(1) Using the method specified in 73.611 or charts or maps of suitable scale, determine the distances (i) between the proposed land mobile base station and the protected co-channel television station and (ii) between the proposed land mobile base station and the protected adjacent channel television station. If the exact mileage does not appear in Table A for protected co-channel television stations (or Table B for Channel 15 in New York and Cleveland and Channel 16 in Detroit) or Table E for protected adjacent channel television stations, the next lower mileage separation figure is to be used.

(2) Entering the proper table at the mileage figure found in paragraph (1) above, find opposite, a selection of powers that may be used for antenna heights ranging from 50 (15 m) to 500 (152 m) feet (AAT). If the exact antenna height proposed for the land mobile base station does not appear in the proper table, use the power figure beneath the next greater antenna height.

(3) The lowest power found using the tables mentioned in (1) and (2) above is the maximum power that may be employed by the proposed land mobile base station.

(4) In determing the average elevation of the terrain, the elevations between 2 (3 km) and 10 (16 km) miles from the antenna site are employed. Profile graphs shall be drawn for eight radials beginning at the antenna site and extending 10 (17 km) miles. The radials should be drawn for each 45° of azimuth starting with true north. At least one radial should be constructed in the direction of the nearest co-channel and adjacent channel UHF television stations. The profile graph for each radial shall be plotted by contour intervals of from 40 (12 m) to 100 (30 m) feet and, where the data permits, at least 50 points of elevation (generally uniformly spaced) should be used for each radial. For very rugged terrain 200 (61 m) to 400 (122 m) feet contour intervals may be used. Where the terrain is uniform or gently sloping, the smallest contour interval indicated on the topographic charte may be used. The average elevation of the 8-mile distance between 2 (3 km) and 10 (17 km) miles from the antenna site should be determined from the profile graph for each radial. This may be obtained by averaging a large number of equally spaced points, by using a planimeter, or by obtaining the median elevation (that exceeded by 50 percent of the distance) in sectors and averaging those values. In the preparation of the profile graphs the elevation or contour intervals shall be taken from U.S. Geological Survey Topographic Quadrangle Maps, U.S. Army Corps of Engineers Maps, or Tennessee Valley Authority Maps (Scale 1:2400) whichever is the latest. If such maps are not published for the area in question, the next best topographic information should be used.

(5) Applicants for base stations in the Miami, Fla., urbanized area may, in lieu of calculating the height of average terrain, use 10 feet (3 m) as the average terrain height.

TABLE A.—*Base station—cochannel frequencies (50 dB protection) maximum effective radiated power (ERP)*[1]

Distance in miles[2]	Antenna height in feet (AAT) 50 (15 m)	100 (30 m)	150 (45 m)	200 (61 m)	250 (76 m)	300 (91 m)	350 (106 m)	400 (122 m)	450 (137 m)	500 (152 m)

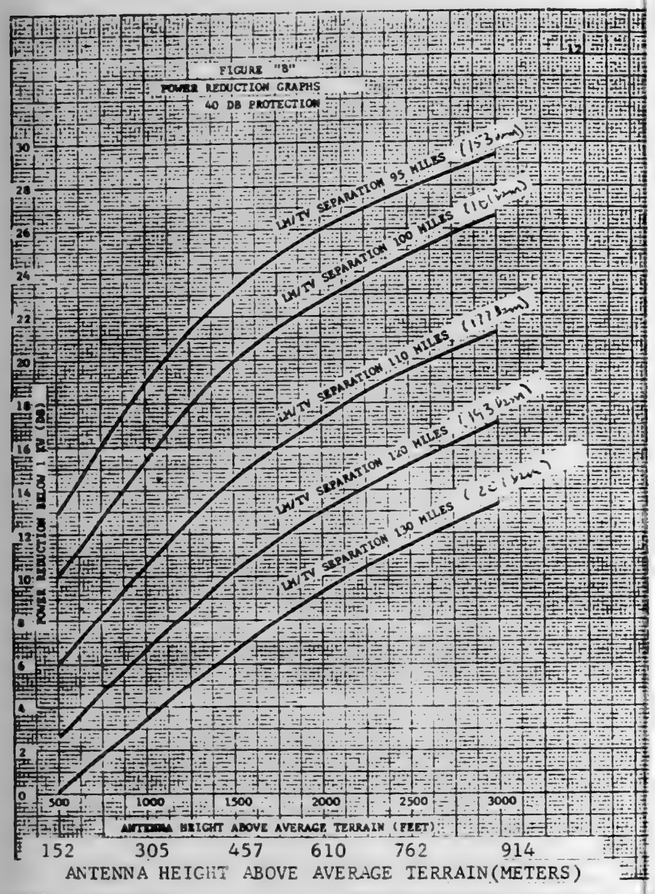
(b) *Directions for Using the Figures.*

(1) Determine antenna height above average terrain. (According to 90.309(a)(4)).

(2) Locate this value on the antenna height axis.



(3) Determine the separation between the I.M antenna site and the nearest protected co-channel TV station. (According to 73.611).

(4) Draw a vertical line to intersect the I.M/TV separation curve at the distance determined in step 3 above. For distances not shown on the graph use linear interpolation.

(5) From the intersection of the I.M/TV separation curve draw a horizontal line to the power reduction scale.

(6) The power reduction in dB determines the reduction below 1 kw that must be achieved.

(7) See Table F for dB power equivalents.

§ 90.311 Frequencies.

Except as provided for in § 90.315, the following frequencies in the band 470–512 MHz may be assigned to eligibles in the services as indicated below. The first and last assignable frequencies are shown. Assignable frequencies occur in increments on 25 kHz. The separation between base and mobile transmit frequencies is 3 MHz for two frequency operation.

These frequency charts will be included in the forthcoming Report and Order. They will be identical to those adopted in the Docket 20909 proceeding.

(1) Channel availability in the General Access Pool in any of the urbanized areas referred to in the table depends upon whether that channel is presently assigned to users in one of the service pools. If unassigned, or should a channel subsequently become unassigned, it will be treated as available in the General Access Pool.

(2) Frequencies in the General Access Pool will be made available to applicants after all channels presently assigned are substantially loaded in accordance with the standards set out in 90.313 of this section. Channels from the General Access Pool will be assigned starting with the lowest frequency available at the time and progress towards the high end of the General Access Pool. Normally, each channel should be substantially filled before the next one will be assigned.

(b) Miami, Fla., Dallas, Tex., and Houston, Tex. urbanized areas.

Channel 14 (Miami)	Channel 16 (Dallas)	Channel 17 (Houston)
470.3125 to 475.9875	482.3125 to 487.9875.	488.3125 to 493.9875.

(1) Base station frequencies for the Public Safety Radio Service will be assigned serially beginning at 470.7125 MHz for Miami, 482.7125 MHz for Dallas, and at 488.7125 MHz for Houston and progressing a channel at a time upward and downward from those points.

(2) Base station frequencies for the Petroleum, Forest Products, and Manufacturers Radio Services will be assigned serially beginning at 470.3125 MHz for Miami, 482.3125 MHz for Dallas, and 488.3125 MHz for Houston and progressing upward from those points a channel at a time.

(3) Base station frequencies for the Special Industrial Radio Service will be assigned serially beginning at 471.4375 MHz for Miami, 483.4375 MHz for Dallas and 489.4375 MHz for Houston and progressing a channel at a time upward and downward from those points.

(4) Base station frequencies for the Business Radio Service will be assigned serially beginning at 472.3625 MHz for Miami, 484.3625 MHz for Dallas, and 489.3625 MHz for Houston and progressing a channel at a time upward and downward from those points.

(5) Base station frequencies for the Power and Telephone Maintenance Radio Services will be assigned serially beginning at 471.2625 MHz for Miami, 483.2625 MHz for Dallas, and 489.2625 MHz for Houston and progressing a channel at a time upward and downward from those points.

(6) Base station frequencies for the Railroad, Motor Carrier, and Automobile Emergency Radio Services will be assigned serially beginning at 471.7825 MHz for Miami, 483.7825 MHz for Dallas, and 489.7825 MHz for Houston and progressing upward and downward from those points a channel at a time.

(7) Base station frequencies for the Taxicab Radio Service will be assigned serially beginning at 472.9875 MHz for Miami, 484.9875 MHz for Dallas, and 490.9875 MHz for Houston and progressing a channel at a time downward from those points.

§ 90.313 Frequency loading criteria.

(a) Execpt as provided for in paragraph (b), the maximum channel loading on frequencies in the 470–512 MHz band is as follows:

(1) 50 units in the Public Safety Radio Services.

(2) 70 units in the Industrial Radio Services (except business).

(3) 90 units in the Business Radio Service.

(4) 150 units in the Taxicab Radio Service, except in the New York Northeast New Jersey urbanized areas where the loading is 200 units.

(5) 70 units in the Railroad, Motor Carrier, and Automobile Emergency Radio Services except in the intra-urban passenger carrier sub-category of the Motor Carrier Radio Service where the loading is 150 units.

(b) If a licensee has exclusive use of a frequency, then the loading standards in paragraph (a) may be exceeded. If it is a shared channel, the loading standards can be exceeded upon submission of a signed statement by all those sharing the channel agreeing to the increase.

(c) A unit is defined as one vehicular mobile unit or two hand-carried transmitter-receivers for the Public Safety Services, three hand-units for the Industrial, and Land Transportation Services. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency pair. Channel capacity may be reached either by the requirements of a single licensee or by several users sharing a channel. Until a channel is loaded to capacity it will be available for assignment to other users in the same area. A frequency pair may be reassigned at distances 64 km. (40 mi.), (32 km. (20 mi.) for Channel 15, Chicago: Channel 20, Philadelphia and Channel 17, Washington or more from the location of base stations authorized on that pair without reference to loading at the point of original installation. Following authorization, the licensee shall notify the Commission either during or at the close of the 8 months period of the number of units in operation. In the Industrial Radio Services, if the base station facility is to be used by more than a single licensee, the frequency assigned to it will not be reassigned for use by another facility within 64 km. (40 mi.) or 32 km. (20 mi.) where applicable) for a period of 12 months, *Provided*, That the facility is constructed within 90 days from the date of the first grant, meets the loading standards to at least 50 percent within 9 months, and meets all loading standards within 12 months.

§ 90.315 Special provisions governing use of frequencies in the 488–494 MHz band (TV Channel 17) in the Southern Louisiana Offshore Zone.

(a) The frequency bands from 490–491 and 493–494 MHz will be available for assignment to stations governed by this part within the Southern Louisiana Offshore Zone. The boundaries of the Southern Louisiana Offshore Zone are from longitude 87°45′ on the east to longitude 94°00′ on the west, and from the three mile limit along the Gulf of Mexico shoreline on the north to the limit of the outer continental shelf on the south. These frequencies may also be assigned to fixed stations located on shore designed to provide communications service within the zone.

(b) Offshore Base/Mobile, and offshore and shore fixed stations may be authorized.

(c) F2, F3, F4, F9, and A2, A3, A4, and A9 emissions may be authorized.

(d) Offshore stations shall afford co-channel protection to TV Channel 17, Bude, Miss. Station operating parameters shall be in accordance with the values given in Table I.

TABLE 1.—*Protection of cochannel television stations by offshore stations operating in the southern Louisiana zone (65 dB protection); maximum effective radiated power (in watts)*

Distance from transmitter to TV channel 17, Bude, Miss. (in miles):	Antenna height above sea level		
	100 ft	150 ft	200 ft
210	1,000	1,000	1,000
205	1,000	900	800
200	900	730	650
195	780	640	560
190	640	520	460
185	520	420	370
180	420	340	300
175	340	270	240
170	270	220	190
165	220	175	150
160	175	140	120
155	140	110	95
150	110	85	75
145	85	65	55
140	65	50	40
135	50	40	30
130	40	30	25

NOTE.—To determine the maximum permissible effective radiated power:

(1) As specified in sec. 73.611 determine the distance between the proposed station and channel 17, Bude, Miss. If the exact mileage does not appear in table 1, the next lower mileage separation figure should be used.

(2) Opposite the distance the ERPs are given that may be used for antenna heights of 100, 150, or 200 ft AbL. If the exact antenna height is not shown, the ERP allowed will be that shown for the next higher antenna height.

(e) Shore stations communicating in the point-to-point with offshore stations will be permitted at least the same ERP as the offshore station, but only in the direction of the offshore station. A directional antenna shall be used and the rearward radiated power from the antenna in a sector ±22½° from the line joining the shore antenna to Bude, Miss., shall not exceed those shown in Table 2.

(f) To provide co-channel protection to TV Channel 17, no shore station will be allowed closer than 120 miles from Bude, Miss., coordinates 31° 22′ 19″ N and 90° 45′ 05″ W.

(g) To provide adjacent channel protection to TV Channel 18 in Lake Charles, Louisiana, no shore or offshore stations shall be allowed within an 80 mile distance of Lake Charles, Louisiana, whose coordinates are 30°13′45″ N and 93°12′52″ W.

(h) Surface mobile stations shall not operate with an effective radiated power in excess of 25 watts within 20 miles of the three mile limit. In all other areas, the effective radiated power shall not exceed 100 watts with 30 foot maximum antenna height.

(i) No airborne station shall be operated with an effective radiated power in excess of 1 watt or at heights in excess of 1,000 feet above mean sea level and shall not be operated outside the limits of the zone specified in Table A. However, to provide adjacent channel protection to TV channel 18, no airborne subscriber station shall operate within an 80 mile radial distance of Lake Charles, Louisiana.

(j) The following frequencies are available for assignment in all services for use in the Southern Louisiana Zone as defined in paragraph (a) of this section.

PAIRED FREQUENCIES (MHz)

Transmit (or receive)	*Receive (or transmit)*
490.025–490.975	493.025–493.975

Only the first and last assignable frequencies are shown. Frequencies shall be assigned in pairs with 3 MHz spacing between transmit and receive frequencies. Assignable frequency pairs shall occur in increments of 25 kHz.

(k) Fixed stations operating point-to-point shall be assigned frequencies beginning with 490.025/493.025 MHz and progressing upwards utilizing available frequencies towards the end of the band. Offshore Base/mobile stations shall be assigned frequencies beginning at 490.975/493.975 MHz and progressing downwards utilizing available frequencies towards the beginning of the band. All frequency assignments are subject to the conditions specified in § 91.8.

(l) Bandwidths other than 25 kHz may be authorized upon an adequate showing of need. An application requesting such authorization shall fully describe the modulation, emission and

TABLE 2.—*Maximum rearward effective radiated power allowed for shore stations in the southern Louisiana zone; rearward effective radiated power (in watts) from shore antenna in a sector ±22½° from the line joining the shore antenna to Bude, Miss.*

Distance from transmitter to TV channel 17, Bude, Miss. (in miles):	Antenna height above ground				
	100 ft.	150 ft.	200 ft.	500 ft.	750 ft.
180	320	280	240	140	125
180	250	210	175	125	100
175	175	150	130	100	70
170	130	110	100	75	50
165	95	82	70	50	35
160	65	55	50	40	25
155	45	40	35	30	20
150	35	30	25	20	15
145	25	25	18	15	10
140	18	15	13	10	7
135	13	10	9	7	5
130	10	7	6	5	3
125	7	6	4	3	2
120	5	4	3	2	1

NOTE.—As an example of the use of tables 1 and 2, assume an offshore station located just north from Bude, Miss. with an antenna height of 100 ft. Table 1 allows this station 1 kW ERP. Now assume the shore station communicating with the offshore station is 210° from Bude, Miss. The shore station will be allowed the same ERP as the offshore station (1 kW). Now assume the shore station is 205° from Bude, Miss. The shore station will be allowed the same ERP as the offshore station (1 kW) from the line joining the shore antenna to Bude, Miss. (on bearing 122.6° T). (250 W forward power to 15 W rearward power is a power ratio of 16.8 or 12.2 dB).

bandwidth desired, the bandwidth to be occupied, and justification for the request.

Subpart M—Special Regulations Governing Licensing and Use of Frequencies in the 806–821 MHz and 851–866 MHz Bands

§ 90.351 Scope.

This subpart sets out the regulations governing the licensing and operations of conventional and trunked stations authorized in the 806–821 MHz and 851–866 MHz bands. It includes eligibility requirements, application procedures, operational, and technical standards for stations licensed in these bands. The rules in this subpart are to be read in conjunction with the applicable requirements contained elsewhere in this part; however, in case of conflict, the provisions of this subpart shall govern with respect to licensing and operation in these frequency bands.

§ 90.353 Definitions.

Conventional radio system. A method of operation in which one or more radio frequency channels are assigned to mobile and base stations but are not employed as a trunked group. An "urban-conventional system" is one whose transmitter site is located within 15 miles (24 km) of the geographic center of any of the first 50 urbanized areas (ranked by population) of the United States. A "suburban-conventional system" is one whose transmitter site is located more than 15 miles (24 km) from the geographic center of the first 50 urbanized areas. See Table 21, Rank of Urbanized Areas in the United States by Population, Page 1–87, U.S. Census (1970); and Table 1 of paragraph (h) of 90.365.

Geographic center. The geographic center of an urbanized area is defined by the coordinates given at Table 1 of paragraph (h) of § 90.365.

Trunk (telephony). A one or two-way channel provided as a common traffic artery between switching equipment.

Trunk group. All of the trunks of a given type or characteristic that extend between two switching points.

Trunked radio system. A method of operation in which a number of radio frequency channel pairs are assigned to mobile and base stations in the system for use as a trunk group.

APPLICATIONS FOR AUTHORIZATIONS IN THE 806–821 MHz AND 851–866 MHz BANDS

§ 90.355 Eligibility.

The following persons are eligible for licensing in the 806–821 MHz and 851–866 MHz bands.

(a) Any person eligible for licensing under Subparts B, C, D, or E of this part.

(b) Any person proposing to provide private dispatch service to any person eligible for licensing under Subpart B, C, D, or E of this part on a not-for-profit, cost-shared basis.

(c) Any person except wire line telephone common carriers proposing to provide, on a commercial basis, base station and ancillary facilities for the use of persons eligible for licensing under Subparts B, C, D, or E of this part.

§ 90.357 Forms to be used.

Applications for conventional and trunked radio facilities shall be submitted on FCC Form 400, and such applications shall be filed with the Commission, at its offices in Washington, D.C. Where the facility is to be established in the Chicago Regional area FCC Form 425 shall be used and all such applications shall be filed with the Chicago Regional Office. In addition, FCC Form 400–S shall be filed by all applicants.

§ 90.359 Supplemental information to be furnished by applicants for facilities under this subpart.

(a) Applicants for conventional or trunked systems of communication shall, in addition to the information required by FCC Form 400 or FCC Form 425, furnish the following data and material:

(1) Where the applicant is a person proposing to provide dispatch service to eligibles under § 90.179 on a not-for-profit, cost-shared basis, he shall furnish:

(i) A copy of the plan or agreement under which service will be offered. It must be in sufficient detail to show that such service will be provided at cost.

(ii) A statement of the purposes for which the system is to be used and of the planned mode of operation.

(iii) The names and addresses of each person to participate in the sharing arrangement.

(iv) A statement showing that each participant is eligible to use the system for the purposes for which it is to be employed.

(2) Where the applicant is a person proposing to provide dispatch service to eligibles under this part on a commercial basis, he shall supply:

(i) A statement of the purposes for which the system is to be used and of the planned mode of operation.

(ii) A statement certifying that no person not eligible to use the proposed facility for the purposes for which it is to be authorized will be offered or provided service over or through the licensee's base station facility.

(iii) A copy of the basic agreement under which the dispatch service will be offered.

(3) Where the applicant is subject to the provisions of § 90.373 he shall furnish the following information:

(i) A list of any trunked stations licensed to the applicant.

(ii) A list of any trunked stations licensed to any other person or entity directly or indirectly controlled by the applicant or which directly or indirectly controls the applicant.

(4) All applicants for conventional radio systems shall furnish a list of all conventional radio systems licensed to them or proposed by them within 64 km. (40 mi.) from the location of the base station transmitter site of the facility applied for.

(b) All applicants for conventional systems shall specify the number of vehicle or portable units to be placed in operation upon grant of the authorization and the number of such units that will be placed in operation within 8 months of the date of grant.

(c) All applicants of trunked systems shall specify the number of mobile units to be placed in operation within the term of the license; Provided, however, Where the applicant applies for more than the minimum 5 channels, and elects to construct in 5-channel stages, he shall so specify and shall state the number of mobile units to be placed in operation by the end of two years from the date of the grant of his station authorization.

(d) Each applicant shall furnish a functional system diagram illustrating the inter-relationship of all stations being applied for, together with technical details (including antenna height (AAT) and effective radiated power (ERP)), together with his proposed area of coverage and the signaling methods he will employ.

§ 90.361 Special limitations on amendment of applications for assignment or transfer of authorizations for radio systems used to provide service to persons other than the licensee.

(a) No application for a conventional or trunked radio system proposing radio facilities to be made available for use by a single user or by multiple users on a commercial basis may be amended so as to substitute a new entity except in the following circumstances:

(1) The amendment does not involve a substantial change in the ownership or control of the applicant; or

(2) The changes in the ownership or control of the applicant are involuntary due to the original applicant's insolvency, bankruptcy, incapacity, or death.

(b) A license to operate a radio facility for the purposes described in paragraph (a) of this section may not be assigned or transferred prior to the completion of construction of the facility; *Provided, however,* The Commission may give its consent to the assignment or transfer of control of such a license where the applicant shows:

(1) That the assignment or transfer does not involve a substantial change in ownership or control of the authorized radio facilities; or,

(2) That the assignment or transfer is involuntary due to the licensee's insolvency, bankruptcy, incapacity, or death.

POLICIES GOVERNING THE PROCESSING OF APPLICATIONS AND THE SELECTION AND ASSIGNMENT OF FREQUENCIES FOR USE IN THE 806–821 MHz AND 851–866 MHz BANDS

§ 90.363 Processing of applications.

Applications for facilities to operate in the 806–821 MHz and 851–866 MHz bands will be processed as follows:

(a) All applications will first be considered to determine whether they are substantially complete and acceptable for filing. If so, they will be assigned a file number and put in pending status. If not, they will be returned to the applicant.

(b) All applications in pending status will be processed in the order in which they are received. The order in which they are received will be determined by the time and date on which the original proposal was filed with the Commission.

(c) Each application will then be reviewed to determine whether it can be granted. Should it be granted, frequencies or channels will be assigned by the Commission in accordance with its assignment policies and loading criteria.

(d) Where, upon examination, it is determined that the proposal must be dismissed, that application will be returned; and the priority accorded it will no longer obtain.

(e) Where, upon examination, it is determined that the proposal cannot be granted or dismissed, but that it must be designated for hearing, such action will be taken.

§ 90.365 Selection and assignment of frequencies.

(a) The Commission will select and assign frequencies for operation in the 806–821 MHz and 851–866 MHz bands.

(1) For trunked systems, the assignment of frequencies will be made, in accordance with applicable loading criteria, in minimum groups of five and in maximum groups of twenty channel pairs. All mobile and control station frequencies will be chosen from those allocated in the 806–821 MHz band. Mobile station transmitting frequencies will commence with Channel No. 1 at 820.9875 MHz, followed by Channel No. 2 at 820.9625 MHz, and proceed to the band end with uniform 25 kHz channeling; and base station transmitting frequencies will be selected by the Commission and assigned from those allocated in the 851–866 MHz band, commencing with Channel No. 1 at 865.9875 MHz, followed by Channel No. 2 at 865.9625 MHz, and proceed to the band end with uniform 25 kHz channeling. The spacing between associated mobile and base station frequencies shall be, uniformly, 45 MHz.

(2) For conventional systems the assignment of frequencies will be made in accordance with applicable loading criteria. Accordingly, depending upon the number of mobile units to be served, the applicant may either be required to share a channel, or, if the applicant shows a sufficient number of mobile units to warrant the assignment of one or more channels for its exclusive use, he may be licensed to use such channel or channels on an exclusive basis in his area of operation.

(3) For conventional systems, mobile station transmitting frequencies, as well as those for use by control stations, will be selected from those allocated in the 806–821 MHz band. Mobile and control station transmitting frequencies will commence with Channel No. 1 at 806.0125 MHz, followed by Channel No. 2 at 806.0375 MHz, and proceed to the band end with uniform 25 kHz channeling. Base station transmitting frequencies will be selected and assigned from those allocated in the 851–866 MHz band, with Channel No. 1 commencing at 851.0125 MHz, followed by Channel No. 2 at 851.0375 MHz, and proceed to the band end with uniform 25 kHz channeling. The spacing between associated mobile and base station frequencies shall be, uniformly, 45 MHz.

(b) Stations authorized by the Commission to operate in the 806–821 and 851–866 MHz band will be afforded protection solely on the basis of the mileage separation criteria set out below. Only co-channel interference between base station operations will be taken into consideration. Adjacent channel and other types of possible interference will not be taken into account.

(1) For trunked systems, the minimum separation between co-channel systems must be 112 km. (70 mi.) except that no trunked system shall be less than 168 km. (105 mi.) distant from co-channel wide area trunked systems on any of the following mountain top sites: Santiago Peak, Sierra Peak, Mount Lukens, Mount Wilson (California).

(2) For urban-conventional systems, co-channel base stations will be authorized only when the separation between the centers of the urban areas involved is at least 160 km. (100 mi.).

(3) For suburban-conventional systems, co-channel base stations will be authorized only when the separation between the centers of the suburban loading areas involved is at least 176 km (110 mi.).

(4) For a suburban conventional system to operate co-channel with an urban conventional system, the distance between the center of the urban area and the center of the suburban loading area must be at least 176 km. (110 mi.).

(5) The minimum distance from any of the following four sites: Santiago Peak, Sierra Peak, Mount Lukens, and Mount Wilson (California) to the center of the nearest co-channel "urban" area, must be 192 km. (130 mi.) and to the center of the nearest co-channel suburban loading area (for a suburban-conventional station), must be 208 km. (130 mi.).

(c) Notwithstanding the provisions of paragraph (b)(2) of this section, where an assigned channel of an urban-conventional system is not fully loaded in accordance with applicable loading criteria, and where the transmitter site of that system is located within 24 km. (15 mi.) from the center of the urbanized area involved, the Commission may issue additional authorizations for facilities to be located within 24 km. (15 mi.) of the center of that urbanized area until the channel in question is occupied in conformity with applicable loading criteria.

(d) Notwithstanding the provisions of paragraph (b)(3) of this section, where an assigned channel of a suburban-conventional system is not fully loaded in accordance with applicable loading criteria, the Commission may issue additional authorizations for facilities to be located within 40 km. (25 mi.) of the transmitter site of the first station authorized until the channel in question is occupied in conformity with applicable loading criteria.

(e) Notwithstanding the provisions of paragraph (b)(5) of this section, where a channel is assigned for use at either Santiago Peak, Sierra Peak, Mount Lukens, or Mount Wilson (California) and the channel is not fully loaded in accordance with applicable loading criteria, the Commission may issue additional authorizations for wide-area-coverage facilities to be located at the same site area until the channel in question is occupied in conformity with applicable loading criteria. A channel previously assigned at one such site area may not be used at any of the three remaining designated mountain-top sites.

(f) UHF television translator stations using UHF output channels from Channel 70 through Channel 83, shall operate on a secondary basis to land mobile stations using the UFH bands allocated under this subpart for land mobile use, and, accordingly, such television translator stations will not be protected from interference from such authorized land mobile stations.

(g) Pending further negotiations with Canada and Mexico, land mobile stations operating in the 806–890 MHz band shall do so on a secondary basis to any Canadian or Mexican television station placed in operation on television channels in this band.

(h) See table below.

TABLE 1. *Urbanized areas*

Urbanized area	Geographic center: North latitude	Geographic center: West longitude
Akron, Ohio	41°06'00"	81°30'44"
Albany-Schenectady-Troy, N.Y.	42°39'01"	73°45'01"

§ 90.367 Limitation on the number of frequencies assignable for conventional systems.

(a) The maximum number of frequency pairs that may be assigned to

any one licensee for the operation of a conventional radio system shall be five, except for licensees in the Taxicab Radio Service.

(b) Where an applicant proposes to operate a conventional radio system to provide facilities for the use of a single person or entity eligible under Subparts B, C, D, or E of this part, he may be assigned only the number of frequency pairs justified on the basis of the requirements of the proposed user of the system.

(c) No more than five frequency pairs may be assigned to any person proposing to operate one or more conventional radio systems to provide facilities for use by more than a single entity, if there is any overlap of the 40 dBu contour of the proposed new facility and any of the 40 dBu contours of any station authorized to that person, or to any person or entity in which he has a direct or indirect interest.

NOTE.—For the purposes of this subsection, the 40 dBu contour is assumed to be that obtained using maximum effective radiated power and antenna height permitted by this subpart.

§ 90.369 Other criteria to be applied in assigning channels for use in conventional systems of communication.

(a) In every case, the Commission will examine a proposal to determine the requirements of the applicant in terms of the number of mobile units to be served, together with the nature of the activities the applicant is engaged in. Where the applicant shows that the channel will be loaded to 70 percent of its assigned capacity, as defined in § 90.377 then that channel will be made available to that applicant for his exclusive use in the area in which he proposes to operate. Where the showing made justifies the assignment of more than one channel to the applicant, then additional frequencies will be made available for his use.

(b) Where an applicant proposes to furnish service to eligibles under Subparts B, C, D, or E of this part on a commercial basis, using a conventional system of communication, his application will be considered on the same basis as that of an applicant for private or shared communication facilities.

(c) In loading channels, the Commission will further consider the mode of operation planned; the purposes for which the system is to be used, as noted; the persons to be served by the station and other factors. The other factors shall include the following:

(1) Mobile relay or repeater operations will not be assigned on channels to be used in two-frequency simplex mode, and conversely.

(2) Systems employing full duplex mode of operation will not be licensed on frequencies assigned for mobile relay or two-frequency simplex systems.

(3) Applicants in one service group, where possible, will not be required to share with applicants in other service groups, where the loading criteria of the services involved are different, except where circumstances require it.

(4) Push-to-talk operations will not be licensed on channels which are to be used under other modes of operation, except in those cases where it is shown that such method of operation is feasible.

(d) The Commission, in addition to the foregoing standards, set out at paragraph (c) of this section, may take into consideration any other factor which might enable the persons licensed to use a given channel or channels in more efficient and effective ways.

(e) There shall be no limit on the number of systems authorized to operate in any one given area except that imposed by allocation limitations; and no person authorized to operate any radio facility under the provisions of this subpart shall have a right to protest proposals on grounds other than violation of or inconsistency with the provisions of this subpart. All grants are made subject to this condition and to the other conditions and standards set out in this chapter.

(f) No applicant shall be required to obtain any approval from a state or local regulatory authority to operate facilities authorized pursuant to these rules. State or local regulation may be exercised only to the extent that it does not limit competition or otherwise conflict with these rules. There shall be no limit on the number of systems authorized to operate in any one given area except that imposed by allocation limitations; and no person authorized to operate any radio facility under the provisions of this subpart shall have a right to protest proposals on grounds other than violation of or inconsistency with the provisions of this subpart. All grants are made subject to this condition and to the other conditions and standards set out in this subpart.

§ 90.371 Limitation on the number of frequency pairs assignable for trunked systems and on the number of trunked systems.

(a) The maximum number of frequency pairs that may be assigned for the operation of a trunked radio system shall be twenty. The minimum number of frequencies that may be assigned for the operation of such a system shall be five.

(b) No more than a single trunked system will be authorized to any one licensee to provide radio facilities for the use of more than a single person or entity where the 40 dBu contour of the proposed facility will overlap the 40 dBu contour of any existing facility of the licensee, or of any concern in which he has a direct or indirect interest, or for which applications are pending except where the applicant shows:

(1) That the additional trunked system will be used to provide radio facilities for a single entity, where the additional system is justified on the basis of the requirements of the proposed single user or,

(2) That radio systems previously authorized to the applicant are being operated to at least 90 percent of their authorized capacity.

NOTE.—For the purposes of this paragraph the 40 dBu contour is assumed to be that obtained using maximum effective radiated power and antenna height permitted by this chapter.

§ 90.373 Restriction on licensing manufacturers in the 806–821 MHz and 851–866 MHz bands.

No person engaged in the manufacture or production of radio frequency ("RF") equipment to be used in systems authorized under this subpart, or any person directly or indirectly controlled (through stock ownership or otherwise) by such manufacturing entity, may be licensed to operate more than one trunked system of communication to be used in providing base station and ancilliary facilities to eligibles under Subpart B, C, D or E of this part.

CHANNEL LOADING REQUIREMENTS FOR TRUNKED AND CONVENTIONAL SYSTEMS OPERATING IN THE 806–821 AND 851–866 MHz BANDS

§ 90.375 Trunked systems loading requirements.

(a) Trunked systems of communication will be authorized on the basis of the loading criteria set out in this section.

(b) See table below:

TABLE 1.—*Loading requirements for trunked systems*

Service group [1]	Vehicular radio units [2]		
	5-channel systems	10-channel systems	20-channel systems
Police and fire group	300	750	1,500
Business radio group [3]	500	1,000	2,000
Motor carrier group (urban and interurban passenger motor carriers only)	800	1,600	2,500
Other services group [3]	400	800	1,600
Mixed service group	500	1,000	2,000

[1] No provision is made for use for trunked systems by persons eligible in the taxicab radio service, since this mode of communication is not compatible with normal transmission requirements of taxicab companies.
[2] For loading trunked systems of communication, no distinction is made between vehicular and portable mobile units.
[3] When the primary activity of the licensee is the operation of urban or interurban passenger motor carriers, the loading requirements shall be as shown for the motor carrier group.

(c) Each applicant for trunked facilities shall certify that a minimum of 70 percent of the mobile units specified in his application will be placed in operation not later than the date on which the term of his license for the system expires.

(d) Any licensee, at any time his authorized trunked system is occupied to 90 percent of its specified capacity, may appy for additional channels. Assignments will be made based, first, upon the availability of frequencies for use by the licensee; and, second, based upon the showing made by the licensee of its requirements for additional channel pairs.

(e) Licensees of trunked facilities must commence construction within six months from the date of grant and complete construction within one year; Provided, however, That a licensee of a "trunked" facility assigned more than the minimum five-channel group may elect to construct the facility in stages. In this event, the licensee shall complete construction of the basic five-channel group of the authorized facility within the time limits given above; Provided, further, That should the licensee elect to proceed in this manner, then he must demonstrate that at the end of a two-year period from the date of the grant of his station authorization, the constructed facility is occupied to a minimum of 70 percent of the loading required, notwithstanding the provisions of paragraph (c) of this section.

§ 90.377 Conventional systems loading requirements.

(a) Conventional systems of communication will be authorized on the basis of the loading criteria set out in this section.

(b) See table below:

TABLE 1.—*Loading requirements for conventional systems*

Service group	Channel loading-units per channel vehicular/portable		
	Single licensee	2 to 5 licensees	Over 5 licensees
Police and fire group	50/100	40/80	30/60
Business radio group	90/180	70/140	50/100
Taxicab radio group [1]	150	125	100
Motor carrier radio group (urban and interurban passenger motor carriers, only)	150/300	125/250	100/200
Other services group [2]	70/140	50/100	40/60
Mixed service group		70/140	50/100

[1] No loading criteria for portable units in the taxicab radio group are given, since the requirements for units of this type has not been established in that service.
[2] Where the primary activity of the licensee is the operation of urban or interurban passenger motor carriers, the loading requirements shall be as shown for the motor carrier group.

(c) Every applicant for a conventional system of communication shall certify that a minimum of 70 percent of the mobile units specified in his application will be placed in operation not later than 8 months after the date of grant of his license for the system.

(d) Where licensees, authorized under the provisions of paragraph (c) of this section, do not load the channel or channels assigned in accordance with specified loading criteria, any (assigned channel) not so occupied shall be available for assignment to other applicants. All authorizations for conventional systems are issued subject to this condition.

(e) Any licensee, at any time its authorized conventional system is occupied to 90 percent of its specified capacity, may apply for additional channel pairs. Assignments will be made based, first, upon the availability of frequencies for use by the licensee, and, second, based upon the showing made by the licensee of its requirements for additional channel pairs.

TECHNICAL REGULATIONS REGARDING THE USE OF FREQUENCIES IN THE 806–821 MHz AND 851–866 MHz BANDS

§ 90.379 Limitations on power and antenna height.

(a) The maximum effective radiated power and antenna height, respectively, for base stations used in suburban-conventional systems of communication operating in the 851–866 MHz band shall be no greater than 500 watts (27 dBw) and 152 m. (500 ft.) above average terrain (AAT), or the equivalent thereof determined from Table 1 of paragraph (c) of this section. These are maximum values, and applicants will be required to justify power levels and antenna heights requested. For service area requirements less than 32 km. (20 mi.) in radius, see Table 3 of paragraph (c) of this section.

(b) The maximum effective radiated power and antenna height, respectively, for base stations used in trunked and urban conventional systems authorized in the 851–866 MHz band shall be no greater than 1 kilowatt (30 dBw) and 304 m. (1000 ft.) above average terrain (AAT), or the equivalent thereof determined from Table 1 of paragraph (c) of this section. These are maximum values, and applicants will be required to justify power levels and antenna heights requested. For service area requirements less than 32 km. (20 mi.) in radius, see Table 3 of paragraph (c) of this section.

(c) See table below:

TABLE 1.—*Equivalent powers and antenna heights for base stations in the 851–866 MHz band which have a requirement for a 32 km (20 mi) service area radius*

Antenna height (AAT) (feet) (meters)	Effective radiated power (watts) [1, 2]	
	Urban/trunked	Suburban
Above 5,000	65	15
4,501 to 5,000	65	15
4,001 to 4,500	70	20
3,501 to 4,000	75	25
3,001 to 3,500	100	30
2,501 to 3,000	140	35
2,001 to 2,500	200	50
1,501 to 2,000	350	80
1,001 to 1,500	600	160
501 to 1,000	[3] 1,000	220
Up to 500	1,000	[4] 500

[1] Power is given in terms of effective radiated power (ERP).
[2] Applicants in the Los Angeles, Calif., area who demonstrate a need to serve both the downtown and fringe areas will be permitted to utilize an ERP of 1 kw at the following mountaintop sites: Santiago Peak, Sierra Peak, Mount Lukens, and Mount Wilson.
[3] Stations with antennas below 1,000 ft (AAT) will be restricted to a maximum power of 1 kw (ERP).
[4] Stations with antenna below 500 ft (AAT) will be restricted to a maximum power of 500 W (ERP).

TABLE 2.—*Equivalent powers and antenna heights for suburban-conventional base stations in the 851–866 MHz band which have a requirement for less than 20 mi service area radius—maximum effective radiated power (watts)*

Service area radius, miles (kilometers)	Base station antenna height (AAT) (feet)					
	401–500	301–400	201–300	101–200	51–100	0–50
20 (32)	500	500	500	500	500	500
19 (30)	400	500	500	500	500	500
18 (29)	310	385	500	500	500	500
17 (27)	235	300	385	500	500	500
16 (26)	175	220	285	440	500	500
15 (24)	130	160	215	330	500	500
14 (22)	95	120	155	240	480	500
13 (21)	70	85	115	175	350	500
12 (19)	50	60	80	125	250	500
11 (18)	35	45	60	90	180	360
10 (16)	25	30	40	60	120	240
9 (14)	15	20	25	40	80	160
8 (13)	10	12	15	25	50	100
7 (11)	6	7	10	15	30	60
6 (10)	3	4	5	7	15	30
5 (8) or less	1	2	3	4	8	16

TABLE 3.—*Equivalent powers and antenna heights for urban-conventional and trunked system base stations in the 851–866 MHz band which have a requirement for less than 20 mi service area radius—maximum effective radiated power (watts)*

Service area radius (miles)	Base station antenna height (AAT)							
	751–1,000	501–750	401–500	301–400	201–300	101–200	51–100	0–50
20	1,000	1,000	1,000	1,000	1,000	1,000	1,000	1,000
19	800	1,000	1,000	1,000	1,000	1,000	1,000	1,000
18	640	830	1,000	1,000	1,000	1,000	1,000	1,000
17	480	625	960	1,000	1,000	1,000	1,000	1,000
16	360	470	720	900	1,000	1,000	1,000	1,000
15	270	350	540	675	875	1,000	1,000	1,000
14	200	260	400	500	650	1,000	1,000	1,000
13	140	180	280	350	450	700	1,000	1,000
12	100	130	200	250	325	500	1,000	1,000
11	70	90	140	175	230	350	700	1,000
10	45	60	90	110	145	220	440	1,000
9	30	40	60	75	100	150	300	600
8	20	25	40	50	65	100	200	400
7	15	20	30	40	50	80	160	320
6	8	10	16	20	25	40	80	160
5 or less	5	6	9	12	15	25	50	100

(d) The maximum output power of the transmitter for mobile stations is 100 watts (20 dBw).

§ 90.381 Restrictions on operational fixed stations.

(a) Except for control stations, operational fixed operations will not be authorized in the 806–821 and 851–866 MHz bands.

(1) Control stations associated with one or more mobile relay stations will be authorized only on the assigned frequency of the associated mobile station. Use of a mobile service frequency by a control station of a mobile relay system is subject to the condition that harmful interference not be caused to stations of licensees authorized to use the frequency for mobile service communication.

(2) Control stations shall in all cases employ directional antennas with the main lobe of radiation directed toward the station, or stations, being controlled. In each case, the antenna used, consistent with reasonable design, shall produce a radiation pattern that provides only the coverage necessary to permit satistfactory control of each mobile relay station and limits radiation in other directions to the extent feasible.

(3) The strength of the signal of a control station, controlling a single mobile relay station, may not exceed, by more than 6 dB, at the antenna terminal of the mobile relay receiver, the signal strength produced there by a unit of the associated mobile station. When the fixed station controls more than one mobile relay station, the 6 dB control-to-mobile signal difference need be verified at only one of the mobile relay station sites. The measurement of the signal strength of the mobile unit must be made when such unit is transmitting from the control station location or, if that is not practical, from a location which is not more than one-fourth mile from the control station site.

(4) Each application for a control station to be authorized under the provisions of this paragraph shall be accompanied by a statement certifying that the output power of the proposed transmitter will be adjusted to comply with the foregoing signal level limitation. Records of the measurements used to determine the signal ratio shall be kept with the station records and shall be made available, upon request, for inspection by Commission personnel.

§ 90.383 Acceptability of transmitters for licensing in the 806–821 and 851–866 MHz bands.

Except for transmitters used in developmental stations, each transmitter utilized by a station authorized for operation in these bands must be a type which is included on the Commission's current Radio Equipment List, or be of a type which has been type-accepted by the Commission for use in these bands.

OPERATING REQUIREMENTS IN THE 806–821 MHz AND 851–866 MHz BANDS

§ 90.385 Restrictions and limitations on permissible communications, on use, and on mode of operation.

(a) Systems licensed to provide service to persons or entities eligible under Subparts B, C, D, or E of this part may, in conformity with the following restrictions, be used:

(1) Only for purposes expressly allowed under this part.

(2) Only by persons who are eligible for facilities, either under this subpart or in the radio services included under Subparts B, C, D, or E of this part.

(3) Only for the transmission of messages or signals permitted in the service in which the participants are eligible.

(4) Only in the private dispatch mode of operation.

(b) Except as provided at paragraph (c) of this section, radio systems licensed under this subpart may be used for voice communications (telephony), only.

(c) Notwithstanding any contrary provisions in this subpart, a system licensed for use by a person or entity eligible under Subparts B, C, D, or E of this part may be employed for any purpose or operated in any manner, including the use of F2, F4, and F9 emissions, which is consistent with the regulations governing the service in which the user is eligible: Provided, That the loading standard which applies to the system is met and the channel or channels are assigned to that person or entity for its exclusive use.

§ 90.387 Station identification.

(a) Conventional systems of communication shall be identified in accordance with existing regulation governing such matters.

(b) Trunked systems of communication shall be identified through the use of an automatic device which transmits the call sign of the base station facility at 30-minute intervals. Such station identification shall be made on the lowest frequency in the base station trunk group assigned to the licensee. Should this frequency be in use at the time station identification is required, such identification may be made at the termination of the communication in progress on this frequency. Identification may be by voice or International Morse Code. When the call sign is transmitted in International Morse Code, it should be at a rate of between 15 to 20 words per minute; and it should be transmitted by the means of tone modulation of the transmitter, the tone frequency being between 800 and 1000 hertz. The level of modulation is to be high enough to be clearly discernible, but low enough not to be disruptive of voice communications in progress.

§ 90.389 Restriction on interconnection.

Radio systems licensed under this subpart may be interconnected with the wire line facilities of any telephone company; Provided, however, Such interconnection is accomplished at a control point or control station, which is situated at a fixed location (not in a mobile unit), licensed to the user, where a person immediately responsible for the operation of the base station is on duty, and where all of the requirements of § 90.429 are met. Provided, further, That such interconnection may not be accomplished at any control station or control point facility licensed to or used by, any person other than the licensee.

§ 90.391 Supplemental reports required of licensees authorized under this subpart.

(a) Licensees providing service to persons eligible either under Subparts B, C, D, or E of this part on a not-for-profit, cost-shared basis, shall, prior to furnishing service to any user not previously identified, notify the Commission of his intention to do so and furnish the Commission with sufficient information as to the prospective user to enable it to determine whether this person is eligible to participate in the sharing arrangement. Service to the participant may commence 30 days ofter such notification, unless the licensee is advised, in writing, of any deficiency in the licensees' showing or in the eligibility of the person to be served. In the latter case, until the deficiency is corrected or the user is shown to be qualified and eligible, he may not participate in the use of the system.

(b) Where a licensee provides service under the terms of an agreement, on a not-for-profit, cost-shared basis, such agreement may not be modified in any material respect until the changes in the terms and conditions are reported to, and approved by the Commission.

(c) Where a licensee provides service on a commercial basis, he shall not modify, in any material respect, the basic agreement under which such service is provided until the changes in its terms and conditions are reported to, and approved by, the Commission.

(d) Licensees offering service on a commercial basis to any person or entity eligible under either Subpart B, C, D, or E of this part, or to the public, must report, annually and at the time of filing applications for renewal of license, the number of mobile units being serviced; and such licensees shall, at that time, give the name and full address of each customer; the number of mobile units operated by each of them; and such other data as the party reporting may feel would be helpful in determining channel occupancy of the system, together with a certification that the terms of the basic agreement under which service is provided have not been modified or changed in any material respect. Such data shall be current as of the day and date falling 30 days prior to the date on which such licensees are required to file for renewal of their licenses, or, for the annual reports, at the close of the 12-month period covered by the annual report. The licensees of systems of the type covered by the provisions of this rule shall maintain records which, if referred to, will support any of the information required to be filed in the subject report. These records shall be available to the Commission upon request.

(e) Licensees furnishing service to eligible persons on a not-for-profit, cost-shared basis, shall, within 30 days of the close of the first full calendar year of operation, and each year thereafter, submit a report setting out the following information:

(1) A certification that during the period covered by the report, services have been offered and provided in accordance with the terms and conditions of the agreement approved by the Commission; that said agreement has not been notified or changed, except with the express approval of the Commission; and that records have been kept which show that service and facilities were made available on a not-for-profit, cost-shared basis. These records shall be available to the Commission upon request.

(2) A list of persons served during the period covered by the report.

(3) The number of mobile units operated by each user and a statement showing whether these units are of the vehicular or portable type.

(4) The total number of units served by the system during the period of the report, together with the number served on January 1st and on December 31st of the year of the report, and the average number of such mobile units served during this period of time.

(f) Licensees of trunked systems serving only themselves shall report annually, and at the time of filing applications for renewal of licenses, the number of mobile units being served, together with such other data as the licensees may feel would be helpful to the Commission in determining channel occupancy of their systems. Records supporting the information required in these reports shall be maintained by the licensees and shall be available to the Commission upon request.

(g) All licensees of conventional systems, in addition to the other requirements of this section, shall report the number of vehicular and portable units placed in operation within 8 months of the date of the grant of his license. Such reports shall be filed within 30 days from that date.

(h) All licensees of trunked systems shall report, within seven (7) months of the date of the grant, whether or not construction of the authorized facility has begun, and, within thirteen months of the date of the grant, whether or not construction of the facility has been completed.

OTHER PROVISIONS GOVERNING THE USE OF THE 806–821 MHz AND 851–866 MHz BANDS

§ 90.393 Special conditions governing the furnishing of radio equipment by licensees.

Every licensee of a trunked or conventional system furnishing base station facilities on a commercial basis, under this subpart, shall afford users the option of purchasing, leasing, or renting the associated control and mobile station radio gear. Should a user elect to lease or to rent the equipment and should the lease or rental arrangement involve no more than five (5) transmitting receiving units, the user must be given the further right to cancel the lease or rental agreement at any time, without penalty, on ten days' written notice.

§ 90.395 Number of systems authorized in a geographical area.

There shall be no limit on the number of trunked systems authorized to operate in any one given area except that imposed by allocation limitations and no person authorized to operate any trunked radio facility shall have a right to protest any other proposal on grounds other than violation of any inconsistency with the provisions of this subpart. All grants are made subject to the conditions and standards set out in this subpart.

§ 90.397 Special licensing requirements for radio systems used to provide service to persons other than the licensee.

Where a conventional or a trunked radio system is to be used to provide radio facilities to a single user or to multiple users, on a commercial basis, any associated control points, control stations, and mobile radio stations shall be authorized only to the user of those particular facilities.

Subpart N—Operating Requirements

§ 90.401 Scope.

The subpart prescribes general operating requirements for stations licensed under this part. This includes station operating procedures, points of communication, permissible communications, methods of station identification, control requirements, and station record keeping requirements.

§ 90.403 General operating requirements.

(a) Each licensee shall restrict all transmissions to the minimum practicable transmission time and shall employ an efficient operating procedure designed to maximize the utilization of the spectrum.

(b) Communications involving the imminent safety-of-life or property are to be afforded priority by all licensees.

(c) Licensees shall take reasonable precautions to avoid causing harmful interference. This includes monitoring

the transmitting frequency for communications in progress and such other measures as may be necessary to minimize the potential for causing interference.

(d) Stations licensed in this part shall not continuously radiate except where required for tests as permitted in Section 93.405, except where specifically permitted by this part, where specifically authorized in the station authorization, or on an as needed basis in the Radiolocation Radio Service.

(e) The radiations of the transmitter shall be suspended immediately upon detection or notification of a deviation from the technical requirements of the station authorization and until such deviation is corrected. For transmissions concerning the imminent safety-of-life or property, the transmissions shall be suspended as soon as the emergency is terminated.

§ 90.405 Permissible communications.

Stations licensed under this part may transmit only the following types of communication:

(a) Any communication related directly to the imminent safety-of-life or property;

(b) Communications directly related and necessary to those activities which make the licensee eligible for the station license held under this part. In addition, when communication service is provided under the cooperative sharing provisions of § 90.179, the licensee providing such service may transmit communications related to the activities for which the parties receiving the service would be eligible to be licensed.

(c) Communications for testing purposes required for proper station and system maintenance. However, each licensee shall keep such tests to a minimum and shall employ every measure to avoid harmful interference.

§ 90.407 Communications permitted during emergency situations.

The licensee of any station authorized under this part may, during a period of emergency in which the normal communication facilities are disrupted as a result of hurricane, flood, earthquake, or similar disaster, utilize such station for emergency communication without regard to § 90.405, but in accordance with the following:

(a) As soon as possible after the beginning of such emergency use, notice is sent to the Commission in Washington, D.C., and to the Engineer in Charge of the Radio District in which the station is located, stating the nature of the emergency and the use to which the station is being put;

(b) The emergency use of the station be discontinued as soon as substantially normal communication facilities are again available, and the Commission in Washington, D.C., and the Engineer in Charge be notified immediately when such special use of the station is terminated; and

(c) The Commission may at any time order discontinuance of such special use of the authorized facilities.

§ 90.409 Emergency operation of Public Safety and Special Emergency mobile stations at fixed locations.

During an emergency requiring a local communication center, any mobile transmitter authorized in the Public Safety or Special Emergency Radio Services may be operated temporarily as a base station at a fixed location for a period not to exceed ten days. If operation for a longer period is required, such operation must be specifically authorized.

§ 90.411 Civil Defense Communications in the Public Safety and Special Emergency Radio Services.

The licensee of any radio station licensed in the Public Safety or Special Emergency Radio Services may, on a voluntary basis, transmit communications necessary for the implementation of civil defense activities assigned such station by local civil defense authorities during an actual or simulated emergency, including drills and tests. Such communications, however, must relate to the activity or activities which form the basis of the licensee's eligibility in the radio service in which he is authorized.

§ 90.413 Civil Defense Communications in the Taxicab Radio Service.

In addition to communications permitted by § 90.405, stations in the Taxicab Radio Service may be used for the transmission of the following:

(a) Messages relating to the dispatch of taxicabs which are temporarily diverted from their normal public passenger transportation activities to the performance of civil defense transportation functions.

(b) Messages relating to the activities of the civil defense agency in those cases where other communications facilities including the Radio Amateur Civil Emergency Service, Disaster, or Domestic Public Services are inoperative or inadequate, either in fact or during a simulated civil defense emergency: Provided, That:

(1) As soon as possible after the beginning of such use, the licensee shall send notice to the Commission in Washington, D.C., and to the Engineer in Charge of the Radio District in which the station is located, stating the nature of the communications being transmitted and the duration of the special use of the station. In addition, the Engineer in Charge shall be notified as soon as possible of any change in the nature of or termination of such use.

(2) In the event such use is to be a series of pre-planned tests or drills of the same or similar nature which are scheduled in advance for specific times or at certain intervals of time, the licensee may send a single notice to the Commission in Washington, D.C., and to the Engineer in Charge of the Radio District in which the station is located, stating the nature of the communications to be transmitted, the duration of each such test, and the times scheduled for such use. Notice shall likewise be given in the event of any change in the nature or termination of any such series of tests.

(3) The Commission may, at any time, order the discontinuance of such special use of the authorized facilities.

§ 90.415 Prohibited Uses.

Stations licensed under this part shall not:

(a) Transmit program material of any kind for use in connection with broadcasting; or

(b) Render a communications common carrier service, except for stations in the Special Emergency Radio Service providing communications standby facilities under § 90.49, or operational fixed stations licensed in the Railroad Radio Service handling public telegraph messages as agents of telegraph common carriers pursuant to § 90.91(b)(2).

§ 90.417 Interstation communication.

(a) Any station licensed under this part may communicate with any other station without restriction as to type, service, or licensee when the communications involved relate directly to the imminent safety-of-life or property.

(b) Any station licensed under this part may communicate with any other station licensed under this part, with U.S. Government stations, and with foreign stations, in connection with mutual activities, provided that where the communication involves foreign stations prior approval of the Commission must be obtained, and such communication must be permitted by the government that authorizes the foreign station. Communications by Police Radio Service stations with foreign stations will be approved only to be conducted in accordance with artice 5 of the Inter-American Radio Agreement, Washington, D.C., 1949, the provisions of which are set forth in § 90.19(c).

§ 90.419 Points of communication.

Normally, operations licensed under this part are intended to provide intrastation mobile communications. For example, a base station is intended to communicate with its associated mobile stations and mobile stations are intended to communicate between associated mobile stations and associated base stations of the licensee. Accordingly, operations between base stations at fixed locations are permitted only in the following situations:

(a) Base stations licensed in the Public Safety and Special Emergency Radio Services may communicate with other base stations, operational fixed stations, or fixed receivers authorized in these services on frequencies below 450 MHz only on a secondary basis.

(b) Base stations licensed on any frequency in the Industrial and Land Transportation Radio Services and on base station frequencies above 450 MHz in the Public Safety and Special Emergency Services may communicate on a secondary basis with other base stations, operational fixed stations, or fixed receivers authorized in these services only when:

(1) The messages to be transmitted are of immediate importance to mobile stations; or

(2) Wireline communications facilities between such points are inoperative, economically impracticable, or unavailable from communications common carrier sources. Temporary unavailability due to a busy wireline circuit is not considered to be within the provisions of this subparagraph.

(c) Operational fixed stations may communicate with units of associated mobile stations only on a secondary basis.

(d) Operational fixed stations licensed in the Industrial and Land Transportation Radio Services may communicate on a secondary basis with associated base stations licensed in these services when:

(1) The messages to be transmitted are of immediate importance to mobile stations; or

(2) Wireline communications facilities between such points are inoperative, economically impracticable, or unavailable from communications common carrier sources. Temporary unavailability due to a busy wireline circuit is not considered to be within the provisions of this subparagraph.

§ 90.421 Operation of mobile units in vehicles not under the control of the licensee.

Mobile station transmitters may be installed in vehicles operated by persons other than the licensee as provided in the following paragraphs when necessary for the licensee to meet his requirements in connection with the activities for which he is licensed. The number of units so installed, together with units installed in vehicles operated by the licensee, must not exceed the number of mobile units authorized to the licensee. When an insufficient number of units is licensed to cover such additional units, the license must be modified to add a sufficient number of mobile units. The licensee is responsible for taking any necessary precaution to effectively eliminate the possibility of unauthorized operation of transmitters when not under the control of the licensee.

(a) Mobile units licensed in the Local Government Radio Service may be installed in any vehicle which in an emergency would require cooperation and coordination with the licensee, and in any vehicle used in the performance, under contract, of official activities of the licensee. This includes ambulances, emergency units of public utilities, lifeguard units, and vehicles of contractors or other persons or agencies performing for the licensee under contract one or more of its local government functions. This provision does not permit the installation of radio units in non-emergency vehicles not performing governmental functions under contract but with which the licensee might wish to communicate.

(b) Mobile units licensed in the Police Radio Services may be installed in any vehicle which in an emergency would require cooperation and coordination with the activities of the licensee. This includes emergency units of public utilities, lifeguard emergency units, ambulances, fire department vehicles and rural school buses.

(c) Mobile units licensed in the Fire Radio Service may be installed in emergency vehicles which may be alerted during a fire emergency. This includes emergency units of public utilities and water departments.

(d) Mobile units licensed in the Highway Maintenance Radio Service may be installed in vehicles of contractors or other persons having a direct responsibility for official highway activities.

(e) Mobile units licensed in the Forestry-Conservation Radio Services may be installed in vehicles of forestry cooperators, and persons having a direct responsibility in the prevention, detection, and suppression of forest fires.

(f) Mobile units licensed in the medical services category of the Special Emergency Radio Service may be installed in a vehicle or be hand-carried for use by any person with whom cooperation or coordination is required for medical services activities.

(g) Mobile units licensed in the Industrial Radio Services may be installed in vehicles of persons furnishing under contract to the licensee and for the duration of the contract, a facility or service directly related to the activities of the licensee.

(h) Mobile units licensed to an electric utility in the Power Radio Service on frequencies designated for use by an interconnected utility system may be installed in any vehicle operated by an organization or association comprised of interconnected electric utilities forming interconnections, power pools or groups.

(i) Mobile units authorized in the Automobile Emergency Radio Service may be installed in the vehicles of persons furnishing a private emergency road service to its members pursuant to a contract with the association.

§ 90.423 Operations on board aircraft.

(a) Except as provided in paragraphs (b), (c), and (d) of this section, and except as may be provided in other sections of this part with respect to operation on specific frequencies, mobile stations first authorized after September 14, 1973, under this part may be operated aboard aircraft for air-to-mobile, air-to-base, air-to-air and air-to-ship communications subject to the following:

(1) Operations are limited to aircraft that are regularly flown at altitudes below one mile (1.6 km) above the earth's surface;

(2) Transmitters are to operate with an output power not to exceed ten watts;

(3) Operations are secondary to land-based systems;

(4) Such other conditions, including additional reductions of altitude and power limitations, as may be required to minimize the interference potential to land-based systems.

(b) Exceptions to the altitude and power limitations set forth in paragraph (a) of this section may be authorized upon a showing of unusual operational requirements which justify departure from those standards, provided that the interference potential to regular land-based operations would not be increased.

(c) Mobile operations aboard aircraft in the services governed by this part, under licenses in effect September 14, 1973, may be continued without regard to provisions of paragraph (a) of this section, as follows:

(1) Operations may be continued only for the balance of the term of such licenses if aircraft involved are regularly flown at altitudes greater than one mile (1.6 km) above the earth's surface.

(2) Operations may be continued for one additional renewal license term if the aircraft involved are regularly flown at altitudes below one mile (1.6 km) above the earth's surface.

(d) Operation of radiolocation mobile stations may be authorized without regard to limitations and conditions set forth in paragraph (a), (b), and (c) of this section.

§ 90.425 Station identification.

Except as otherwise provided in this part, stations licensed under this part shall transmit identification as designated by this section.

(a) *Time of identification.* Each licensee shall transmit a station identification at the end of each transmission or exchange of transmissions, or once each 15 minutes (30 minutes in the Public Safety and Special Emergency Radio Services) of an operating period that has no substantial interruption. As an exception to this requirement, base and mobile stations licensed in the Railroad Radio Service may be identified at the beginning of each transmission or exchange of transmissions not exceeding three minutes.

(b) *Type of identification.* Unless otherwise provided, each station licensed under this part shall be identified by the transmission of the assigned call sign, given by voice (A3 or F3 emission) in plain language, in English. For fixed relay, vehicular repeater, and mobile relay stations, this identification requirement may be met by the transmission of the call sign of the associated controlling station. Other station identifiers that are arranged in a manner which cannot be confused with an assigned radio station call sign, may be employed as follows:

(1) In the Public Safety and Special Emergency Radio Services, mobile units operating above 30 MHz may employ an identifier in lieu of the assigned call sign that contains, at least, the name of the governmental subdivision under which the unit is licensed. The licensee must notify in writing the Engineer in Charge

of the district in which the unit operates of the specific identifiers used by the mobile units.

(2) In the Industrial Radio Services, mobile units communicating with a base station may transmit, once during each exchange of transmissions, any unit identifier, in lieu of the assigned call sign, which is on file in the station records of such base station, except that, when the base station transmits on a different frequency, the assigned call sign of either the mobile or the base station also must be transmitted.

(3) In the Land Transportation Radio Services, licensees may request the Commission's local Engineer-in-Charge to approve use of special mobile unit designations in lieu of the assigned call sign. This authority will not be granted where it appears that harmful interference to international operations may be caused by stations operating on frequencies below 50 MHz or by stations operating in areas within 50 miles of an international boundary; or, where it appears that the proposed method of identification will not adequately distinguish the mobile units of the applicant from the mobile units of other licensees in the area.

(4) In the Railroad Radio Service, stations may be identified by the name of the railroad and the train number, caboose number, engine number or name of fixed wayside station; or, if that is not practicable, by such other number or name as may be specified by the railroad concerned for the use of employees of the railroad to identify the fixed point or mobile unit. Where identification is made by other than a train number, caboose number or engine number, a list of such identification shall be maintained by the railroad. An abbreviated name or initial letters of the railroad may be used where such name or initial letters are in general usage. In those cases where it is shown that no difficulty would be encountered in identifying the transmissions of a particular station, as for example where stations of one licensee are located in a yard isolated from other radio installations, approval may be given to a request from the licensee for permission to omit the station identification.

(5) Nothing in this section shall be construed as prohibiting the transmission of station or unit identifiers, in addition to the assigned station call sign, which may be necessary for system operation.

(c) *Exception for mobile units in the public safety radio services.*

(1) When the station identification is regularly transmitted in 30 minute intervals, a single mobile unit in each general geographic area may be assigned responsibility for such identification. For the purposes of this paragraph, the term "each general geographic area" means an area not smaller than a single city or county and not larger than a single district administratively established for the service in which the radio system operates.

(2) A mobile station that operates on the transmitting frequency of the associated base station is not required to transmit any identification.

(d) *Special provisions for identification in the radiolocation service.*

(1) Stations in the Radiolocation Service operating on frequencies below 3400 kHz shall identify on each carrier frequency by transmission of the assigned call sign at the beginning and end of each period of operation. Such identification shall be by the Morse Code signals specified in the Telegraph Regulations annexed to the International Telecommunication Convention, Geneva, 1959, using A1 or A2 emission. For the latter emission, either the modulating audio frequency or modulated emission may be keyed.

(2) Stations in the Radiolocation Service operating on frequencies above 3400 kHz are not required to identify except upon specific instruction from the Commission.

(e) *Exemption for special uses.* A station which is transmitting for telemetering purposes or for the activation of devices which are employed solely as a means of attracting attention, or for remote control purposes, or which is retransmitting by self-actuating means a radio signal received from another radio station or stations, are exempted from any station identification requirements.

§ 90.427 Precautions against unauthorized operation.

Each transmitter shall be so installed and protected that it is not accessible to or capable of operation by persons other than those duly authorized by and under the control of the licensee. Provisions of this part authorizing certain unlicensed persons to operate stations, or authorizing unattended operation of stations in certain circumstances, shall not be construed to change or diminish in any respect the responsibility of station licensees to maintain control over the stations licensed to them (including all transmitter units thereof), or for the proper functioning and operation of those stations and transmitter units in accordance with the terms of the licenses of those stations.

§ 90.429 Control point and dispatch point requirements.

(a) *Control point required.* Unless permitted to be operated on an unattended basis, each station shall be provided with a control point;

(b) *Control point defined.* A control point is an operating position:

(1) Which must be under the control and supervision of the licensee;

(2) Where a person immediately responsible for the operation of the transmitter is stationed;

(3) Where the monitoring facilities required by this part are installed.

(c) *Control point location.* The location of the control point will be specified in the station license and will be assumed to be the same as that of the transmitting equipment unless an application for a different location has been approved by the Commission.

(d) *Control point facilities required.* At each control point, the following facilities shall be installed:

(1) A carrier operated device which will provide continuous visual indication when the transmiter is radiating, or, a pilot lamp or meter which will provide continuous visual indication when the transmitter circuits have been placed in a condition to produce radiation. The provisions of this subparagraph shall not apply to hand-carried transmitters or transmitters installed on motorcycles. The control point for a transmitter utilized to activate another radio station may employ a single pilot lamp or meter as an indication of the activation of local and remote transmitters.

(2) Equipment to permit the person responsible for the operation of the transmitter to monitor aurally all transmissions originating at dispatch points under his supervision;

(3) Facilities which will permit the person responsible for the operation of the transmitter either to disconnect the dispatch point circuits from the transmitter or to render the transmitter inoperative from any dispatch point under his supervision; and

(4) Facilities which will permit the person responsible for the operation of the transmitter to turn the transmitter carrier on and off at will.

(e) *Dispatch point.* A dispatch point is any position from which messages may be transmitted under the supervision of the person at a control point who is responsible for the operation of the transmitter. Dispatch points may be installed without authorization from the Commission.

§ 90.431 Unattended operation.

No person is required to be in attendance at a station when transmitting during normal rendition of service and when either:

(a) Transmitting for telemetering purposes, or;

(b) Retransmitting by self-actuating means a radio signal received from another radio station or stations

§ 90.433 Operator license requirements.

No operator license or permit is required for the operation of stations licensed under this part except as follows:

(a) *Maintenance and tests.* All transmitter adjustments or tests during the installation, servicing, or maintenance or a radio station which may affect the proper operation of such station shall be made by or under the immediate supervision and responsibility of a person holding a first-or-second-class commercial radio operator license, either radiotelephone or radiotelegraph, who shall be responsible for the proper functioning of the station equipment. Only persons holding a radiotelegraph first-or-second-class operator license shall perform such functions at radiotelegraph stations transmitting by any type of the Morse Code.

(b) *Operation during the course of normal rendition of radiotelegraph service.* Only a person holding a commercial radiotelegraph operator license of any class issued by the Commission shall operate a station when transmitting radiotelegraphy by any type of the Morse Code. Generally, only police zone and interzone stations will be transmitting radiotelegraphy.

§ 90.435 Posting of operator license.

Each person required to have an operator's license under this section shall post, or have immediately available at a place he is normally based or on duty, the original of his license, except that when he is performing duty at a station where he is not normally based, he shall have on his person a valid license identification card (FCC Form 785–F).

§ 90.437 Posting station licenses and transmitter identification cards or plates.

(a) The current original authorization for each station shall be retained as a permanent part of the station records but need not be posted.

(b) A clearly legible photocopy of the authorization for each base or fixed station at a fixed location shall be posted at every control point of the station.

(c) A Transmitter Identification Card (FCC Form 452–C) or a plate of metal or other durable substance, legibly indicating the call sign of the station, shall be affixed on each mobile station readily visible for inspection.

(d) If the transmitter is not in view of the operating position or is not readily accessible, then:

(1) A transmitter Identification Card or plate shall be affixed to the control equipment at the transmitter operating position or posted adjacent to it. The posting of the Transmitter Identification Card is not required for radio transmitters operated on railroad rolling stock.

(2) A Transmitter Identification Card or plate legibly indicating the call sign and the licensee's name and address shall be affixed, readily visible for inspection, to each transmitter operated at a fixed location.

§ 90.439 Inspection of stations.

All stations and records of stations in these services shall be made available for inspection at any reasonable time and any time while the station is in operation upon reasonable request of an authorized representative of the Commission.

§ 90.441 Inspection and maintenance of tower marking and associated control equipment.

(a) The licensee of any radio station with an antenna structure that must be painted or illuminated as specified in the station authorization is required to maintain the tower marking and associated control equipment in accordance with the following:

(1) The tower lights shall be checked at least once each 24 hours. Assurance that such lights are functioning properly shall be accomplished by visually observing either the tower lights or by observing an automatic indicator that registers any failure of such lights. Alternately, an automatic alarm system which detects any failure of the tower lights and indicates such failure to the licensee may be used but must be properly maintained.

(2) Any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within 30 minutes, regardless of the cause of such failure, shall be reported immediately by telephone or telegraph to the nearest Flight Service Station or office of the Federal Aviation Administration. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(3) All automatic or mechanical control devices, indicators, and alarm systems associated with the tower lights shall be inspected at intervals not to exceed three months, to insure that such apparatus is functioning properly.

(4) All lighting shall be exhibited from sunset to sunrise unless otherwise specified in the instrument of station authorization.

(5) All towers shall be cleaned or repainted as often as is necessary to maintain good visibility.

(b) Licensees operating stations licensed under this part which share a tower used for antenna and/or antenna supporting purposes with other licensees under this part or under this chapter, may designate in writing one licensee to be responsible for maintenance and inspection of the tower, and maintenance of the inspection log. In such cases, a copy of the agreement must be filed with the Commission to be maintained in each participating licensee's station file. Each licensee remains individually responsible for meeting the inspection, maintenance and recordkeeping requirements.

§ 90.443 Content of station records.

Each licensee of a station in these services shall maintain records in accordance with the following:

(a) For all stations, the results and dates of the transmitting measurements required by § 90.215 of this part and the name of the person or persons making the measurements.

(b) When service or maintenance duties are performed on stations, the responsible operator shall sign and date an entry in the station record giving:

(1) Pertinent details of all duties performed by and under the supervision of the operator;

(2) The operator's name and address, and;

(3) The class, serial number and expiration date of the operator's license. Information stipulated in subparagraphs (2) and (3) of this paragraph need be entered only once in the station record at any station where the responsible operator is employed on a full time basis and an operator's license is properly posted.

(c) For stations whose antenna or antenna supporting structure must be illuminated, the licensee will record:

(1) The time the tower lights are turned on and off each day, if manually controlled.

(2) The time the daily check of proper operation of the tower lights was made, if an automatic alarm system is not provided.

(3) Any observed or otherwise known failure of a tower light by indicating:

(i) The nature of such failure.

(ii) The date and time the failure was observed or otherwise noted.

(iii) The date, time, and nature of adjustments, repairs or replacements made.

(iv) The identification of the Flight Service Station (Federal Aviation Administration) notified of the failure of any code or rotating beacon light not corrected within 30 minutes, and the date and time such notice was given.

(v) The date and time notice was given to the Flight Service Station of the Federal Aviation Administration that the required illumination was resumed.

(4) The completion of the 3-month periodic inspection required by § 90.441 of this part by indicating:

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, or repairs made to insure compliance with the lighting requirements and the date such adjustments, replacements or repairs were made.

§ 90.445 Form of station records.

(a) Station records shall be kept in an orderly manner, and in such detail that the data required are readily available. Key letters or abbreviations may be used if proper meaning or explanation is set forth in the record.

(b) Each entry in the records of each station shall be signed by a person qualified to do so, having actual knowledge of the facts to be recorded.

(c) No record or portion thereof shall be erased, obliterated, or wilfully destroyed within the required retention period. Any necessary correction may be made only by the person originating the entry, who shall strike out the erroneous portion, initial the correction made, and indicate the date of correction.

§ 90.447 Retention of station records.

Records required by this part shall be retained by the licensee for at least one year.

§ 90.449 Answers to a notice of violation.

Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act or treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 10 days from such receipt or such other period as may be specified, send a written answer to the office of the Commission originating the original notice. If an answer

cannot be sent, or an acknowledgement made within such period, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. The reply shall set forth the steps taken to prevent a recurrence of improper operation.

Subpart O—Chicago Land Mobile Spectrum Management

§ 90.481 Scope.

This subpart sets forth special provisions for the filing of applications for authority to operate new or modified radio facilities in the Chicago region and the Chicago land mobile spectrum management district.

§ 90.483 Chicago region.

The Chicago Region is defined to consist of the counties listed below:

ILLINOIS

1. Boone.
2. Bureau.
3. Carroll.
4. Champaign.
5. Christian.
6. Clark.
7. Coles.
8. Cook.
9. Cumberland.
10. De Kalb.
11. De Witt.
12. Douglas.
13. Du Page.
14. Edgar.
15. Ford.
16. Fulton.
17. Grundy.
18. Henry.
19. Iroquois.
20. Jo Daviess.
21. Kane.
22. Kankakee.
23. Kendall.
24. Knox.
25. Lake.
26. La Salle.
27. Lee.
28. Livingston.
29. Logan.
30. Macon.
31. Marshall.
32. Mason.
33. McHenry.
34. McLean.
35. Menard.
36. Mercer.
37. Moultrie.
38. Ogle.
39. Peoria.
40. Piatt.
41. Putnam.
42. Rock Island.
43. Sangamon.
44. Shelby.
45. Stark.
46. Stephenson.
47. Tazewell.
48. Vermilion.
49. Warren.
50. Whiteside.
51. Will.
52. Winnebago.
53. Woodford.

INDIANA

1. Adams.
2. Allen.
3. Benton.
4. Blackford.
5. Boone.
6. Carroll.
7. Cass.
8. Clay.
9. Clinton.
10. De Kalb.
11. Delaware.
12. Elkhart.
13. Fountain.
14. Fulton.
15. Grant.
16. Hamilton.
17. Hancock.
18. Hendricks.
19. Henry.
20. Howard.
21. Huntington.
22. Jasper.
23. Jay.
24. Kosciusko.
25. Lake.
26. Lagrange.
27. La Porte.
28. Madison.
29. Marion.
30. Marshall.
31. Miami.
32. Montgomery.
33. Morgan.
34. Newton.
35. Noble.
36. Owen.
37. Parke.
38. Porter.
39. Pulaski.
40. Putnam.
41. Randolph.
42. St. Joseph.
43. Starke.
44. Steuben.
45. Tippecanoe.
46. Tipton.
47. Vermillion.
48. Vigo.
49. Wabash.
50. Warren.
51. Wells.
52. White.
53. Whitley.

IOWA

1. Cedar.
2. Clinton.
3. Dubuque.
4. Jackson
5. Jones.
6. Muscatine.
7. Scott.

MICHIGAN

1. Allegan.
2. Barry.
3. Berrien.
4. Branch.
5. Calhoun.
6. Cass.
7. Clinton.
8. Eaton.
9. Hillsdale.
10. Ingham.
11. Ionia.
12. Jackson.
13. Kalamazoo.
14. Kent.
15. Lake.
16. Mason.
17. Mecosta.
18. Montcalm.
19. Muskegon.
20. Newaygo.
21. Oceana.
22. Ottawa.
23. St. Joseph.
24. Van Buren.

OHIO

1. Defiance.
2. Mercer.
3. Paulding.
4. Van Wert.
5. Williams.

WISCONSIN

1. Adams.
2. Brown.
3. Calumet.

§ 90.485 Applications.

Applicants for new base, mobile, or fixed stations on frequencies below 950 MHz (excluding applications in the Radiolocation Service) and located in the Chicago Region, as defined in section 90.483, and licensees proposing to modify, renew, or assign existing authorizations for such stations located in the Chicago Region shall submit Form 425.

§ 90.487 Special Provisions Relating to frequency assignments in the Chicago region.

(a) The table below reflects the basic frequency assignment methodology for use in the Chicago Region. Category I consists of the Police and Fire Radio Services and their present frequencies. Category II consists of other radio services and their frequencies:

CATEGORY I

Police Radio Service
Fire Radio Service

CATEGORY II

GROUP A

Forestry-Conservation Radio Service
Highway Maintenance Radio Service
Local Government Radio Service
Special Emergency Radio Service

GROUP B

Power Radio Service
Telephone Maintenance Radio Service
Railroad Radio Service

GROUP C

Petroleum Radio Service
Forest Products Radio Service
Manufacturers Radio Service
Relay Press Radio Service
Motion Picture Radio Service
Automobile Emergency Radio Service
Business Radio Service
Taxicab Radio Service
Motor Carrier Radio Service
Special Industrial Radio Service

(b) Frequencies in Category I are available only to those who establish eligibility in that Category. Frequencies in Category II are available to all persons who establish eligibility in Category II; and are also available to Category I eligibles on a secondary basis.

(c) To the extent practicable, frequencies from the service within which an applicant has established eligibility will be assigned to that applicant. If no suitable frequency is available, then a search will be made of frequencies of other services in the same group as the applicant. Access to the frequencies of a different group will be permitted only on a case-by-case basis and only when no suitable frequency is available in the group in which eligibility is established.

(d) Where services which presently share frequencies are in different categories or groups, the shared frequencies will only be available to the lower priority category or group; except for the eleven low band frequencies shared by police and local government which go to Category I. Licensees who presently operate on these frequencies may continue to do so even though the frequencies do not appear in their eligibility pool.

(e) The eligibility, permissible communications, points of communications, technical requirements and assignment limitations reflected in the various subparts of this part will also govern in the Chicago Region. Station limitations for the service in which licensee eligibility is established will govern the use of a station even though the frequency assigned may not be from the service in which eligibility was established; except in the case of mobile relay stations which will only be permitted on frequencies previously available for mobile relay use.

(f) Frequency coordination procedures of Section 90.175 are required in the Chicago region after August 31, 1977.

NOTE.—The above frequency assignment methodology for inter-service sharing will not be implemented until further notice by the Commission.

Subpart P—Developmental Operation

§ 90.501 Scope.

This subpart contains the procedures and requirements for the filing of applications for developmental licenses. It includes special requirements related to developmental operation, restrictions on operations, and special reports required when the development operation is to seek operational data or techniques directed toward the extension of that service.

§ 90.503 Eligibility.

Those persons who are eligible to operate stations in services under this part on a regular basis are also eligible to obtain an authorization for developmental operation in those particular radio services.

§ 90.505 Showing required.

(a) Except as provided in paragraph (b) of this section, each application for developmental operation shall be accompanied by a showing that:

(1) The applicant has an organized plan of development leading to a specific objective;

(2) The actual transmission by radio is essential to proceed beyond the present stage of the program;

(3) The program has reasonable promise of substantial contribution to the expansion or extension of the radio art, or is investigating new unexplored concepts in radio transmission and communications;

(4) The program will be conducted by qualified personnel;

(5) The applicant is legally and financially qualified, and possesses adequate technical facilities to conduct the proposed program; and

(6) The public interest, convenience, and necessity will be served by the proposed operation.

(b) The provisions of paragraph (a) of this section do not apply when an application is made for developmental operation solely for the reason that the frequency requested is restricted to such developmental use.

§ 90.507 Limitations on use.

Stations used for developmental operation shall conform to all technical and operating requirements of Subparts I and N of this part, unless specifically exempted in the instrument of authorization.

§ 90.509 Frequencies available for assignment.

Stations engaged in developmental operation may be authorized to use a frequency or frequencies available in the service in which they propose to operate. The number of channels assigned will depend upon the specific requirements of the developmental program and the number of frequencies available in the particular geographical area where the station is to operate.

§ 90.511 Interference.

The operation of any station engaged in developmental work shall not cause harmful interference to the operation of stations regularly licensed under any part of the Commission's rules.

§ 90.513 Special provisions.

(a) The developmental program as described by the application for authorization shall be followed unless the Commission shall otherwise direct.

(b) Where some phases of the developmental program are not covered by the general rules in this chapter and the rules in this part, the Commission may specify additional requirements or conditions as deemed necessary in the public interest, convenience, or necessity.

(c) The Commission may, from time to time, require a station engaged in developmental work to conduct special tests which are reasonable and desirable to the authorized developmental program.

§ 90.515 Change or cancellation of authorization without hearing.

Every application for authority to engage in developmental operation shall be accompanied by a statement signed by the applicant in which it is agreed that any authorization issued pursuant thereto will be accepted with the express understanding of the applicant that it is subject to change in any of its terms or to cancellation in its entirety at any time, upon reasonable notice but without a hearing, if, in the opinion of the Commission, circumstances should so require.

§ 90.517 Report of operation.

A report on the results of a developmental program shall be filed with and made a part of each application for renewal of authorization. In cases where no renewal is requested, such report shall be filed within 60 days of the expiration of such authorization. Matters which the applicant does not wish to disclose publicly may be so labeled; they will be used solely for the Commission's information, and will not be publicly disclosed without permission of the applicant. The report shall include comprehensive and detailed information on:

(a) The final objective.
(b) Results of operation to date.
(c) Analysis of the results obtained.
(d) Copies of any published reports.
(e) Need for continuation of the program.
(f) Number of hours of operation on each frequency.

This report is not required if the sole reason for the developmental authorization is that the frequency of operation is restricted to developmental use only.

Subpart Q—Emergency Communications Pursuant to the Industrial Communications Emergency Plan (ICEP) and the Land Transportation Industries Communications Emergency Plan (LATICEP)

§ 90.525 Industrial Communications Emergency Plan (ICEP).

(a) *Scope and objectives.* This section contains the rules and regulations providing for emergency operations for all Industrial Radio Service Licensees of the Federal Communications Commission, and an Industrial Communications Emergency Plan (ICEP) prepared pursuant to and by the authority of Sections 1, 4(i), 301, 303, 307, 308, 309, 312, 316, 318, 319 and 606 of the Communications Act of 1934 as amended, and Executive Order 11490, as amended. The objective of this subpart is to provide for the development of detailed communications plans containing the designation of facilities, mutually compatible operational arrangements, procedures, and interconnecting facilities, for the continued operation of industrial radio stations on a voluntary, organized basis during times of war, grave national crisis, or other National, State or Operational (Local) emergency situations.

(b) *Industrial communications emergency plan (ICEP) defined.* The Industrial Communications Emergency Plan (ICEP) is a plan containing procedures for the development of detailed communications plans of Industrial Radio Service licensees based on essential communications requirements of industry, including communications with interested Government Agencies during emergencies on a National, State, or Operational (Local) Area level.

(c) *Emergency situation.* An emergency situation is a situation posing a threat to the safety of life and/or property on a National, State, or Operational (Local) level.

(d) *Activation and termination.* In an emergency situation communications elements of the ICEP may be activated and terminated by competent authorities as defined in the Detailed Operational ICEPs.

(e) *National, State and local emergency operation.* Detailed data, information and instructions for emergency operation of mutually compatible facilities, systems and arrangements will be set forth in the Detailed Operational ICEPs which are considered a supplement to the ICEP.

(f) *Participation of class A citizens radio service licensees.* Industrial entities may utilize their Citizens Radio Service Class A facilities, licensed to them under Section 95.41(a) of the Commission's Rules, in the operation of their own Detailed Operational Industrial Communications Emergency Plans as developed in accordance with the procedures established in this subpart.

(g) *Emergency Communications Authorization (ECA).* (1) A radio station licensee in any industry covered by the Industrial Communications Emergency Plan (ICEP) may be granted an Emergency Communications Authorization (ECA) by the Federal Communications Commission. Each ECA shall remain in effect concurrently with the terms of the approved Detailed Operational Industrial Communications Emergency Plans provided:

(2) The licensee functioning within the terms of the ECA has demonstrated his willingness to cooperate with others by agreeing to provide service or interconnection as part of a communication emergency plan.

(3) The licensee is included in an FCC approved intra-company plan to utilize its radio facilities as emergency backup for other communications services used by the licensee.

(4) An ECA will be issued to each industrial entity for each communications system plan approved by the Commission.

(5) Any industrial radio service participating in the ICEP may withdraw from participation by giving thirty (30) days'

written notice and by submitting his Emergency Communications Authorization (ECA) to the Federal Communications Commission for cancellation.

(h) *Tests of approved interconnecting systems and facilities.* After detailed emergency communication systems plans are completed, or segments of the system are completed, system operational tests may be necessary. When deemed necessary, these tests shall be conducted as specified in the approved operational plans. Results of these tests shall be furnished to the FCC Engineer in Charge (EIC), the Chief, Emergency Communications Division of the FCC, and to others concerned. These tests would be used as training exercises for personnel at all levels.

§ 90.527 Land Transportation Industries Communications Emergency Plan (LATICEP).

(a) *Scope and objective.* This section applies to those stations licensed under this part and operating in a system for which a National Defense Emergency Authorization has been issued. The section provides for operation of stations within the United States during a grave national crisis or war. The objective is to provide for flexible operation of communications equipment during such an emergency to fulfill emergency communication requirements and needs.

(b) *Definition of terms.* (1) National Defense Emergency Authorization (NDEA). A National Defense Emergency Authorization is an authorization issued by the Federal Communications Commission to the licenses of land transportation stations, subject to the provisions of this part, for operation in accordance with the Interim Basic Land Transportation Industries Communications Emergency Plan (LATICEP) including the annexes and supplements to that plan.

(2) *Emergency action notification.* The Emergency Action Notification is the notice (with or without an Attack Warning) to all licensees and regulated services of the Federal Communications Commission and to the general public of the existence of an Emergency Action Condition. The Emergency Action Notification is released upon direction of the President of the United States and is disseminated only via the Emergency Action Notification System.

(3) *Emergency action condition.* The Emergency Action Condition is the period of time between the transmission of an Emergency Action Notification and the transmission of the Emergency Action Condition Termination.

(4) *Emergency action notification system.* The Emergency Action Notification System is the system by which all licensees and regulated services of the Federal Communications Commission, and the general public, are notified (with or without an Attack Warning) of the existence of an Emergency Action Condition resulting from a grave national crisis or war. The Emergency Action Notification System consists only of the following approved facilities, systems, and arrangements:

(i) *First method.* From the President of the United States via the White House Communications Agency to the Associated Press (AP) and United Press International (UPI); thence via automatic selective switching and teletype Emergency Action Notification to all standard, FM, and television broadcast and other stations (including Land Transportation stations) subscribing to the AP and UPI Radio Wire Teletype Networks.

(ii) *Second method.* From the President of the United States via the White House Communications Agency to specified control points of the nationwide commercial Radio and Television Broadcast Networks, the American Telephone and Telegraph Co. and other specified points via a dedicated teletypewriter network; thence to all affiliates via any available commercial Radio and Television internal network alerting facilities.

(iii) *Third method.* Off-the-air monitoring of a standard, FM, or television broadcast station by other standard, FM, and television broadcast stations and FCC licensees (including Land Transportation licensees) for receipt of the Emergency Action Notification. All broadcast station licensees are required to install, maintain, and operate radio receiving equipment for receipt of the Emergency Action Notification at this level.

(iv) *Fourth method.* Off-the-air monitoring of standard, FM, and TV broadcast stations by the general public who are listening or viewing or whose receivers can be activated by standardized selective signaling transmitted by said stations.

(5) *Emergency action condition termination.* The Emergency Action Condition Termination is the notice to all licensees and regulated services of the Federal Commission and to the general public of the termination of an Emergency Action Condition. The Emergency Action Condition Termination is released upon direction of the President of the United States and is disseminated only via the Emergency Action Notification System.

(c) *Emergency operation.* (1) A National Defense Emergency Authorization will be issued on a system basis by the Commission to those licensees who are engaged in essential activities for which an approved National Industry Advisory Committee Emergency Plan has been adopted, provided, the licensee has submitted to the Commission a certification of willingness to participate in and conform to the emergency communications plan applicable to his stations licensed under this part for which coverage is desired, has ceftified thereon a willingness to interconnect facilities where necessary with those of similar licensees and to cooperate with such licensees in providing emergency communications. Once issued, a National Defense Emergency Authorization is effective for each station in the system concurrently with the regular license for that station. A National Defense Emergency Authorization may be terminated by the Commission upon a finding that, for any reason, the facilities are no longer capable of providing effective emergency communications in accordance with the National Industry Advisory Committee Emergency Plan concerned.

(2) Over and above the permissive provisions of all applicable rules and notwithstanding any provisions of this chapter or license restrictions to the contrary, systems covered by a National Defense Emergency Authorization and operated by licensees participating in the Land Transportation Industries Communications Emergency Plan (LATIC EP) are authorized to operate in accordance with the provisions of this paragraph under the emergency conditions and for the periods of time specified above:

(i) To share facilities with, or interconnect with, any other communications facilities necessary to accomplish transportation industry's communications requirements where such sharing and/or interconnection is mutually acceptable.

(ii) To use mobile frequencies to provide point-to-point services and to effect tie-ins between established fixed services.

(iii) To use any type of modulation, including multiplex, so long as the occupied bandwidth does not exceed that normally authorized on the frequency involved, and to use any operating power not exceeding the maximum specified under Part 93, subject to mutual resolution of any resulting interference.

(iv) To test periodically any facility established for emergency use under this section.

PART III

CONSUMER PRODUCT SAFETY COMMISSION

■

IDENTIFICATION OF CERTAIN TOYS AND OTHER ARTICLES PRESENTING POTENTIAL PUNCTURE OR LACERATION INJURY HAZARDS DUE TO SHARP POINTS

Technical Requirements

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1500]

IDENTIFICATION OF CERTAIN TOYS AND OTHER ARTICLES PRESENTING POTENTIAL PUNCTURE OR LACERATION INJURY HAZARDS DUE TO SHARP POINTS

Proposed Technical Requirements

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed Regulation.

SUMMARY: The Commission is proposing a regulation that would establish technical requirements for toys and other articles intended for use by children under 8 years of age. These requirements would identify sharp points on such children's articles that could injure children. If the Commission identifies sharp points on particular children's articles that present an unreasonable risk of injury to children under 8 years of age, it will initiate rulemaking proceedings to ban those articles.

DATES: Comments must be received on or before September 6, 1977. The proposed effective date woud be 365 days after publication of final requirements.

ADDRESS: Send comments to the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Elaine Besson, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207 (301–492–6550).

SUPPLEMENTARY INFORMATION: On January 7, 1975, the Consumer Product Safety Commission, pursuant to section 2(f)(1)(D) of the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261(f)(1)(D)), proposed regulations to ban toys intended for children under 8 years of age[1] that present an unreasonable risk of personal injury from puncture or laceration hazards due to sharp points (40 FR 1491). The proposed regulations also set forth test criteria for determining whether toys intended for children under 8 years of age present these hazards.

At the Commission meeting of April 7, 1977, the Commission voted to withdraw its proposed regulations and to repropose the sharp point test criteria, with certain changes, as a technical requirements regulation.

The effect of the technical requirements regulation proposed in this document, if issued in final form, would be to identify toys containing sharp points that the Commission preliminarily believes are hazardous to children under 8 years of age. Because such toys may not always present a mechanical hazard under the FHSA (section 2(s), 15 U.S.C. 1261(s)), the Commission is not proposing a regulation that would automatically classify such toys as banned hazardous substances. Instead, the Commission will regulate such toys on a product-by-product basis whenever the test procedures identify them as presenting sharp points and the Commission believes that they present a mechanical hazard as defined in the FHSA.

The Commission's reasons for its proposal of this product-by-product regulatory approach for toys with points and the manner in which the Commission will use this approach are discussed below.

RATIONALE FOR REPROPOSAL

The Commission has decided to withdraw the January 7, 1975 proposed regulation and to repropose the sharp point test criteria, with certain changes, as a technical requirements regulation for the following reasons:

1. The proposed banning regulation of January 7, 1975 and the technical requirements regulation proposed below include in their scope all products intended for children within an age span ranging from 0 to 8 years. However, the Commission believes that it would be unwise to attempt to apply a single sharp-point test criterion in a self-executing banning regulation to the numerous products which make up the play environment of children between the ages of 0 and 8 years. Sharp point tests on toys conducted by the Commission staff showed that some points which were classified sharp by the test instrument and were accessible by the criteria of the proposed regulations do not constitute an unreasonable risk of injury.

The Commission therefore believes that factors other than the tip geometry of a point, such as construction material of the point and its location on a toy and the intended use and foreseeable misuse of the toy, should be considered when making a determination that a toy presents a mechanical hazard under the FHSA (section 2(s), 15 U.S.C. 1261(s)).

2. Staff analyses of the Commission's injury data associated with products intended for children indicate that injuries to young children are predominantly lacerations, punctures and avulsions. However, many of these injuries appear to occur as a result of some form of violent activity such as swinging or throwing the product, or running and subsequently falling on it. This type of activity and the resultant potential risk of injury associated with children's products was never intended to be addressed by the proposed banning regulations of January 7, 1975. Rather, that proposal was aimed at the casual handling of toys, which includes the range of activity associated with unpacking, handling, operating, and playing with toys, including foreseeable misuse and types of play not intended by the manufacturer.

For the reasons discussed above, the Commission is proposing in the regulation below certain technical requirements for manufacturers to follow in designing and manufacturing toys without sharp points.

Toys that do not comply with the technical requirements will be reviewed by the Commission and its staff on a product-by-product basis for further regulatory action. Under this approach, toys not meeting the technical requirements would not be classified as banned hazardous substances under the FHSA until they are the subject of a completed proceeding under section 2(f)(1)(D) of the FHSA (15 U.S.C. 1261). In contrast, under the approach that was proposed in January 1975, toys not meeting the sharp point test criteria would have been automatically banned.

The Commission believes that consumers, state and local governments, and other interested persons should be given an opportunity to comment on the technical requirements regulation followed by a product-by-product banning approach before the Commission adopts it.

BACKGROUND

In response to the Commission's January 1975 proposed regulations on sharp points, comments were received from 29 individual toy manufacturers or importers, seven trade associations, two retailers, two consumers, one consumer group, one nonprofit organization, and one unidentifiable commentor.

The Commission's responses and conclusions to the major issues raised in the comments that are pertinent to the proposal are discussed below.

1. *Injury data.* In response to comments that injuries reflected in the Commission's National Electronic Injury Surveillance System (NEISS) are not caused by toys themselves but are merely associated with the toy, the Commission believes some commentors may have misunderstood how the Commission uses NEISS surveillance data.

The Commission points out that NEISS surveillance data are primarily an indicator of need and not a justification for regulation because NEISS does not distinguish between product-caused and product-related injuries and does not identify whether an injury resulted from the normal use or the reasonably foreseeable misuse of a product. Such information is obtained through in-depth investigations that are performed by the Commission. However, NEISS surveillance data provide information on the type and severity of injuries and the ages of those being injured. Therefore, NEISS data are only one factor the Commission uses in making its findings of an unreasonable risk of injury pursuant to the FHSA. In addition, the Commission offers the following explanation of how NEISS surveillance data are applicable to the regulation proposed below.

A review of NEISS injury data indicates that a substantial number of children under 8 years of age are receiving laceration and puncture injuries from toy-related accidents. In calendar year 1976 an estimated 43,300 children under 8 years of age were treated in hospital emergency rooms for such injuries.

In order to determine the extent to which lacerations and punctures are occurring from toys intended for children under 8 years of age, the Commission staff divided toys into the following three categories.

a. Toys primarily intended for use by children under the age of 8 years.

b. Toys primarily intended for use by children 8 years to 14 years of age.

c. Toys intended for use by children in both age groups.

Of the estimated 43,300 injuries treated in 1976, an estimated 9,000 were associated with products intended specifically for use by children under 8 years of age. An additional 30,800 injuries were associated with products intended for use by children in both the under 8 year and in the 8-to-14 year age groups.

In addition based on NEISS estimates, laceration and puncture injuries accounted for over half (approximately 53 percent) of all toy related injuries to children under 8 years of age.

The Commission points out that injuries of the type addressed by the regulation being proposed are serious enough to require emergency room treatment as shown by the fact that NEISS surveillance data are obtained from reports of injuries that are treated in hospital emergency rooms. The Commission believes that a purchaser of toys for children under 8 years of age does not expect such articles to cause laceration or puncture injuries to the children using them. The Commission therefore finds toys that can puncture or lacerate skin and cause bleeding, during normal use or reasonably foreseeable misuse, constitute an unreasonable risk of injury.

The Commission recognizes some commentors were concerned that reports of punctures accounted for a small percentage of the reported toy-related injuries reflected in the January 7, 1975 proposal. The Commission points out that many puncture wounds, however, are often reported in NEISS as foreign body lodgments or lacerations. Further, the proposed regulation below is directed also to the reduction of laceration injuries.

The Commission finds that while many toy-related puncture and laceration injuries may be scratches and finger pricking causing minor bleeding, there are a sufficient number of injuries which are more severe. Such injuries warrant the adoption of reasonable regulations to reduce or eliminate their occurrence.

The Commission emphasizes that the proposed technical requirements are intended to set a standard of safety to reduce the risks of injury not only for the products currently available to young children but also fort he new and redesigned products for which there is no hazard experience data available to the Commission. The Commission estimates that between 3,000 to 5,000 new children's products are introduced into the marketplace each year. It is anticipated therefore that the technical requirements proposed below will reduce the occurrence of puncture and laceration injuries associated with the new products that will be available for children.

The injury reports and the Commission staff's analysis of injuries related to sharp points on toys may be seen in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C., during working hours Monday through Friday

2. *Sharp point test criteria.*—a. *Sharp point tester.* The proposed January, 1975 regulations prescribed a sharp point tester developed for the Commission by the National Bureau of Standards (NBS). The sharp point tester was designed to distinguish, on the basis of sharpness, between the sharp and dull points that children can contact during the casual handling of toys. Casual handling includes the range of activity associated with unpacking, handling, operating, and playing with toys, including foreseeable misuse andother types of play not intended by the manufacturer. While foreseeable misuse certainly includes the throwing or swinging of toys at high velocities, under those conditions, the degree of injury that results is more a function of velocity than the detailed geometry of the point. Thus, this regulation stops short of considering the highest forces that may be involved in children's play. NBS data indicated that a force of 16.5 pounds was reasonably representative of the forces commonly involved in the handling of toys by children under 8.

In determining the sharpness of various points to develop the sharp point tester, NBS considered data from three sources:

i. Subjective evaluation by 50 adult males and 50 adult females (nonphysicians) of the sharpness of a set of manufactured conical metal points. The 100 adults rated each point as either too sharp, intermediate, or sufficiently dull for use in children's toys under casual handling conditions.

ii. Subjective evaluation by 37 physicians of a similar set of conical points. The physicians rated each point as acceptable or unacceptable for use in children's toys under casual handling conditions.

iii. Actual skin puncture tests performed with the metal points used in the subjective evaluation tests. The skin puncture tests, performed on both human cadaver skin and pigskin samples, were designed to determine what combinations of force and point configuration are necessary to cause punctures that penetrate human skin.

The results from the two groups in the subjective evaluation tests and the results of the skin puncture tests indicated a similar demarcation between sharp and dull points. From these results, NBS developed a sharp point tester capable of judging the sharpness of a point of any shape based on its penetration into a gaging slot of specified width, length, and depth. This tester was included in the sharp point test method proposed on January 7, 1975 by the Commission.

The gaging slot dimensions for the tester found by NBS to best distinguish between points that are sharp and dull to children were a slot with a width of 0.040 inch and a penetration depth allowance of 0.020 inch. The dimension for slot length was based on the NBS conclusion that if two edges of a piece of sheet metal meet at an included angle of 120 degrees or less, a point exists. Using this conclusion and the penetration depth allowance of 0.020 inch, a gaging slot length of 0.070 inch was selected to classify as sharp a 120-degree corner on sheet metal if it has no tip radius.

NBS also incorporated as part of the tester's operation a 0.5 pound spring which a test point must override before an indication is made that the point is sharp. NBS determined that if a point was flexible and could not retain its shape under a force of 0.5 pound than the point would be incapable of puncturing skin.

b. *Articulated probe.* A three-knuckle articulated probe, designed by Underwriters Laboratories (UL) to simulate the penetration of a finger into a small slot or hole, was specified in the proposal on January 7, 1975 for use in determining the accessibility of sharp points to children. A point that is accessible to this probe was determined to be accessible to a child and therefore subject to the sharp point test. The dimensions for the probe were based on the depth of penetration of fingers into slots and holes having respective widths and diameters ranging from 0.125 inch to 1.0 inch. The penetration data wre taken from a study of the finger penetration ability of 100 adult males, 100 adult females, and 100 children. The dimensions used to construct the probe were set so that no more than five percent of the group with the greatest finger penetration (adult females) could reach into the slots and holes to a length greater than that of the probe.

c. *Use and abuse test procedures.* The proposed regulations referenced Commission regulations that prescribe test procedures for simulating the use and abuse of toys and games (16 CFR 1500.50 through 1500.53, published in the FEDERAL REGISTER on January 7, 1975 (40 FR 1480)). These tests are performed in order to simulate the normal use and reasonably foreseeable damage or abuse that is included in the statutory definition of mechanical hazard.

As the regulations were originally proposed, any toy intended for children under 8 years of age would be classified as a hazardous substance and, therefore, a banned hazardous substance if such toy failed to comply with the accessibility and sharp point test method before or after being subjected to the appropriate use and abuse tests.

d. *Skin puncture tests.* i. The Commission received several comments to the

[1] The Commission intends that the scope of this technical requirements regulation will include other articls intended for use by children under 8 years of age as well as toys. However in an effort to simplify reading the preamble, the term toy(s) hereafter will be used inclusively for both toys and other articles intended for use by children.

January 7, 1975 proposal which criticized the use of the skin puncture tests NBS performed on human cadaver skin and pigskin samples to establish the test criteria. These tests and other NBS tests described previously have resulted in a determination of what sharpness of metal points is undersirable for use in any toy. The NBS tests are described in NBS report 10739 [2] which may be seen in the Office of the Secretary.

The Commission points out that the NBS skin puncture tests identified as sharp certain conical metal points in a set of 35 such points and that NBS designed a tester that discriminates these conical metal points from points that NBS identified as dull. Such sharp points correlate with the conical metal points that, as described previously, 100 nonphysician adults and 37 physicians determined subjectively to be too sharp for use in children's toys during casual handling. In addition, the Commission has already concluded that points on toys that can puncture or lacerate skin and produce bleeding during normal use or reasonably foreseeable misuse constitute an unreasonable risk of injury. The Commission therefore concludes that there is sufficient research on which to base the technical requirements regulation being proposed below.

ii. Some comments to the January 7, 1975 proposal questioned the technical validity of the skin puncture tests because such tests were conducted on skin samples backed by a rigid plate. The Commission points out that in several places on a child's anatomy (knuckles, forehead, etc.) the resiliency of subdermal tissue is at a minimum and the dermal layer is backed by a rigid bone structure. Therefore, the tests represented certain real-life conditions. In addition, it is difficult to duplicate the resistance to punctures afforded by the resiliency of all of the dermal and subdermal tissue and still maintain the repeatability of the skin puncture tests. The Commission finds no reason to discount the technical validity of the NBS skin puncture research and therefore does not accept the comments.

iii. Additional commentors alleged that the physical properties of skin have not been identified sufficiently to correlate the variations of skin support conditions in both pigskin and human cadaver skin, and that, therefore, the NBS research does not support the test requirements in the sharp point proposal of January 7, 1975.

Based on a NBS literature search of 28 current publications on the subject, the use of skin samples from one preselected area of the skin surface, and medical consultations, the Commission finds that NBS has addressed the various differences between human and animal skin and has established preliminary relationships. Accordingly, the Commission concludes that sufficient studies of skin support conditions have been made to support the type of regulation proposed below.

e. *Force level.* NBS has indicated that during normal use or reasonably foreseeable use of toys, a 5-year-old child can exert a force of at least 16.5 pounds. Many of the commentors questioned NBS's selection of 16.5 pounds as being representative of the force that may be generated by children playing with toys. These commentors believe that this force is greater than the force level that a child could normally exert when playing with toys and twelve commentors believe it is impractical to expect a child to apply 16.5 pounds to a point.

The Commission disagrees with the commentors and points out that the NBS report on the skin puncture potential of points (identified above in footnote 2) indicates that 5-year-old children can exert a force of 16.5 pounds. Further, NBS classified the set of conical points into sharp and dull groups according to tests of the points' skin-puncture potential at 16.5 pounds. NBS noted a strong similarity between the classification of points by their puncture potential at 16.5 pounds and the classification of the same points into sharp and dull groups by the subjective evaluation tests.

Although it is difficult to determine the exact level of force that children will generate when playing with toys, the Commission finds that children at play engage in many activities such as grabbing, holding, crawling, sitting, and rolling that can result in high forces being unintentionally exerted. The Commission therefore finds that the 16.5-pound force used by NBS to define the skin-puncture potential of the conical points is representative of the level of force that can be generated by children playing with toys.

Regarding the criticism that there are inconsistent force levels in the sharp point regulations proposed on January 7, 1975, the use and abuse regulations (16 CFR 1500.50 through 1500.53), and the proposed regulations for sharp edges on toys (16 CFR 1500.18(a)(16) and 1500.47) published in the FEDERAL REGISTER on January 7, 1975 (40 FR 1488), the Commission notes that the proposed sharp edge regulations have not been issued as final regulations and the force level utilized in those regulations may ultimately be changed in response to public comments. Because the merits of that determination should not be addressed in this proceeding, the Commission finds that the comment cannot be further considered at this time.

The Commission finds no inconsistency between the force levels proposed as part of the sharp point test criteria in the regulation below and the maximum levels of force prescribed in the use and abuse regulations because the two are designed to approximate different actions of a child. The sharp point test criteria in the regulation proposed below are derived in part from data related to the gripping strength of young children and the tensile forces specified in the use and abuse regulations are derived from data related to the pulling-strength capabilities of children in designated age groups.

CHANGES TO PROPOSED REGULATION

1. *Test criteria.* In response to public comments and based on continuing staff analysis of the proposal of January 7, 1975, the Commission (a) modified one dimension of the sharp point test instrument, (b) included a test-application force and (c) revised the accessibility criteria by developing two new accessibility test probes. These changes and the reasons supporting them are discussed below in paragraphs 2, 3 and 4.

2. *Sharp point test instrument.* NBS developed a sharp point test instrument that judged the sharpness of a point based on its penetration into a gaging slot of specified width, length, and depth. This tester was included in the sharp point test procedure proposed on January 7, 1975 by the Commission.

As discussed above in paragraph 2—a under the heading "Background," the gaging slot dimensions for the tester found by NBS to best distinguish between points that are sharp and dull to children were a slot with a width of 0.040 inch, a penetration depth allowance of 0.020 inch, and a length of 0.070 inch.

Based on Commission staff recommendations and additional tests conducted on a sample of toys with sharp point test instruments having gaging slots of various lengths, the Commission conclues that a reduction in the length of the gaging slot from 0.070 inch to 0.045 inch is appropriate to identify sharp corners on toys. Such a slot length will identify sharp right-angle corners which have not been rounded-off that the Commission believes present a puncture or laceration hazard. Accordingly, the gaging slot in the sharp point test instrument in the proposed regulation below has been modified to include a rectangular gaging slot measuring 0.040 inch in width, 0.045 inch in length and 0.020 inch in depth.

Detailed engineering drawings for a suggested sharp point tester described in proposed § 1500.48 below are available at a minimum cost from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

3. *Sharp point test-application force.* In response to a commentor's suggestion, the Commission has established a maximum force of 1.0 pound that may be applied to a point when it is inserted into the gaging slot of the tester. The commentor contended and the Commission staff verified, that if excessive force was used when applying a point to the sharp point tester some points with configurations that barely prevent entry into the gaging slot may be shaved or extruded and cause a false indication of sharpness. Section 1500.48(d)(2)(iii) below now includes the 1.0 pound test-application force.

4. *Accessibility criteria.*—a. *Probes.* In reexamining the research supporting the proposed articulated probe, the Commission finds that the probe, designed by UL, was intended to prevent electric shock where simple contact results in serious injury. UL based the design of the articulated probe on the finger penetration depth of 100 adult males, 100 adult females, and 100 children. The Commission therefore has redrafted the accessibility criteria to simulate only accessibility for children's fingers.

The Commission selected the anthropometric measurements [3] of young children for the lengths and the diameters of the small and middle fingers as well as the dimensions for hand clearance. Because children up to the age of 8 years are in a period of rapid growth, the anthropometric measurements were divided into two age groups—0 to 3 years and over 3 years up to 8 years of age.

To insure protection of the greatest number of children in each age group, the Commission selected anthropometric measurements that reflect the following assumptions:

i. That the younger children in each age group have narrower hands and therefore can reach into openings which would be inaccessible to an older child.

ii. That the older children in each age group have longer fingers and therefore can touch the inside components of toys which would be inaccessible to a younger child.

Furthermore, anthropometric data are not available for the dimensions of a child's index finger. Those dimensions have been approximated by averaging the respective dimensions of the small and middle fingers of children in the two age groups.

In the 0 to 3-year age group, measurements for a fifth-percentile 3-month-old's small and middle fingers were averaged and used to approximate the diameter of the index finger. Measurements for a 95th-percentile 3-year-old's small and middle fingers were averaged and used to approximate the length of the index finger. The minimum hand-clearance measurement of a fifth-percentile 3-month-old child was selected. These measurements were then used to define the dimensions of probe A.

For explanatory purposes, the various percentiles refer to how the size and proportions of one child within a particular age range compare with respect to the size and proportions of other children in the same age range. For example, a fifth-percentile 3-month-old child represents a child of this age, the size of whom is such that 95 percent of the children of the same age are larger and only five percent are smaller.

Similarly for the over 3-year to 8-year age group, measurements for the small and middle fingers of a fifth-percentile child 37–42 months of age were averaged and used to approximate the diameter of the index finger. Measurements for the small and middle fingers of a 95th-percentile child 85–96 months of age were averaged and used to approximate the length of the index finger. The minimum hand-clearance dimensions for a fifth-percentile child 37–42 months of age were selected. These dimensions were then used to define the dimensions of probe B.

Accordingly, probes A and B shown in figure 2 of the regulation below are to be used as follows:

Probe A is to be used to determine the accessibility of points in holes, recesses, or openings on toys intended for children 3 years of age or less.

Probe B is to be used to determine the accessibility of points in holes, recesses, or openings on toys intended for children over 3 years up to 8 years of age.

The Commission notes that the accessibility probes are articulated in two rather than three places, as was the proposed articulated probe, because only two finger joints customarily go through an opening that will not accept the entire hand.

Detailed engineering drawings to enable the construction of the redesigned accessibility probes shown in figure 2 of the regulation below are available at a minimal cost from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

Based on staff recommendations and the anthropometric measurements from the University of Michigan study on the physical characteristics of children (cited in footnote 3, above) for two age groups—0 to 3 years and over 3 years up to 8 years of age, the Commission has defined accessibility for holes, recesses, and openings on toys and other children's articles as follows (holes, recesses, and openings will be referred to hereafter in this paragraph 4 as openings).

b. *Finger access.* Section 1500.48(c)(3)(i) of the proposed regulation provides that access into openings large enough to accept a child's hand and arm but too small to admit the child's torso (body trunk) shall be determined by the dimensions of the entrance of the opening. Such openings include openings that are larger than the width of a child's hand but smaller than the breadth of a child's shoulders. For the reasons given below, the Commission finds that a depth-of-insertion factor of two and one-quarter multiplied by the minor dimension of an opening is appropriate to determine the accessibility of points in such openings.

The Commission defines a minor dimension of an opening as the diameter of the largest sphere that will pass through the opening. The minor dimension of an opening can be determined by using a pair of calipers. This dimension multiplied by two and one-quarter determines the maxium depth of insertion for accessibility.

The Commission points out that the value of two and one-quarter is the approximate average of the ratio of arm length to shoulder breadth for a 50th percentile child in each of the two age groups—0 to 3 years and over 3 years to 8 years of age. For example, the depth of insertion into an opening with a minor dimension slightly smaller than the breadth of a child's shoulders will be slightly less than the length of the child's arm.

The Commission notes that the detachable extensions of the accessibility (finger) probes shown in figure 2 of the regulation below correlate with the dimensions discussed above and are therefore appropriate for determining the accessibility of points recessed in openings that are larger than the diameter for hand clearance but smaller than the dimension for shoulder breadth. For testing purposes, the appropriate insertion depth should be marked on the probe extension by any suitable means and is the distance from that mark to the tip, of the simulated finger. The probe, attached to the probe extension, should be inserted in any direction into the opening up to the depth of the previously made mark. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement and any point that can be contacted by the finger portion of the probe, forward of the probe collar, shall be considered accessible.

d. *Total accessibility.* The Commission has decided that openings larger than the breadth of a child's shoulders shall be considered totally accessible.

For the 0 to 3-year age group, the Commission believes that a shoulder breadth measurement of 7.36 inches is appropriate. This measurement represents a fifth-percentile one-year-old child, since children who are under one-year of age are less mobile and therefore are less likely

the youngest age category is 0–3 months of age and for the over 3-year to 8-year age group, the youngest age category is 37–42 months of age.

c. *Hand access but not shoulder access.* Section 1500.48(c)(3)(ii) of the proposed regulation provides that access into openings large enough to accept a child's hand and arm but too small to admit the child's torso (body trunk) shall be determined by the dimensions of the entrance of the opening. Such openings include openings that are larger than the width of a child's hand but smaller than the breadth of a child's shoulders. For the reasons given below, the Commission finds that a depth-of-insertion factor of two and one-quarter multiplied by the minor dimension of an opening is appropriate to determine the accessibility of points in such openings.

The Commission defines a minor dimension of an opening as the diameter of the largest sphere that will pass through the opening. The minor dimension of an opening can be determined by using a pair of calipers. This dimension multiplied by two and one-quarter determines the maxium depth of insertion for accessibility.

The Commission points out that the value of two and one-quarter is the approximate average of the ratio of arm length to shoulder breadth for a 50th percentile child in each of the two age groups—0 to 3 years and over 3 years to 8 years of age. For example, the depth of insertion into an opening with a minor dimension slightly smaller than the breadth of a child's shoulders will be slightly less than the length of the child's arm.

The Commission notes that the detachable extensions of the accessibility (finger) probes shown in figure 2 of the regulation below correlate with the dimensions discussed above and are therefore appropriate for determining the accessibility of points recessed in openings that are larger than the diameter for hand clearance but smaller than the dimension for shoulder breadth. For testing purposes, the appropriate insertion depth should be marked on the probe extension by any suitable means and is the distance from that mark to the tip, of the simulated finger. The probe, attached to the probe extension, should be inserted in any direction into the opening up to the depth of the previously made mark. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement and any point that can be contacted by the finger portion of the probe, forward of the probe collar, shall be considered accessible.

d. *Total accessibility.* The Commission has decided that openings larger than the breadth of a child's shoulders shall be considered totally accessible.

For the 0 to 3-year age group, the Commission believes that a shoulder breadth measurement of 7.36 inches is appropriate. This measurement represents a fifth-percentile one-year-old child, since children who are under one-year of age are less mobile and therefore are less likely

[2] "The skin Puncture Potential of Points Associated With Certain Toys," dated April 27, 1972.

[3] All measurements were obtained from the University of Michigan's study, "Physical Characteristics of Children as Related to Death and Injury for Consumer Product Design and Use" (Highway Safety Research Institute, The University of Michigan, Ann Arbor, Mich. 48105).

to climb into cavities than children who are one-year of age or older.

For the over 3-year to 8-year age group, the Commission believes that a shoulder breadth measurement of 9.00 inches is appropriate. This measurement represents a fifth percentile child in the age category of 37–42 months.

The Commission believes that since significant growth occurs within the 0 to 3-year and the over 3-year to 8-year age groups, the measurements of 7.36 and 9.00 inches, respectively, provide an appropriate margin of safety in the tests for accessibility.

The Commission believes that for toys intended for children 0 to 3-years of age, access into openings with a minor dimension (defined above in paragraph 4c) of 7.36 inches or larger shall be considered totally accessible to a child. For toys intended for children over 3 years to 8 years of age, access into openings with a minor dimension of 9.00 inches or larger shall be considered totally accessible to a child. Because openings that are totally accessible to children in the 0–8 years age span may contain smaller openings that are not totally accessible to such children, access into these smaller openings shall be determined by the appropriate procedures explained above in paragraphs 4 b or c.

e. *Inaccessible points.* From the results of sharp point tests conducted on a representative sample of toys, the Commission observes that tabs, wires and other protrusions do not present a puncture or laceration hazard if such protrusions are flush with a protecting surface which is part of the toy. The Commission therefore has decided that a point shall be considered inaccessible if it is protected by an adjacent surface and any gap between the point and the adjacent surface does not exceed 0.020 inch, either before or after application of the appropriate use and abuse test procedures (16 CFR 1500.50 through 1500.53).

Accordingly, the accessibility criteria explained above in this paragraph 4 is included below in proposed § 1500.48(c).

5. *Product-by-product regulatory approach.* The technical requirements regulation concerning toys containing points is proposed under the authority of section 10 of the FHSA as a regulation for the efficient enforcement of the FHSA. Like the use and abuse regulations (16 CFR 1500.50 through 1500.53), the proposed regulation would establish testing criteria but would not itself ban any toy intended for children under 8 years of age. The testing criteria include the sharp point test instrument, the accessibility probes, and the use and abuse tests. If any toy contains points that are identified as sharp, the Commission and its staff will evaluate the toy to determine if it presents a mechanical hazard.

If any such toy does appear to present a mechanical hazard under section 2(s) of the FHSA, the Commission will propose that it be classified as a hazardous substance (and thus a banned hazardous substance) according to sections 2(f)(1)(D), 2(q)(1)(A), and 3(e)(1) of the FHSA (15 U.S.C. 1261, 1262). Interested persons will be notified of the proposal and will have an opportunity to comment to the Commission, in accordance with the Administrative Procedure Act (5 U.S.C. 553). Notification will be by publication of the proposal in the FEDERAL REGISTER or by actual notice to the manufacturer of the affected toy, with notice to the general public, where appropriate. After the Commission and its staff evaluate all comments received, the Commission will issue a final regulation classifying the toy as a hazardous substance (and thus a banned hazardous substance) if the Commission believes that the toy presents a mechanical hazard.

If the Commission decides that a toy containing a point, identified as sharp by the test criteria, does not present a mechanical hazard, the Commission will not initiate regulatory action against that toy.

For example, the Commission notes that certain toys manufactured from soft plastics, such as one some polyethylenes, have molded-in protrusions which indicate a sharp point when tested, but which in reality are too flexible to cause a puncture or laceration injury (e.g., the thin bayonet of certain plastic toy soldiers). The Commission recognizes that the test instrument is not always able to distinguish between soft plastic points that do or do not present a mechanical hazard to children under 8 years of age. However, the Commission is proposing in this document a regulation establishing technical requirements applicable to toys which may contain hazardous sharp points regardless of the material composition of those toys. Since this proposed regulation does not contain automatic banning provisions, the Commission will review those toys which fail the sharp point test criteria on a product-by-product basis. The Commission therefore encourages manufacturers of children's products to make every effort to insure that their product lines comply with the technical requirements because products which fail the test criteria may be subject to additional regulatory action, which may lead to those products being declared banned hazardous substances.

6. *Use and abuse test procedures.* The proposed regulation below would require testing for sharp points before and after application of the appropriate use and abuse test procedures (16 CFR 1500.50 through 1500.53). These test procedures, published as final regulations in the FEDERAL REGISTER of January 7, 1975 (40 FR 1480), do not in and of themselves ban toys and games. Rather, they are for use in exposing potential hazards that result from the normal use or the reasonably foreseeable damage or abuse to which toys and games may be subjected.

The use and abuse test procedures are to be used whenever they are referenced in regulations that are issued pursuant to the FHSA. Such regulations may identify particular mechanical hazards as defined by section 2(s) of the FHSA, which provides, in part, that (a toy) may be determined to present a mechanical hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury from points.

Bite tests for various age categories are among the Commission's use and abuse test procedures for simulating normal use or reasonably foreseeable damage or abuse. With regard to the bite tests, the Commission finds, based on staff recommendations, that there is some doubt whether children can bite at the force levels specified in each of the bite tests and maintain these forces for the specified ten seconds.

The Commission's research for the bite test procedures and force levels included a study by Dr. Wilton M. Krogman.[4] A copy of the study by Dr. Krogman may be seen in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C., during working hours Monday through Friday.

After reconsidering the Krogman study and the staff's recommendations, the Commission concludes that the bite tests prescribed by §§ 1500.51(c), 1500.52(c), and 1500.53(c) should not be referenced in the proposed regulation below.

EXEMPTIONS

1. *Individual products.* In the case of both bicycles and baby cribs, the Commission notes that these products are covered by comprehensive FHSA regulations that address the hazard of sharp points. Therefore, the Commission proposes to exempt from the technical requirements regulation the bicycles and baby cribs in categories that are addressed in the following three sets of individual product banning regulations:

a. Full-size baby cribs (16 CFR 1500.18(a)(13) and Part 1508) promulgated in the FEDERAL REGISTER of November 21, 1973 (38 FR 32129).

b. Bicycles (16 CFR 1500.18(a)(12) and Part 1512), amended November 13, 1975 (40 FR 52815 and 52828), published in the FEDERAL REGISTER in entirety as amended January 28, 1976 (41 FR 4144) and corrected (printer's error) February 6, 1976 (41 FR 5386).

c. Non-full-size baby cribs (16 CFR 1500.18(a)(14) and Part 1509) promulgated in the FEDERAL REGISTER of February 12, 1976 (41 FR 6238).

2. *Model and craft kits.* An industry association requested that any sharp point regulation exempt model and craft kits because the data, test methods, and other criteria on which the regulation would be based are wholly inapplicable and irrelevant to the essential nature and use patterns of such kits.

The Commission considers adding such an exemption unnecessary because most children under 8 years of age do not have the dexterity and the reading

[4] "Manual and Oral Strengths of American White and Negro Children, Ages 3–6," by Dr. Wilton Krogman (the study by Dr. Krogman, dated September 1, 1971, was sponsored by the Closure Committee of the Glass Container Manufactuers Institute, Inc.).

ability necessary for assembling complicated model and craft kits. The Commission believes also that model and craft kits in the marketplace today are usually not intended for use by children under 8 years of age. Therefore, the Commission finds that such kits are excluded from the scope of the proposed regulation below.

For purposes of the exclusion, the Commission recognizes that model and craft kits are articles containing components which may be unfinished and which require assembly or other necessary processing by the user in order to arrive at a finished product.

3. *Toys and other articles with functional sharp points.* The Commission is proposing to exempt from the technical requirements those toys that have sharp points by reason of their functional purpose, such as needles for toy sewing machines, provided the toy is identified by a conspicuous, legible, and visible label as having sharp points. The Commission is also proposing an exemption for other children's articles that have sharp points by reason of their functional purpose, such as tips on writing instruments. For purposes of both exemptions, non-functional sharp points may not be present on the toy or other article.

PREEMPTION

Section 18(b)(1)(B) of the FHSA, as amended, states:

"Except as provided in paragraphs (2), (3), and (4), if under regulations of the Commission promulgated under or for the enforcement of section 2(q) a requirement is established to protect against a risk of illness or injury associated with a hazardous substance, no State or political subdivision of a State may establish or continue in effect a requirement applicable to such substance and designed to protect against the same risk of illness or injury unless such requirement is identical to the requirement established under such regulations.

The regulations proposed below are requirements established to protect against the hazard of sharp points on toys intended for children under 8 years of age and they are Commission regulations issued for the enforcement of section 2(q) of the FHSA. Therefore, if the regulations proposed below are issued in final form, the Commission believes and intends that state and local governments would be prohibited from establishing or enforcing any non-identical requirement that addresses the hazard of sharp points on toys intended for children under 8.

The Commission's proposed regulations are "technical requirements" that establish manufacturing criteria for toys intended for children under 8. As long as states or local governments use these same criteria it regulate such toys, their regulations would be considered to be identical to the Commission's regulations. Even if a state or local government were to impose different penalties or use different procedures to regulate toys, there would be no preemption as long as the manufacturing criteria were identical. As an example, if a state were to ban automatically any toy not meeting the criteria, the Commission's position is that such a ban is not preempted by the Commission's technical requirements.

EFFECTIVE DATE

It is contemplated that the effective date will be 365 days from publication of a final regulation establishing technical requirements to identify toys with potentially hazardous sharp points for all products subject to the regulation and introduced into interestate commerce after that date. For purposes of the regulation, introduction into interstate commerce is defined as follows: A toy manufactured outside the United States is introduced into interstate commerce when it is first brought within a U.S. port of entry. A toy manufactured in the United States is introduced into interstate commerce (a) at the time of its first interstate sale, or (b) at the time of its first intrastate sale if one or more of its components and/or raw materials were received interstate.

ENVIRONMENTAL CONSIDERATIONS

An assessment of the potential environmental impact has been made of proposed § 1500.48 establishing technical requirements to identify toys and other articles that are intended for use by children under 8 years of age and that have sharp points presenting a potential puncture or laceration injury hazard. The Commission concludes that there are no potentially significant environmental impacts associated with the proposal. Therefore, there is no need for an environmental impact statement. A copy of the environmental assessment is on file at the Commission and may be inspected at the Office of the Secretary.

METRIC CONVERSION

Throughout the regulation English figures are used. The metric approximations in parentheses are included for convenience and information only.

THE PROPOSAL

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(s), 10(a), 74 Stat. 378 (15 U.S.C. 1261, 1269)) in accordance with the provisions of 5 U.S.C. 553, and under authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92–573, sec. 30(a), 86 Stat. 1231 (15 U.S.C. 2079(a))), the Commission proposes to amend 16 CFR Part 1500 by adding a new § 1500.48, as follows:

§ 1500.48 Technical requirements for determining a sharp point in toys and other articles intended for use by children under 8 years of age.

(a) *Objective.* The sharp point test prescribed by paragraph (d) of this section will be used by the Commission in making a preliminary determination that points on toys and other articles intended for use by children under 8 years of age, and such points exposed in normal use or as a result of reasonably foreseeable damage or abuse of such toys and articles, present a potential risk of injury by puncture or laceration under section 2(s) of the Federal Hazardous Substances Act (15 U.S.C. 1261(s)). The Commission will further evaluate points that are identified as presenting a potential risk of puncture or laceration injury to determine the need for individual product regulatory action.

(b) *Scope.*—(1) *General.* The sharp point test of paragraph (d) of this section is applicable to toys or other articles that are introduced into interstate commerce on or after (365 days after the publication in the FEDERAL REGISTER of a final regulation). The sharp point test shall be applied to any portion of the test sample before and after subjecting the test sample to the use and abuse tests of §§ 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section).

(2) *Exemptions.* (i) Toys and other children's articles that are the subject of any of the following regulations are exempt from this § 1500.48: The regulations for bicycles, non-full-size baby cribs, and full-size baby cribs (Parts 1508, 1509, and 1512 of this chapter).

(ii) Toys that by reason of their functional purpose necessarily present the hazard of sharp points and that do not have any nonfunctional sharp points are exempt from this § 1500.48: *Provided,* Each toy is identified, by a conspicuous, legible, and visible label at the time of any sale, as having functional sharp points. An example of such toys is a toy sewing machine with a needle.

(iii) Articles, besides toys, intended for use by children that by reason of their functional purpose necessarily present the hazard of sharp points and that do not have any nonfunctional sharp points are exempt from this § 1500.48. An example of such articles is a ball-point pen.

(c) *Accessibility*—(1) *General.* Any point that is accessible either before or after the tests of §§ 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section) are performed shall be subject to the sharp point test of paragraph (d) of this section.

(2) *Accessible points.* (i) An accessible point for a toy or article intended for children 3 years of age or less is one that can be contacted by any portion forward of the collar of the accessibility probe designated as probe A in figure 2 of this section.

(ii) An accessible point for a toy or article intended for children over 3 years up to 8 years of age is one that can be contacted by any portion forward of the collar of the accessibility probe designated as probe B in figure 2 of this section.

(iii) An accessible point for a toy or article intended for children of ages spanning both age groups is one that can be contacted by any portion forward of the collar of either probe A or B, as shown in figure 2 of this section.

(3) *Insertion depth for accessibility.* (i) For any hole, recess, or opening having a minor dimension [6] smaller than the collar diameter of the appropriate probe, the total insertion depth for accessibility shall be up to the collar on the appropriate probe. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement.

(ii) For any hole, recess, or opening having a minor dimension larger than the collar diameter of probe A but less than 7.36 inches (186.9 millimeters), when probe A is used, or a minor dimension larger than the collar diameter of probe B but less than 9.00 inches (228.6 millimeters), when probe B is used, the total insertion depth for accessibility shall be determined by inserting the appropriate probe with the extension shown in figure 2 in any direction up to two and one-quarter times the minor dimension of the hole, recess, or opening, measured from any point in the plane of the opening. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement.

(iii) For any hole, recess, or opening having a minor dimension of 7.36 inches (186.9 millimeters) or larger when probe A is used, or a minor dimension of 9.00 inches (228.6 millimeters) or larger when probe B is used, the total insertion depth for accessibility is unrestricted unless other holes, recesses, or openings within the original hole, recess, or opening are encountered with dimensions specified in paragraph (c) (3) (i) or (ii) of this section. In such instances, the appropriate paragraphs (c) (3) (i) or (ii) of this section shall be followed. If both probes are to be used, a minor dimension that is 7.36 inches (186.9 millimeters) or larger shall determine unrestricted access.

(4) *Inaccessible points.* Points shall be considered inaccessible without testing with a probe if they lie adjacent to a surface of the test sample and any gap between the point and the adjacent surface does not exceed 0.020 inch (0.50 millimeter) either before or after the tests of §§ 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section) are performed.

(d) *Sharp point test method*—(1) *Principle of operation.* The principle of operation of the sharp point tester shown in figure 1 of this section is as follows: A rectangular opening measuring a maximum of 0.040 inch (1.02 millimeters) wide by 0.045 inch (1.15 millimeters) long in the end of the slotted cap establishes two reference dimensions. Depth of penetration of the point being tested determines sharpness. If the point being tested can contact a sensing head that is recessed a minimum distance of 0.015 inch (0.38 millimeter) below the end cap and can move the sensing head a further 0.005 inch (0.12 millimeter) against a 0.5-pound (2.2-newton) force of a return spring, the point shall be identified as sharp. A sharp point tester of the general configuration shown in figure 1 of this section or one yielding equivalent results shall identify a sharp point. In conducting tests to determine the presence of sharp points, the Commission will use the sharp point tester shown in figure 1 of this section and the accessibility probes designated as A or B in figure 2 of this section.

(2) *Procedure.* (i) The sample to be tested shall be held in such a manner that it does not move during the test.

(ii) Part of the test sample may need to be removed to allow the sharp point testing device to test a point that is accessible by the criteria of paragraph (c) of this section. Such dismantling of the test sample could affect the rigidity of the point in question. The sharp point test shall be performed with the point supported so that its stiffness approximates but is not greater than the point stiffness in the assembled sample.

(iii) Using the general configuration shown in figure 1 of this section, the adjustment and operation of the sharp point tester is as follows: Hold the sharp point tester and loosen the lock ring by rotating it so that it moves towards the indicator lamp assembly a sufficient distance to expose the calibration reference marks on the barrel. Rotate the gaging cap clockwise until the indicator lamp lights. Rotate the cap counterclockwise until an equivalent of five divisions (the distance between the short lines on the cap) have passed the colibration reference mark. Lock the gaging cap in this position by rotating the lock ring until it fits firmly against the cap. Insert the point into the gaging slot in all directions in which it was accessible by the criteria of paragraph (c) of this section, and apply a force of not more than 1.00 pound (4.45 newtons). A glowing light identifies the point as sharp.

(e) For the purpose of conformance with the technical requirements prescribed by this § 1500.48, the English figures shall be used. The metric approximations are provided in parentheses for convenience and information only.

Interested persons are invited to submit, on or before September 6, 1977, written comments regarding this proposal. Comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the Office of the Secretary, at the above address, during working hours Monday through Friday.

Dated: July 29, 1977.

SADYE E. DUNN,
Deputy Secretary,
Consumer Product Safety Commission.

[6] The minor dimension of an opening is the diameter of the largest sphere that will pass through the opening.

FIG 2—ACCESSIBILITY PROBES

[FR Doc.77-22300 Filed 8-3-77, 8:45 am]

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Surface Mining Control and Reclamation Act of 1977. (Aug. 3, 1977; 91 Stat. 445). Price $0.95.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Community Services Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Associate Director for Interagency and External Affairs is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3373(g) is added as set out below:

§ 213.3373 Community Services Administration.

* * * * * *

(g) *Office of Interagency and External Affairs.* (1) The Associate Director.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–22549 Filed 8–4–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Special Assistant to the Deputy Assistant Secretary for Research and Demonstration is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3384(i)(8) is added as set out below:

§ 213.3384 Department of Housing and Urban Development.

* * * * * *

(i) *Office of the Assistant Secretary for Policy Development and Research.* * * *

(8) One Special Assistant to the Deputy Assistant Secretary for Research and Demonstration.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–22550 Filed 8–4–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Labor

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Staff Assistant to the Assistant Secretary for Employment Standards is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3315(a)(59) is added as set out below:

§ 213.3315 Department of Labor.

(a) *Office of the Secretary.* * * *

(59) One Staff Assistant to the Assistant Secretary for Employment Standards.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–22551 Filed 8–4–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Treasury

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Special Assistant to the Assistant Secretary (Public Affairs) is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3305(a)(73) is added as set out below:

§ 213.3305 Department of the Treasury.

(a) *Office of the Secretary.* * * *

(73) One Special Assistant to the Assistant Secretary (Public Affairs).

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–22553 Filed 8–4–77;8:45 am]

PART 213—EXCEPTED SERVICE

National Foundation on the Arts and Humanities

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment changes the title of two positions of Assistant Director for State and Community Operations in the National Endowment for the Arts to Assistant Director for Federal-State Partnerships to more accurately reflect the duties of the positions.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3182(a)(13) is amended as set out below:

§ 213.3182 National Foundation on the Arts and Humanities.

(a) National Endowment for the Arts. * * *

(13) Until September 30, 1980, two Assistant Directors for Federal-State Partnerships.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–22552 Filed 8–4–77;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to quarantine portions of Honolulu County in Hawaii because of the existence of exotic Newcastle disease. Exotic Newcastle disease was confirmed in Honolulu County, Hawaii, July 25, 1977. Therefore, in order to prevent the dissemination of exotic Newcastle disease it is necessary to quarantine the infested areas.

EFFECTIVE DATE: July 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. M. A. Mixson, USDA, Emergency Programs, Room 748, Federal Building, Hyattsville, Md. 20782 (301-436-8073).

SUPPLEMENTARY INFORMATION: This amendment quarantines portions of Honolulu County in Hawaii because of the existence of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles, from quarantined areas, as contained in 9 CFR Part 82, as amended, will apply to the quarantined areas.

Accordingly, Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respect:

In § 82.3, the introductory portion of paragraph (a) is amended by adding thereto the name of the State of Hawaii and a new paragraph (a)(1) relating to the State of Hawaii is added to read:

§ 82.3 Areas quarantined.

(a) • • •

(1) *Hawaii.* (i) The premises of Koolau Pets, 45-1045 Kamehameha Highway, Kaneohe, in Honolulu County.

(ii) The premises of Parrot Place, 719 Kamehameha Highway, Pearl City, in Honolulu County.

• • • • • •

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111-113, 115, 117, 120, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendment imposes certain restrictions necessary to prevent the interstate spread of exotic Newcastle disease, a communicable disease of poultry, and must be made effective immediately to accomplish its purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 29th day of July 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services.

[FR Doc.77-22477 Filed 8-4-77;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—ORGANIZATION, PROCEDURES, AND RULES OF PRACTICE

PART 2—NONADJUDICATIVE PROCEDURES

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

Disclosure of Material Pertaining to Consent Order Settlements; Withdrawal of Matter From Adjudication to Consider Consent Agreements

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: These rules amend the Commission's rules governing disclosure of material pertaining to consent order settlements so as to make available for public inspection and copying, at the beginning of the period for public comment on such order, material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act. These rules also provide for a form of automatic withdrawal of proceedings from adjudication where consent agreements have been signed, thus eliminating, in most cases, the need for the Administrative Law Judge to certify and the Commission to consider, all motions to withdraw a matter from adjudication.

EFFECTIVE DATE: September 7, 1977.

FOR FURTHER INFORMATION CONTACT:

Barry R. Rubin, Office of the General Counsel, Federal Trade Commission, Washington, D.C. 20580 (202-523-3865).

SUPPLEMENTARY INFORMATION: On September 1, 1976, the Commission published in the FEDERAL REGISTER (41 FR 36823) a proposal to amend its rules governing disclosure of material pertaining to consent order settlements so as to make available for public inspection and copying, at the beginning of the period for public comment on such order, factual material reasonably related to the merits of each order that is not exempt from disclosure under the Freedom of Information Act; to make explicit that confidential records of consent negotiations are subject to the Commission's Freedom of Information Act rules; and to add to the rule governing consent negotiations in matters withdrawn from adjudication the same provisions for FEDERAL REGISTER publication applicable to all other consent order settlements. The Commission also published for comment a petitioner's request that all documents submitted by a party during consent negotiations, including nonfactual material reflecting the negotiating process and draft settlement proposals, be placed on the public record at the beginning of the comment period.

The Commission determined that most documents submitted by the respondent or proposed respondent would be made available to assist in public comment. The only exception would be where the documents are otherwise exempt from mandatory disclosure under the Freedom of Information Act, such as documents which would reveal trade secrets or confidential commercial or financial information, or documents the disclosure of which would interfere with a related enforcement proceeding. The Commission also determined to examine the effect of this change at the end of a one year period, particularly its impact on consent negotiations.

DISCUSSION OF MAJOR COMMENTS

Some commenters suggested that no amendment of existing rules is necessary, because the public now has adequate information and might be misled by additional materials. Parties to consent negotiations might choose to litigate instead, it was suggested, if the additional, potentially damaging disclosure required by the proposal were adopted. The Commission has concluded, however, that the material to be disclosed may promote more informed public comments, and that outside persons will be protected against damaging disclosures through application of the appropriate exemptions in the Freedom of Information Act.

Other commenters urged the Commission to adopt the petitioner's request for disclosure of nonfactual negotiation material as well. They contended that the public comment process would be improved by disclosure of the negotiation context, that such disclosure would have no significant "chilling" effect on consent negotiations, and that such documents must be disclosed in any event to requesters under the Freedom of Information Act. Although a colorable claim might be made that all non-factual documents submitted to the Commission in the course of consent negotiations can be withheld under Exemption 7(A) of the Freedom of Information Act, 5 U.S.C. 552(b)(7)(A), the Commission believes that the public comment process will be improved by disclosure of

such material reasonably related to the merits of the order actually accepted by the Commission. The Commission is mindful of the possibility of risk to the negotiating process, however, and for that reason it will review the effect of this rule change after one year.

Finally, one commenter suggested that the Commission limit disclosure to "factual material reasonably related to the effect of the proposed order and not exempt from disclosure under the Freedom of Information Act which the Commission considered determinative in formulating the proposed order" and provide notice to the investigated party of the documents to be disclosed. The Commission rejects the first suggestion as administratively awkward and inappropriate. The broader public record disclosure in the Commission's amendment will be of greater benefit to the comment process. The second suggestion requires no specific amendment. The Commission has directed that notice be given to the investigated party prior to placing any documents received from it on the public record. This notice is independent of any notice afforded under a grant of confidential treatment.

Accordingly, and pursuant to 15 U.S.C. § 46 (f), (g) and 5 U.S.C. § 552, the Commission hereby amends its Rules of Practice §§ 2.34, 2.35, and 3.25, 16 CFR §§ 2.34, 2.35, and 3.25, as set forth below.

1. By revising § 2.34 to read as follows:

§ 2.34 Disposition.

Upon receiving an executed agreement conforming with the requirements of § 2.32, the Commission may: (a) Accept it; (b) reject it and issue its complaint; or (c) take such other action as it may deem appropriate. If an agreement is accepted, the Commission will place the order contained therein and any initial report of compliance submitted pursuant to § 2.33 on the public record, and at the same time, will make available an explanation of the provisions of the order and the relief to be obtained thereby; material submitted to the Commission reasonably related to the merits of the order that is not exempt from disclosure under the Freedom of Information Act, and any other information which it deems helpful in assisting interested persons to understand the terms of the order. The Commission will publish the agreement, order and explanation in the FEDERAL REGISTER. For a period of sixty (60) days after placement of the order on the public record and issuance of the statement, the Commission will receive and consider any comments or views concerning the order that may be filed by any interested person. Thereafter, the Commission may either withdraw its acceptance of the agreement and so notify the other party, in which event it will take such other action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require), and decision, in disposition of the proceeding.

2. By deleting § 2.35 as follows:

§ 2.35 [Deleted]

3. By amending § 3.25 to read as follows:

§ 3.25 Consent agreement settlements.

• • • • • •

(b) A proposal to settle a matter in adjudication by consent agreement shall be submitted by way of a motion to withdraw the matter from adjudication for the purpose of considering the proposed consent agreement. Any such motion shall be accompanied by a consent agreement containing a proposed order executed by one or more respondents and conforming to the requirements of § 2.32; the consent agreement itself, however, shall not be placed on the public record unless and until it is accepted by the Commission as provided herein.

(c) If the agreement accompanying the motion has also been executed by complaint counsel, including the appropriate Bureau Director, the Secretary shall issue an order withdrawing the matter from adjudication with respect to those respondents signing the proposed consent agreement, and all proceedings before the Administrative Law Judge shall be stayed with respect to such respondents, pending a determination by the Commission pursuant to paragraph (f) of this section.

(d) If the agreement accompanying the motion has not been executed by complaint counsel, the Administrative Law Judge may certify the matter to the Commission together with his recommendation if he determines, in writing, that there is a likelihood of settlement. The filing of a motion to withdraw a matter from adjudication under this subsection and certification thereof to the Commission shall not stay proceedings before the Administrative Law Judge unless the Administrative Law Judge or the Commission shall so order. Upon certification of a motion to withdraw a matter from adjudication pursuant to this subsection, the Commission may, if it is satisfied that there is a likelihood of settlement, issue an order withdrawing the matter from adjudication for the purpose of considering the proposed consent agreement.

(e) If a matter is withdrawn from adjudication pursuant to paragraphs (c) or (d) of this section, the Commission will treat the matter as being in a nonadjudicative status with respect to those respondents signing the proposed consent agreement.

(f) After the matter has been withdrawn from adjudication, the Commission may (1) accept the agreement, (2) reject it and return the matter to adjudication for further proceedings, or (3) take such other action as it may deem appropriate. If an agreement is accepted, the Commission will place it on the public record, together with any initial report of compliance submitted pursuant to § 2.33, and at the same time, will make available an explanation of the provisions of the order and the relief to be obtained thereby; material submitted to the Commission reasonably related to the merits of the order that is not exempt from disclosure under the Freedom of Information Act; and any other information which it deems helpful in assisting interested persons to understand the terms of the order. The Commission will publish the agreement, order and explanation in the FEDERAL REGISTER. For a period of sixty (60) days after placement of the order on the public record and issuance of the statement, the Commission will receive and consider any comments or views concerning the order that may be filed by any interested persons. Thereafter, the Commission may either withdraw its acceptance of the agreement and so notify the other party, in which event it will return the matter to adjudication for further proceedings or take such other action as it may consider appropriate, or issue and serve its decision in disposition of the proceeding.

(g) This rule will not preclude the settlement of the case by regular adjudicatory process through the filing of an admission answer or submission of the case to the Administrative Law Judge on a stipulation of facts and an agreed order.

By direction of the Commission, dated July 27, 1977.

CAROL M. THOMAS,
Secretary.

DISSENTING STATEMENT BY COMMISSIONER DOLE JOINED IN BY COMMISSIONER DIXON

I share with the majority of the Commission the desire that the public comment period for consent orders be as meaningful and constructive as possible. Such comments can be extremely helpful to the Commission in making the final determination on whether to accept a consent order. I would have preferred, however, that factual material submitted by respondents, reasonably related to the merits of a consent order, be placed on the public record pursuant to an experimental rules change and that nonfactual material reflecting the negotiating process not be so included.

I am concerned that the step taken by the majority of the Commission today may well lessen the Commission's ability to obtain consent orders. It is beyond doubt that consent orders are vitally important law enforcement tools. Our staff has presented strong and, in my opinion, persuasive arguments that the majority's determination will inhibit respondents' willingness to participate in meaningful consent negotiations. The negotiation process is by nature delicate; successful negotiations depend in large part upon good faith give-and-take discussions. Ideas and possible order provisions are discussed by counsel, often without the respondent's prior review. Some proposals are rejected and others are accepted in the process of fashioning a consent order which would serve the public interest. Staff advises that respondent's counsel often produce facts which would be hotly contested in litigation.

I fear that the Commission's action today will result in disincentives to settlement, and I am not prepared to take this risk. The consent order procedure must remain a strong and viable option to the expense and time involved in litigation.

[FR Doc.77-22546 Filed 8-4-77;8:45 am]

SUBCHAPTER B—GUIDES AND TRADE PRACTICE RULES

RESCISSION OF OBSOLETE PARTS

AGENCY: Federal Trade Commission.

ACTION: Final Rescission of Certain Trade Practice Rules.

SUMMARY: Action taken is rescission of obsolete trade practice rules for eleven industries:

1. Commercial dental laboratory industry.
2. Frozen food industry.
3. Wall coverings industry.
4. Manifold business forms industry.
5. Wire rope industry.
6. Tobacco distributing industry.
7. Ribbon industry.
8. Hand knitting yarn industry.
9. Venetian blind industry.
10. Gladiolus bulb industry.
11. Fountain pen and mechanical pencil industry.

The Commission considered public comments received on proposed rescission of these rules and concluded that none merits retention or modification in the public interest. Accordingly all are being rescinded.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION WRITE OR CALL:

Charles H. Slayman, Jr., Attorney, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, telephone 202–724–1193.

SUPPLEMENTARY INFORMATION: Interested persons were invited by the Commission, in 41 FR 2398, to submit written statements for the public record on proposed rescission of trade practice rules for 50 industries published in Title 16 (Commercial Practices) of the Code of Federal Regulations. This document concerns 11 of those 50. Separate documents cover the other 39.

Written statements received were placed on the Commission's Public Record No. 215–55–1–2 for examination by anyone during regular business hours.

Written requests were received to retain trade practice rules for 11 industries the subjects of this document. Recently the request to retain 16 CFR Part 47 (manifold business forms) was withdrawn. Retention requests were submitted by various industry members and trade associations concerning trade practice rules for the other 10 industries. However, still other trade associations agreed to rescission of Part 138 (ribbon), Part 191 (venetian blind) and Part 226 (fountain pen and mechanical pencil). Except for Part 18 (commercial dental lab), each part contains a section defining the industry or industry products. Except for Part 105 (tobacco distributing), each part contains sections (other than definitions) referring by name to the particular industry or industry products. Each part contains sections on deceptive and anticompetitive acts or practices. The Commission considered comments received and determined to rescind the following provisions of these trade practice rules:

(i) Group II rules because they were merely expressions of the trade and were not Commission interpretations of law;

(ii) Industry committee references because authority to establish such committees was rescinded in 1971;

(iii) Stereotype sections (e.g., commercial bribery, sales below cost, prohibited discrimination, etc.) because acts or practices covered are not limited to particular industries; and

(iv) Particularized sections (e.g., deception as to size of gladiolus bulbs, etc.) where a showing is not made that retention or modification is in the public interest. Public interest does not require these administrative interpretations of Commission administered laws to obtain compliance with those laws.

To date, the Commission has not granted any request to retain or amend trade practice rules. However, the Commission (June 10, 1977: 42 FR 29916) invited public comments on proposed amendments to Part 23 (jewelry). Commission action on Part 27 (brick) and Part 195 (bedding) will be reported soon.

Accordingly the Commission hereby announces its final rescission of obsolete trade practice rules published in the following Parts of Title 16 of the Code of Federal Regulations:

Part 18—Commercial Dental Laboratory Industry.
Part 22—Frozen Food Industry.
Part 35—Wall coverings Industry.
Part 47—Manifold Business Forms Industry.
Part 66—Wire Rope Industry.
Part 105—Tobacco Distributing Industry.
Part 138—Ribbon Industry.
Part 177—Hand Knitting Yarn Industry.
Part 191—Venetian Blind Industry.
Part 206—Gladiolus Bulb Industry.
Part 226—Fountain Pen and Mechanical Pencil Industry.

The Commission notes that rescission of trade practice rules and industry guides does not relieve anyone of duties to comply with Commission administered laws. Therefore rescission is not an invitation to engage in unfair or deceptive or anticompetitive acts or practices in violation of law.

(Secs. 5, 6, 18(a)(1)(A), amended FTC Act, 38 Stat. 719, 721, 88 Stat. 2193 (15 U.S.C. 45, 46, 57a); 16 CFR 1.5, 1.6, 17.1.)

Issued: August 5, 1977.

By the Commission.

CAROL M. THOMAS,
Secretary.

[FR Doc.77-22557 Filed 8-4-77;8:45 am]

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

SUBCHAPTER B—REGULATIONS UNDER THE FEDERAL POWER ACT

[Order No. 569; Docket No. RM77-24]

PART 35—FILING OF RATE SCHEDULES

Filing of Changes

AGENCY: Federal Power Commission.

ACTION: Final rule.

SUMMARY: This order amends the Commission's regulations governing the filing of certain changes in rate schedules by public utilities. A utility requesting a rate increase was previously required to submit certain cost of service data 60 days prior to the date that such changed rate was proposed to become effective. This rulemaking changes the mandatory minimum notice time between filing of the data required and the proposed effective date of the increased rates to 30 days. The change reflects a decision of the D.C. Circuit Court of Appeals. This amendment brings the Commission's regulations in line with the terms of the Federal Power Act.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Lilo Schifter, Office of General Counsel, 202–275–4275.

By this order, the Commission amends the regulations governing the filing of certain changes in rate schedules by public utilities to reflect the decision of the Court of Appeals for the D.C. Circuit in *Indiana & Michigan Electric Co.* v. *F.P.C.*, 502 F. 2d 336 (D.C. Circuit 1974), cert. den. 420 U.S. 946 (1975).

Sections 35.13(b)(4)(i) and 35.13(b)(5)(i) of the Commission's regulations presently provide that a filing utility requesting a rate increase shall submit certain cost of service data and testimony 60 days prior to the date that such changed rate is proposed to become effective. Indiana & Michigan Electric Co.[1] found that the practical effect of this requirement is to impose a de facto 60-day notice requirement on utilities seeking a rate increase and that such a requirement contravenes the terms of Section 205(d) of the Federal Power Act, imposing a statutory waiting period for utilities seeking a rate increase of only 30 days. Accordingly, we shall conform our regulations by amending §§ 35.13(b)(4)(i) and 35.13(b)(5)(i) to change the mandatory minimum notice time between filing of the data and testimony required by these sections and the proposed effective date of the increased rates to 30 days. Section 35.22(b)(5) is amended to conform the provisions of that section with the 30 day requirement.

While enlargement of the statutory minimum notice period of 30 days may not be mandated by the Commission, it would be helpful to the Commission's proper exercise of the ratemaking authority under the Federal Power Act if more than 30 days are available for the evaluation of rate increase filings and related pleadings. We, therefore, welcome if the utilities file their rate increases more than 30 days (but less than 90 days) prior to the proposed effective date.

The Commission finds: (1) In view of the nature of these amendments compliance with the notice, public procedure and effective date provisions of 5 U.S.C. 553 is unnecessary.

[1] 502 F. 2d at p. 340.

(2) The amendment to the Commission's regulations herein prescribed is necessary and appropriate for the administration of the Federal Power Act.

The Commission, acting pursuant to the authority granted by the Federal Power Act, as amended, particularly sections 205 and 309 thereof (49 Stat. 851, 858 and 859; 16 U.S.C. 824(d) and 825(h)) orders: (A) Subparagraphs (b)(4)(i) and (b)(5)(i) of § 35.13 in Part 35, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations are revised to read as follows:

§ 35.13 Filing of changes in rate schedules.

* * * * *

(b) In addition the following material shall be submitted: * * *

(4)(i) Except as provided in paragraph (b)(4)(ii) of this section, if the rate schedule provides for an increased rate, then the filing public utility shall submit a statement showing its cost of the service to be supplied under the new rate schedule according to supporting statements A through O as described below.

* * * * *

(5)(i) A utility filing for an increase in rates and charges shall be prepared to go forward at a hearing on reasonable notice on the data which have been submitted and sustain the burden of proof, imposed by the Federal Power Act, of establishing that its proposed charges are just and reasonable and not unduly discriminatory or preferential or otherwise unlawful within the meaning of the Act. The Commission is desirous of avoiding delay in processing rate filings. To this end, if the rate schedule provides for an increase in rate which exceeds $50,000 in revenues for the test period, the filing utility shall submit with its rate increase filing testimony and exhibits of such composition, scope and format that they would serve as the company's case-in-chief in the event the matter is set for hearing. In addition to whatever material the utility chooses to submit as part of its case, except for increases resulting from changes made in fuel clauses and increases of rates comprising an integral part of coordination and interchange arrangements in the nature of power pooling transactions, the exhibits shall include full cost of service data, as identified in subparagraph (4)(iii) of this paragraph, statements A through O, and the accompanying testimony should include an explanation of these exhibits.

* * * * *

§ 35.22 [Amended]

(B) In § 35.22 in Part 35, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations "Research and development clauses" amend paragraph (b)(5) by deleting "60 days" as the minimum notice period and substituting "30 days" therefor.

(C) The amendment adopted herein shall be effective upon issuance of this order.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

SUBCHAPTER C—REGULATIONS UNDER THE FEDERAL POWER ACT

SUBCHAPTER F—REGULATIONS UNDER THE NATURAL GAS ACT

[Docket No. RM75-27; Order 561-A]

UNIFORM SYSTEM OF ACCOUNTS FOR PUBLIC UTILITIES AND LICENSEES AND NATURAL GAS COMPANIES

Supplemental Order

AGENCY: Federal Power Commission.

ACTION: Supplemental order.

SUMMARY: The Commission is denying applications for rehearing of Order No. 561 (42 FR 9161, published February 15, 1977, amending CFR Parts 101, 104, 141, 201, 204 and 260) and clarifying one minor point related to use of the "Allowance for Funds Used During Construction" (AFUDC) formula. Several parties to this proceeding, filed applications for rehearing of the Commission's previous order which determined the maximum rates to be used in computing the AFUDC and provided accounting and reporting requirements for AFUDC. The Commission found that the rehearing applications presented no facts or principles of law which would require modification of its previous order.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

L. H. Drennan, Jr., Chief Accountant, Office of Chief Accountant, 202–275–4031.

On March 4, 1977, El Paso Natural Gas Co. (El Paso), Public Systems,[1] three bulk power suppliers for rural electric cooperatives (Oglethorp),[2] and eight investor-owned public utilities (Private Group)[3] filed Applications for Rehearing of our Order No. 561, issued February 2, 1977, in Docket No. RM75–27. On March 7, 1977, Pennsylvania Power & Light Co. (PP&L) filed a separate Application for Rehearing. On April 1, 1977, an order was issued granting application for rehearing by the aforementioned petitioners for the purpose of further consideration of Order 561. On April 18, 1977, pursuant to Section 1.34(d) of the Commission's Rules of Practice and Procedure, the Public Service Commission of the State of New York (New York) and the Private Group filed responses to Applications for Rehearing filed by the Private Group and Public Systems, respectively.

SHORT-TERM DEBT

El Paso's application stated that it fully supported the Commission's objective in the instant rulemaking proceeding of providing adequate compensation for funds devoted to construction but believed that the formulas devised by the Commission and promulgated pursuant to Order No. 561 fall short of accomplishing this objective. El Paso submits that the approach adopted by the Commission is grounded upon two erroneous assumptions, i.e. (i) that short-term debt is the first source of funds for construction purposes, and (ii) that short-term debt is used exclusively for construction. El Paso proposed that instead of the formula adopted by the Commission that the rate for AFUDC be expressed as follows:

$$R = d\left(\frac{D}{D+P+C}\right) + p\left(\frac{P}{D+P+C}\right) + c\left(\frac{C}{D+P+C}\right)$$

In this formula R represents the AFUDC rate and the other symbols have the same meaning as defined in Order No. 561 except that D would equal the sum of long-term and short-term debt and d would equal the weighted average interest rate for D. El Paso states that this formula is grounded upon the more realistic assumption that construction work in progress is financed by funds provided according to the pro rata capitalization of the company, including short-term debt, if any. In the event, however, that the Commission chooses to retain the formula set forth in Order No. 561, El Paso requests clarification in cases where short-term debt exceeds construction work in progress to ensure that negative AFUDC rates do not result.

Public Systems states that the Commission correctly concludes that short-term debt is the primary source of funds for the construction of new utility plant and the procedures for the calculation of AFUDC reflect this fact. However, Public Systems expressed concern over the statement in Order No. 561 that the AFUDC method established was not for the purposes of establishing a method for allocating short-term interest cost for the purpose of a rate proceeding. They believe that such statement may be interpreted as an invitation to include the cost of construction related short-term borrowings in the development of AFUDC and to recognize the same costs in the development of the allowed return in rate proceedings. Public Systems also objects to any possible recognition of costs associated with bank or other

[1] See Appendix A for members of Public Systems.

[2] Oglethorp Electric Membership Corp., North Carolina Electric Membership Corp., and Old Dominion Electric Cooperative, Inc.

[3] Jersey Central Power & Light Co., Long Island Lighting Co., Metropolitan Edison Co., New England Power Co., Northeast Utilities Co., Pacific Power & Light Co., Pennsylvania Electric Co., and Pennsylvania Power & Light Co.

borrowings, such as compensating bank balances, in determining short-term debt cost. They believe that recognition of such costs should be sanctioned, if at all, only in general rate proceedings after a hearing on the record.

PP&L also disagrees with the Commission's premise in Order No. 561 that all short-term debt should be allocated to financing construction work in progress. PP&L states that there are many instances when a utility can specifically identify the utilization of short-term debt for purposes other than financing construction work in progress and in such cases, it would be erroneous to include this debt in the AFUDC computation.

As we stated in Order No. 561, it is generally impossible to specifically trace the source of funds used for various corporate purposes and it was not the purpose of the proposed rule to do so. We recognize that short-term debt is a source of funds that can be used for many corporate purposes other than construction. However, short-term debt cost is a valid cost of conducting utility operations and a mechanism for the recovery of such cost should be provided for within the regulatory framework. Recovery of capital costs is usually provided for through the rate of return allowance in a general rate proceeding. However, in a typical rate case situation, short-term debt cost does not lend itself to reasonable measurement for use in setting future rates since, as El Paso graphically illustrated in the Appendix to its Application, the amount of short-term debt that a company has outstanding can fluctuate widely over short periods of time. In addition, the interest rate for short-term debt often changes at frequent intervals. On the other hand, the cost of short-term debt can be effectively measured and capitalized for subsequent recovery (through depreciation charges in rates) since under our formula the balances and rates for the forthcoming year are estimated annually, with appropriate adjustments to the amounts capitalized if the estimates used are not reasonably reflective of actual experience. Therefore, we do not believe that we should modify Order No. 561 with respect to the weight given short-term debt in the formula.

El Paso's point on possible negative AFUDC rates in situations where short-term debt exceeds construction work in progress is well taken. We believe that this matter can best be clarified by stating herein that if short-term debt balances exceed construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment and fabrication the maximum total AFUDC rate to be utilized will be the weighted average short-term debt rate. In instances where this occurs, the entire credit for AFUDC will be recorded in Account 432, Allowance for borrowed funds used during construction—Credit.

We do not believe that Public System's concerns are well founded with regard to the inclusion of short-term debt for rate of return purposes or the potential recognition in certain instances of short-term debt costs arising from such items as compensating balances. Order No. 561 neither changes the Commission's policy with respect to treatment of short-term debt in capitalization used for rate of return purposes nor does it grant blanket approval for recognition of compensating balances and commitment fees in costing short-term debt. The burden of proof is upon the companies to justify such items before they will be permitted.

STATE COMMISSION RATE DETERMINATIONS

Both Public Systems and Oglethorp object to the provision in Order No. 561 that the cost rate to be used for common equity be the rate granted common equity in the last rate proceeding before the body having primary rate jurisdiction or, if such rate is not available, the average rate actually earned during the preceding three years. They believe that the return on equity rate should be based upon determinations of the Federal Power Commission, whether the FPC has primary rate jurisdiction or not. Public Systems and Oglethorp believe that the approach adopted by the Commission is an unjustified abdication of statutory responsibility. On the other hand, Private Group urges that Order No. 561 be amended to provide that, if a state ratemaking agency having primary rate jurisdiction over an electric utility has prescribed a method of determining or applying an AFUDC rate, such electric utility may use such State Commission-directed rate rather than the rate developed under the formula in Order 561.

In its response to the application for rehearing filed by Public Systems, the Private Group stated the following:

> Order No. 561 is designed to provide an orderly method for accrual of AFUDC month-by-month during the on-going operations of a public utility. For the most part, the facilities constructed by an electric utility cannot be segregated as between those which will be employed solely for retail service and those which will be employed solely for wholesale service; instead, allocation procedures for joint use facilities are required and appropriate methods of allocation have been developed and are routinely applied. Under those circumstances, the utility must have a single AFUDC rate to apply to facilities under construction which will ultimately serve both groups of customers. A reasonable recognition of, and accommodation to, the Federal-State relationship involves the use of a cost rate for common equity which is equal to that last approved by the body having primary rate jurisdiction.

We fully agree with the above response by the Private Group with respect to the cost rate for equity funds. We believe that this argument is also supportive of the Commission's adoption of a uniform method for all jurisdictional companies to follow so that a single rate is developed for each company. Additionally, since the financial statements of electric utilities and natural gas companies are used by government agencies, investors, the general public, and others for purposes other than setting rates, it is important that a uniform method be used. This is especially important in an area such as AFUDC which has such a material impact on the earnings and cost determinations of utilities. We shall therefore deny rehearing on this point.

THE RELOCATION OF AFUDC IN THE INTEREST CHARGES SECTION OF THE INCOME STATEMENT

The Private Group and PP&L urged that Order No. 561 be revised to eliminate the provision that directs the relocation of the allowance for borrowed funds as a credit to the interest charge section of the income statement. New York in its response to application for rehearing filed by Private Group supported this position. These parties argue that the relocation required by Order No. 561 is likely to have an adverse effect on the ability to finance both debt and preferred stock securities due to coverage test requirements included in mortgage indentures and corporate charters. PP&L also questions whether the relocation of a portion of AFUDC as a reduction of interest charges will better inform readers of the financial statements as to the nature of the capitalized allowance for borrowed funds as stated in Order No. 561. They argue that such reclassification may in fact mislead readers of financial statements if such amount is considered a reduction of the actual amount of interest a company must pay.

We are unpersuaded by these arguments that we should modify Order No. 561 with respect to the location of the interest portion of AFUDC in the income statement. We purposely did not require that the amount of interest charged to the income statement be shown net of interest capitalized but instead required that the gross interest charges be shown in the income statement with a separate line item for the capitalized allowance for borrowed funds. This enables readers of financial statements to be informed as to the total interest liability incurred for the year as well as to any lesser amount of interest entering into the determination of net income for the year. We continue to believe that the readers of the financial statements will be better informed with this form of accounting disclosure than other suggested methods. Furthermore, the change in the location on the income statement for the allowance for interest capitalized does not in itself change either the nature of the item or the degree of protection afforded security holders by earnings of a utility.

NET-OF-TAX AFUDC RATE

Public Systems objects to the normalization of income tax benefits of construction interest through the use of a net-of-tax AFUDC rate and asks that Order No. 561 be revised to prohibit this practice.

Public Systems' arguments are misplaced. The proposed plant instructions pertaining to computation of income taxes were deleted when the Commission adopted Order No. 561 because these matters were previously spoken to in the Commission's Order Nos. 530, 530–A and 530–B in Docket Nos. R–424 and R–446.

These orders are currently under review by the D.C. Circuit (*Public Systems, et al., v. FPC*, CADC Nos. 76–1609, 76–1830.)

OTHER MATTERS

Private Group states in their application that in order for the AFUDC rate to be fully compensatory, estimates of weighted average embedded long-term debt and preferred stock costs as they are expected to exist during the current year should be used rather than the effective weighted average cost of the long-term debt and preferred stock at the end of the prior year as required by Order No. 561.

Private Group also argues that compounding of AFUDC should be permitted monthly rather than semi-annually, since utility accounting is on an accrual basis. If, however, the Commission considers the timing of cash outlays for interest and dividend to be relevant, Private Group argues that quarterly compounding would be more appropriate than semi-annual compounding since dividends on preferred and common stock and interest on short-term debt are almost invariably paid quarterly, and these items account in the aggregate for more than half of the AFUDC accrual. The remainder of the accrual relates to long-term debt which is normally paid semi-annually.

Public Systems objects to the provisions of Order No. 561 which indicate that amounts capitalized for AFUDC for the year will not be required to be adjusted if the gross AFUDC rate actually used for the year does not exceed by more than 25 basis points the rate that would be derived from the formula by use of actual thirteen monthly balances of construction work in progress and the actual weighted average cost and balances for short-term debt outstanding during the year. Public System argues that this provision creates an incentive to "misestimate" AFUDC and pocket additional prospective but unjustified revenues. Public System assumes that this provision was intended to ease accounting burdens but submits that the governing statutes do not contemplate such windfalls in the name of administrative convenience.

Oglethorp states that Order No. 561 excludes all non-investor sources of funds from the AFUDC computation on the ground that such sources are treated as rate base deductions but argues that some non-investor funds may not be treated as rate base deductions and hence could be incorrectly also overlooked for AFUDC purposes. Oglethorp believes the Order should be modified to provide that all non-investor funds which are not deducted from rate base should be included in the AFUDC formula at zero cost.

The requirement that the AFUDC rate for the current year be based on the effective weighted average cost of the long-term debt and preferred stock at the end of the prior year and the requirement that the AFUDC be compounded no more frequently than semi-annually may, in some instances, tend to slightly understate the cost of capital used for construction. Conversely, there may be relatively minor items of consumer contributed capital which are not considered in either the ratemaking process or through AFUDC and there may well be some instances in which the estimates used exceed by up to 25 basis points the rate that would be derived from actual experience.

We conclude that Order No. 561 should not be modified with respect to these matters. When considered together the proposed modifications tend to offset each other. We believe that Order No. 561 clearly provides for a rate for AFUDC which is in the zone of reasonableness, based upon uniform standards which can be effectively implemented and administered.

In light of the above, we believe that the applications for rehearing filed by the aforementioned applicants should be denied.

The Commission finds: The application for rehearing filed on March 4, 1977, by El Paso, Public Systems, Oglethorp and Private Group and on March 7, 1977, by PP&L present no facts or principles of law which would require modification of Order No. 561.

The Commission Orders: (A) The applications for rehearing filed by El Paso, Public Systems, Oglethorp and Private Group on March 4, 1977, and PP&L on March 7, 1977, are denied.

(B) The Secretary shall cause prompt publication of the Order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 770-4]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Imperial County APCD

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on changes to the Imperial County APCD portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: September 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 100 California Street, San Francisco, Calif. 94111, Attn.: Dave Souten (415–556–7288).

SUPPLEMENTARY INFORMATION: On May 26, 1977, in 42 FR 27001, EPA published a Notice of Proposed Rulemaking for revisions to the Imperial County Air Pollution Control District Rules and Regulations submitted on November 10, 1976, by the California Air Resources Board for inclusion in the California SIP.

The changes contained in the abovementioned submittal and being acted upon by this rulemaking include the following: additions to the "Definitions" rule; the addition of a rule exempting agricultural operations from the visible emissions and quantity of emissions rules; the addition of an exemption to the "Nuisance" rule for odors emanating from agricultural operations; a new rule governing livestock feed yards; and the addition of an exemption for agricultural operations from the prohibitions rules.

A list of the Rules being considered by this action was published as part of the Notice of Proposed Rulemaking and can be found in 42 FR 27001 (May 26, 1977). The Notice of Proposed Rulemaking provided for a 30-day public comment period. EPA noted the deficiency that the term "agricultural operations" is not defined in the APCD rules and regulations. Although the Imperial County APCD sent a letter defining the term, the deficiency remains since definitions must be part of the rules and regulations in order to become a portion of the applicable SIP. No other public comments were received.

It is the purpose of this notice to approve Rule 100, *Definitions* and Rule 131.5, *Livestock Feed Yards* and incorporate them into the California SIP.

EPA is disapproving Rule 114.5, *Exceptions* and Rule 148.D(3), *Miscellaneous Exceptions*. These rules exempt "agricultural operations" from the visible emissions rules and the quantity of emissions rules. Because the term "agricultural operations" is not defined in the Imperial County APCD rules and regulations, the rules could be interpreted to exempt stationary sources to which the rules and regulations now apply. In addition, no data has been submitted which demonstrate that these exemptions will not interfere with attainment and maintenance of the National Ambient Air Quality Standards. This action adds Imperial County APCD to the disapproval notice in 40 CFR 52.236.

Rule 117, *Nuisance* is not appropriate for inclusion in the SIP because it is not specifically directed at the attainment and maintenance of the National Ambient Air Quality Standards. Therefore, EPA is taking no action on this rule.

The California Air Resources Board has certified the public hearing requirements of 40 CFR 51.4 have been satisfied.

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions.

(Secs. 110 and 301, Clean Air Act, as amended (40 U.S.C. 1857c–5 and 1857g).)

Dated: August 1, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of Part 52 of Chapter 1, Title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c) is amended as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(35) * * *

(viii) Imperial County APCD.

(A) Rules 100, 114.5, 131.5, and 148.D (3).

* * * * *

2. Section 52.236 is added as follows:

§ 52.236 Rules and regulations.

(a) Since the following Air Pollution Control District (APCD) rules do not define the term "agricultural operations," the rules are disapproved because they could render certain emission limitations rules unenforceable.

(1) Southeast Desert Intrastate:

(i) Imperial County APCD.

(A) Rule 114.5, *Exceptions* submitted on November 10, 1976.

(B) Rule 148.D(3), *Miscellaneous Exceptions*, submitted on November 10, 1976.

[FR Doc.77-22487 Filed 8-4-77;8:45 am]

[FRL 770-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Illinois Plan Revision

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The purpose of this notice is to announce the approval of a revision to the Illinois State Implementation Plan addressing the ozone episode situation.

EFFECTIVE DATE: Immediately effective.

FOR FURTHER INFORMATION CONTACT:

Ms. Maxine Borcherding, Illinois State Specialist, Air Programs Branch, Environmental Protection Agency, Region V, 230 South Dearborn, Chicago, Ill. 60604 (312–353–2205).

SUPPLEMENTARY INFORMATION: On January 31, 1972, the State of Illinois submitted to the Administrator of the United States Environmental Protection Agency an implementation plan to achieve and maintain the National Ambient Air Quality Standards. The plan was approved by the Administrator on May 31, 1972 (37 FR 10862) with several exceptions, including disapproval of regulations pertaining to Prevention of Air Pollution Emergency Episodes. These deficiencies were corrected and the episode plan was fully approved on October 28, 1973 (38 FR 29297).

On April 9, 1976, the Illinois Pollution Control Board revised its emergency episode regulations after due notice and public hearings. The regulations (Illinois Pollution Control Board Regulations, Chapter 2, Part IV) took effect on April 19, 1976, and were submitted to U.S. Environmental Protection Agency (USEPA) on July 22, 1976, as revisions to the Illinois State Implementation Plan (SIP).

The new regulations primarily address ozone episode situations and would revise the plan as follows: (1) The regulations specifically state that Illinois Environmental Protection Agency has sole authority for declaring episode stages; (2) The requirement for a forecast of 24 hours of poor dispersion before an ozone episode can be declared has been revised to allow the declaration of an episode whenever specified ozone levels occur one day and are expected to recur the next day, or if an air stagnation advisory is received for any area within the State; (3) The term "Ozone Advisory" replaces the former designation of "Ozone Watch," and is issued when a two-hour average of 0.07 ppm of ozone is measured; (4) Episode stages have been set for concentration levels occurring for a one-hour period at any monitoring station as follows: ozone yellow alert level has been raised from 0.10 to 0.17 ppm; ozone red alert level has been decreased from 0.40 to 0.30 ppm; ozone emergency level has been decreased from 0.60 to 0.50 ppm; (5) The regulations establish a procedure for filing emission reduction contingency plans and requirements for reduction of pollution levels during periods of high concentrations. Indirect sources of pollution such as large government agencies, parking garages, and fleet vehicle operations are included among sources required to file emission reduction contingency plans.

Notice of receipt of this revision request and the establishment of a 30-day period for public comment was published in the January 19, 1977, FEDERAL REGISTER (42 FR 3657). Copies of the regulations are available for public inspection during normal working hours at the Illinois Pollution Control Board, 309 West Washington Street, Suite 300, Chicago, Ill. 60606. Copies of the regulations are also available at the Illinois Environmental Protection Agency, 2200 Churchill Road, Springfield, Ill. 62706; and at Air Programs Branch, Air and Hazardous Materials Division, USEPA, Region V, 230 South Dearborn, Chicago, Ill. 60604.

In response to the January 18, 1977, FEDERAL REGISTER notice, EPA received two substantive comments. The issues raised were as follows:

(1) The proposal was criticized by the City of Chicago Department of Environmental Control for giving sole authority for the declaration of episode stages to the State. The City alleged that it had authority to declare air pollution episodes under its home rule authority, and was concerned about the possibility that the State may declare an episode alert for the City of Chicago only.

The Clean Air Act gives the states primary responsibility for development of air pollution programs. These revised regulations reserve authority to declare episodes to the Director of the Illinois Environmental Protection Agency to provide for statewide uniformity in conducting air pollution episodes and to prevent confusion on the part of the public which would be caused by conflicting episode orders by a number of air pollution control agencies.

On December 17, 1976, the Commissioner of the City of Chicago Department of Environmental Control signed the 1977–1978 interagency agreement for air pollution control between the Illinois Environmental Protection Agency and the Chicago Department of Environmental Control. In doing so, the City agreed to conduct its episode program in accordance with Part IV of the Illinois Pollution Control Regulations. It is, therefore, incumbent upon the City to adjust its program so as to be in conformity with its agreed role.

With respect to the geographic limitations on the declaration of episodes, the nature of the ozone problem is such that the likelihood of finding monitored violations solely within the corporate limits of the City of Chicago is extremely small, and we do not expect that this situation will arise in practice.

In addition, Rule 402(f) of the revised regulations stipulates that an advisory shall be declared for the entire Illinois portion of any air quality control region if any part of that region meets advisory criteria. Alert and Emergency declarations are made for portions of the alert area meeting the applicable criteria or causing those criteria to be met elsewhere. While we note the reluctance of the City of Chicago to accept a role which reduces its authority to declare air pollution episodes, the Agency has determined that these objections are outweighed by the advantages of a uniform statewide program.

(2) The proposal was also criticized by the Chicago Lung Association for the increase in the yellow alert level from 0.10 ppm to 0.17 ppm.

While retaining the existing 0.10 limitation would have been preferable, the 0.17 ppm level is consistent with the minimum EPA requirements. The impact of raising the yellow alert level to 0.17 ppm is offset by the fact that the advisory level is to be maintained at 0.07 ppm level, and the red alert and emergency levels have been decreased to 0.3 and 0.5 ppm, respectively. The revised regulations provide for more stringent emission reductions at lower ambient air concentrations of oxidants. Therefore, these revised regulations will result in greater protection to the public, and, therefore, should be approved.

EPA approval. After review of all relevant materials, the Administrator has determined that the proposed revision is consistent with current EPA policies and goals set forth in the requirements of section 110(a)(9) (A)–(H) of the Clean Air Act and EPA regulations in 40 CFR Part 51 in that the proposed revision will not interfere with any applicable ambient air quality standard. Therefore, the Administrator is approving this proposed Illinois revision.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart O—Illinois

1. In § 52.720, paragraph (c)(12), is added as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(12) On June 22, 1976, the Director of the Illinois Environmental Protection Agency submitted revised emergency episode regulations.

(42 U.S.C. 1857c-5.)

Dated: August 1, 1977.

DOUGLAS M. COSTLE,
Administrator.

[FR Doc.77-22488 Filed 8-4-77;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21246; RM-2851]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations In Heidelberg, Miss.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns a first Class A FM channel to Heidelberg, Miss. Petitioner, New Laurel Radio Station, Inc., states that the FM station would provide Heidelberg with a first full-time local broadcast service.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau (202–632–7792).

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. Heidelberg, Miss. Report and order (Proceeding Terminated).

Adopted: July 29, 1977.

Released: August 2, 1977.

1. The Commission has under consideration the Notice of Proposed Rule Making, adopted May 13, 1977, 42 FR 27268, proposing the assignment of Channel 257A to Heidelberg, Miss., as a first FM assignment to that community. The Notice was issued in response to a petition filed by New Laurel Radio Station, Inc. ("petitioner"), licensee of AM Station WAML, Laurel, Miss. Petitioner filed supporting comments reaffirming its intention to apply for a station if the channel is assigned and to build a station if authority is granted. No oppositions to the petition were filed.

2. Heidelberg (pop. 1,112), situated in Jasper County (pop. 15,995),[1] is located approximately 24 kilometers (15 miles) northeast of Laurel, Miss., and 153 kilometers (95 miles) northwest of Mobile, Ala. There is no local broadcast service in Heidelberg.

3. In support of its proposal, petitioner submitted information with respect to Heidelberg and its need for a first FM channel assignment.

4. Upon careful consideration of the proposal herein, the Commission believes it would be in the public interest to assign Channel 257A to Heidelberg, Mississippi. A demand has been shown for its use, and it would provide the community with a first local aural service. It can be made without affecting any existing assignments and would be consistent with the applicable minimum spacing requirements.

5. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules.

6. In view of the foregoing, it is ordered, That effective September 12, 1977, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, is amended with respect to the city listed below as follows:

[1] Population figures are taken from the 1970 U.S. Census.

City and Channel No.

Heidelberg, Miss., 257A.

7. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-22592 Filed 8-4-77;8:45 am]

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Amendment of Rules in the Maritime Service Adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974; Correction

AGENCY: Federal Communications Commission.

ACTION: Correction.

SUMMARY: This document corrects the Report and Order appearing in the FEDERAL REGISTER June 17, 1977 at 42 FR 30999.

EFFECTIVE DATE: July 18, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Walter E. Weaver, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION: In the matter of amendment of Parts 2, 13, 81 and 83 to implement changes in frequencies, operating procedures, technical standards and other criteria relating to the use of radiotelegraphy in the maritime services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974, Docket No. 20813.

Released: July 29, 1977.

1. The Report and Order in the instant proceeding (FCC 77-380; 42 FR 30999), was released on June 10, 1977. The (First) Errata was released on June 21, 1977, and a Second Errata was released on July 18, 1977.

2. We have received a number of inquiries regarding the requirements imposed by the text of § 81.209(c)(2). In general these inquiries seek to determine if the intent of this section was to impose a receiver selectivity substantially less than the channel width, with particular reference to the A1 Morse calling channels.

3. In the case of the A1 Morse working channels, the channel width is uniformally 500 Hz in the bands between 4 and 26 MHz. The text of § 81.209(c)(2) is directed to those bands. This is not correct, however, in the case of the A1 Morse calling channels, where the channel width varies with megacycle order, being: 400 Hz at 4 MHz; 800 Hz at 8 MHz; 1200 Hz at 12 MHz; 1600 Hz at 16 MHz; and 2000 Hz at 22 MHz and at 26 MHz.

4. Clarification is necessary and can be provided by deleting the receiver selectivity for the A1 Morse working frequencies. We are, therefore amending § 81.209(c)(2) to delete the phrase "500 Hz removed", appearing at the end of that subparagraph. Section 81.209(c)(2) is, therefore amended to read as follows:

In § 81.209(c), subparagraph (2) is amended to read as follows:

§ 81.209 Watch on ship calling frequencies.

* * * * *

(c) * * *

(2) Have a selectivity capability such that it will reject signals on adjacent channels.

* * * * *

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-22523 Filed 8-4-77;8:45 am]

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. MC-43 (Sub-No. 6)]

PART 1057—LEASE AND INTERCHANGE OF VEHICLES

Safety Inspection of Augmenting Equipment

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The rule established by this rulemaking proceeding relieves commonly controlled carriers which jointly maintain a uniform safety program of the duty to inspect equipment leased between them at the point of augmentation, provided that they remain under common control and that the equipment leased is inspected within the 24 hour period immediately preceding the time of augmentation. Thus, under the revised rule, all leased equipment will still be subject to an inspection to insure that it complies with the Motor Carrier Safety Regulations of the Federal Highway Administration of the Department of Transportation. However, the revised rule will allow commonly controlled carriers to provide a less costly and more expeditious service to the shipping public.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Section of Operating Rights, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423 (202-275-7292).

SUPPLEMENTARY INFORMATION: On April 25, 1977, the Interstate Commerce Commission published a proposed rule (42 FR 21114) to revise the regulation in 49 CFR 1057.4(c). As the Commission stated at that time, the purpose of the proposed rule was to establish a more efficient procedure for allowing commonly controlled carriers to lease equipment between themselves than existed previously, thereby improving service to the shipping public.

Interested members of the public were invited to submit written comments concerning the proposed rule. Comments were received from a national organization of the trucking industry, and from five separate groups of commonly controlled motor carriers. All of the comments were favorable to the proposed revision. Several commenters, however, raised questions, or made suggestions, which have prompted changes in the regulation as proposed.

PURPOSE

The proposal for the revision of 49 CFR 1057.4(c) was initiated after the Section of Motor, Water, Forwarder Operations, in the Commission's Bureau of Operations, conducted a study of the effectiveness and efficiency of the existing regulation. Under the regulation all motor carriers leasing equipment have been required to inspect the equipment at the point of augmentation to insure that it conformed to the Motor Carrier Safety Regulations of the Federal Highway Administration of the Department of Transportation. It has, however, been the practice of the Commission's Motor Carrier Leasing Board to grant a petition for waiver of this regulation where the petitioning carriers are under common control and jointly maintain and administer a uniform safety program, in order to avoid needless duplication of effort, time, and cost. In those instances where waivers have been granted, the petitioning carriers were still obligated to inspect leased equipment. However, a single inspection took place at a time earlier than at the point of augmentation. Under the rule as revised in this proceeding, affected motor carriers need no longer file petitions for waiver, or, in the alternative, inspect leased equipment at the point of augmentation. These carriers will still be required, nonetheless, to inspect leased equipment within the 24 hour period immediately preceding the time of augmentation in the manner otherwise prescribed in the regulation. Thus, under the revision, the safety aspect of the regulation will be preserved, but affected carriers will be enabled to operate more efficiently to the benefit of the shipping public.

TIME AND NATURE OF THE INSPECTION

The revision to 49 CFR 1057.4(c) as originally proposed indicated, in part, that the exemption would apply provided that the equipment leased is inspected on the day it is to be leased. Several commenters have stated that this "same day" requirement is too restrictive since they perform trucking operations around the clock. They claim, therefore, that the time of the lease and that of the inspection may not readily be accomplished on the same calendar day. Therefore, these commenters have requested that a 24 hour period be allowed in lieu of the same day requirement, arguing that this modification would not subvert the intention of the regulation. We agree, provided that the inspection is accomplished prior to the time of augmentation to insure that the equipment conforms to the Motor Carrier Safety Regulations of the Department of Transportation before it changes hands.

One commenter has asked that we clarify the nature of the inspection required when equipment is leased between commonly controlled carriers jointly maintaining and administering a uniform safety program. Simply stated, the inspection requirement is the same which has previously existed and which is still clearly outlined in the regulation. The revision to 49 CFR 1057.4(c) enacted herein does not modify the nature of the inspection, but merely alters the time it may be accomplished without necessitating the filing of petitions for waiver by affected motor carriers.

The final revision to the regulation in 49 CFR 1057.4(c) reflects one additional modification to the rule as proposed. The sentence immediately following the newly incorporated exemption paragraph in the regulation begins with the phrase, "If an inspection is required * * *" and thereafter sets forth requirements pertaining to the nature of the inspection. The words, "If an inspection is required" will be deleted, since leased equipment still must always be inspected for safety purposes, irrespective of whether the parties engaging in the lease are commonly controlled and jointly maintain a uniform safety program.

(5 U.S.C. 553 and 559, and 49 U.S.C. 304.)

NOTE.—This decision is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

Accordingly, 49 CFR 1057.4(c) is amended to read as follows:

§ 1057.4 Augmenting equipment.

* * * * *

(c) *Safety inspection of equipment by the authorized carrier.* It shall be the duty of the authorized carrier, before taking possession of the equipment, to inspect the same or to have the same inspected by a person who is competent and qualified to make such inspection and has been duly authorized by such carrier to make such inspection as a representative of the carrier in order to insure that the said equipment complies with the Motor Carrier Safety Regulations of the Federal Highway Administration of the Department of Transportation. However, where carriers leasing equipment are commonly controlled and jointly maintain and administer a uniform safety program, no such inspection at the point of lease is required; *Provided,* That both carriers remain under common control and the equipment be inspected within the 24 hour period immediately preceding the time of augmentation and found to meet the requirements of the Motor Carrier Safety Regulations of the Department of Transportation. The person making the inspection shall certify the results thereof on a report in the form hereinafter set forth, which report shall be retained and preserved by the authorized carrier, and if his inspection discloses that the equipment does not comply with the requirements of the said safety regulations, possession thereof shall not be taken. When such an inspection has been made, the authorized carrier or an officer or partner thereof, or a safety director or other supervisory employee responsible for safety compliance, shall certify on the inspection report that the person who made the inspection, whether an employee or person other than an employee, is competent and qualified to make such inspection and has been duly authorized to do so by such carrier as its representative. When equipment other than a power unit is leased, a form of report applicable to such equipment may be used.

* * * * *

(5 U.S.C. 553 and 559 (49 U.S.C. 304).)

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, BARTER, EXPORTATION, AND IMPORTATION OF WILDLIFE

PART 20—MIGRATORY BIRD HUNTING

Clarification of Tagging Requirements

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: A new section is added to require tagging of freshly killed migratory birds received, possessed, or given as a gift. Wording in present regulations allows a hunter to avoid possible charges of hunting without a license or exceeding possession limit by stating that another hunter had given him the birds; this requirement tightens that loophole by placing accountability on the hunter who took the birds. Also, "Migratory bird preservation facility" is redefined to include "taxidermists."

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Marshall L. Stinnett, Special Agent in Charge, Regulations and Penalties, Division of Law Enforcement, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (202-343-9242).

SUPPLEMENTARY INFORMATION: On March 10, 1977, the Service published a proposed rule in the FEDERAL REGISTER [42 FR 13321] to amend § 20.11 and to add a new § 20.40 to Part 20 of Title 50 of the Code of Federal Regulations. The amendment to § 20.11 would insert the word "taxidermist" in paragraph (ii) of the definition of "Migratory bird preservation facility" in order to clarify the fact that taxidermists fall within the scope of that definition. The proposed § 20.40 would require that any freshly killed migratory game birds received, possessed, or given as a gift, except at personal abodes, have a tag attached identifying the hunter who took the birds, the total number taken, and the date such birds were taken.

Public comments were requested on these proposed rules, and comments received no later than May 18, 1977, have been considered. Comments received were favorable to the proposal. Two comments were from State agencies and one comment was from a waterfowl organization. The comment from the waterfowl organization suggested that "took" might be misconstrued to mean "accepted." However, in § 10.12 of Part 10 of Title 50, CFR, "took" or "take" is defined to mean pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to pursue, hunt, shoot, wound, kill, trap, capture, or collect. This definition is applicable to Part 20. The final rule is therefore adopted as proposed. The principal author of this document is Margaret Cash, Division of Law Enforcement.

Accordingly, Part 20, Subchapter B, Chapter I of Title 50, Code of Federal Regulations, is amended, as follows:

1. Add the word "taxidermist" to § 20.11(ii) under Subpart B. As revised, paragraph (ii) reads:

§ 20.11 Meaning of terms.

* * * * *

"Migratory bird preservation facility" means:

* * * * *

(ii) Any taxidermist, cold storage facility or locker plant which, for hire or other consideration; or

* * * * *

2. Add a new § 20.40 to Subpart D to read:

§ 20.40 Gift of migratory game birds.

No person may receive, possess, or give to another, any freshly killed migratory game birds as a gift, except at the personal abodes of the donor or donee, unless such birds have a tag attached, signed by the hunter who took the birds, stating such hunter's address, the total number and species of birds and the date such birds were taken.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 2, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

[FR Doc.77-22563 Filed 8-4-77;8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

PART 2—PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: The United States Parole Commission.

ACTION: Final rule.

SUMMARY: This rule enlarges the possible grounds for appeals by prisoners of the Commission's decisions. The rule replaces the present general criteria, which did not indicate what specific issues might be most relevant in such appeals. The purpose of the rule is to help the prisoner focus on the relevant issues as well as to make the Commission's reviewing process more efficient.

EFFECTIVE DATE: This rule becomes effective on September 6, 1977.

FOR FURTHER INFORMATION, CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, 320 First Street, NW., Washington, D.C. 20537, telephone 202-724-3092.

SUPPLEMENTARY INFORMATION: The rule is adopted as proposed. A total of four comments were received on the proposal. Three prisoners felt that the new appeal grounds were a considerable improvement from their point of view. One probation officer also sent a favorable comment.

The appeal grounds are designed to encompass any possible and relevant basis for relief, in both parole, recission, and revocation proceedings. The grounds include the possibility of a prisoner making his appeal on the basis of actual harm caused by errors of procedure (actual harm being defined as a different decision than would have resulted had corrected procedure been followed). Prisoners will therefore benefit from careful study of the possible appeal grounds before presenting their appeals; however, the absence of lengthy discussion of any ground selected will not foreclose consideration of that point by the Commission.

Accordingly, pursuant to the provisions of 18 U.S.C. 4203(a)(1) and 4204(a)(6), 28 CFR Chapter 1, Part 2, is amended as set forth below, effective September 6, 1977.

Dated: August 3, 1977.

CURTIS C. CRAWFORD,
Acting Chairman,
U.S. Parole Commission.

In § 2.25, paragraph (f) is revised as follows:

§ 2.25 Regional appeal.

* * * * *

(f) Appeals under this section may be based on the following grounds:

(1) That the guidelines were incorrectly applied as to any or all of the following:

(i) Severity rating;

(ii) Salient factor score;

(iii) Time in custody;

(2) That a decision outside the guidelines was not supported by the reasons or facts as stated;

(3) That especially mitigating circumstances (for example, facts relating to the severity of the offense or the prisoner's probability of success on parole) justify a different decision;

(4) That a decision was based on erroneous information, and the actual facts justify a different decision;

(5) That the Commissionn did not follow correct procedure in deciding the case, and a different decision would have resulted if the error had not occurred;

(6) There was significant information in existence but not known at the time of the hearing.

(7) There are compelling reasons why a more lenient decision should be rendered on grounds of compassion.

[FR Doc.77-22720 Filed 8-4-77;8:45 am]

PART 2—PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: The United States Parole Commission

ACTION: Final rule.

SUMMARY: The procedures relating to the organization of the Commissioners in the Commission's headquarters office in Washington, D.C., for the purpose of voting on national appeals and cases referred to them by the Regional Commissioners, are being revised to indicate which Commissioners will preside over and direct such voting, and how Commissioners will be substituted for by other Commissioners in the case of absence or vacancy. The purpose of the rule is to clarify the exercise of internal administrative authority which had hitherto been undefined, and not to affect the voting procedures themselves.

EFFECTIVE DATE: This rule is effective August 3, 1977.

FOR FURTHER INFORMATION, CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, 320 First Street NW., Washington, D.C. 20537, telephone 202-724-3092.

SUPPLEMENTARY INFORMATION: Since these internal administrative rules will not have any effect on the balance of voting power or any other matter which might affect the disposition of cases, this rule is made effective without public comment. The Commission has also determined that the orderly administration of its current caseload will be served by making the change effective immediately.

Accordingly, pursuant to the provisions of 18 U.S.C. § 4203(a)(1) and § 4204(a)(6), 28 CFR Chapter 1, Part 2, is amended as set forth below, effective August 3, 1977.

Dated: August 3, 1977.

CURTIS C. CRAWFORD,
Acting Chairman,
U.S. Parole Commission.

In § 2.1, paragraphs (c) and (d) are revised as follows:

§ 2.1 Definitions.

As used in this part:

* * * * *

(c) The term "National Appeals Board" refers to the Vice Chairman of the Commission and two other National Commissioners who are assigned in the headquarters office of the Commission in Washington, D.C. The Vice Chairman shall be the Chairman of the National Appeals Board. In the absence or vacancy of the Vice Chairman the Chairman of the Commission functions as the Chairman of the National Appeals Board. In the absence or vacancy of a member the Chairman of the Commission functions as a member of the National Appeals Board.

(d) The term "National Commissioners" refers to the Chairman of the Commission and the three members of the National Appeals Board. The Vice Chairman of the Commission shall be the Chairman of the National Commissioners. In the absence or vacancy of the Vice Chairman, the Chairman of the Commission shall be Chairman of the National Commissioners.

* * * * *

[FR Doc.77-22723 Filed 8-4-77;8:45 am]

PART 2—PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: The United States Parole Commission.

ACTION: Final rule.

SUMMARY: The Commission is publishing a rule that would permit any three Commissioners to obtain full Commission review of any decision to grant or deny parole. This rule arises from the need to ensure that no parole is granted or denied by a minority of Commission members, in a case where the full Commission would clearly decide otherwise. The purpose of the rule is to provide an extraordinary review procedure as part of the Commission's existing system of internal checks and balances.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, 320 First Street NW., Washington, D.C. 20537, telephone 202-724-3092.

SUPPLEMENTARY INFORMATION: On June 10, 1977, the Commission published a proposal to permit review by the entire Commission (on the referral of three Commissioners) of any level of Commission decisionmaking, whether Regional Commissioner or National Appeals Board.

Two comments were received regarding the proposal. One prisoner felt that the procedure would be unfair in a case where a parole had been granted, while a probation officer felt that the regulation was well taken.

The Commission does not contemplate the use of such a procedure except in the most unusual case where its statutory mandate, at 18 U.S.C. § 4206(a)(2) (requiring that a release not "jeopardize the public welfare"), might not be served by a release, or where a denial of parole was clearly unwarranted. The case of a denial of a parole already granted, would, therefore, be likely to involve a very serious offender whose case would justify the use of such an extraordinary remedy. Moreover, the requirement for a three-vote referral ensures that such review will be taken only where the gravity of the issue makes it appropriate. Finally, a change of decision under § 2.24(at the regional level) is a not-infrequent occurrence that reflects the Commission's belief that the quality of its decisionmaking is enhanced through a system of internal checks and balances.

The rule is made effective immediately in order that the procedure be available in any future case in which a parole or a denial of parole might be contrary to the statutory requirements. Thus, the emergency nature of this publication arises from the need to ensure the fullest possible compliance with 18 U.S.C. § 4206.

Accordingly, pursuant to the provisions of 18 U.S.C. 4203(a)(1) and 4204(a)(6), 28 CFR Chapter 1, Part 2, is amended as set forth below, effective August 3, 1977.

Dated: August 3, 1977.

CURTIS C. CRAWFORD,
Acting Chairman,
U.S. Parole Commission.

§ 2.54 is amended by adding paragraph (c) to read as follows:

§ 2.54 Reviews pursuant to 18 U.S.C. 4203/4215.

* * * * *

(c) Notwithstanding the provisions of §§ 2.23-2.26 and § 2.28, any decision made by a Regional Commissioner or the National Appeals Board shall, upon the petition of not less than three Commissioners, be referred to the full Commission for review and, by majority vote, affirmed, modified, or reversed. Such petition must be submitted to the Chairman of the Commission and be acted upon by the Commission not later than 30 days from the date of entry of the decision to be reviewed. The prisoner shall receive a written notice of this referral, which shall stay the decision in his case until such review has been completed. Following review by the full Commission, the prisoner shall be informed in writing of the Commission's decision and, if parole is denied, of the reasons therefor.

[FR Doc.77-22724 Filed 8-4-77;8:45 am]

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Order of Succession to Act as Secretary

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document provides the order in which Assistant Secretaries of the Department of Agriculture shall act as Secretary in the event two or more shall have taken office simultaneously.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert Siegler, Deputy Director, Research and Operations Division, Office of the General Counsel, U.S. Department of Agriculture, (202-447-6035).

SUPPLEMENTARY INFORMATION: Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended by adding to § 2.5 the following new sentence at the end of paragraph (a):

§ 2.5 Order in which Assistant Secretaries and the General Counsel shall act as Secretary.

(a) * * * In the event that any two or more Assistant Secretaries shall have taken office simultaneously, they shall act as Secretary in the order they are listed herein.

* * * * *

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953.)

Dated: August 1, 1977.

BOB BERGLAND,
Secretary of Agriculture.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 104]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 7-13, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: August 7, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202-447-3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendaitons and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is easier than last week. Average f.o.b. price was $7.21 per carton the week ended July 30, 1977, compared to $6.82 per carton the previous week. Track and rolling supplies at 225 cars were down 25 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be han-

died should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of as specified. The committee meeting was held on August 2, 1977.

§ 910.404 Lemon Regulation 104.

(a) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August, 7, 1977, through August 13, 1977, is established at 275,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated: August 4, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22856 Filed 8-4-77;1:09 pm]

[Pear Reg. 16]

PART 927—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

Minimum Grade, Quality and Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation sets minimum grade and size requirements for fresh shipment of Beurre D'Anjou variety winter pears shipped from Oregon (except the Medford District), Washington, and California, and certain quality requirements for shipments from designated areas of Oregon and Washington, during the period August 8 through September 30, 1977. This action is necessary to assure that the pears shipped will be of suitable quality and size in the interest of consumers and producers.

EFFECTIVE DATE: August 8, 1977, through September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the applicable provisions of the marketing agreement and Order No. 927 (7 CFR Part 927), regulating the handling of Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Clairgeau varieties of pears grown in Oregon, Washington, and California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The regulation was recommended by the Control Committee, established under the marketing agreement and order. It is hereby found that the regulation of Beurre D'Anjou variety of winter pears, as hereinafter set forth, will tend to effectuate the declared policy of the act.

This action reflects the Department's appraisal of the crop and the need for regulation based on current and prospective market conditions. The committee estimates that about 6 million boxes of Beurre D'Anjou pears will be produced this year as compared with 6.9 million in 1976 and 5.3 million in 1975. Shipments of Beurre D'Anjou pears from the production area are expected to begin about August 12, 1977. The grade, quality and size regulations hereinafter provided, are designed to prevent the handling, from August 8 through September 30, 1977, of any Beurre D'Anjou pears of lower grades and smaller sizes than specified so as to provide satisfactory quality fruit in the interest of producers and consumers consistent with the declared policy of the act.

In addition to the basic grade and size requirements specified for Beurre D'Anjou variety pears, the regulation permits the handling of such pears bearing limited damage from skin punctures, however, this reduction in market desirability would be offset by the requirement that any pears thus affected be of a specified higher grade and larger size.

The requirement regarding Beurre D'Anjou variety pears grown in the Oregon and Washington districts and shipped to domestic markets whereby certification that the core temperature of such pears has been lowered to 35 degrees F., or less prior to shipment and must have an average pressure test of 14 pounds, is designed to assure proper ripening of such pears.

It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than August 8, 1977. A reasonable determination as to supply of, and the demand for, Beurre D'Anjou variety winter pears must await the development of the crop thereof, and adequate information thereon was not available to the Control Committee until July 7, 1977, on which date an open meeting was held, after giving due notice thereof, to consider the need for, and the extent of, regulation of shipments of such pears. Interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were submitted to the Department as soon as practicable after such meeting was held; shipments of the current crop of such pears are expected to begin soon after August 8, 1977; this regulation should be applicable to all such shipments in order to effectuate the declared policy of the act; the provisions of this regulation are identical with the aforesaid recommendation of the committe; information concerning such provisions and effective time has been disseminated among handlers of such pears; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

Therefore, a new § 927.316 is added which reads as follows:

§ 927.316 Pear Regulation 16.

(a) During the period August 8, 1977, through September 30, 1977, no handler shall ship any Beurre D'Anjou variety of pears, except such variety grown in the Medford District, unless such pears meet the following requirement or are handled in accordance with paragraph (b) of this section: *Provided*, That, any Beurre D'Anjou pears shipped from the Medford District shall meet the requirements of subparagraph (2) of this paragraph.

(1) Beurre D'Anjou pears shall be of a size not smaller than 165 size and shall grade at least U.S. No. 2 except that any handler may ship a quantity of Beurre D'Anjou pears that are not smaller than 180 size and not less than U.S. No. 1 grade which quantity shall not exceed 2 percent of the total U.S. No. 1 or better grades of such variety shipped by the handler during the aforesaid period: *Provided*, That, pears of such variety which bear unhealed skin punctures not exceeding $^{3}/_{16}$ of an inch in diameter may be shipped if they otherwise grade at least U.S. No. 1 and are of a size not smaller than 135 size; *Provided further*, That, pears of such variety which fail to meet the U.S. No. 2 grade requirements only because of serious damage but not very serious damage caused by healed hail marks or by frost, may be shipped if the shape of the pear is such that it will cut at least one good half;

(2) Beurre D'Anjou pears shipped from the Medford, Hood River-White Salmon-Underwood, Wenatchee, and Yakima Districts through September 30, 1977, shall have an appropriate certification by the Federal-State Inspection Service, issued prior to shipment, showing that the core temperature of such pears has been lowered to 35 degrees Fahrenheit or less and any such pears for domestic shipment shall have an average pressure test of 14 pounds.

(b) During the aforesaid period, each handler may ship on any one conveyance up to, but not to exceed, 200 standard western pear boxes of Beurre D'Anjou variety of pears, or an equivalent quantity of pears in other containers computed by weight to the nearest 5 pounds, without regard to the inspection requirements of § 927.60(a), under the following conditions:

(1) Each handler desiring to make shipments of Beurre D'Anjou variety of pears pursuant to this paragraph shall first apply to the committee, on forms furnished by the committee, for permission to make such shipments. At the time of any such shipment the handler shall report to the committee on forms furnished by the committee, the car or truck number and the destination of the shipment.

(2) On the basis of such individual reports the committee shall require spot check inspection of such shipments.

(c) When used herein, "U.S. No. 1" and "U.S. No. 2" shall have the same meaning as when used in the United States Standards for Winter Pears (7 CFR 51.1300–51.1323); "135 size," "165 size," and "180 size," shall mean that the pears of such designated sizes will pack, in accordance with the sizing and packing specifications of a standard pack as specified in said United States Standards, 135, 165, or 180 pears, respectively, in a standard western pear box (inside dimensions 18 inches long by $11^{1}/_{2}$ inches wide by $8^{1}/_{2}$ inches deep); and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 2, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

PART 946—IRISH POTATOES GROWN IN WASHINGTON

Handling Regulation

Correction

In FR Doc. 77-21932 appearing on page 38380 in the issue for Thursday, July 28, 1977, in § 946.332(e)(1)(iii), middle column, page 38381, the line "such special purpose shipments and or" was printed twice. The first of these should be removed and "such handler's certificate applicable to" substituted therefor.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 993]

DRIED PRUNES PRODUCED IN CALIFORNIA

Proposed Expenses and Rate of Assessment for 1977–78 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on proposed expenses of $218,880 and a rate of assessment of $1.50 per ton of salable prunes handled, for the maintenance and functioning of the Prune Administrative Committee. This regulation would enable the Committee to collect assessments from handlers on all prunes handled and use the resulting funds for its expenses.

DATE: Comments due August 19, 1977.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written materials shall be submitted, and they shall be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: The marketing agreement, and Order No. 993, both as amended, regulate the handling of dried prunes produced in California. They are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 691–674). The Committee, established under the order, is responsible for its local administration.

The proposal is as follows:

§ 993.328 Expenses of the Prune Administrative Committee and rate of assessment for the 1977–78 crop year.

(a) *Expenses.* Expenses in the amount of $218,880 are reasonable and likely to be incurred by the Prune Administrative Committee during the crop year beginning August 1, 1977, for its maintenance and functioning and for such other purposes as the Secretary may, pursuant to the applicable provisions of the marketing agreement, as amended, and this part, determine to be appropriate.

(b) *Rate of assessment.* The rate of assessment for such crop year which each handler is required, pursuant to § 993.81, to pay to the Prune Administrative Committee as his pro rata share of the said expenses is fixed at $1.50 per ton of salable prunes handled by him as the first handler thereof.

Dated: August 2, 1977.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 108]

ASYLUM

Identification of Reasons for Denial

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This is a notice of proposed rule making setting forth proposed amendments to the regulations of the Immigration and Naturalization Service pertaining to asylum. These amendments are necessary to require that a district director denying an application for asylum because it is "clearly lacking in substance" shall identify the feature or features which make the application insubstantial in his written denial order, and to reflect the agreement reached between this Service and the Department of State concerning the processing of last-minute applications for asylum submitted by citizens of the People's Republic of China ordered deported to Hong Kong. The intent of these amendments is to provide the detailed reasons for denial to aliens whose applications for asylum are denied because they are "clearly lacking in substance", and to prevent delay caused by the filing of last-minute applications for asylum where the State Department has indicated that it does not wish to be consulted in the particular class of cases.

DATES: Representations must be received on or before September 6, 1977.

ADDRESSES: Please submit written representations, in duplicate, to the Commissioner of Immigration and Naturalization, Room 7100, 425 Eye Street NW., Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, telephone 202–376–8373.

SUPPLEMENTARY INFORMATION: This is a notice of proposed rule making issued in accordance with the provisions of section 553 of Title 5 of the United States Code (80 Stat. 383) proposing amendments to 8 CFR 108.2. This proposal amends the existing regulation in two respects.

The first proposed amendment reflects the desire of the Service that where an asylum application is denied because it is "clearly lacking in substance", the reasons for this determination must be set forth Accordingly, it is proposed to amend the existing regulation to provide that where an application is denied for the reason that it is clearly lacking in substance, the required written denial must identify the feature or features of the application which make it insubstantial.

The second proposed amendment is the result of consultations between the Service and the Office of the Coordinator for Humanitarian Affairs of the Department of State concerning the problems raised by last-minute requests for asylum from aliens who could have applied for a hearing under section 243(h) of the Immigration and Nationality Act, with particular reference to the specific problems of the citizens of the People's Republic of China who have fled to Hong Kong and who have resided there for a substantial period of time. That office, in a letter which is being made an Appendix to this regulation, stated that it would deny requests for asylum submitted by citizens of the People's Republic of China who have fled to Hong Kong and who have resided there for a substantial period of time provided: (a) They are being deported to Hong Kong and not the People's Republic of China and (b) that the Colony will accept them. The existing regulation provides that where an application is denied for the reason that it is clearly lacking in substance, notification shall be given to the Department of State with opportunity to supply a statement containing matter favorable to the application and departure shall not be enforced until 30 days following the date of notification unless a reply has been received from the Department of State prior to that time. Since the Department of State has advised that it is unlikely that citizens of the People's Republic of China being deported to Hong Kong will be persecuted, and that last-minute requests for asylum may be handled by the Service without consultation with the Department of State, it is proposed to add a proviso to the 30-day provision of the existing regulation referred to above, stating that there need be no delay of departure in any class of cases in which the Service has been officially notified by the Department of State that it does not desire to be consulted.

The Service invites submission of written data, views and arguments concerning the proposed rule. Oral representations may not be made in any manner. All relevant material received on or before the closing date for submission of representations will be considered.

In the light of the foregoing, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations by revising § 108.2 and by adding an Appendix to Part 108 as set forth below.

In Part 108, in § 108.2, it is proposed to revise the existing first paragraph and redesignate it paragraph (a) and add a new paragraph (b). As revised, § 108.2 reads as follows:

§ 108.2 Decision.

(a) The applicant shall appear in person before an immigration officer prior to adjudication of the application, except that the personal appearance of any children included in the application may be waived by the district director. The district director shall request the views of the Department of State before making his decision unless in his opinion the application is clearly meritorious or clearly lacking in substance. The district director may approve or deny the application in the exercise of discretion. The district director's decision shall be in writing, and no appeal shall lie therefrom. If an application is denied for the reason that it is clearly lacking in substance, the written denial must identify the feature or features of the application which make it insubstantial, and notification shall be given to the Department of State, with opportunity to supply a statement containing matter favorable to the application, and departure shall no be enforced until 30 days following the date of notification unless a reply has been received from the Department of State prior to that time; *Provided,* however, there need be no delay of departure in any class of cases in which the Service has been officially notified by the Department of State that it does not desire to be consulted. A case shall be certified to the regional commissioner for final decision if the Department of State has made a favorable statement, but, notwithstanding, the district director has chosen to deny the application. If any decision will be based in whole or in part upon a statement furnished by the Department of State, the statement shall be made a part of the record of proceeding, and the applicant shall have an opportunity for inspection, explanation, and rebuttal thereof as prescribed in § 103.2(b)(2) of this chapter. A denial under this part shall not preclude the alien, in a subsequent expulsion hearing, from applying for the benefits of section 243(h) of the Act and of Articles 32 and 33 of the Convention Relating to the Status of Refugees.

(b) One class of cases in which the Department of State has notified the Service that it does not desire to be consulted is the following: The alien resided in Hong Kong for a substantial period after leaving the People's Republic of China, the Service proposes to deport him to Hong Kong which will accept him, and the alien has had an opportunity before requesting asylum to apply for section 243(h) withholding of deportation to Hong Kong. A pertinent letter from the Department of State dated November 9, 1976, is published as an Appendix to this Part.

It is proposed to add an Appendix to Part 108 which reads as follows:

APPENDIX

MR. JAMES F. GREENE, *Deputy Commissioner, Immigration & Naturalization Service, 425 I Street NW., Washington, D.C.*

November 9, 1976.

DEAR MR. GREENE: Thank you for your letter of October 22, 1976, with which you enclosed a copy of your proposed amendment to 8 CFR 108.2, and in which you call particular attention to the paragraph concerning citizens of the People's Republic of China who have fled to Hong Kong. You requested our comments and or suggested changes in the proposed amendment. We have no suggested changes and the language as submitted is acceptable to the Department of State.

We understand that you are concerned over the problems raised by last minute requests for asylum from aliens who could have applied earlier for a hearing under Section 243(h) of the Immigration and Nationality Act, with particular reference to the specific problems of citizens of the People's Republic of China who have fled to Hong Kong and have resided there for a substantial period of time. There is no likelihood that these aliens will be persecuted within the meaning of the Convention Relating to the Status of Refugees if they are deported to Hong Kong nor have we any specific reason to believe that any of such persons will be returned by that government to countries where they will face such persecution. Our policy is to deny such requests for asylum provided: (a) They are deported to Hong Kong and not the People's Republic of China and (b) that the Colony will accept them.

We agree that such last minute requests concerning the return of Chinese to Hong Kong as described above can be handled by the Immigration and Naturalization Service without consultation with the Department through our office. We understand that during the deportation hearings all such aliens will have available to them the various benefits of the Immigration and Nationality Act, including withholding of deportation under Section 243(h) and the application of the Convention Relating to the Status of Refugees whenever appropriate in their cases. If there are any questions concerning individual asylum requests in such cases or if a case appears to be politically sensitive, we are prepared to provide you with an advisory opinion by telephone or in writing on an urgent basis.

I hope the increased flexibility provided your office as outlined above regarding Chinese from Hong Kong will be helpful to you.

Sincerely,

JAMES L. CARLIN,
Deputy Coordinator for Humanitarian Affairs, Department of State.

(Sec. 103; 66 Stat. 173 (8 P.S.C. 1103).)

Dated: August 2, 1977.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

1. Gas water heaters: In col. 1, Stage I, line 3, change "24" to "$24.00"; col. 2, Stage IV, paragraph 4, line 1, change "$5 million" to "$2 million".

2. Room air conditioners: In col. 3, Stage II, paragraph 3, line 13, change "$36.5 million" to "$36.8 million"; Stage III, paragraph 2, line 2, change "shipment" to "shipments"; State III, paragraph 3, line 4, change "20 trillion" to "21 trillion"; Stage III, paragraph 3, line 7, change "380 million" to "308 million".

E. Page 36662:

1. Room air conditioners: In col. 1, delete the first six paragraphs; col. 1, Stage IV, paragraph 5, line 5, change "93 percent" to "95 percent"; Stage IV, paragraph 5, line 6, change "12 sizeable firms" to "13 sizeable firms"; Stage IV, paragraph 5, line 7, change "seven percent" to "five percent".

2. Home heaters (gas vented): In col. 2, Stage II, between paragraph 2 and paragraph 3, insert the following:

Stage III. Benefits exceed costs for the household sector in the purchase and use of higher-priced, more efficient home heaters (gas vented), resulting in measurable energy savings.

The purchase and use of projected 1980 shipments of 700,000 home heaters (gas vented) complying with the proposed target initially costs households an additional $17 million but lowers life cycle operating costs by $55 million, yielding a net benefit of $38 million calculated on a present value basis.

Achievement of proposed operating efficiency for projected 1980 shipments results in an annual energy savings of 2.7 billion cubic feet of natural gas, which is equivalent to 3 trillion Btu's of utility energy supply. Total energy savings of these 1980 shipments is 40 billion cubic feet of natural gas, or 45 trillion Btu's over the 15-year life of an average home heater (gas vented).

Stage IV. Negative impacts from implementation of the proposed home heater (gas vented) target are not of substantial consequence.

Demand in 1980 might reasonably increase by 1.8 percent, or 12,600 home home heaters (gas vented), because of the higher purchase price of more energy-efficient products.

Employment might temporarily increase by 30 production workers, or about 2 percent of home heater (gas vented) employment, in response to lower demand.

3. Oil vented home heaters: Delete the entire section, and add the following:

Oil Vented Home Heaters

FEA, in a manner consistent with the methodology presented above, has determined that the proposed energy efficiency improvement target of 12 percent for oil vented home heaters is the maximum improvement which is technologically and economically feasible. A summary of economic findings for oil vented home heaters follows:

Stage I. The total price increase resulting from implementation of the selected design options is $200 per unit which yields a production-weighted price increase of $31.00 in current prices and $35.93 in 1980 prices.

Stage II. Both scarce material supplies and investment funds are sufficiently available to permit the implementation of the proposed target for oil vented home heaters.

No scarce materials are affected by the proposed target.

Profitability and growth of the manufacturers is adequate to finance total industry investment of 1.2 million which amounts to about $197 thousand per firm in additional research and development along with capital costs. The investment requirement per firm is the cumulative cost for each design option. Alternative investment required to produce an amount of energy equivalent to that which will be saved by the design options is $900 thousand.

Stage III. Benefits exceed costs for the household sector in the purchase and use of higher-priced, more efficient oil vented home heaters, resulting in measurable energy savings.

The purchase and use of projected 1980 shipments of 40 thousand oil vented home heaters complying with the proposed target initially costs households an additional $1.4 million but lowers life cycle operating costs by $4.8 million, yielding a net benefit of $3.4 million calculated on a present value basis.

Achievement of proposed operating efficiency for projected 1980 shipments results in an annual energy savings of 1.3 million gallons of fuel oil, which is equivalent to 173 billion Btu's of utility energy supply. Total energy savings of these 1980 shipments is 19 million gallons, or 2.6 trillion Btu's, over the 15-year life of an average oil vented home heater.

Stage IV—Negative impacts from implementation of the proposed oil vented home heater target are not of substantial consequence because the relatively small replacement demand shows signs of declining below current low levels during the next decade. Comprehensive data concerning demand, employment, and industry structure for oil vented home heaters are not presently available but the data which are available imply that the impacts are not of substantial consequence."

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 320]

[Docket No. 77N-0194]

CERTAIN ANTICONVULSANTS

Proposed Bioequivalence Requirements

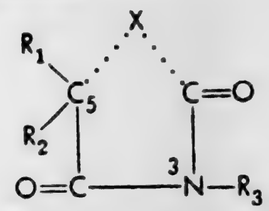
AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would establish bioequivalence requirements for certain oral drug products used to treat convulsions (anticonvulsants). Available data suggest that the various marketed brands of the same oral anticonvulsant may not have a comparable therapeutic effect. The proposed regulations would assure the bioequivalence of different brands of an anticonvulsant drug product and batch-to-batch uniformity of the same drug product by each manufacturer.

DATES: Comments by October 4, 1977. The Commissioner proposes that the final regulation based on this proposal be effective 30 days after its dates of publication in the FEDERAL REGISTER.

ADDRESSES: Written comments (four copies, identified with Docket No. 77N-0194) to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.



FOR FURTHER INFORMATION CONTACT:

Jerome P. Skelly, Bureau of Drugs (HFD-522), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-4750).

SUPPLEMENTARY INFORMATION: Regulations in Subpart C of 21 CFR Part 320 published in the FEDERAL REGISTER of January 7, 1977 (42 FR 1624) set forth procedures for the Commissioner, on his own initiative or in response to a petition from an interested person, to propose and to establish a bioequivalence requirement for drug products containing identical amounts of the same active ingredient and in the same dosage form that are intended to be used interchangeably for the same therapeutic effect and for which there is a known or potential bioequivalence problem. Data available to FDA suggest that there is well-documented evidence of actual bioequivalence differences in oral formulations of phenytoin and phenytoin sodium and potential bioequivalence differences in oral formulations of other anticonvulsants among currently marketed brands of the same drug product produced by various manufacturers, based on the criteria set forth in § 320.52 (21 CFR 320.52). Therefore, the Commissioner, on his own initiative, tentatively concludes that a bioequivalence requirement involving in vivo testing in humans and in vitro dissolution testing should be established for the following oral anticonvulsants: phenytoin, phenytoin sodium, ethotoin, mephenytoin, ethosuximide, methsuximide, phensuximide, paramethadione, trimethadione, phenacemide, and primidone. The evidence on which the Commissioner bases his tentative conclusion and the proposed bioequivalence requirement are discussed below.

BACKGROUND

Orally administered anticonvulsants are used primarily in the prophylaxis of epileptic seizures, i.e., to reduce the number and severity of seizures in patients with epilepsy. Although no one oral anticonvulsant drug product is equally effective in all types of epilepsy, they are presented together on the basis that they are members of a class of drugs that have close structural commonality, similar physicochemical and pharmacological properties and whose dose must be individualized which in turn requires close monitoring of patients. All of them are derivatives of either barbiturates (primidone being a structural analog of phenobarbital), hydantoins (phenytoin, phenytoin sodium, ethotoin, mephenytoin), and phenacemide (a substituted acetylurea derivative), oxazolidinediones (paramethadione and trimethadione), or succinimides (ethosuximide, methsuximide, and phensuximide). All contain the following structural common denominator:

The substituent at x varies with the chemical class, e.g.,

Hydantoins —NH—
Oxazolidinediones—O—
Succinimides —CH_2—
Acetylureas —NH_2—

Except for anticonvulsant agents selectively active against absence (petit mal) seizures, a phenyl or similar aromatic group at R_1 or R_2 appears essential for antiepileptic activity (Ref. 1).

Although their specific modes of action are not fully understood, these products have anticonvulsant activity and are effective for the various types of epilepsy, i.e., primidone is indicated for grand mal, psychomotor and focal seizures; phenytoin and ethotoin for grand mal and psychomotor seizures; mephytoin for psychomotor seizures; mephenytoin for grand mal, focal, Jacksonian, and psychomotor seizures; phenacemide for severe epilepsy, particularly mixed forms of psychomotor seizures; ethosuximide, methsuximide, phensuximide, paramethadione, and trimethadione for petit mal.

Most anticonvulsant drugs are almost completely absorbed after oral administration; however, the rate of absorption differs with the various drugs. The rate of excretion is generally slow and varies from subject to subject. The anticonvulsant agents are widely distributed in the body. Hydantoins, especially phenytoin, reach highest concentrations in the brain, liver, and salivary glands. Oxazolidinediones and succinimides are freely distributed throughout body water. Phenytoin and probably paramethadione and trimethadione cross the placental barrier. Phenytoin and primidone appear in the milk of nursing mothers (Ref. 2).

With the exception of paramethadione, most of the anticonvulsants are crystalline solids. Although phentoin sodium, ethosuximide, and trimethadione are fairly soluble in water, the other oral anticonvulsants are either insoluble or very slightly soluble in water.

Because of the similarity of chemical structure, physicochemical and pharmacological properties, and the necessity for individualized dosage requiring close monitoring of patients during administration of each drug product, these anticonvulsant drug products are being considered as a class in establishing a bioequivalence requirement. While phenobarbital sodium fall within the same

class by virtue of their structure and use as anticonvulsants, these drug products are not proposed at this time for inclusion as drugs of the anticonvulsant class presenting bioequivalence problems. The agency has reached this decision based on the lack of significant documented evidence of bioequivalence problems with phenobarbital commensurate with its extensive production by numerous manufacturers and use over the years.

EVIDENCE TO ESTABLISH A BIOEQUIVALENCE REQUIREMENT

The following criteria as set forth in § 320.52 were considered by the Commissioner in determining that a bioequivalence requirement should be established:

1. *Evidence from well-controlled bioequivalence studies that such products are not bioequivalent drug products.* Studies conducted under an FDA contract (Ref. 3) evaluated the relative bioavailability in 12 normal human volunteers of 11 lots of 100 mg phenytoin sodium capsules manufactured by 8 different companies. The studies demonstrated that several of the drug products exhibited statistically significant differences in the various parameters studied, e.g., the time of peak plasma concentration of the drug products ranged from 2.6 to 6 hours and the peak plasma concentration from 0.93 to 1.44 micrograms per milliliter (mcg/ml). The same studies also showed that on the basis of the area under the plasma level-time curve, one drug product was 31 percent more bioavailable than the reference product.

A recent single-dose crossover study involving six volunteers (Ref. 4) compared the bioavailability of four brands of phenytoin tablets with that of a micronized phenytoin-acid suspension. Significant differences between various products were found with regard to the areas under the serum phenytoin concentration-time curves (AUC), the peak serum phenytoin concentration (Cmax) and time to peak (Tmax).

Cmax, Tmax, and AUC's for the various brands of phenytoin

Brand	Cmax (micrograms per milliliter	Tmax (hours)	AUC (micrograms per hour per milliliter
A	6.3±0.5	12.2±3.9	327±33
B	2.7±0.2	12.3±3.9	124±20
C	9.1±1.5	5.2±1.4	429±44
D	6.1±0.5	7.8±3.2	283±44
E (suspension)	11.4±1.0	7.2±1.1	480±66

The areas under the serum phenytoin concentration-time curves for the tablets were 26, 59, 68, and 90 percent of the AUC of the suspension. The peak serum phenytoin concentrations using the different tablets were 24, 54, 55, and 80 percent of the peak serum concentration of the suspension.

A bioavailability study (Ref. 5) submitted in support of an abbreviated new drug application (ANDA) demonstrated that the test products, 30 mg and 100 mg phenytoin sodium capsules, were only 70 percent (30 mg capsules) and 66 percent (100 mg capsules) as bioavailable as the reference capsule product on the basis of the area under the 0- to 72-hour plasma concentration time curve.

In another bioavailability study (Ref. 6) submitted in support of an ANDA, the test product, an oral phenytoin suspension, showed a significantly greater rate of absorption over the reference oral phenytoin suspension as demonstrated by a 46 percent increase in peak plasma concentration, a 67 percent reduction in time of peak plasma concentration, and a 32 percent increase in the 0- to 12-hour area under the plasma concentration-time curve.

This criterion is therefore considered to be applicable to drug products containing either phenytoin or phenytoin sodium.

2. *Evidence that these drug products exhibit a narrow therapeutic ratio, e.g., there is less than a twofold difference in median lethal dose (LD_{50}) and median effective dose (ED_{50}) values, or have less than a twofold difference in the minimum toxic concentrations and minimum effective concentrations in the blood, and safe and effective use of the drug products requires careful dosage titration and patient monitoring.* The absorption, metabolism, and excretion of anticonvulsants varies widely, yet these drug products must be limited to a relatively narrow blood concentration range from that producing the desired therapeutic effect to that associated with significant toxic response or lack of therapeutic response. (See table below.) This necessitates individualized dosage of these drug products and therefore calls for close monitoring of patients undergoing anticonvulsant therapy (Refs. 7 through 11). For example, data indicate an effective plasma concentration of 10 to 20 mcg/ml for phenytoin. Concentrations as low as 8 mcg/ml may be adequate for seizure control in some patients. However, nystagmus (involuntary rapid eyeball movement) is usually evident at 20 mcg/ml, ataxia (muscular incoordination) at 30 mcg/ml, and lethargy occurs at 40 mcg/ml or higher (Ref. 1). With primidone, minimum effective blood levels for the control of seizures in patients are over 5 mcg/ml. Levels over 15 mcg/ml or 20 mcg/ml may be associated with continuous side effects (Ref. 7). Data are not available to determine the relationship between plasma concentration and adverse effects for ethotoin, mephenytoin, phenacemide, paramethadione, trimethadione, methsuximide, and phensuximide. However, blood levels for these drug products vary from patient to patient as with phenytoin and primidone requiring individualized dosage and close monitoring of patients during administration of each drug product. Similar symptoms of toxicity are also produced. It is therefore logical to apply this criterion to these anticonvulsants as well.

Effective and toxic blood levels of some anticonvulsants

Drug	Minimum effective concentration (microgram per milliliter)	Toxic (microgram per milliliter)
Phenytoin	10	20
Primidone	5	12
Ethosuximide	40	100

3. *Competent medical determination that a lack of bioequivalence of such drug products would have serious adverse effect in the treatment or prevention of a serious disease or condition.* The management of epileptic seizures and acute convulsive episodes is the major indication for anticonvulsant therapy. Significant changes in drug availability could change blood levels from optimal to toxic or subtherapeutic. Large differences in drug product bioavailability when undetected would increase the potential for epileptic seizures or toxic reactions. For example, a report on the hearings before the Subcommittee on Monopoly of the Select Committee on Small Business, United States Senate, in May and June 1967 (Ref. 12) indicated that an increased incidence of seizures was observed in patients in six government-operated hospitals when different brands of phenytoin sodium were used. A number of other reports recognize and document the potential for variable phenytoin sodium absorption among different lots of the same drug product and among different brands with a possible change in bioavailability (Refs. 13, 14, and 15). Because of the similarity in structure, pharmacology, and physicochemical properties, it is logical to apply this criterion to all of the other previously named oral anticonvulsants.

4. *Physicochemical evidence that:* (a) *The active drug ingredient has a low solubility in water, e.g., less than 5 milligrams per 1 milliliter, or if dissolution in the stomach is critical to absorption, the volume of gastric fluids required to dissolve the recommended dose far exceeds the volume of fluids present in the stomach (taken to be 100 milliliters for adults and prorated for infants and children).* Phenytoin is practically insoluble in water. Phenytoin sodium is fairly soluble in water but is converted to the less soluble acid form in the stomach. Ethotoin is insoluble in water; methsuximide (2.8 mg/ml) and phensuximide (4.2 mg/ml) are slightly soluble in water; mephenytoin, phenacemide, and primidone (0.5 mg/ml) are very slightly soluble in water; and paramethadione is sparingly soluble in water (Ref. 2). Therefore, for these oral anticonvulsant drugs the amount of fluid required to dissolve any of these drugs at the recommended dose level exceeds the volume of fluid present in the stomach.

(b) *The dissolution rate of one or more such products is slow, e.g., less than 50 percent in 30 minutes when tested using either a general method specified in an official compendium or a paddle method at 50 revolutions per minute in 900 milliliters of distilled or deionized water at 37° C, or differs significantly from that of an appropriate reference material such as an identical drug product that is the subject of an approved full new drug application.* Dissolution studies conducted by FDA (Ref. 16) on phenytoin sodium capsules (100 mg) of seven different manufacturers revealed that three of the drug products dissolved less than 50 percent in 30 minutes (see results below). The rotating basket apparatus described in the United States Pharmacopeia at 50 rpm and water at 37° C was used to determine the dissolution rates.

Dissolution Profile of Phenytoin Sodium (100 mg) Capsules

Product:	Percent dissolved in 30 minutes
A	80
B	33
C	36
D	58
E	83
F	88
G	18
H	112

Based on this criterion, evidence suggests a bioequivalence difference between drug products in capsule form containing phenytoin sodium marketed by different manufacturers.

(c) *The particle size and/or surface area of the active drug ingredient is critical in determining its bioavailability.* The effect of particle size and salt form on absorption is well illustrated in a study (Ref. 17) of plasma phenytoin levels in dogs given equivalent 25 mg/kg peroral doses of: (1) phenytoin sodium in particle size of 5 to 25 microns; (2) phenytoin (acid form) in particle size of 10 to 50 microns; and (3) phenytoin (acid form) crystallized in flat plates averaging about 3 millimeters in diameter. The sodium salt preparation was absorbed more rapidly than the acid preparation reaching higher peak levels at earlier time periods. The sodium salt is converted to phenytoin (acid form) in the stomach with the resultant precipitation of the insoluble acid in fine microcrystalline particles which are more readily absorbed. The 10- to 50-micron crystal preparation of phenytoin (acid form) gave 15 times the peak blood levels of that obtained from flat plates of the phenytoin (acid form) preparation which showed practically no absorption.

In another study (Ref. 18) using (1) two preparations of phenytoin sodium capsules (100 mg) in particle sizes less than 100 microns for one preparation and 5 to 30 microns for the other preparation and (2) phenytoin (acid form) in a particle size of 100 x 100 to 300 microns, the plasma levels of phenytoin in epileptic patients were significantly higher after treatment with either of the two phenytoin sodium preparations than after treatment with the same dose of the free acid. This was confirmed by both short- and long-term studies, and in the long-term studies, increased plasma levels of phenytoin were accompanied by better control of generalized seizures.

Evidence therefore suggest that, based on this criterion, drug products containing phenytoin and phenytoin sodium present bioequivalence differences.

(d) *Specific inactive ingredients, e.g., hydrophilic or hydrophobic excipients and lubricants, either may be required for absorption of the active drug ingredient or therapeutic moiety or alternatively, if present, may interfere with such absorption.* An outbreak of phenytoin intoxication occurred in epileptic patients in Australia during 1968–1969. Reports (Refs. 15 and 19) indicated a fourfold increase in peak plasma phenytoin levels with attendant increase in toxicity. The excipient in the responsible phenytoin sodium capsules had been changed by the manufacturer from calcium sulfate to lactose several months before the outbreak of the intoxication and this change was causally related to the altered blood phenytoin concentrations.

This criterion is therefore applicable to drug products containing phenytoin sodium.

THE BIOEQUIVALENCE REQUIREMENT

On the basis of these data, the Commissioner tentatively concludes that the evidence meets one or more of the criteria set forth in § 320.52 and he proposes to establish a bioequivalence requirement for single active ingredient oral dosage form drug products containing the following anticonvulsants: phenytoin, phenytoin sodium, ethotoin, mephenytoin, ethosuximide, methsuximide, phensuximide, paramethadione, trimethadione, phenacemide, and primidone. The proposed bioequivalence requirement would be applicable to all manufacturers of such drug products and would require each manufacturer, except a manufacturer of a reference material or a manufacturer who has previously conducted in vivo bioavailability/bioequivalence studies fulfilling the requirements of this section, to: (1) conduct an in vitro dissolution test comparing its drug product to a specified reference material and (2) conduct an in vivo bioavailability study comparing its drug product to a specified reference material. Under this proposed requirement, the test drug product would be deemed to meet the bioequivalence requirement if (1) the in vitro data show that the dissolution rate for the test drug product is not less than 60 percent in 30 minutes and not less than 85 percent in 60 minutes, and (2) the in vivo data show that the test drug product meets the following conditions:

1. The test drug product and the reference material indicate no more than 20 percent difference in the comparison of measured parameters, e.g., concentration of the active drug ingredient in the plasma, peak plasma levels (Cmax), and area under the plasma concentration-time curves (AUC); and

2. In at least 75 percent of the subjects administered the drug, the test drug product has a bioavailability of greater than 75 percent relative to that of the administered reference material utilizing each subject as his own comparison; and

3. Analytical and statistical techniques used are of sufficient sensitivity to detect those differences in rate and extent of adsorption that are not attributable to subject variability.

The Commissioner advises that further in vivo studies may be required where data submitted in the application differ significantly from data involving valid studies reported in literature or obtained by the agency using a validated protocol and method.

The Commissioner proposes that a manufacturer of a drug product selected by the FDA as the reference material and a manufacturer of any drug product subject to the requirements of the section proposed below who has previously conducted in vivo tests in humans to demonstrate bioavailability bioequivalence of his drug product in accordance with the provisions of the proposed section below would be required to conduct in vitro dissolution testing on three consecutive lots/batches of their product to demonstrate consistent dissolution performance. A manufacturer of a reference material who has not previously conducted in vivo bioavailability/bioequivalence studies fulfilling the requirements of this section would be required to conduct an in vivo bioavailability study comparing the reference material with a solution or suspension of an equivalent amount of the anticonvulsant contained in the reference material.

A manufacturer of a drug product subject to this proposed section who has previously conducted in vivo bioavailablity/bioequivalence studies, e.g., to meet requirements for approval of an ANDA for a drug product covered by a drug efficacy study implementation (DESI) notice, may request the FDA to evaluate such studies to determine whether (1) such studies now fulfill the requirements uder this proposed section or (2) such studies are adequate and conclusive to assure the bioequivalence of the drug product in light of current scientific knowledge and methodology.

To obtain data necessary to correlate in vivo data with in vitro data, the Commissioner proposes that the same lot/batch of the test product and one of the three lots/batches of the reference material used in the in vitro tests be used in the in vivo test, unless a manufacturer has conducted in vivo tests in humans to demonstrate bioavailability/bioequivalence prior to the effective date of this proposed section.

General guidelines for the conduct of in vivo testing are set forth in § 320.25 (21 CFR 320.25). Specific guidelines for in vivo testing and for in vitro dissolution testing of anticonvulsants are on file in the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, and are available on request. The reference material to be used in conducting the in vivo and in vitro tests of each drug product subject to this proposed section is named in the guideline for in vivo bioavailability studies for anticonvulsants.

The Commissioner proposes that the results of the required in vitro dissolution test be submitted to FDA on or before 60 days following the effective date of the final regulation and the results of the required in vivo test be submitted to FDA on or before 180 days following the effective date of the final regulation. The proposed effective date of the final regulation is 30 days following the date of its publication in the FEDERAL REGISTER. The Commissioner believes this will be sufficient time for a manufacturer to conduct the required tests, evaluate the data, prepare the necessary reports, and

submit them to FDA. The Commissioner advises, however, that in meeting an in vivo bioavailability requirement for some anticonvulsants, the agency may require a manufacturer to conduct a pilot study to determine optimal sampling times and volume of sample needed. An additional extension up to 180 days may be granted by the Commissioner upon request from the manufacturer to allow sufficient time to conduct the pilot study and submit the data to FDA. In addition, FDA encourages the submission of protocols for conducting in vivo bioavailability studies. In the event that a manufacturer submits a protocol for evaluation by FDA, the Commissioner will grant an extension of time necessary for the initial review of the protocol.

The Commissioner advises that drug products subject to this proposal are regarded as new drugs as defined in section 201(p) (21 U.S.C. 321(p)) of the Federal Food, Drug, and Cosmetic Act, requiring either an approved full or abbreviated new drug application as a condition to lawfully market the product. Marketing of such a drug product shall be in accordance with the requirements of § 320.58 (21 CFR 320.58).

Certain oral anticonvulsant drugs are covered by a DESI notice (DESI 5856) published in the FEDERAL REGISTER on August 26, 1970 (35 FR 13594) and amended on July 29, 1976 (41 FR 31588). The DESI notice set forth requirements for the marketing of these products and offered an opportunity for hearing concerning certain indications. These requirements specify that an ANDA must contain the information specified in § 314.1(f) (21 CFR 314.1(f)) and, for oral anticonvulsant dosage forms, shall include data of the kind required for the drug at the time of submission of the application to show that it is bioavailable in the formulation proposed for marketing. After a final bioequivalence requirements for oral anticonvulsants is promulgated, the submission of evidence that the drug meets the bioequivalence requirement, i.e., that it is comparable in vivo and in vitro to the specified reference material, would be required in lieu of evidence of bioavailability. Elsewhere in this issue of the FEDERAL REGISTER, the Director of the Bureau of Drugs is issuing a followup notice to DESI 5856 setting forth the legal status and the conditions for marketing specific oral dosage forms of phenytoin and phenytoin sodium.

After the effective date of a final regulation establishing a bioequivalence requirement, each manufacturer, under § 320.56 (21 CFR 320.56), would be required to conduct the in vitro dissolution test on a sample of each batch of the oral anticonvulsant to assure batch-to-batch uniformity.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(p), 502, 505, 701(a), 52 Stat. 1050–1053 as amended, 1055, 76 Stat. 795 as amended (21 U.S.C. 321(p), 352, 355, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 320 be amended by adding new Subpart D consisting at this time of § 320.105 to read as follows:

Subpart D—Bioequivalence Requirements for Specific Drug Products

§ 320.105 Certain oral anticonvulsants.

(a) *Applicability.* The requirements of this section apply to all single active ingredient oral dosage form drug products containing the anticonvulsants phenytoin, phenytoin sodium, ethotoin, mephenytoin, ethosuximide, methsuximide, phensuximide, phenacemide, primidone, paramethadione, or trimethadione.

(b) *Bioequivalence requirement for in vitro testing.* (1) Each manufacturer of a drug product subject to this section, except as provided for in paragraph (b)(3) of this section, shall conduct an in vitro dissolution test comparing its drug product to the reference material.

(2) The test drug product shall be deemed to meet the bioequivalence requirement for in vitro testing if it dissolves not less than 60 percent in 30 minutes and not less than 85 percent in 60 minutes.

(3) Each manufacturer of a drug product subject to this section selected by the Food and Drug Administration as the reference material and each manufacturer of a drug product subject to this section who has previously conducted in vivo tests in humans to demonstrate bioavailability/bioequivalence of its drug product in accordance with the provisions of this section shall conduct an in vitro dissolution test on three consecutive lots/batches of their drug product to demonstrate consistent dissolution performance.

(4) Each manufacturer of a drug product subject to this section shall submit the results of the required in vitro dissolution test to the Food and Drug Administration on or before (60 days after the effective date of this section).

(c) *Bioequivalence requirement for in vivo testing in humans.* (1) Each manufacturer of a drug product subject to this section, other than a manufacturer of the reference material, who has not conducted in vivo bioavailability/bioequivalence studies fulfilling the requirements of this section prior to the effective date of this section, shall conduct an in vivo bioavailability study in humans comparing its drug product to the reference material.

(2) The test drug product shall be deemed to meet the bioequivalence requirement for in vivo testing in humans of the following conditions are met:

(i) The test drug product and the reference material indicate no more than 20 percent difference in the comparison of measured parameters, e.g., concentration of the active drug ingredient in the plasma, peak plasma levels (Cmax), and area under the plasma concentration-time curves (AUC); and

(ii) In at least 75 percent of the subjects administered the drug, the test drug product has a bioavailability of greater than 75 percent relative to that of the administered reference material utilizing each subject as his own comparison; and

(iii) Analytical and statistical techniques used are of sufficient sensitivity to detect those differences in rate and extent of absorption that are not attributable to subject variability.

(3) Each manufacturer of a drug product subject to this section that is selected by the Food and Drug Administration as the reference material, who has not conducted in vivo bioavailability/bioequivalence studies fulfilling the requirements of this section prior to the effective date of this section, shall conduct an in vivo bioavailability study in humans comparing its product (i.e., the reference material) with a solution or suspension of an equivalent amount of the anticonvulsant contained in the reference material.

(4) Each manufacturer of a drug product subject to this section shall submit the results of the required in vivo testing to the Food and Drug Administration on or before (180 days after the effective date of this section). The Food and Drug Administration may grant an extension of time up to 180 days upon request for the submission of the results of the required in vivo test when pilot studies are required prior to commencing such tests. An extension of time necessary for an initial review of a protocol will be granted by the Food and Drug Administration when a protocol is submitted.

(5) Each manufacturer of a drug product subject to this section who has conducted one or more in vivo bioavailability/bioequivalence studies prior to the effective date of this section may request an evaluation of such studies to determine whether (i) such studies now fulfill the requirements under this section or (ii) such studies are adequate and conclusive to assure the bioequivalence of the drug product in light of current scientific knowledge and methodology. Any such request shall contain the new drug application number, the established (generic) name of the drug product, the dosage form and strength of the drug product, and the date(s) of submission of the pertinent study information contained in the new drug application.

(6) If the manufacturer holds an approved or pending full new drug application for the drug product, a request for an evaluation shall be submitted to the Division of Neuropharmacological Drug Products (HFD–120), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857. If the manufacturer holds an approved or pending abbreviated new drug application for the drug product, a request for an evaluation shall be submitted to the Division of Generic Drug Monographs (HFD–530), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

(d) *Reference material and guidelines for testing.* (1) The reference material to be used in the in vivo and in vitro tests is specified in the "Guidelines for In Vivo Bioavailability Studies for Anticonvulsants." The same lot/batch of the test drug product and one of the three lots/batches of the reference material used in the in vitro test shall be used in the in vivo test unless a manufacturer has conducted in vivo tests in humans to demonstrate bioavailability/bioequivalence prior to the effective date of this section.

(2) Guidelines for the conduct of in vivo and in vitro tests of anticonvulsants are on file in the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, and are available on request to that office.

Interested persons may, on or before October 4, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: July 20, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

OFFICE OF THE FEDERAL REGISTER

AUGUST AND SEPTEMBER 1977 LEGAL DRAFTING WORKSHOPS ARE FULL. ADDITIONAL WORKSHOPS ARE SCHEDULED.

WHO: Any local, state, or Federal employee who drafts or reviews documents for publication in the FEDERAL REGISTER.

COST: One hundred-fifty dollars for each participant. Federal employees send an Optional Form 37 or a Form 170 to: Special Projects Unit, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

WHAT: The workshop covers the following areas:

1. Legal Drafting Techniques—Preferred usage, organization, clarity.
2. Writing for your audience—Who is your audience, measuring the writer-reader gap, how to use readability formulas.
3. Legal Drafting Exercises—Regulations, preambles.
4. Critique of participant's drafts to check for use of legal drafting techniques and for substance.
5. How to comply with new preamble requirements.
6. The regulatory process—Where has it been, where is it going?

WHY: The workshop aims to improve the participant's ability to design and draft clear documents which make the FEDERAL REGISTER more readable.

WHEN: October 20, 21, 25, 1977; November 17, 18, 21, 1977; December 15, 16, 19, 1977; January 19, 20, 23, 24, 1978;[1] February 16, 17, 20, 1978; March 16, 17, 20, 21, 1978;[1] April 20, 21, 24, 1978; May 18, 19, 22, 1978.

MORE INFORMATION: Write: Special Projects Unit, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408 or call: 202–523–5240.

[1] These workshops will meet mornings only. Workshop dates are subject to change.

CIVIL AERONAUTICS BOARD

[Docket No. 31221; Order 77–8–3]

AMERICAN AIRLINES, INC.

Order Regarding Emergency Air Transportation Requirements

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of August 1977.

On July 28, 1977, American Airlines, Inc., filed an application pursuant to section 416(b) of the Act for an exemption to serve Burlington, Vermont, in lieu of Montreal, Canada, during the period of an anticipated strike by the Canadian air traffic controllers expected to begin August 4 or 5, 1977.[1] The carrier indicates that it will reroute its Chicago-Montreal flights to Burlington and provide bus service between Burlington and Montreal. American cites similar authority granted by the Board in the past, particularly a blanket exemption granted by Order 76–6–170 to all U.S. carriers to provide similar emergency service during a strike by Canadian air controllers.

Upon consideration of the request, the Board has determined that an emergency may be created affecting all U.S.-Canadian flights should the work stoppage materialize. However, because of the number of requests which may be submitted[2] and the desire of the Board to respond expeditiously and effectively to this situation, we have decided to delegate authority to the Director, Bureau of Operating Rights, beginning August 1, 1977, and terminating on August 31, 1977 (unless sooner terminated or extended), to grant or deny, in whole or in part, any and all requests for exemptions or special operating authorizations which may arise out of this situation. Our sole purpose in taking this action is to alleviate, to the extent possible, any hardships on the traveling public which would inevitably result from the projected strike.

Accordingly, it is ordered, That:

1. Authority be delegated to the Director, Bureau of Operating Rights (the Director), beginning August 1, 1977, to act for the Board on requests for emergency exemption under section 416(b) of the Act and/or for special operating authority for the transportation of persons, property, and mail for the duration of the imminent work stoppage by the Canadian air traffic controllers;

2. In the absence of a further order of the Board, the delegation of authority in paragraph 1 shall expire not later than August 31, 1977;

3. In the exercise of delegated authority, the Director is authorized in his discretion to act before the receipt of answers, and petitions for review of the Director shall not stay the effective date thereof;

4. Applications subject to the procedures established may be made orally pursuant to 14 CFR 300.2(c)(5), but such applications shall be put into telegraphic or written form within 24 hours and, if in telegraphic form, shall be followed within 5 days with a written notice served in accordance with the Board's rules of practice;

5. Any interested person objecting to any provision of this order shall file such objections with the Board within 5 days from the date of service of this order, but the filing of objections shall not stay the effectiveness of this order;

6. This order may be amended or revoked at any time at the discretion of the Board; and

7. This order shall be served on all certificated air carriers.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[3]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77–22570 Filed 8–4–77;8:45 am]

[1] We have been advised orally by American that the strike date has been changed to August 2, 1977.

[2] Operations of Allegheny Airlines, Delta Air Lines, Eastern Air Lines, Frontier Airlines, Hughes Airwest, North Central Airlines, Northwest Airlines, United Air Lines, and Western Air Lines would also be affected.

[3] All Members concurred.

[Docket No. 29123; Agreements C.A.B. 26555–26557, R–1 through R–19 etc.; Order 77–7–142]

INTERNATIONAL AIR TRANSPORT

Order Relating to North Atlantic Passenger Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 28th day of July 1977.

By Order 77–5–91, May 18, 1977, the Board generally approved agreements among the carrier members of the International Air Transport Association (IATA) establishing fares over the North Atlantic through March 31, 1978. However, the Board disapproved the increases proposed in Miami-London first-class fares and economy-class promotional fares, on the grounds that the earnings of National Airlines, Inc. (National), the only U.S. carrier serving the Miami-London route, would be adequate under existing fares and excessive under the proposed fares.[1]

[1] The subject IATA agreements superseded a previous North Atlantic fare package approved in major part by Order 77–3–54, March 9, 1977 which, however, disapproved all normal economy-fare increases, all Miami-London increases, and placed conditions on other portions of the agreement. As a result, the IATA carriers submitted new agreements intended to satisfy the Board's objections to the previous package. Miami-London fares, for instance, were proposed to be increased in more moderate amounts than those previously disapproved in Order 77–3–54.

Petitions for reconsideration of Order 77–5–91 have been filed by National Airlines, Inc. (National) and by Pan American World Airways, Inc., (Pan American). An answer in support of Pan American). An answer in support of Pan American's petition has been submitted by Trans World Airlines, Inc. (TWA).

In support of its petition, National alleges that the Board has illegally transformed the public interest test of section 412(b) of the Act into an absolute rule of ratemaking, by using National's return on investment (ROI) as the only consideration in acting on Miami-London fares, and by disapproving increases when it forecast National's ROI to be above 12 percent; that the domestic 12-percent ROI standard developed in Phase 8 of the Domestic Passenger-Fare Investigation, Docket 21866–8, has been applied here as a rule in violation of section 553 of the Administrative Procedure Act; and that the Board, through its use of a simple arithmetic test for determining the public interest in the context of an IATA agreement, has used the agreement approval procedure as a de facto device to prescribe passenger fares in foreign air transportation, and thus create for itself authority which Congress denied the Board when it expanded the Board's authority over international fares in 1972.[2] National asserts further that the Board's failure to evaluate the agreement on an overall industry basis favors National's competitors, because at the same time the Board denied National a fare increase by treating National's earnings separately, it allowed Pan American and TWA to enjoy yields higher than National by combining their earnings in approving fare increases on their route;[3] that the Board has advanced no reason for such discriminatory treatment and is required to "play by the same rules" with all whom it regulates;[4] and that the Board's action is not premised on advantages to the public which National's lower fares over Miami will bring, since if fare levels were the Board's concern, it would cause TWA, whose earnings are much higher and who carries many more passengers, to charge lower fares as well.[5] Finally, National contends that the Board's adjustments to National forecast are arbitrary, capricious and an abuse of discretion under section 706 of the Administrative Procedure Act since the Board acted without substantial evidence and did not even describe how the adjustments were made; and that the Board was incorrect in assuming National's load factor through next March will not decline, since National's competitor British Airways will offer 40 percent more seats than National per departure in addition to increasing its frequencies to a daily schedule.

In its petition, Pan American alleges that the Board has arbitrarily treated the Miami-London market as if it were not part of the overall North Atlantic market, and by singling out Miami-London fares for separate treatment the Board is, in effect, repudiating its findings in Order 77–3–54 that the revenue need of Pan American and TWA justifies promotional-fare increases in all other North Atlantic markets. Elaborating on this point, Pan American contends that North Atlantic fares constructed over a Miami-London routing undercut fares over New York-London for every city in the southern United States, including at least 49 cities which generate a significant amount of traffic, and thus Pan American and other carriers will either have to give up this traffic or reduce their own fares over New York from these interior points to the level of those on the Miami-London sector; and that if they do hold their fares to the Miami level, they will not only lose revenue but will also bear a heavier pro-rate burden, resulting in a substantial loss of the revenue to which the Board found Pan American entitled for a reasonable return.[6] Finally, Pan American denies the Board's statement in Order 77–5–91 that Miami may, in many cases, be a more convenient departure gateway than New York; the carrier asserts that connecting service from New York to Europe is much superior to that out of Miami, and that there is a far greater number of European destinations served directly from New York than are served directly from Miami.

In its answer TWA states that it supports Pan American's petition, contending that the Board's disapproval of Miami-London fare increases will deprive the North Atlantic carriers of all or a substantial portion of the revenues the Board found to be needed, because of the undercut situation; that TWA, which is the only carrier certificated to provide direct service to Europe from many cities such as Tulsa, Oklahoma City, and Phoenix, will lose traffic from these points to connections over Miami; and that the Board's action prefers the Miami gateway as compared to New York.

Upon careful review of Order 77–5–91, the petitions and answer thereto, and all other relevant matters, the Board finds that the petitions do not set forth facts sufficient to warrant reversal of our earlier action and they will, therefore, be denied.

We reject out of hand National's assertions that there is no adequate basis for treating fares on the Miami-London route separately from the rest of the North Atlantic IATA fare package, and that an IATA agreement must always be considered only as a single, homogenous mass. While the carriers' earnings forecasts are based on the total effect of an agreement's provisions, this does not preclude the Board from disapproving any individual portion it finds to be adverse to the public interest; and although the profitability of individual markets usually cannot be distinguished from that of the overall market in a given ratemaking area, in some cases it is so different that it cannot be ignored. This is clearly the situation with the Miami-London market, which is clearly separable and due to its particular characteristics has historically shown good earnings. For this reason the Board has treated this market separately and has omitted National from our computation of composite carrier ROI in the general North Atlantic market during the past three years of high profits for National, profits over the 12 percent guideline. Our rationale was clearly articulated in Orders 75–3–101, March 27, 1975, 76–4–175, April 30, 1976, and 77–3–54, March 9, 1977, as well as in the order at issue here, where in each case the Board disapproved increases in Miami-London fares because we found National's earnings to be adequate under existing fares and because the carrier had not shown a clear need for an increase. There is even earlier precedent. In Order 74–4–144, April 26, 1974, the Board disapproved a U.S.-Mexico IATA agreement to the extent it would have increased U.S. west coast-Mexico fares, on the basis that Western Airlines, Inc. (Western), the only U.S. carrier serving those routes, was in an excess earnings position and required no fare increase; and the Board has rejected arguments made by Western which are similar to those National presents here.[7]

National is in error in arguing that the Board could not have been concerned with fare levels and public benefits since it permitted TWA, which carries more passengers and has higher earnings than National, to increase its fares. The Board's concern with fare levels was an important factor; indeed, it goes to the heart of the matter. There is no reason for Miami-London passengers to pay

[2] Pub. L. 92–259. National contends in particular that by delaying its decision until May 18, 1977 when the new fares were proposed for effect June 1, the Board gave the carriers no choice but to refile the existing fares on short notice, since there was no time for the carriers to reconvene and submit a new agreement, and any tariff filing to implement the higher fares would surely have been suspended; and that this conduct is a clear abuse of discretion. National also cites *Pan American World Airways, Inc.* v. *C.A.B.*, 14 AVI 17, 448 (D.C. D of C, 1976); and *Moss* v. *C.A.B.*, 430 F. 2d 891 (D.C. Cir. 1970).

[3] National notes that TWA's adjusted ROI including the fare increases would be about 17 percent.

[4] Citing *Continental Air Lines, Inc.* v. *C.A.B.*, 443 F. 2d 745 (D.C. Cir., 1971).

[5] National also claims that National's low costs were of little interest to the Board in Docket 25908, Transatlantic Route Proceeding, where the Board recommended Pan American rather than National to serve Houston-Europe.

[6] Pan American has cited the relevant fare constructions and undercuts; and submits that while most of the undercuts occur in the 22/45-day excursion fare, which accounts for about 20 percent of its traffic, the undercuts extend to the 14/21-day excursion fare in many markets. Pan American's prorate argument refers to the fact that in computing each carrier's share of a ticket using a joint routing, the domestic portion will be larger in relation to the transatlantic portion if the through international fare is reduced.

[7] See Order 76–8–22, August 5, 1976; see also Orders 77–4–132, April 26, 1977, 74–8–117, August 29, 1974, 74–12–49, December 13, 1974, 75–2–102, February 25, 1975, 75–3–96, March 26, 1975, 75–8–13, July 24, 1975, and 76–11–7, November 3, 1976.

fares in excess of National's economic costs on this route and provide it unjust enrichment because the U.S. carriers on other North Atlantic routes—Pan American and TWA—require a fare increase. Were there a direct, competitive relationship between carriers serving the same routes, where one carrier was achieving good returns and the others were experiencing poor earnings, our actions in preventing unjust enrichment of the favorably situated carrier would, of course, be considerably attenuated. This is, in fact, the current situation with TWA and Pan American. We are not unmindful of TWA's adjusted ROI forecast of 17.11 percent under the new IATA fares, and were it possible to consider Pan American's and TWA's routes separately, we would certainly do so. However, it is patently impossible to set aside fares on TWA's extensive route network for separate treatment and we must, therefore, evaluate such fares on the basis of a composite Pan American/TWA ROI. Miami-London fares, however, must be evaluated in light of National's particular earnings.

National also argues that the Board used a 12 percent ROI figure as an inflexible, maximum ceiling. It is true that the Board, in evaluating international fare increases, has used the 12 percent figure as a guideline which represents a reasonable long-term return on investment. In the instant case we estimated National's ROI, after adjustments, at 12.36 percent under existing fares, and National has provided no basis for concluding that its present earnings are inadequate and that it is entitled to the 13.39 percent ROI which we estimated it would earn with the proposed fare increase. We may note also that while National alleges that the 12 percent ROI guideline has become a ceiling, the carrier has historically achieved returns well above 12 percent. The Board's view on use of a 12 percent ROI guideline in international rate cases will be articulated fully in a subsequent order, and National has presented no arguments which would convince us that this practice is unreasonable or that it constitutes promulgation of a rule without proper notice as defined by section 551 and 553 of the Administrative Procedure Act. The proper return on investment is an issue in the North Atlantic Fare Investigation, Docket 27918, which National cites. Pending completion of that proceeding, however, the Board is not enjoined from making appropriate adjustments to the carriers' economic justification for IATA agreements.

In this connection, we are not persuaded that our adjustment to National's forecast load factor was wrong. National forecast a load factor of 53.8 percent for the year ending March 1978, compared to load factors of 58.4 percent and 57.3 percent during the historical periods ended September 1976 and December 1976, respectively. The Board upped National's forecast load factor to the December 1976 year-end figure of 57.3 percent. National argues that it cannot maintain this historical load-factor level since it will suffer increased competition from British Airways, which has increased its frequencies and no longer restricts the number of seats available for sale. We do not believe National has made a convincing case that it will lose such a significant amount of traffic to British Airways that it will not be able to achieve the historical load factor. The Miami-London market has shown healthy growth—enough, we believe, for both carriers to achieve good load factors as high as those already experienced. Mindful of National's allegations, we have reviewed even more recent data, for the year ended March 31, 1977 (a period when Nation's results were not colored by the September 1, 1975—January 20, 1976 strike), and find that the carrier achieved a 62.5 percent load factor during the period. Its forecast for March 1978 reflects traffic growth of only 2.9 percent over the year ended March 1977, compared to a capacity increase of 19.3 percent. In these circumstances, the Board cannot conclude that our adjustments in Order 77-5-91, holding National to a 57.3 percent load factor, were unreasonable.[8]

The three carriers also argue that the Board ignored the undercuts via Miami of fares from other U.S. cities to London and the injury to Pan American and TWA which would allegedly result from holding Miami-London fares at status quo. The carriers cite, for example, that the 22/45-day excursion fare from New Orleans to London is $24 or $44 lower via Miami than via New York, depending on season. The Board gave most careful consideration to this argument and concluded that the carriers had made no showing that this problem is so serious as to justify approval of otherwise unwarranted increases in transatlantic fares to/from Miami. It is strange indeed that until Pan American filed its instant petition, no U.S. or foreign-flag transatlantic carrier provided the Board with any worthwhile analysis of the undercuts, although the U.S. carriers all alleged significant impact. Nonetheless, while the analysis submitted by Pan American is useful, it does not demonstrate that Pan American or TWA would suffer such an adverse impact as to warrant approval of otherwise unwarranted Miami-London fare increases. Neither Pan American nor TWA has provided an estimate of the diversion and dilution they anticipate, or of the damage they have suffered from undercuts via Miami which have been in existence for some time. In any event, it is doubtful that all the interior U.S.-New York-Europe fares cited by Pan American have to be reduced to the level of the combination over Miami in order to prevent diversion of traffic via Miami. A large number of the undercuts listed by Pan American amount to $20 or less, and if, as the carrier contends, New York is such a superior gateway for transatlantic travel, then few passengers would inconvenience themselves by flying via Miami for such a small savings. Furthermore, even assuming Pan American and TWA hold these fares to the level of the Miami combination, and therefore suffer the maximum possible revenue dilution, the information supplied by Pan American leads to the conclusion that such dilution would be de minimis, amounting to less than one-tenth of one percent of its transatlantic passenger revenues.[9]

Accordingly, it is ordered, That:

The petitions of National Airlines, Inc. and Pan American World Airways, Inc. for reconsideration of Order 77-5-91 be denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[10]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-22567 Filed 8-4-77;8:45 am]

[8] The process of adjustment was indicated clearly in Appendix B of the Board's order. The procedure employed was the standard DPFI methodology for making a load factor adjustment. This adjustment reduces capacity to the required load factor and uses the resulting percentage reduction to decrease direct operating costs, and makes the same percentage adjustment to 75 percent of the carrier's investment and interest expense. Order 77-5-91 did not, as National contends, violate section 706 of the Administrative Procedure Act. Section 706 merely sets forth the scope of judicial review of agency orders, providing that the reviewing court shall set aside actions found to be, inter alia, "arbitrary, capricious, an abuse of discretion * * *," or "unsupported by substantial evidence * * *." The Board's action, which was based on National's own justification and its regular Form 41 reports, and employed standard regulatory methodology of long usage, easily passes these tests.

[9] In reviewing Pan American's assertions, we took the 17 U.S. cities for which the carrier supplied North Atlantic passenger enplanements, applied Pan American's own traffic distribution by fare category in conjunction with the cited undercuts. The maximum possible revenue dilution on this traffic would range from $159,000 to $290,000 depending on seasonality, compared to Pan American's forecast third and fourth freedom passenger revenue of $333,991,000.

[10] All Members concurred except Chairman Kahn who did not participate.

[Docket Nos. 3050, etc.; Order 77-7-151]

NORTH CENTRAL AIRLINES ET AL.

Order Regarding Baltimore-Detroit Nonstop Proceeding

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of July 1977.

On February 15, 1977, North Central Airlines filed an application for nonstop authority on a subsidy-ineligible basis, between Baltimore, Maryland, and Detroit, Michigan. Contemporaneously therewith, the State of Maryland and North Central filed a joint petition for an order to show cause or, in the alternative, a motion for hearing on the application. If awarded the authority requested, North Central proposes to provide first single-plane service between Baltimore, on the one hand, and Milwaukee, and Green Bay, Wisconsin; Lansing, Grand Rapids, Escanaba, and Marquette, Michigan, on the other hand. Additionally, the carrier proposes first single-carrier service between Baltimore, on the one hand, and Madison, Marinette, and Wausau/Stevens Point, Wisconsin; Muskegon, Iron Mountain, Hancock, and Kalamazoo/Battle Creek, Michigan, on the other.

In support of their joint petition, Maryland and North Central allege that the carrier would provide two daily nonstop round trips in the market with DC-9-30 aircraft. The parties state that these flights would be scheduled to complement the single round trip in the market now operated by the incumbent, United. The petitioners argue at length that the Baltimore-Detroit market has been subject to a history of serious service deficiencies, culminating in United's currently inadequate service. Petitioners' dissatisfaction with United's service stems from their belief that United has focused on the parallel Detroit-Washington (National) market and has provided the Baltimore-Washington International Airport (BWI) with only a marginal level of service due to its perceived satellite status. Maryland and North Central also contend that the Baltimore-Detroit authority does not efficiently integrate with United's system since the carrier is "boxed in at Baltimore" and its use of Detroit as an active connecting center has declined. In contrast, although North Central's application involves an extension outside its present system to Baltimore, the petitioners maintain that the requested authority will effectively integrate into North Central's predominantly east-west system. According to Maryland and North Central, an award of Baltimore-Detroit non-stop authority to the carrier would: (1) insure improved service in this market since North Central's operations would be provided exclusively at BWI; (2) provide first single-plane and single-carrier service in the numerous markets recited above; (3) reduce North Central's subsidy need in the first normal year of operations by more than $173,000 using Subpart K methodology or by over $759,000 employing functional costing; (4) cause only minimal diversion from United amounting to only .03% or .04% of the incumbent carrier's fiscal year 1976 revenues, depending upon the methodology employed; (5) result in significant strengthening of North Central's route system by increasing the average hop and passenger haul of the carrier.

Answers in support of the joint petition were filed by Delta County Airport Board, Marquette Area Chamber of Commerce, Marquette County Airport Committee, Brown County and the Green Bay Area Chamber of Commerce, the Greater Detroit Chamber of Commerce and Board of Wayne County Road Commissioners, and the Michigan Department of State Highways and Transportation, Aeronautics Commission. The City of Grand Rapids, the Grand Rapids Area Chamber of Commerce, and the County of Kent jointly petitioned for leave to intervene.

Both Allegheny Airlines and Northwest Airlines filed applications for nonstop authority between Detroit and Baltimore, motions to consolidate their applications with that of North Central, and answers to the joint petition of Maryland and North Central. In their respective answers, both Allegheny and Northwest oppose acting upon North Central's application by show-cause procedures, relying upon the doctrine of *Ashbacker Radio Corporation* v. *F.C.C.*, 326 U.S. 327 (1945) in support of their positions. Further, Allegheny notes that while North Central's application would involve a major off-route extension, Allegheny already serves both Detroit and Baltimore and would only require the removal of its one-stop restriction to provide nonstop service in the market. Northwest contends that it can provide the same principal service benefits as North Central, that it has stronger authority at Detroit, and that, as principal carrier in the Detroit-Washington (National) market, it may suffer serious diversion should a carrier other than itself be awarded the Detroit-Baltimore authority in issue.

United filed a consolidated answer to the application of North Central and joint petition of Marvland and North Central, objecting both to the use of show-cause procedures, and the petitioners' alternative motion for hearing. In support of its position, United questions whether the Detroit-Baltimore market is capable of supporting two carriers, arguing that: (1) the market is currently receiving adequate service, (2) United's own attempt to operate a second daily round-trip flight in the market in the first half of 1976 generated an average load factor of only 32 percent; (3) North Central's passenger and revenue forecasts are exaggerated; and (4) according to United's forecast, North Central would suffer a net loss, after return and tax, which would effectively increase the carrier's subsidy by lowering the earnings on its subsidy ineligible system.

Maryland and North Central filed a joint motion for leave to file an unauthorized document, accompanied by a joint reply directed solely to the answer of United.[1] In its joint reply, Maryland and North Central continue to urge the Board to set the application of North Central for hearing; however, the petitioners concede that the issuance of an order to show cause with respect to the authority requested is no longer appropriate in light of outstanding competing applications of Allegheny and Northwest.

Upon consideration of the above pleadings and of all relevant facts, we have decided to institute the Baltimore-Detroit Nonstop Proceeding for the purpose of considering whether the public convenience and necessity require competitive nonstop service between Baltimore and Detroit. Accordingly, we are consolidating for hearing the applications of North Central, Northwest, and Allegheny in Dockets 30501, 30573, and 30583, respectively.

The Board's O&D Traffic Survey shows the Baltimore-Detroit market as generating over 57,000 O&D plus interline connecting passengers in calendar 1975. While this level of traffic might not be sufficient by itself to justify granting priority of hearing to an application for competitive service in the market, it is probable that the Survey substantially understates the actual and potential traffic, in part because of the proximity of the Washington and Baltimore metropolitan areas and their respective airports. In this regard, we note that in the Washington-Baltimore Adequacy-of-Service Investigation, 30 C.A.B. 1215 (1960), the Board found that published origin-destination figures understate Baltimore's actual traffic. Similarly, there is reason to believe that 1975 survey figures understate the potential of the Baltimore-Detroit market. Total Baltimore-Detroit traffic declined in both 1974 and 1975. It appears likely that these decreases were the result, in whole or part, of severely depressed conditions in the automotive industry, which had a pronounced effect on the economy of Detroit. Against such a backdrop, we find that consideration of the competitive nonstop service in issue is justified in light of the possible passenger inconvenience being suffered by persons who live or work within readier access to Baltimore-Washington International Airport than to National Airport. We are also concerned with exploring means to minimize traffic congestion at National Airport.

Finally, while North Central has submitted an environmental evaluation along with its joint petition, Northwest and Allegheny have not submitted sufficient information for us to determine the environmental consequences of their certificate amendment applications at this time. Therefore, we will require Northwest and Allegheny to file the information set forth in Part 312 of the Board's Procedural Regulations. We will allow these carriers, and all other carriers filing applications in this proceeding, 30 days from the date of adoption of this order to file their environmental evaluations.

Accordingly, it is ordered, That:

1. The joint motion of the State of Maryland and North Central Airlines for hearing is granted;

2. To the extent not granted in paragraph 1, above, the joint petition of the

[1] We shall grant the joint motion of Maryland and North Central for leave to file an otherwise unauthorized document. The joint reply is brief, and will not unduly expand the record, delay any proceeding, or prejudice and party.

State of Maryland and North Central Airlines is denied;

3. A proceeding to be known as the Baltimore-Detroit Nonstop Proceeding, Docket 31212, is instituted and shall be set for hearing before an Administrative Law Judge of the Board at a time and place hereinafter designated, as the orderly administration of the Board's docket permits;

4. The proceeding instituted in paragraph 3, above, shall include consideration of the following issues:

(a) Do the public convenience and necessity require the certification of an air carrier or air carriers to engage in competitive nonstop air transportation between Baltimore, Maryland, and Detroit, Michigan?

(b) If the answer to (a) is in the affirmative, which air carrier(s) should be authorized to engage in such service? and

(c) What terms, conditions and/or limitations, if any, should be placed on the operation of such carrier(s)?

5. Any authority awarded in this proceeding shall be granted without eligibility for subsidy;

6. Insofar as they conform to the scope of the proceeding set forth in paragraph 4, above, the applications of North Central Airlines in Docket 30501, Northwest Airlines in Docket 30573, and Allegheny Airlines in Docket 30583, are consolidated with the proceeding instituted by paragraph 3, above;

7. The State of Maryland, United Air Lines, Delta County Airport Board, Marquette Area Chamber of Commerce, Marquette County Airport Committee, Brown County and the Green Bay Area Chamber of Commerce, the Greater Detroit Chamber of Commerce and Board of Wayne County Road Commissioners, the Michigan Department of State Highways and Transportation, Aeronautics Commission, the City of Grand Rapids, the Grand Rapids Area Chamber of Commerce, and the County of Kent are made parties to the proceeding instituted by paragraph 3, above;

8. The joint motion of the State of Maryland and North Central Airlines for leave to file an unauthorized document is granted;

9. Northwest Airlines, Allegheny Airlines and all other carriers filing applications in this proceeding shall file environmental evaluations pursuant to section 312.12 of the Board's Procedural Regulations within 30 days of adoption of this order;

10. Applications, motions to consolidate and petitions for reconsideration of this order shall be filed within 20 days from the service date of this order and answers thereto shall be filed within 10 days thereafter; and

11. This order shall be served upon all parties to the proceeding instituted by paragraph 3, above, and all persons contained in the service list attached to the joint petition of the State of Maryland and North Central Airlines, Inc. for an order to show cause or, in the alternative, motion for hearing.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[Docket Nos. 30679, 29312; Order 77-7-144]

SOUTHERN AIRWAYS, INC.

Order Regarding Florida-Atlanta Competitive Nonstop Case

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 28th day of July 1977.

INTRODUCTION

On April 9, 1976, the County of Volusia, Florida, the City of Daytona Beach, Florida, the Volusia County Airports Advisory Board, the Volusia County Council of Governments, and the Daytona Beach Chamber of Commerce (the Daytona Beach Parties) petitioned the Board for an investigation of the need for first competitive nonstop service between Daytona Beach and Atlanta. On April 12, 1976, the Sarasota-Manatee Airport Authority, the Manatee County Chamber of Commerce, and the Sarasota County Chamber of Commerce (the Sarasota Parties) also petitioned the Board to institute an investigation of the need for an additional air carrier at Sarasota-Bradenton, and for competitive nonstop service between Sarasota and Atlanta and Daytona Beach and Sarasota-Brandenton. By Order 77-3-167, the Board instituted the Atlanta-Daytona Beach/Sarasota-Bradenton Nonstop Proceeding, Docket 30679, to examine the need for first competitive service in the Atlanta-Daytona Beach and Atlanta-Sarasota markets.

On May 25, 1976, Southern Airways, Inc., filed an application in Docket 29312 for a certificate amendment to add a new segment in whole or in part to its Route 98. The new authority would permit operations between the terminal point Atlanta, Ga., the intermediate points Tallahassee, Panama City, Eglin A.F.B., Pensacola, Tampa-St. Petersburg-Clearwater, Sarasota-Bradenton, Orlando, Gainesville, Jacksonville, Daytona Beach, Melbourne, West Palm Beach, Ft. Lauderdale, and Miami, Fla., and the terminal point Key West, Fla.

On August 30, 1976, civic representatives from Tallahassee[1] moved for hearing on Southern's application "insofar as it promises new and improved air transportation services for Tallahassee." The Tallahassee parties argue that Tallahassee is the state capitol, the home of three universities, and the economic center of Leon County which has experienced rapid population growth since 1970; that the present carriers authorized to serve Tallahassee are not providing the necessary service in Tallahassee's intra-Florida markets; that traffic to and from Tallahassee responds well to service improvements; and, that the Board indicated (in Order 69-9-132) that it would institute an investigation into the air service needs of those Florida points north of Miami.

Southern and a number of civic parties[2] have filed answers in support of the Tallahassee motion. Air Sunshine, Delta Air Lines and Eastern Air Lines have filed answers in opposition.

DISCUSSION

The Board has decided to add the issue of new service in the Tallahassee-Atlanta market to the pending Atlanta-Daytona Beach/Sarasota-Bradenton Nonstop Proceeding, Docket 30679. We have also decided not to add any other markets to that proceeding nor to institute separate cases with respect to the remaining Tallahassee markets.

We believe that the addition of the Tallahassee-Atlanta market to the pending Daytona/Sarasota case represents an appropriate use of the Board's resources. The Tallahassee-Atlanta market is the largest monopoly market encompassed by the Tallahassee parties' motion, having generated 86,180 local O&D and interline connecting passengers in the year ended December 31, 1975 (over 235 passengers per day), and is slightly larger than the Atlanta-Sarasota/Bradenton market already in issue. Notwithstanding the general decline in growth which characterized nationwide air traffic in recent years, the Tallahassee-Atlanta market grew at a rate of 11.7 percent per year between 1970 and 1975. Continuation of this traffic growth rate would produce a market in excess of 120,000 annual passengers (or about 329 per day) by 1978. Eastern is the monopoly nonstop operator while Southern, which holds restricted authority in the market, operates a one-stop round trip daily except Saturday.

Equally important, the market presents the same basic issue of first competitive service between the major connecting hub at Atlanta, and an important Florida community, including the opportunity for the institution of improved direct service via Atlanta from Tallahassee to points north and west of Atlanta. It also necessarily includes the question of whether a restriction in the certificate of a local service carrier should be lifted in order to permit that carrier to provide nonstop competitive service. Eastern is the incumbent carrier in all three Atlanta-Florida markets while Southern is already a party to Docket 30679. Under all these circumstances, we believe that the modest expansion of the Daytona Beach-Sarasota

[2] All Members concurred.

[1] The City of Tallahassee and the Tallahassee Chamber of Commerce (the Tallahassee Parties) jointly.

[2] The Atlanta parties, Gainesville, Broward County, the Fort Walton Beach parties, the Satasota-Manatee Airport Authority, the Pensacola parties, and the Tampa Bay parties (Counties of Hillsborough and Pinellas, Fla., the Greater Tampa Chamber of Commerce, and the City of Tampa).

proceeding to include an additional, reasonably large Atlanta-Florida market will not unduly expand the case. On the contrary, the examination of the need for competitive service between Atlanta and Tallahassee can be conducted with a minimum of additional time and effort.

None of the other markets presents the same combination of size and potential service benefits to warrant separate investigation. Nor do they pose issues sufficiently related to those under consideration in Docket 30679 so that consolidation would be conducive to the proper dispatch of the Board's business. See Part 399.60 of the Board's Policy Statements and Rule 12 of the Board's Rules of Practice. All of the remaining Tallahassee markets are smaller than the Atlanta market, service is reasonably good, and the markets are not of a size which would warrant a commitment of time or effort looking toward additional authorizations. Furthermore, all are intra-Florida markets which, in contrast to Atlanta, will not serve as useful gateways to beyond points. Improved direct access to points north or west of Atlanta, including the Midwest, was, of course, at the heart of the communities' petitions which led to institution of the Atlanta-Daytona Beach/Sarasota case. See Order 77-3-167, pp. 1-2.

In reaching this conclusion, we are not suggesting that improved air service is not desirable or that the existing service is necessarily acceptable for the longer term. Rather, we are indicating our judgment that, at the present time, the Board's workload should be directed to applications and requests which hold promise of greater public benefits. While we fully recognize, in this connection, that the Board in 1969, indicated that it had "* * * decided to institute an investigation to determine air service requirements at various Florida points north of Miami and between these points and Atlanta * * *,"[3] we believe that the press of competing applications and the changes in circumstances which have occurred in the intervening years require that we limit our consideration to the needs of the Atlanta-Tallahassee market.

We do not believe that consideration of the service needs of the remaining markets, either in the pending case or in other proceedings, is warranted. The Tallahassee-Miami market is the second largest market for which the Tallahassee parties seek improved service. It generated 76,000 passengers in 1975. Unlike the Atlanta-Tallahassee market, however, two carriers (Southern and Eastern) already hold nonstop authority, although the service provided is generally one-stop. (Eastern provides two round trips per day via Tampa; Southern provides four round trips per day via Orlando.) Given other, more pressing needs, we are unprepared to consider the need for a third nonstop authorization in the market.

The Tallahassee-Orlando market generated only 46,000 local O&D and interline connecting passengers in 1975. Southern provides six daily nonstop round trips in this market and operated at an average load factor of 54 percent in 1975 and 55 percent for the first eight months of 1976.

The Tallahassee-Tampa market, with 46,000 local O&D and interline connecting passengers in 1975, is identical in size to Tallahassee-Orlando. Eastern provides two daily nonstop round trips in this city pair, and its service is supplemented by the services of Sun Air Lines and Air Florida (two intra-Florida carriers) which provide a total of four nonstop round trips per day in the market. Eastern experienced an average load factor of 64 percent in 1975 and this decreased to 60 percent for the first eight months of 1976.

The Tallahassee-Eglin A.F.B./Panama City/Pensacola/Sarasota/Fort Lauderdale/Jacksonville markets are smaller, single-plane markets which collectively generated 23,000 local O&D interline connecting passengers in 1975, or only 63 per day.[4] In each of these markets, at least one of three certificated carriers, Eastern, National, or Southern, holds nonstop authority. Air Florida, the commuter airline, provides the only single-plane service between Tallahassee and Sarasota/Bradenton.

Tallahassee-Daytona Beach/Gainesville/Key West/Melbourne/West Palm Beach do not enjoy single-plane service; however, they generated a combined traffic total of only 11,000 local O&D and interline connecting passengers in 1975.[5] Eastern, National or Southern holds nonstop authority in each of the city-pairs save Tallahassee-Key West, where no carrier is presently certificated, and Tallahassee-Daytona Beach where Eastern and National hold one-stop rights.

CONCLUSION

We are mindful of the Tallahassee parties' desire for improved air service and our obligation to foster the development of a sound air transportation system. In view of our current commitment to a number of ongoing routes proceedings, as well as numerous other existing hearing matters, the Board must be guided by its obligation to hear those requests which promise the greatest public benefits. These factors lead us to conclude that consideration of the need for first competitive service in the Tallahassee-Atlanta market only, and consideration of that need in connection with the pending Atlanta-Daytona Beach/Sarasota case, is required by the public interest and in keeping with the proper dispatch of the Board's business.

Southern's application in Docket 29312 was dismissed by Order 77-3-167. Consequently, the carrier, and other interested applicants, will be required to file applications, along with appropriate motions to consolidate, in Docket 30679. The motions to consolidate, along with all other matters still pending in Docket 30679, will be disposed of by subsequent order. In this connection, the presiding administrative law judge is authorized, of course, to establish a new date for the prehearing conference in order to allow the orderly disposition of pending matters.

Accordingly, it is ordered, That: 1. The motion of the City of Tallahassee and the Tallahassee Chamber of Commerce, insofar as it requests an immediate hearing with respect to the need for first competitive nonstop service in the Tallahassee-Atlanta market, be granted;

2. This proceeding shall hereafter be known as the Florida-Atlanta Competitive Nonstop Case, Docket 30679;

3. The proceeding shall include consideration of the following issues:

a. Do the public convenience and necessity require the certification of an air carrier or air carriers to engage in nonstop air transportation between Atlanta, Georgia, on the one hand, and Daytona Beach, Sarasota-Bradenton, and/or Tallahassee, Florida, on the other hand?

b. If the answer to (a) is in the affirmative, which air carrier or air carriers should be authorized to engage in such service?

c. What terms, conditions, and/or limitations, if any, should be attached to any new authority which may be awarded?

4. Any authority granted in said proceeding shall be in the form of a new segment and shall be ineligible for Federal subsidy;

5. Applications within the expanded scope of the proceeding and motions to consolidate shall be filed within twenty (20) days from the date of service of this order, and answers thereto shall be filed within ten (10) days thereafter; and

6. Except to the extent granted here, the motion of the City of Tallahassee and the Tallahassee Chamber of Commerce filed in Docket 29312 be denied, and Docket 29312 is closed.[6]

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[7]
Secretary.

[3] Southern Airways Route Realignment Investigation, Order 69-9-132, September 24, 1969, p. 6.

[4] The 1975 traffic in certain of these markets is slightly understated. National was not operating due to strike from September 1, 1975, through January 7, 1976. Also, the traffic of commuter operations and the intra-Florida airlines is not included in the Board's O&D surveys.

[5] See footnote (4) above.

[6] Pleadings filed jointly in Dockets 29312 and 30679 shall be considered in connection with Docket 30679.

[7] All members concurred.

DEPARTMENT OF AGRICULTURE

Forest Service

ENVIRONMENTAL STATEMENTS UNDER PREPARATION AS OF JUNE 15, 1977

A list of environmental statements is here published to provide timely public information on the status of Forest Service environmental statements under preparation as of June 15, 1977. Persons interested in a particular action and environmental statement should contact the responsible official directly.

For ease in use of this list, statements are grouped by Forest Service organizational units proposing the action. Statements marked with an asterisk indicate, in total or in part, land management planning, developments, or activities within inventoried roadless areas. National Forest inventoried roadless areas are defined as roadless and undeveloped areas 5,000 acres or larger, except that smaller areas adjoining existing Wilderness and Primitive Areas could be included. Existing Wilderness and Primitive Areas are excluded from this definition.

Forest Service field addresses are given at the end of the listing of environmental statements.

EINAR L. ROGET,
Deputy Chief, Forest Service.

JULY 29, 1977.

LOWER MINAM WILDERNESS STUDY AREA REPORT

Public Hearing

Notice is hereby given that a public hearing will be held, beginning at 9 a.m. on October 15, 1977, in the Eastern Oregon State College Classroom Building Auditorium, La Grande, Oreg., on a proposal for the future management of the Lower Minam Wilderness Study Area comprised of approximately 34,000 acres within the Wallowa-Whitman National Forest in the Counties of Union and Wallowa in the State of Oregon.

A brochure containing a map and information about the proposal may be obtained from the Forest Supervisor, Wallowa-Whitman National Forest, P.O. Box 907, Baker, Oreg. 97814.

Individuals and organizations may express their views by appearing at this hearing, or may submit written comments for inclusion in the official record to the Forest Supervisor, P.O. Box 907, Baker, Oreg. 97814. Those persons wishing to present oral testimony at the hearing should notify the Forest Supervisor, P.O. Box 907, Baker, Oreg. 97814, prior to October 8, 1977.

Dated: July 29, 1977.

R. A. RESLER,
Acting Chief, Forest Service.

PACIFIC CREST NATIONAL SCENIC TRAIL ADVISORY COUNCIL

Meeting

The Pacific Crest National Scenic Trail Advisory Council will meet on August 29-31, 1977, at the Thunderbird Inn at the Quay in Vancouver, Wash. The meeting will begin on August 29 at 1 p.m. On August 31, a field trip to view portions of the trail, on or near the Gifford Pinchot National Forest, begins at 8 a.m.

The purpose of the meeting is to provide orientation to the Council members and to receive Council recommendations. The meeting will include a review of trail status through council and agency reports, discussion of sanitation measures needed, status of rights-of-way and use of volunteers.

The meetings will be open to the public. Persons who wish additional information concerning the meeting should contact Donald A. Warman, Recreation Staff, Pacific Northwest Region, Forest Service, P.O. Box 3623, Portland, Oreg. 97208, phone 503-221-3644.

CHESTER A. SHIELDS,
Acting Deputy Chief.

Office of the Secretary

NATIONAL FOREST SYSTEM ADVISORY COMMITTEE

Notice of Intent To Establish

The Secretary of Agriculture proposes to establish a National Forest System Advisory Committee in compliance with Section 11 of the National Forest Management Act of 1976 (Pub. L. 94-588) for a two-year period.

The purpose of this Committee is to advise the Secretary of Agriculture on questions of policy, programs, and procedures affecting the administration of the National Forest System.

The Secretary has determined that establishment of the Committee is necessary and in the public interest in connection with the duties imposed on the Department of Agriculture and the Forest Service by law.

Comments of interested persons concerning the establishment of this Committee may be submitted to the Forest Service, USDA, National Forest System, Room 3021-S, P.O. Box 2417, Washington, DC 20013, on or before August 22, 1977.

All written submissions made pursuant to this notice will be available for public inspection in the Office of the Deputy Chief for National Forest System during regular business hours (7 CFR 1.27(b)).

HOWARD W. HJORT,
Director of Economics, Policy Analysis and Budget.

AUGUST 2, 1977.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

FOREIGN EXCESS PROPERTY

Proposal To Revise General Determination No. 1 (Revised)

AGENCY: Domestic and International Business Administration.

ACTION: Notice of Intent to amend General Determination No. 1 (Revised) (38 FR 20484 et seq.).

SUMMARY: It is proposed to amend Foreign Excess Property General Determination No. 1 (Revised) by broadening the scope of certain categories of property presently covered by general determination and by including new categories of property, the importation of which would relieve domestic shortages or otherwise be beneficial to the economy of this country.

DATE: Comments due August 19, 1977. Any written communication in connection with this notice should be addressed to:

Foreign Excess Property Officer, Room 6895, U.S. Department of Commerce, Washington, D.C. 20230

FOR ADDITIONAL INFORMATION CONTACT:

Mr. Frank Creel, who can be reached by telephone on 202-377-4913.

SUPPLEMENTARY INFORMATION: Section 302.4 of the Department of Commerce Foreign Excess Property Regulations (15 CFR Part 302) authorizes the Deputy Assistant Secretary for Resources and Trade Assistance to make a general determination that the importation of particular foreign excess property (FEP) would relieve domestic shortages or otherwise be beneficial to the economy of this country and to amend or withdraw any general determination he may issue. Inclusion of property on general determination facilitates the processing of applications to import FEP by avoiding the otherwise applicable case-by-case internal review. Moreover, persons proposing to purchase FEP abroad are put on notice that authorization to import property covered by general determination will be granted, provided all other requirements of the FEP Regulations are satisfied.

Interested parties are invited to submit written comments concerning the proposed amendments to General Determination No. 1 (Revised). All timely comments will be carefully considered prior to publication of the revised general determination in the FEDERAL REGISTER.

It is proposed to issue General Determination No. 1 on or about September 1, 1977. It is further proposed that General Determination No. 1 will be effective on August 5, 1977. The proposed provisions are less restrictive than those currently in force and delaying their effect would only result in the extension of the more involved application procedures required for foreign excess property not included in General Determination No. 1 (Revised).

It is proposed to amend General Determination No. 1 (Revised) to read as follows:

GENERAL DETERMINATION NO. 1

Importation of foreign excess property consisting of the following listed items would relieve domestic shortages or would otherwise be beneficial to the economy of this general determination and to the requirements of § 302.4 of the Foreign Excess Property Regulations (15 CFR Part 302), foreign excess property specified below may be imported into the United States, unless otherwise prohibited by law.

(a) Used non-combat military motor vehicles. All used non-combat military motor vehicles, irrespective of rated capacity, including general purpose trucks such as cargo, carryall, chassis, panel, pickup, dump, platform, prime mover and stake; special purpose trucks such as shop van, medical van, laboratory, fluid tank, wrecker, and ambulance; and jeeps. This provision does not include passenger cars.

(b) Used parts and components for noncombat military motor vehicles.

(c) Combat military motor vehicles and parts and components thereof.

NOTE.—Military motor vehicles enumerated on the U.S. Munitions Import List are also subject to the import permit requirements of the Department of the Treasury under the Mutual Security Act of 1954, as amended. See 26 CFR Part 180.

(d) Pneumatic tires and inner tubes, excluding passenger car tires and inner tubes. Unused tires subject to this general determination shall prior to entry into the customs territory of the United States (i) be branded with the letters "N.F.C." (Not First Class) in one inch type on each sidewall of each tire so as to be clearly visible above the bead area, or (ii) be buffed so as to remove from each sidewall thereof the name of the manufacturer and trade name(s). Inner tubes must be stamped with indelible ink in one inch block type with the letters "N.F.C.".

(e) Used power transformers, 10001 kilovolt-amperes and above.

(f) Compressed gas cylinders.

(g) Metal scrap, ferrous and non-ferrous.

(h) Used ships, boats, floating equipment (including barges, dry docks and pontoons),

and parts and components thereof. (Excludes battleships, cruisers, aircraft carriers, destroyers and submarines which are not subject to the provisions of the Federal Property and Administrative Services Act of 1949, as amended; 40 U.S.C. 472(d)(2)).

Any of the property described above may be entered into the economy of the United States on presentation of the original FEP Import Authorization to the District Director of Customs for his endorsement at the time of entry: *Provided*, The requirements in paragraph (d) above relating to unused pneumatic tires and innertubes are complied with to the satisfaction of the District Directors of Customs at the port of entry.

Nothing in General Determination No. 1 shall be construed to exempt the importer from presentation of such other entry documents, or conforming with any procedures, required by the U.S. Customs Service.

General Determination No. 1 may be amended or withdrawn by the Deputy Assistant Secretary and notice of such amendment or withdrawal shall be published in the FEDERAL REGISTER (15 CFR 302.4.)

Dated: August 2, 1977.

ROBERT E. SHEPHERD,
Deputy Assistant Secretary for Resources and Trade Assistance.

National Oceanic and Atmospheric Administration

ATLANTIC FOREIGN PELAGIC LONGLINE FISHERY

Preliminary Management Plan; Public Hearing Change

Notice is hereby given of a change in the meeting date as published in the FEDERAL REGISTER on July 29, 1977 (42 FR 38625) for a public meeting concerning a draft environmental impact statement for the proposed implementation of a preliminary management plan for the Atlantic Foreign Pelagic Longline Fishery.

The meeting scheduled for August 26, 1977, at the Club Nautico, San Juan, Puerto Rico, 4 to 7 p.m. will now be held on August 24, 1977 at 4:30 to 6:30 p.m. The location remains unchanged.

Dated: August 2, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-22619 Filed 8-4-77;8:45 am]

ATLANTIC FOREIGN PELAGIC LONGLINE FISHERY

Preliminary Management Plan; Supplemental Notice of Public Hearing

Notice was given on July 22, 1977, (42 FR 37583) of the availability of a draft environmental impact statement for the proposed implementation of a Preliminary Management Plan (DEIS/PMP) for the Atlantic Foreign Pelagic Longline Fishery and meetings scheduled for public comment upon the DEIS/PMP.

Additional meetings have now been scheduled. Individuals or organizations wishing to comment on the DEIS/PMP may do so at public meetings to be held in conjunction with the South Atlantic Fishery Management Council, which is currently working on the Fishery Management Plan for this fishery. The times and locations are listed below:

AUGUST 22, 1977, SAVANNAH, GA.

Downtowner Motor Inn, 201 W. Oglethorpe Avenue, 7:30 to 10 p.m.

AUGUST 25, 1977, JACKSONVILLE, FLA.

Jacksonville City Council Chamber, City Hall—15th Floor, 220 E. Bay Street, 7:30 to 10 p.m.

AUGUST 26, 1977, CHARLESTON, S.C.

South Carolina Wildlife and Marine Resources Department. 217 Ft. Johnson Road, 7:30 to 10 p.m.

SEPTEMBER 1, 1977, MIAMI, FLA.

Southeast Fisheries Center, National Marine Fisheries Service, 75 Virginia Beach Drive, 7:30 to 10 p.m.

SEPTEMBER 2, 1977. WEST PALM BEACH, FLA.

West Palm Beach Fishing Club, 5th Street and Flagler. 7:30 to 10 p.m.

Copies of the DEIS/PMP are available for inspection from the Regional Director, National Marine Fisheries Service, 9450 Gandy Boulevard, St. Petersburg, Fla. 33702 (telephone: 813-893-3141). Written comments on the DEIS/PMP from the public may be submitted to the Regional Director not later than September 4, 1977 at the above address.

Dated August 2, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-22622 Filed 8-4-77;8:45 am]

NORTH PACIFIC FISHERY MANAGEMENT COUNCIL; SCIENTIFIC AND STATISTICAL COMMITTEE, AND ADVISORY PANEL

Public Meeting

Notice is hereby given of a meeting of the North Pacific Fishery Management Council established by Section 302, and its Scientific and Statistical Committee and Advisory Panel, established by Section 302(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The North Pacific Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the State of Alaska. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to the fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee will assist the Council in development, collection, and evaluation of such statistical, biological, economic, social, and other scientific information as is relevant to the Council's development and amendment of any fishery management plan. The Advisory Panel contains broad representation from interests affected by Council activities in order to assist the Council in carrying out its functions under the Act.

The meetings will be held Thursday and Friday, August 25-26, 1977, in the Elk's Lodge, Kodiak, Alaska. The meetings will convene at 8:30 a.m., and adjourn at approximately 4:30 p.m. The meeting may be extended or shortened depending upon progress on the agenda.

PROPOSED AGENDA

1. Public hearings on Council management plans and activities.
2. Reports from Scientific and Statistical Committee and Advisory Panel.
3. Progress report and update from Council's Draft Management Planning teams.
4. Review of foreign fishing activities and permits for foreign fishing applications (if any).
5. Other Council business.

The meetings will be open to the public and there will be seating for approximately 100 members of the public available on a first-come, first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about August 15, 1977:

Mr. Jim Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 3136 DT, Anchorage, Alaska 96813.

At the discretion of the Council, the Committee, or the Panel, as apropriate, interested members of the public may be permitted to speak at times which will allow orderly conduct of official business. Interested members of the public who wish to submit written comments should do so by addressing Mr. Jim H. Branson at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meetings, typewritten statements should be received within 10 days after the close of the meetings.

Date: August 2, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-22620 Filed 8-4-77;8:45 am]

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Supplemental Notice of Public Meetings

Notice was given in the FEDERAL REGISTER on July 18, 1977, (42 FR 36857) of meetings scheduled by the South Atlantic Fishery Management Council for the purpose of providing an opportunity for public input and to serve as a fact-finding mechanism relative to development of a fishery management plan for the domestic and foreign billfish fishery. Additional meetings have been scheduled. These meetings will convene at 7:30 p.m. and adjourn at 10:00 p.m. at the following locations and dates:

August 22, 1977—Downtowner Motor Inn, 201 W. Oglethorpe Avenue, Savannah, Georgia.
August 25, 1977—Jacksonville City Council Chamber, City Hall, 15th Floor, 220 East Bay Street, Jacksonville, Florida.
August 29, 1977—S. C. Wildlife and Marine Resources Dept., 217 Ft. Johnson Road, Charleston, South Carolina.
September 1, 1977—Southeast Fisheries Center, National Marine Fisheries Service, 75 Virginia Beach Drive, Miami, Florida.
September 2, 1977—West Palm Beach Fishing Club, 5th Street and Flagler, West Palm Beach, Florida.

Interested members of the public may present their views on matters related to the billfish fishery and on the management plan under development. Additional information relative to these meetings can be obtained by contacting:

Dr. Jackson Davis, Project Manager, Billfish Management plan, South Atlantic Fishery Management Council, 1 Southpark Circle, Suite 306, Charleston, South Carolina 29407.

Member of the public wishing to submit written comment should do so by addressing the Project Manager. To receive due consideration and facilitate inclusion of such statements in the record of the meetings, typewritten statements should be submitted by September 12, 1977.

Dated: August 2, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

Office of the Secretary

[Dept. Organization Order 20-3]

OFFICE OF BUDGET AND PROGRAM EVALUATION

Statement of Functions and Organization and Delegation of Authority

This order effective July 14, 1977 supercedes the material appearing at 38 FR 31548 of November 15, 1973.

SECTION 1. *Purpose.*—.01 This order prescribes the functions and organization of the Office of Budget and Program Evaluation (the "Office").

.02 This revision reflects the consolidation of the Office of Budget and Program Analysis and the Office of Program Evaluation, and the establishment of the positions of Deputy Director for Budget and Deputy Director for Program Evaluation (Section 2.).

SEC. 2. *Status and line of authority.*—.01 The Office of Budget and Program Evaluation (OBPE), a Departmental office, shall be headed by a Director who shall report and be responsible to the Assistant Secretary for Administration.

.02 The Deputy Director for Budget shall supervise the Budget Coordination and Reports Division and the program review staffs, advise and assist the Director as assigned with respect to the budget functions of the Office, perform the functions of the Director during the latter's absence, and serve as the Executive Secretary of the Department of Commerce Budget Committee.

.03 The Deputy Director for Program Evaluation shall advise and assist the Director in the area of program evaluation, including its relationship to zero-base budgeting, shall develop an annual program evaluation plan, and shall supervise the Program Evaluation Staff.

SEC. 3. *Functions.*—Pursuant to the authority vested in the Assistant Secretary for Administration by Department Organization Order 10-5, and subject to such policies and directives as the Assistant Secretary for Administration may prescribe, the Office shall:

a. Have Departmentwide staff responsibility for all matters relating to development of plans, guidance and program analysis to assure consistency of resource allocation with policies of the Department, budget formulation, presentation and justification and execution, analysis and reporting of fiscal and program status, and program evaluation; and

b. Establish and maintain a close working relationship with the Office of Management and Budget (OMB), the Budget and Appropriations Committees of the Congress, and other Government agencies as appropriate.

SEC. 4. *Specified authority.*—In addition to the authority implicit in and essential to carrying out the functions assigned to the Office and related to the exercise of such functions, the Director OBPE:

a. Is delegated the authority vested in the Assistant Secretary for Administration pertaining to budget planning and management, analysis and reporting of fiscal and program status, and program evaluation, subject to applicable provisions of law, regulation, and instructions of the Assistant Secretary; and

b. As the Departmental Budget Officer, shall be the adviser to, and representative of the Assistant Secretary for Administration and of the Department, on all program, budget and evaluation matters set forth in Section 3. of this order.

SEC. 5. *Organization.*—Under the direction and supervision of the Director, the functions of the Office shall be organized and carried out as provided below.

.01 The *Budget Coordination and Reports Division.* This Division shall:

a. Establish standards, criteria and procedures for preparing budget estimates and justifications, including the maintenance of the Budget and Program Analysis Handbook; and the development of standards, procedures and operational instructions for resource allocation systems in the Department, such as zero-base budgeting;

b. Coordinate budget programs and activities that require consolidated action by the Department, and coordinate the preparation of budget estimates.

c. Interpret OMB directives on budget matters;

d. Maintain information on the status of Congressional actions on the Department's budget;

e. Prepare budget summaries and analyses;

f. Maintain the Department's budget history;

g. Maintain liaison with OMB staff and with staffs of Budget and Appropriations Committees on budget matters as necessary to carry out the Division's responsibilities;

h. Establish reporting requirements from operating units on fiscal plans and status, budget execution, and program accomplishments; and analyze, consolidate or otherwise treat the reports as will best meet the needs of the Secretary and Secretarial Officers, incorporating material furnished by the Program Staffs; and

i. Prepare special reports or briefings for the Secretary and Secretarial Officers on significant fiscal, budget and program execution problems, incorporating material furnished by the Program Staffs.

.02 The *Business and Economics Programs Staff* and the *Science and Environment Programs Staff* for their respective areas of responsibility, as shown in Appendix A, shall:

a. Develop advance program guidance and plans for resource allocation in accordance with policy goals of the Department, and recommend new or revised policy positions which are associated with program development and budgeting;

b. Examine and analyze all budget proposals in terms of effective allocation of Departmental resources, conformance to policies, adequacy of justification and appropriation language, existence of statutory authorization, feasibility and economy of operations, accuracy and consistency of schedules, and for conformity with instructions governing submission of budget estimates;

c. Review zero-based decision packages for consistency with Departmental policy goals and priorities and make recommendations for changes in content and levels of resources to policy officials, including the Secretary and Under Secretary;

d. Participate in the identification of major issues and problems to be covered by special studies and evaluations;

e. Monitor, advise and assist operating units in the development and operation of systems for integrating the results of planning and programming with budgeting, including development of criteria for and review of program memoranda and special analytical studies for completeness, timeliness, adequacy, development of alternatives and factual content;

f. Review and evaluate the Department's program structure and recommend modifications as necessary;

g. Participate in the review of legislative proposals affecting the Department's plans and programs;

h. Examine and clear apportionment requests;

i. Provide technical assistance to operating units on budget matters;

j. Analyze fiscal and program plans and reprograming proposals for continuous review of the status of obligations, expenditures and program progress;

k. Evaluate budgeting policies and programs and make recommendations to appropriate officials for improvements; and

l. Provide continuous liaison and be the point of contact between officials in assigned program areas and appropriate staff of the Office of the Secretary and OMB on budget matters.

.03 The *Program Evaluation Staff* shall: a. Interpret Presidential initiatives in the areas of operational evaluation;

b. Conduct special studies to evaluate the effectiveness of Departmental programs in meeting objectives established through legislation or other appropriate authority;

c. Identify major program, or operational issues and problems, and undertake analyses to resolve them;

d. Advise and assist the Director, OBPE, and the operating units in the application of program evaluation techniques and systems requirements of zero-base budgeting; and

e. Advise and assist operating units in the development and operation of systems for the identification of program objectives and for the evaluation of the results of actions taken against these objectives.

SEC. 6. *Department of Commerce Budget Committee.*—The Department of Commerce Budget Committee shall consist of the Director as Chairman, and the budget officers and the officers responsible for program analysis in each operating unit. The Committee will meet on call from the Chairman for the purpose of advising and assisting in the development of budget policies and programs, and systems of integration of the results of zero-base budgeting throughout the Department.

ELSA A. PORTER,
Assistant Secretary for Administration.

OFFICE OF PROGRAM EVALUATION

Revocation

This order effective July 14, 1977, revokes the material appearing at 40 FR 56707 of December 4, 1975.

Revocation. Department Organization Order 20-13, dated October 22, 1975 is hereby revoked.

Explanation. The personnel, funds, property, and records of the Office of Program Evaluation have been consolidated with the Office of Budget and Program Analysis to form the Office of Budget and Program Evaluation.

ELSA A. PORTER,
Assistant Secretary for Administration.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1977 commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 5, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On April 1, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 F.R. 17510) of proposed additions to Procurement List 1977, November 18, 1976 (41 F.R. 50975).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodities are hereby added to Procurement List 1977:

Class 7105

Frame, Picture, 7105-00-053-0170, 7105-00-061-5334, 7105-00-052-8697, 7105-00-052-8695.

The above for GSA Supply Distribution facilities in Regions 8, 9 and 10.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-22547 Filed 8-4-77;8:45 am]

PROCUREMENT LIST 1977

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1977 commodities to be produced by and a service to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: September 8, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47 (a) (2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Government will be required to procure the commodities and service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and service to Procurement List 1977, November 18, 1976 (41 F.R. 50975):

Class 3920

Truck, Hand, 3920-00-847-1305.

Class 8465

Suspenders, Individual Equipment Belt, 8465-00-001-6471.

SIC 7349

Janitorial Services, ERDA Offices at Rogers Hotel and First Street Bldg., Idaho Falls, Idaho.

C. W. FLETCHER,
Executive Director.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

List of Statements Received

The following is a list of environmental impact statements received by the Council on Environmental Quality from July 25 through July 29, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (September 19, 1977.) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250, 202-447-6827.

FOREST SERVICE

Final

Western Spruce Budworm Management Plan, July 26: Proposed is the management of western spruce budworm on 987,319 acres out of a total infestation of 3,151,985 acres. The preferred method of treatment is long-term silvicultural management on 934,019 acres and short-term aerial application of carbaryl (Sevin-4-oil) on 53,300 acres in the spring and summer of 1977. The application of Sevin will result in decline of population of some soil-inhabiting invertebrates, destruction of beneficial insect populations, and the elimination of honeybees in the treated areas. Comments made by: EPA, USDA, State and local agencies, concerned groups and individuals. (ELR Order No. 70906.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Assistant Secretary for Environmental Affairs, Environmental Affairs, Department of Commerce, Washington, D.C. 20230, 202-377-4335.

NAT'L OCEANIC AND ATMOSPHERIC ADMIN.

Draft

Atlantic Foreign Pelagic Longline Fishery—Preliminary Fisheries Management Plan, July 25: Proposed is the approval of a Preliminary Fisheries Management Plan for the Atlantic pelagic longline fishery off the Atlantic and Gulf of Mexico coasts and off Puerto Rico and the Virgin Islands. The proposed action provides for prohibition of the retention of all billfishes captured by foreign pelagic longline vessels and regulates the catch of sharks in the Fishery Conservation Zone. This action is expected to have beneficial effects on the environment at the local, regional, and international levels. (ELR Order No. 70899.)

Virgin Islands Coastal Zone Management,[1] Virgin Islands, July 28: The proposed action consists of approval and implementation of the Coastal Management Program of the Virgin Islands. Implementation of the project will restrict or prohibit certain land and water uses in parts of the Virgin Islands coasts, while promoting and encouraging development and use activities in other parts. The program will provide an improved decisionmaking process for determining coastal land and water uses and siting of facilities of national interest, and will lead to increased long-term protection and benefit from the State's coastal resources. (ELR Order No. 70920.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, 202-693-6795.

[1] Following consultation between CEQ and DOC/NOAA, the 45 day review period for this Draft EIS has been reduced by 15 days.

Draft

Delta Coves Subdivision, Permit, Contra Costa County, Calif., July 25: Delta Coves plans to provide building sites for 495 single family dwellings and 64 condominium units. This development would occupy 310 acres in the southeastern part of Bethel Island in the Sacramento-San Joaquin Delta. The development, in addition to providing residential lots, will include commercial and recreational facilities. A Department of the Army permit is required to breach the levee system and provide access for the proposed inland harbor/lagoon. (Sacramento District), (ELR Order No. 70900.)

Halstead Local Flood Protection (2), Harvey County, Kans., July 26: Proposed is the construction of a horseshoe levee on the northeast, and southeast boundaries of the city of Halstead, Kansas, in order to provide protection from periodic flooding. Project plans call for the enlargement of the river channel to a bottom width of 60 feet for a length of 3.5 miles, and the realignment of 800 feet of channel in the vicinity of Warkentin Homestead. A total of 240 acres of land and water would be required including 26 acres of flood plain forest, 4 acres of upland trees, 122 acres of cropland, and 23 acres of pastureland. (Tulsa District), (ELR Order No. 70909.)

Hocking River at Logan and Nelsonville (2), Ohio, July 28, Proposed is the construction of the Logan and Nelsonville Local Protection Projects on the Hocking River to be operated as units of the plan of water resources development for the Central Ohio Water Development Region. The proposed plan consists of approximately 5.4 miles of channel modification along the Hocking River and approximately 3,500 feet of earthen levee along the Hocking River and Oldtown Creek at Logan, Ohio. Associated recreation facilities at both Logan and Nelsonville include four stream access sites, 3.65 miles of biking and walking trails and development of two low density parks. (Huntington District) (ELR order No. 70922.)

South Harrisburg Flood Control Improvements, Pennsylvania, July 28: Proposed is a plan for flood control improvements for the Paxton Creek and Susquehanna River area, South Harrisburg, Pennsylvania. The plan calls for a flood wall approximately 4,200 feet in length which will provide protection against backwater flooding from the Susquehanna River. The Paxton Creek channel will be seized to accommodate the Agnes flood flow as modified by a detention reservoir at Asylum Run, and the flow in the existing Paxton Creek will be reversed and also diverted to the Susquehanna River in the area south of I-83. Twelve businesses will be evacuated or relocated. (Baltimore District) (ELR Order No. 70924.)

Brazos Island Harbor, Channel Improvement, Cameron County, Tex., July 27: Proposed is the enlargement of the turning basin, main channel, and entrance channel of the Brazos Island Harbor, Texas. The main channel would be deepened to 42 feet over a bottom width of 300 feet from the entrance channel to the turning basin extension, a distance of 14.8 miles. The turning basin extension would be deepened to 42 feet and widened to varying widths of 325 to 400 feet. Adverse effects are localized turbidity, destruction or disturbance of benthic communities, and release of some objectionable odors. (Galveston District). (ELR order No. 70915.)

Final

Walnut Creek Project, Contra Costa County, Calif., July 27: The Walnut Creek project, now 43% complete, consists of construction of rectangular concrete-lined channels and flood control structures in Walnut Creek and the lower reaches of its principal tributaries. Completed portions of the project have resulted in the elimination of most of the riparian vegetation on the surrounding flood plain and the intensive urbanization in the form of towns, housing developments, shopping centers, roads, and utilities. (Sacramento district.) Comments made by: EPA, DOI, USDA, State and local agencies, and concerned citizens. (ELR Order No. 70911.)

Dallas to Vancouver Channel, Columbia River, Oregon, Wash., July 25: Proposed is the continued maintenance of the navigation channel between Vancouver and The Dalles (River Mile 106 to River Mile 190) on the Columbia River to a 17-foot depth and 300-foot width and continuation of the present permit process in the same area. Included is the maintenance of pile dikes and other small navigation projects conducted by the Corps of Engineers within the project area. Locations of previous and future dredge and disposal sites are outlined. Adverse effects include removal of river bottom habitat and organisms. (Portland district.) Comments made by: EPA, DOC, DOI, FPC, AHP, USDA, State and local agencies, and concerned groups and individuals. (ELR Order No. 70903.)

ENERGY RESEARCH AND DEVELOPMENT ADMIN.

Contact: Mr. W. Herbert Pennington, Office of NEPA Coordination, Energy Research and Development Administration, E-201, ERDA, Washington, D.C. 20545, 301-353-4241.

Draft

High Flux Neutron Source Facility, Richland, Wash., Benton County, Wash., July 27: Proposed is the construction and operation of a deuterium-lithium High Flux Neutron Source Facility at the ERDA Hanford Reservation, Richland, Washington. The purpose of the proposed facility is to provide an experimental neutron irradiation facility for providing a neutronic environment similar to that anticipated in a fusion power reactor. The facility will consist of a Test Building and an Accelerator Building with an interconnecting transport tunnel for the deuteron (deuteron ion) beam. A linear accelerator will generate 30 MeV deuterons to produce neutrons using the deuteron-lithium stripping reaction in a liquid lithium target. (ELR Order No. 70916.)

Final

Brookhaven National Laboratory, Suffolk County, N.Y., July 28: proposed is the continued operation of Brookhaven National Laboratory in Upton, Brookhaven Town, New York. Twenty acres of the 5265-acre site may not be suitable for future uses because of contamination. Research and development activities of the laboratory require the use of 200 million kWh of electricity and 7 million gallons of fossil fuels annually. Radioactive contamination risk is considered small. Comments made by: USDA, DOT, NSF, HEW, DOI, EPA, State and local agencies, and concerned interest groups. (ELR Order No. 70918.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

Coleto Creek Power Station and Cooling Reservoir, Goliad County, Tex., July 27: Proposed is the issuance of a New Source NPDES permit for the discharge of sanitary and cooling water effluents from Central Power and Light Company's proposed Coleto Creek

Power Station. Central Power and Light Co. proposes to build a two-unit, coal-fired power plant (ultimate load capacity, 1100 Mw) in eastern Goliad County, which would be designed to help meet load projections and diversify the fuel base of CPL. Unit 1 is scheduled for completion in 1979, Unit 2 between 1986 and 1988. (Region VI.) (ELR Order No. 70913.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Programs, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9760.

Final

Central Rock Mine, SPR, Fayette County, Ky., July 29: The proposed project involves the implementation of the Strategic Petroleum Reserve, Title I, Part B, of the Energy Policy and Conservation Act (P.O. 94-163). This action is part of the Early Storage Reserve and proposes to store 14 million barrels of oil in an underground limestone mine located in Lexington, Kentucky. The proposed storage of oil at Central Rock Mine would be implemented at an existing underground limestone mine presently owned and operated by the Central Rock Company. Adverse socio-economic impacts may result if the limestone mine is closed temporarily. Comments made by: DOC, HEW, DOD, NRC, and State agencies. (ELR Order No. 70927.)

FEDERAL POWER COMMISSION

Contact: Dr. Jack M. Heinemann, Advisor on Environmental Quality, Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, 202-275-4791.

Draft

Solomon Gulch Project, Alaska, July 26: Proposed is the issuance of a license to the Copper Valley Electric Association, Inc., authorizing the enlargement of the present dam at Solomon Lake, construction of a penstock, powerhouse, transmission line and ancillary facilities, and the operation of these project works for electric power supply to service areas in and around the Towns of Valdez and Glenhallen, Alaska. The dam and powerhouse, with generating equipment having a rated capacity of 12,000-kW, would be located on Solomon Gulch Creek, approximately 4 miles south of Valdez. Adverse effects include the permanent alteration of about 440 acres of wildlife habitat. (ELR Order No. 70908.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202-755-6308.

Final

Bunker Hill Elderly Housing Project, Los Angeles County, Calif., July 28: Proposed is the development of 1,100 units of housing for low income elderly and handicapped in Los Angeles, California. Development will include a multipurpose service center, retail commercial space, and parking garages for an estimated population of 1,500. The project is located in the Central Business District of Los Angeles and within the Bunker Hill Urban Development Project. Increased levels of air pollution from fugitive dust emissions and increased levels of noise may be expected during construction. Comments made by: HEW, State and local agencies, and concerned groups and individuals. (ELR Order No. 70923.)

West Campus Planned Community, King Co.-King County, Wash., July 25: Proposed is the development of West Campus, a 1,600-acre planned community in South King County, Washington. The Quadrant Corporation has requested HUD/FHA subdivision approval for mortgage insurance for 508 single family lots and open space. The total development proposes 6,325 single and multi-family residential units. Negative impacts include erosion and sedimentation and increased demand on public services and infrastructure. Comments made by: USDA, COE, EPA, HEW, DOI, DOT, State and local agencies. (ELR Order No. 70902.)

Section 104(H)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD).

Draft

Vallejo, Calif., Vallejo River Park, Solano County, Calif., July 26: Proposed is the development of a neighborhood-community park located in northwest Vallejo, adjacent to Mare Island Strait in Solano County, California. The site is 3,800 feet in length and about 630 feet in average width, with approximately one half mile of water frontage. The Park will total approximately 75 acres and will be known as River Park. Phase One will include tennis courts, softball complex, and overlook picnic area; Phase Two will include the east picnic area, children's playground, and miscellaneous facilities. (ELR Order No. 70910.)

Corcoran, Calif., Corcoran Fringe Wastewater Facil, Kings County, Calif., July 27: Proposed is the use of Federal funds for the Corcoran Fringe Wastewater Facilities Project. The project will provide a community wastewater collection system in Corcoran, California at an estimated cost of 3.3 million dollars. Short term impacts include: noise, dust, and vibration; possible excavation damage to trees and shrubs; and traffic delays and inconveniences. Long term impacts include consumption of electrical energy and the potential for development of vacant parcels. (ELR Order No. 70912.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256, Interior Bldg., Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF LAND MANAGEMENT

Draft

Rio Puerco Livestock Grazing Program, Sandoval and McKinley Counties, N. Mex., July 28: Proposed is the initiation of an intensive livestock grazing management program through the implementation of Allotment Management Plans on 393,083 acres of public land in the Rio Puerco Resource Area, Albuquerque District. The proposed action would include consolidation of 96 existing allotments into 61. Grazing systems which reserve sufficient forage for wildlife would be implemented and range improvements would be constructed to facilitate these systems. By the year 2000, the proposed action would approximately double forage production in the Rio Puerco ES Area. (ELR Order No. 70921.)

NATIONAL AERONAUTICS AND SPACE ADMIN.

Contact: Mr. Nathaniel Cohen, Director, Office of Policy Analysis, National Aeronautics and Space Administration, 400 Maryland Avenue, Washington, D.C. 20546.

Final

Ames Research Center—Institutional,[2] California, July 11: This statement supersedes the original Institutional Environmental Impact Statement for Ames Research Center, California, dated July 1971. It describes the current mission, facilities, community settings, and environmental effects associated with the present baseline activities at the installation. The major adverse impact is the noise imposed upon the surrounding communities by the operation of certain wind tunnels. Comments made by: EPA, USN, DOI, AHP, DOT, State and local agencies. (ELR Order No. 70928.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, 202-426-4357.

FEDERAL AVIATION ADMINISTRATION

Final

Truk District Airport, Caroline Islands, Truk, Caroline Isles, July 28: The statement refers to the development of the Truk District Airport. The project involves repositioning the existing runway to the northwest such that the new centerline coincides with the northwest edge of the existing runway. The development also includes extending and paving the runway to 6,000 ft. with provisions for an additional 900 ft. extension, perimeter fencing and the construction of a protective structure to ensure against possible wave overtopping during typhoons. The adverse impacts of the project are the loss of agricultural land, the loss of naturally occurring coral and fish habitat, and the increase in air and noise pollution associated with the airport. Comments made by: COE, HEW, USCG, EPA, USDA, HUD, USN, USA, local agencies and interested groups. (ELR Order No. 70919.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

9.5 Mile New Hampshire, Route 101, Relocation, Rockingham County, N.H., July 26: Proposed is the relocation of 9.5 miles of New Hampshire Route 101 from, roughly, Interstate Route 93 in Manchaster to Interstate Route 95 in Hampton. Project termini are N.H. Route 101 approximately 2 miles west of Candia Center and N.H. Route 101 approximately 1.5 miles east of the town of Raymond. The road will be an ultimate 4-lane facility, passing through rural wooded land. Adverse effects include acquisition of 260 acres of land and the relocation of two homes, one mobile home, one cabin, and two storage trailers. (Region 1.) (ELR Order No. 70905.)

U.S. 95 and I-515 Spur, East Leg, Clark County, Nev., July 25: Proposed is the construction of a 20-mile segment of U.S. 95 from Los Vegas to an unincorporated area of Clark County. The leg has been declared a Federal Aid Priority Primary Route. Part of the segment has been approved as a spur of I-15 (I-515 Spur). Adverse effects include the acquistion of 600 acres resulting in the loss of natural vegetation, wildlife habitat and an expanse of open desert terrain in the Las Vegas Valley, the relocation of many families

[2] Due to administrative oversight, the notice of availability concerning the NASA Final EIS, Ames Research Center—Administrative EIS, was omitted from the CEQ Federal Register entry of July 22, 1977. The statement was received by the Council on July 11, 1977 and the 30-day no administrative action period began on that date.

and businesses, loss of low-income housing, increased air and noise pollution, and an undetermined impact on one archaeological site. Comments made by: COE, HEW, DOI, EPA, State, local agencies, and concerned interest groups. (ELR Order No. 70904.)

New Hampshire Route 9, Sullivan, Nelson, and Stoddard Communities, Cheshire County, N.H., July 26: Proposed is the improvement of a deficient two-lane section of N.H. Route 9 located in the communities of Sullivan, Nelson, and Stoddard. Four two-lane corridors will be constructed on new location with a minimum 200 foot controlled access right-of-way. The adverse impacts include acquisition of property, residences and businesses, increased noise levels and intrusion upon conservation areas, wetlands and wildlife habitat. (Region 1.) Comments made by: EPA, DOI, HUD, USDA, COE, FPC, AHP, State, local agencies, and conservation groups. (ELR Order No. 70907.)

I-505—Industrial Freeway, Oregon, Multnomah County, Oreg., July 25: The proposed freeway project is located in the northwest section of Portland, Oregon's Northwest Industrial District and would consist of a 3-mile long, 4-lane elevated Interstate freeway spur (I-505) connecting Interstate 405 to St. Helens Road (U.S. 30). Adverse impacts are the relocation of several families and the costs incurred by business and industrial firms forced to vacate their premises during construction. Noise and air pollution levels will also be increased. Comments made by: DOI, DOT, EPA, State, local agencies, and concerned persons and groups. (ELR Order No. 70901.)

Loop 1 (Mo Pac Blvd.), South Section, Travis County, Tex., July 29: The statement refers to the construction of a 4.3 mile section of Loop 1 (Mo Pac Boulevard) from R.M. Highway 2244 south to U.S. Highway 290 West, southwest of the city of Austin, Texas in Travis County. This is a proposed six-lane freeway facility having frontage roads in selected areas as required to control access and establish local traffic travel. The proposed project will require the relocation of one business, consume 315 acres of open, undeveloped land, and cause air and noise pollution during construction. (Region 6.) Comments made by: HEW, HUD, COE, USDA, DOI, EPA, State, local agencies, and concerned citizens. (ELR Order No. 70925.)

Loop 1 (Mo Pac Blvd.), North Section, Travis County, Tex., July 29: The 5.7 mile section of Loop 1 considered in this statement is the northern portion of a 16.5 mile north-south freeway which traverses the City of Austin. The project extends from F.M. Highway 1325, south to 0.2 mile north of R.M. 2222 (Northland Drive). Development of the six-lane, controlled access facility will require the relocation of five businesses and four residences. (Region 6.) Comments made by: HEW, COE, USDA, DOI, EPA, State and local agencies. (ELR Order No. 70926.)

Supplement:

I-40, I-10—U.S. 90 (S-1), St. Charles County, La. July 27: This statement supplements a final EIS filed with CEQ in March 1972. The proposed action is the moving of people and freight from I-10 West, in St. Charles Parish, to U.S. 90 in the vicinity of Boutte, selecting a bridge site at Luling, and a specific alignment. The settlement of litigation concerning this proposed action called for reconsideration of the action proposed in the final EIS as well as that of other alternatives. Alternatives include mass transit, and ten other possible highway corridors from I-10 to U.S. 90, using the determined bridge site at Luling. (Region 6.) (ELR Order No. 70914.)

NICHOLAS C. YOST,
Acting General Counsel.

DEPARTMENT OF DEFENSE

Office of the Secretary

BOLD EAGLE

Draft Environmental Impact Statement; Public Hearing

Notice is hereby given that an informal public hearing will be held for the purpose of soliciting comments on the Draft Environmental Impact Statement for the proposed exercise "Bold Eagle 78".

Bold Eagle 78 is a joint readiness exercise directed by the Joint Chiefs of Staff and sponsored by the United States Readiness Command. This proposed exercise is scheduled to be conducted in the southeastern United States, preferably at the Eglin Air Force Base Test Range Complex, Fla., and adjacent coastal water during the period October 11 to November 11, 1977. Other installations under consideration include Fort Polk, La., and Fort Stewart, Ga. This exercise will involve approximately 18,000 personnel in join air and ground operations. Airborne assault and mechanized forces will be engaged in ground tactical operations for less than six days.

Adverse impacts include increased air pollution, damage to vegetation caused by track vehicle operations, and the possible disturbance of the Red-Cockaded Woodpecker and Okaloosa Darter, both endangered species.

A Draft Environmental Impact Statement (DESI) for this proposed action was filed with the Council on Environmental Quality (CEQ) on 8 July 1977. Copies are available from:

United States Readiness Command, Attn: RCJ4-L, MacDill Air Force Base, Fla. 33608.
United States Air Force Forces, Readiness Command, Attn: DEEV, Langley Air Force Base, Va. 23665.
United States Army Forces, Readiness Command, Attn: AFOP-JTX, Fort McPherson, Ga. 30330.
Armament Development and Test Center (AFSC), Attn: OI, Eglin Air Force Base, Fla. 32542.
Headquarters, 5th Infantry Division (Mechanized) and Fort Polk, Attn: G3, Fort Polk, La. 71459.
Headquarters, 24th Infantry Division and Fort Stewart, Attn: G3, Fort Stewart, Ga. 31313.

In addition, copies have been forwarded to the following locations for public reference:

Office of the Mayor, City of Fort Walton Beach, Fla.
Office of the Mayor, City of Valparaiso, Fla.
Office of the Mayor, City Crestview, Fla.
Office of the Mayor, Town of Mary Esther, Fla.
Office of the Mayor, Town of Niceville, Fla
Office of the Mayor, Town of Shalimar, Fla.
Chamber of Commerce, Crestview, Fla.
Chamber of Commerce, Fort Walton Beach, Fla.
Chamber of Commerce, Niceville-Valparaiso, Fla.
Public Library, Crestview, Fla.
Public Library, Fort Walton Beach, Fla.
Public Library, Niceville, Fla.
Public Library, Valparaiso, Fla.

The presiding officer will be Col. Harold W. Gardner, Chief Trial Judge, USAF Trial Judiciary, Forrestal Bldg., Washington, D.C. 20314, telephone 202-693-5810.

The following procedures will be followed during the informal public hearing. Individual speakers will be limited to five minutes, with ten minutes for a group spokesman. There will be no relinquishing of time by one speaker to another. Written statements, in addition to, or in lieu of, oral presentations will be accepted. The closing date for including written communications in the hearing record is five days after date of public hearing. Written communications should be submitted to USREDCOM RCJ4-L, MacDill Air Force Base, Fla. 33608.

The informal pulic hearing for the Eglin Air Force Base vicinity will be held at the following time and place: 8 p.m., 15 August 1977, Choctawhatchee High School, Fort Walton Beach, Fla.

This notice and any changes will be released to the local news media.

For further information, contact Lt Col Torsten Rothman, at 202-695-1422.

VAN L. CRAWFORD JR.,
Colonel, U.S. Air Force,
Deputy Director of Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 774-6]

WATER PROGRAMS

Determination of Primary Enforcement Responsibility, State of Minnesota

This public notice is issued under section 1413 of the Safe Drinking Water Act, Pub. L 93-523, December 16, 1974, and section 142.10 of the National Interim Primary Drinking Water Regulations, published in the FEDERAL REGISTER on January 20, 1976.

A submission, dated May 20, 1977, has been received from the Commissioner of Health, requesting a determination that the Minnesota Department of Health has met requirements for primary enforcement responsibility for public water systems in the State of Minnesota, in accordance with the provisions of this Act.

In response, I have determined that the Minnesota Department of Health has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for public water systems in the State of Minnesota. The State—

(1) Has adopted drinking water regulations which are no less stringent than the National Interim Primary Drinking Water Regulations;

(2) Has adopted and will implement adequate procedures for the enforcement of such State regulations, including adequate monitoring and inspections;

(3) Will keep such records and make such reports as required;

(4) Will issue variances and exemotions in accordance with the provisions of the National Interim Primary Drinking Water Regulations;

(5) Has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances.

All documents relating to this determination are available for public inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Environmental Health Division, Minnesota Department of Health, 717 Delaware St. SE., Minneapolis, Minn. 55440

Water Supply Branch, Environmental Protection Agency, Region V, 230 South Dearborn St., Chicago, Ill. 60604.

Any interested person may comment upon the State submission by writing to the U.S. EPA, Region V Office. Written comments must be submitted on or before August 30, 1977.

I have scheduled a public hearing to consider this application and to enable all interested parties to present their views on the State's submission. The hearing will begin at 10 a.m. on August 31, 1977, in the Board Room, Minnesota Department of Health, 717 Delaware St. SE., Minneapolis, Minn. 55440.

Oral statements will be heard and considered, but, for accuracy of the record, all testimony should be submitted in writing. Statements should summarize extensive written material, so there will be time for all interested parties to be heard. Persons are encouraged to bring extra copies of their written statements for the use of the hearing officer and other interested persons.

The hearing officer may, at his discretion, exclude oral testimony if it is overly repetitious of previous testimony heard or if it is not relevant to the decision to approve or require revision to the State program as submitted.

Further information about the public hearing may be obtained by writing the Water Supply Branch of the U.S. EPA, Region V, or the Environmental Health Division of the Minnesota Department of Health, or by calling Joseph Harrison at 312–353–2151 or Gary Englund at 612–296–5330.

After receiving the record of the hearing, I will issue an order affirming or rescinding this determination. If the determination is affirmed, it shall become effective as of the date of this notice.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: July 22, 1977.

GEORGE R. ALEXANDER, Jr.,
Regional Administrator, Environmental Protection Agency, Region V.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-563]

CB EQUIPMENT

Cut-Off Date for Manufacture

AUGUST 1, 1977.

Domestic and Offshore manufacturers of CB equipment that was type-accepted prior to September 10, 1976 are reminded that manufacture of such equipment must cease as of August 1, 1977.

Although importation and marketing of the subject equipment may continue beyond August 1, 1977, importers, distributors, and sellers are cautioned that assurance and evidence of pre-August 1, 1977 manufacture should be obtained from off-shore suppliers before the equipment is imported, or marketed, in order, to assure strict compliance with the Commission's Rules.

Marketing of this type of equipment must cease no later than January 1, 1978.

Action by the Commission August 1, 1977. Commissioners Lee, Quello and Fogarty with Commissioners Washburn and White concurring.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FM AND TV TRANSLATOR APPLICATION READY AND AVAILABLE FOR PROCESSING

Adopted: July 22, 1977.

Released: July 29, 1977.

Notice is hereby given pursuant to Sections 1.572(c) and 1.573(d) of the Commission's Rules, that on September 16, 1977, the TV and FM translator applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to Section 1.227(b)(1) and Section 1.519(b) of the Commission's Rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on September 15, 1977, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on September 15, 1977.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to Section 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FM TRANSLATOR APPLICATIONS

BPFT-433 K288BB Cortez, Dolores, Mancos & Redmesa, Colo., Radio San Juan, Inc. Req: Change output frequency to Channel 285, 104.9 MHz.

BPFT-434 (new), Peterson, Minn., Peterson Good News Translators, Inc. Req: Channel 257, 99.3 MHz, 10 watts. Primary: WWIB-FM, Ladysmith, Wis.

BPFT-435 (new), Morris, Minn., Minnesota Public Radio, Inc. Req: Channel 257, 99.3 MHz, 10 watts. Primary: KSJR-FM, Collegeville, Minn.

BPFT-436 (new), Marquette, Mich., Taconite Broadcasting, Inc. Req: Channel 288, 105.5 MHz, 10 watts. Primary: WMQT-FM, Ishpeming, Mich.

BPFT-437 (new), Carlin, Nev., Carlin TV District. Req: Channel 240, 95.9 MHz, 10 watts. Primary: KSRN-FM, Reno, Nev.

BPFT-438 (new), Newcastle, Wyo., Midland Broadcasting Company of Wyoming. Req: Channel 296, 107.1 MHz, 1 watt. Primary: KOLL-FM, Gillette, Wyo.

BPFT-439 (new), Ashland and Washburn, Wis., Chequamegon Christian Message, Inc. Req: Channel 265, 100.9 MHz, 10 watts. Primary: WWIB-FM, Ladysmith, Wis.

BPFT-440 (new), Hanover, Pa., Calvary Bible Church of Hanover. Req: Channel 228, 93.5 MHz, 1 watt. Primary: WRBS-FM, Baltimore, Md.

BPFT-441 (new), Stevens Point and Plover, Wis., Central Wisconsin Inspirational Radio. Req: Channel 261, 100.1 MHz, 10 watts. Primary: WWIB-FM, Ladysmith, Wis.

BPFT-442 (new), Hurricane, Utah, Julie P. Miner. Req: Channel 269, 101.7 MHz, 10 watts. Primary: KDXU-FM, St. George, Utah.

BPFT-443 (new), Waynesboro, Va., The Louisa Area Christian Radio Association. Req: Channel 257, 99.3 MHz, 1 watt. Primary: WIVE-FM, Ashland, Va.

UHF TV TRANSLATOR APPLICATIONS

BPTT-3266 (new), Eugene, Oreg., State Of Oregon Acting By and Through The State Board Of Higher Education. Req: Channel 68, 794–800 MHz, 100 watts. Primary: KOAC-TV, Corvallis, Oreg.

BPTT-3267 (new), Glide Sutherlin, Oakland and Winchester, Oreg., State Of Oregon Acting By and Through The State Board Of Higher Education. Req: Channel 68, 794–800 MHz, 100 watts. Primary: KOAC-TV, Corvallis, Oreg.

BPTT-3268 (new), Scottsburgh, Oreg., State Of Oregon Acting By and Through The State Board Of Higher Education. Req: Channel 68, 794–800 MHz, 100 watts. Primary: KOAC-TV, Corvallis, Oreg.

BPTT-3269 (new), Klamath Falls, Oreg., Southern Oregon Education Company. Req: Channel 22, 518–524 MHz, 100 watts. Primary: KSYS-TV, Medford, Oreg.

BPTT-3270 K74DW Toole, Glacier and Liberty Counties, Mont., East Butte TV Club, Inc. Req: Change primary TV station to CHAT-TV, Channel 6, Medicine Hat, Alberta, Canada.

BPTT-3272 (new), Dryden, Wash., Upper Wenatchee Valley Television Association. Req: Channel 57, 728–734 MHz, 20 watts. Primary: KSPS-TV, Spokane, Wash.

BPTT-3281 W49AB York, Pa., Newhouse Broadcasting Corp. Req: Change frequency to Channel 62, 758–764 MHz.

BPTT-3282 (new), Crossville, Tenn., WCPT-TV, Inc. Req: Channel 20, 506–512 MHz, 100 watts. Primary: WCPT-TV, Crossville, Tenn.

BPTT-3283 (new), Mullin, Tex., Pompey Mountain Broadcasting, Inc., Req: Channel 63, 764–770 MHz, 100 watts. Primary: KTXS-TV, Sweetwater, Tex.

BPTT-3284 (new), Mullin, Tex., Pompey Mountain Broadcasting, Inc. Req: Channel 65, 776–782 MHz, 100 watts. Primary: KRBC-TV, Abilene, Tex.

BPTT-3286 (new), Mullin, Tex., Pompey Mountain Broadcasting, Inc. Req: Channel 69, 800–806 MHz, 100 watts. Primary: KTBC-TV, Austin, Tex.

BPTT-3287 (new), Grand Marais, Minn., Channel 10, Incorporated. Req: Channel 61, 752–758 MHz, 100 watts. Primary: WDIO-TV, Duluth, Minn.

BPTT-3288 (new), Grand Portage, Minn. Channel 10, Incorporated. Req: Channel 69, 800–806 MHz, 100 watts. Primary: WDIO-TV, Duluth, Minn.

BPTT-3289 (new), Kilauea Military Camp, Hawaii. Hawaii Public Broadcasting Authority. Req: Channel 61, 752–758 MHz, 100 watts. Primary: KMEB-TV, Wailuku, Hawaii.

BPTT-3290 (new), Naalehu, Hawaii, Hawaii Public Broadcasting Authority. Req: Channel 63, 764–770 MHz, 10 watts. Primary: KMEB-TV, Wailuku, Hawaii.

BPTT-3291 (new), Pahala, Hawaii, Hawaii Public Broadcasting Authority. Req: Channel 67, 788–794 MHz, 100 watts. Primary: KMEB-TV, Wailuku, Hawaii.

VHF TV TRANSLATOR APPLICATIONS

BPTTV-5838 (new), Coolin, Nordman and Surrounding Priest Lake Area, Idaho. Priest Lake Translator District. Req: Channel 5, 76–82 MHz, 10 watts. Primary: KSPS-TV, Spokane, Wash.

BPTTV-5839 (new), Coolin, Nordman and Surrounding Priest Lake Area, Idaho. Priest Lake Translator District. Req: Channel 8, 180–186 MHz, 10 watts. Primary: KREM-TV, Spokane, Wash.

BPTTV-5840 (new), Coolin, Nordman and Surrounding Priest Lake Area, Idaho. Priest Lake Translator District. Req: Channel 10, 192–198 MHz, 10 watts. Primary: KXLY-TV, Spokane, Wash.

BPTTV-5841 (new), Coolin, Nordman and Surrounding Priest Lake Area, Idaho. Priest Lake Translator District. Req: Channel 12, 204–210 MHz, 10 watts. Primary: KHQ-TV, Spokane, Wash.

FM BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: July 22, 1977.

Released: August 4, 1977.

Notice is hereby given, pursuant to section 1.573(d) of the Commission's rules, that on September 21, 1977, the FM broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to section 1.227(b)(1) and section 1.591(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on September 20, 1977, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on September 20, 1977. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to section 1.573(d) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending FM broadcast applications, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to section 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[Report No. I-372]

INTERNATIONAL AND SATELLITE RADIO APPLICATIONS ACCEPTED FOR FILING

AUGUST 1, 1977.

The Applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's Rules, Regulations and its Policies. Final action will not be taken on any of these applications earlier than 31 days following the date of this notice. Section 309(d)(1).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

SATELLITE COMMUNICATIONS SERVICES:

560-DSE-P/L-77 Heritage Village Church and Missionary Fellowship, Inc., Charlotte, N.C. For authority to construct a transmit/receive satellite earth station at this location. Lat. 35°08'05", Long. 80°51'27". Rec. freq: 3700–4200 mHz. Trans. freq: 5925–6425 MHz. Emission 36000F9. With a 10 meter antenna.
561-DSE-P/L-77 Florida Cabletelevision, Inc., Broward County, Fla. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 26°07' 14", Long. 80°10'34". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 10 meter antenna.
562-DSE-P/L-77 Opp Cabletelevision, a Division of the Utility Board, Opp, Al. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 31°15'55", Long. 86°17'45". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 6 meter antenna.
563-DSE-P-77 Lakeland Cablevision, Inc., Detroit Lakes, Minn. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 46°50'43", Long. 95°50'51". Rec. freq: 3700–4200 MHz. Emission (none listed). With a 5 meter antenna.
566-DSE-ML-77 KCCS-TV Cable, Inc., Valdez, Ala. Modification of license to permit the reception of signals of WTCG-TV, Channel 17, Atlanta, Georgia, WYAH-TV Channel 27, Portsmouth, Va.

The following Cox Cable Communications, Inc. applications are requesting modification of license to permit the reception of signals from stations: WTCG-TV, Channel 17, Atlanta, Ga., WYAH-TV, Channel 27, Portsmouth, Va. and signals of the Madison Square Garden Event.

568-DSE-ML-77 KB99 Spokane, Wash.
569-DSE-MP/L-77 KD55 El Cajon, Calif.
570-DSE-ML-77 WB90 Roanoke, Va.
571-DSE-ML-77 WB75 Manchester, Conn.
572-DSE-ML-77 KB64 Lubbock, Tex.
573-DSE-ML-77 KB86 Lamont, Calif.
574-DSE-ML-77 WB51 Saginaw, Mich.
575-DSE-P/L-77 Fox Cities Communications, Inc., Appleton, Wis. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 44°14' 42". Long. 88°23'46". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 5 meter antenna.
576-DSE-P-77 Frank Caliri, dba. Gavilan Communications, Gilroy, Calif. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 37°01'26", Long. 121°29'07". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 5 meter antenna.
577-DSE-P/L-77 Greer Associates, Greer, S.C. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 34°56'22", Long. 82°15'13". Rec. freq: 3700–4200 MHz. Emission 36000-F9. With a 5 meter antenna.
579-DSE-P/L-77 RCA American Communications, Inc., Wallops Island, Va. For authority to construct and operate channels of communication by means of a transmit-only communications satellite earth station at this location for operation with a domestic communications satellite system. Trans. freq: 5925–6425 MHz. Emission 36000F9. With an 11 meter antenna.
580-DSE-P/L-77 Starkville TV Cable Co. Starkville, Miss. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 33°26'58", Long. 88°46' 23". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 5 meter antenna.
581-DSE-R-77 American Satellite Corp. (WB27), Vernon Valley, N.Y. Renewal of license for this fixed earth station to: 8-29-80.
582-DSE-R-77 American Satellite Corp. (KB25), Murphy, Tex. Renewal of license for this fixed earth station to: 8-29-80.
583-DSE-R-77 American Satellite Corp. (KB26), Nuevo, Calif. Renewal of license for this fixed earth station to: 8-29-80.
584-DSE-P/L-77 Norman Cable TV, Inc., Norman, Okla. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 35°13'39", Long. 97°27' 07". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 4.2 meter antenna.
567-DSE-MP/L-77 Cox Cable Communications, Inc. (WE21), Pensacola, Fla. Modification of construction permit/license to permit the reception of signals of the Madison Square Garden Events.
578-DSE-ML-77 Gillis G. Conoley (KD41), Taylor, Tex. Modification of license to permit the reception of signals from WYAH-TV, Channel 27, Portsmouth, Va.
585-DSE-P/L-77 Wood River Cable-Vision, Inc., Ketchum, Idaho. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 43°41' 01", Long. 114°22'03". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
586-DSE-P/L-77 West Texas Microwave Co., Midland, Tex. Forauthority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 31°53'44", Long. 102°24' 55". Rec. freq: 3700–4200 MHz. Emission 36000F9. With a 10 meter antenna.

STANDARD BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: July 22, 1977.

Released: July 29, 1977.

Notice is hereby given, pursuant to Section 1.571(c) of the Commission's Rules, that on September 5, 1977, the standard broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to Section 1.227(b)(1) and Section 1.591(b) of the Commission's Rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on September 5, 1977, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the Offices of the Commission in Washington, D.C. by the close of business on September 5, 1977. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in

the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to Section 1.571(c) of the Commission's Rules.

The attention of any party in interest desiring to file pleadings concerning any pending standard broadcast applications, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to Section 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION
VINCENT J. MULLINS,
Secretary.

FEDERAL HOME LOAN BANK BOARD

[H.C. No. 230]

GENERAL OHIO S&L CORP.

Receipt of Application for Permission To Acquire Control of Central Savings and Loan Co.

AUGUST 2, 1977.

Notice is hereby given that the Federal Savings and Loan Insurance Corporation has received an application from General Ohio S&L Corporation, Columbus, Ohio, a multiple savings and loan holding company, for approval of acquisition of control of The Central Savings and Loan Company, Columbus, Ohio, an insured institution, under the provisions of Section 408(e) of the National Housing Act, as amended (12 U.S.C. 1730a(e)), and Section 584.4 of the Regulations for Savings and Loan Holding Companies, said acquisition to be effected by a purchase of the entire outstanding stock of the Central Savings and Loan Company by General S&L Corporation. Following said acquisition, it is proposed that the Railroad Savings and Loan Company, an insured subsidiary of General Ohio S&L Corporation, be merged into The Central Savings and Loan Company. Comments on the proposed acquisition should be submitted to the Director, or Deputy Director, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, on or before September 6, 1977.

J. J. FINN,
Secretary, Federal Home Loan Bank Board.

FEDERAL MARITIME COMMISSION

PORT OF SEATTLE AND PACIFIC ALASKA LINE INC.

Notice of Agreements Filed

Notice is hereby given that the following agreements have been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 25, 1977. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:

H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Agreements Nos. T-3499 and T-3500 between the Port of Seattle (Seattle) and Pacific Alaska Line, Inc., (Pacific) provide for five-year renewable leases to Pacific of certain terminal facilities located at Terminal 105, Seattle, Washington. Agreement No. T-3499 grants to Pacific the lease of land, submerged land, pier and dock facilities in exchange for a monthly rental of $15,811. Agreement No. T-3500 grants to Pacific the lease of land and office space in exchange for a monthly rental of $705. The leased facilities are described in detail in the respective agreements and will be used by Pacific in connection with its maritime commerce activities.

Although these agreements may not be subject to section 15 of the Shipping Act, 1916, interested parties are given an opportunity to comment thereon if they so desire.

By order of the Federal Maritime Commission.

Dated: August 2, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. CI77-641]

ARKANSAS LOUISIANA GAS CO. vs. DYCO PETROLEUM CORP.

Petition for Declaratory Order

JULY 27, 1977.

Take notice that on July 12, 1977 Arkansas Louisiana Gas Company (Petitioner), which has its principal place of business at the Slattery Building, Shreveport, Louisiana, filed in Docket No. CI77-641 a petition for a declaratory order pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR § 1.7(c)).

On July 7, 1970 Petitioner executed an agreement with McCulloch Oil Corporation (McCulloch) whereby Petitioner agreed to purchase and McCulloch agreed to sell natural gas. A certificate of public convenience and necessity pertaining to this contract was issued to McCulloch by the Federal Power Commission on February 18, 1972 in Docket No. CI71-87.

Petitioner states that Dyco operates a certain well covered under the above-described contract pursuant to a farmout arrangement with McCulloch. Petitioner further alleges that Dyco has refused to deliver to it gas from a certain well subject to the contract and that Dyco intends to sell such gas on the intrastate market. Petitioner states that, inasmuch as sales from the subject well are dedicated in interstate commerce, Dyco must continue to sell the gas to Petitioner unless or until Dyco secures from the Commission abandonment authorization pursuant to Section 7(b) of the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 22, 1977, file with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with Section 1.8 of the Commission's Rules of Practice and Procedure (18 C.F.R. § 1.8).

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22518 Filed 8-4-77;8:45 am]

[Docket Nos. E-7631, E-7633 and E-7713]

CITY OF CLEVELAND, OHIO v. CLEVELAND ELECTRIC ILLUMINATING CO.

Order in Compliance With Court Opinion Requiring Further Briefs

JULY 26, 1977.

On July 1, 1977, the U.S. Court of Appeals for the District of Columbia Circuit in *City of Cleveland et al.* v. *Federal Power Commission* ____ F.2d ____ (1977) (Case No. 73-1282) issued an "Opinion On Motion For An Order Directing Compliance With Mandate." That Opinion requires the Commission to expand the remanded proceedings in this docket to cover the issue of whether a prior oral agreement existed as to the energy rates, as well as demand rates (i.e. ratchet clause, which rendered void the January 20, 1970, letter agreement as amended covering load transfer service between Cleveland Electric Illuminating Company (CEI) and the City of Cleveland, Ohio (Cleveland) between February 4, 1970, and May 17, 1972. The Court thus modified the Commission's November 5, 1976, and January 5, 1977, orders in this docket which limited the proceedings on remand from the Court's previous decision herein[1] to the issue of whether or not there was a pre-existing oral agreement as to the demand charges for load transfer service which voided the January 20, 1970, letter agreement, as amended; particularly the ratchet clause contained therein.

Accordingly, the Commission shall establish dates for submission of supplemental briefs on the "energy charge" issue as set forth above and in the Court's July 1, 1977 opinion. Pending receipt of and consideration of these supplemental briefs, the Commission shall defer action on Cleveland's June 8, 1977, application for rehearing of Opinion No. 644-B ____ FPC ____ issued May 9, 1977, in this proceeding.[2]

The Commission orders: (A) On or before August 17, 1977, all parties shall file Initial Briefs regarding the "energy charge" issue. On or before September 19, 1977, all parties shall file responding briefs on the "energy charge" issue.

(B) The Secretary shall ensure that this order is promptly published in the FEDERAL REGISTER.

By the Commission.

Lois D. Cashell,
Acting Secretary.

[FR. Doc.77-22517 Filed 8-4-77;8:45 am]

[Docket No. ER77-175]

FLORIDA POWER & LIGHT CO.

Order Denying Motion for Reconsideration

JULY 26, 1977.

On June 28, 1977, Florida Power and Light Company (FP&L) filed a document entitled "Application . . . For Rehearing" in which it requests rehearing of the May 31, 1977 order[1] issued in this docket.

The May 31 order was issued in response to FP&L's "Application For Rehearing" of our April 12, 1977 order in this docket. As we indicated in our May 31, 1977 order, Section 1.34 of the Commission's Rules of Practice and Procedure requires a final decision or order before an application for rehearing can lie. Since the April 12, 1977 order was interlocutory, no application for rehearing was permitted. However, the Commission treated the application as a motion for reconsideration and considered the merits of FP&L's filing. We see no need to treat this application any differently.

The single argument raised by FP&L in this application was similarly raised in its prior application as well as in its Response to the Petition to Intervene of New Smyrna Beach. The argument was discussed in both the April 12 order and the May 31 order. We reiterate our statement contained in the May 31 order: "Repetition of an argument previously rejected in a Commission order is not a ground for reconsideration of that order."

[1] *City of Cleveland et al.* v. *F.P.C.* 525 F. 2d 845 (CADC 1976).

[2] By order issued July 8, 1977, ____ FPC ____ (1977) in this proceeding, the Commission granted rehearing of Opinion No. 644-B for purposes of further consideration.

[1] Order Granting Motion For Reconsideration and Establishing Procedures.

The Commission finds: (1) FP&L's arguments, allegations, and contentions in its filing of June 28, 1977 raise no issues of fact or law not considered when this Commission issued its May 31, 1977 order in this proceeding.

(2) Good cause does not exist to reconsider the Commission's May 31, 1977 order.

The Commission orders: (A) FP&L's motion for reconsideration is hereby denied.

(B) The Secretary shall cause the prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22516 Filed 8-4-77;8:45 am]

[Docket No. ER77-438]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 26, 1977.

Take notice that Niagara Power Corporation (Niagara), on July 7, 1977, tendered for filing as a rate schedule, an agreement between Niagara and Consolidated Edison Company of New York, Inc. (Con Ed) dated April 12, 1977.

Niagara indicates that there is presently on file an agreement with Con Ed dated February 14, 1975, and this agreement is designated as Niagara Mohawk Power Corporation Rate Schedule FPC No. 90. Niagara states that the new agreement is being submitted as a supplement to the existing agreement.

According to Niagara this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-437]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 26, 1977.

Take notice that Niagara Mohawk Power Corporation (Niagara), on July 7, 1977, tendered for filing as a rate schedule, an agreement between Niagara and Long Island Lighting Company (LILCO), dated April 12, 1977.

Niagara states that there is presently on file an agreement with LILCO dated February 14, 1975, and that this agreement is designated as Niagara Mohawk Power Corporation Rate Schedule FPC No. 91. Niagara further states that the new agreement is being submitted as a supplement to the existing agreement.

According to Niagara this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22508 Filed 8-4-77;8:45 am]

[Docket No. CP77-507]

NORTHWEST PIPELINE CORP.

Application

JULY 26, 1977.

Take notice that on July 13, 1977, Northwest Pipeline Corporation (Applicant), 315 East Second South, Salt Lake City, Utah 84111, filed in Docket No. CP77-507 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1978, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers and other similar sellers thereof, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $10,500,000 with no single project to exceed $1,500,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22506 Filed 8-4-77;8:45 am]

[Docket No. ER76-826]

PENNSYLVANIA POWER & LIGHT CO.

Certification of Settlement Agreement

JULY 26, 1977.

Take notice that Presiding Administrative Law Judge Nahum Litt on June 28, 1977, certified to the Commission a settlement agreement entered into between Pennsylvania Power & Light Company (PP&L) and certain resale customers of PP&L who are intervenors in the proceedings in the above-noted docket: the Boroughs of Ephrata, Quakertown, Watsontown, Perkasie, St. Clair, Hatfield, Catawissa, Lehighton, Weatherly and Schiyekill Haven, Pennsylvania, and Citizens Electric Company of Lewisburg, Pennsylvania (customers).

The Presiding Judge indicates that PP&L states that the customers and PP&L have agreed to the settlement agreement. The Presiding Judge further indicates that PP&L states that it believes that the Commission Staff will support the settlement agreement.

Any person who wishes to comment on the settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before August 12, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22511 Filed 8-4-77;8:45 am]

[Docket No. ER77-402]

PHILADELPHIA ELECTRIC CO.

Order Accepting for Filing Proposed Rate Schedules, Denying Motion To Reject, Suspending Proposed Rate Schedules, Granting Intervention, and Establishing Procedures

JULY 26, 1977.

On May 27, 1977, Philadelphia Electric Company (PE) tendered for filing proposed changes in its Electric Service Tariff, applicable for service to the Borough of Lansdale, Pennsylvania, (Lansdale). PE indicates that the proposed changes would increase revenues from jurisdictional sales and service by $2,133,792 (222%) based on the 12-month period ending June 30, 1978. PE requests its filing be made effective July 27, 1977.

Notice of tendered filing was issued on June 10, 1977, with all protests or petitions to intervene due on or before June 17, 1977.

On June 14, 1977, Lansdale filed a motion to extend the time for filing petitions to intervene or protest to the proposed tariff changes. The Commission granted such extension until July 1, 1977. On that date, Lansdale filed a Motion to Reject, Protest and Petition to Intervene.

In support of its motion to reject, Lansdale asserts that PE's filing fails to comply with Section 35.13 of the Commission's Rules and Regulations in that PE has not supplied certain required statements and workpapers in support of its rate increase proposal.

Lansdale also challenges PE's proposed auxiliary service provision as being anti-competitive and discriminatory in effect on Lansdale, and argues that the provision attempts to virtually isolate Lansdale from any economically feasible alternatives other than full-requirements service by PE. Lansdale urges that the effectiveness of this provision be deferred pending final Commission determination on the matter. In the alternative, Lansdale requests a full five-month suspension period.

On July 11, 1977, PE filed an answer opposing the motion to reject, arguing for no more than a one-day suspension. PE argues as to the necessity of its rate increase, the sufficiency of the workpapers, and the fairness of the auxiliary service provision.

We will not reject PE's filing. As noted in *Municipal Light Boards* v. *FPC*, 450, F 2d 1341, 1346 (1971):

> A "rejection" of a filing . . . is more like a motion to dismiss on the face of the pleading and indeed goes even beyond that. It is appropriate where the filing is so deficient on its face that the agency may properly return it to the filing party without even waiting a responsive filing by any other Party.

In this case, PE's filing is not deficient on its face. A preliminary review of the Company's proposal indicates that the filing has not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, or preferential or otherwise unlawful. Hearing procedures will be established to determine the lawfulness of this filing.

The Commission finds: (1) Good cause exists to deny the motion to reject and to accept for filing and suspend the proposed rates tendered by the Company on May 27, 1977, as hereinafter ordered.

(2) The participation in this proceeding of the Borough of Lansdale may be in the public interest.

The Commission orders: (A) The proposed increased rates and changes tendered by PE on May 27, 1977, are hereby accepted for filing.

(B) The motion to reject filed by the Borough of Lansdale is denied.

(C) The Borough of Lansdale is hereby permitted to intervene in the proceeding, subject to the Rules and Regulations of the Commission. *Provided, however*, that the participation of such intervenor shall be limited to matters affecting the rights and interests specifically set forth in its petition to intervene; and *provided further*, that the admission of such intervenor shall not be construed as recognition that it might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(D) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the filing tendered by PE in this proceeding.

(E) Pending such hearing or decision thereon, the increased rates and charges tendered by the Company on May 27, 1977, are hereby suspended and the use thereof deferred for one day until July 28, 1977, when they shall become effective subject to refund.

(F) The Secretary shall cause prompt publication of this Order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22519 Filed 8-4-77;8:45 am]

[Docket No. ER77-503]

PUBLIC SERVICE CO. OF COLORADO

Proposed Tariff Change

JULY 26, 1977.

Take notice that Public Service Company of Colorado (PSCO) on July 5, 1977 tendered for filing proposed changes in its FPC Electric Service Tariff. PSCO states that the proposed change is Supplement No. 9 (Supplement) to PSCO's Contract for Interconnections and Transmission Service with the United States Department of the Interior, Bureau of Reclamation, Pick-Sloan Missouri Basin Program—Western Division, Colorado River Basin Project (USBR), on file with the Commission under PSCO's FPC Rate Schedule No. 7.

PSCO indicates that the Supplement, dated June 30, 1976, grants PSCO further extension of the termination date of its Temporary Tap (Henderson Temporary Point of Delivery) to the Green Mountain-Summit 115 kV Transmission line of the USBR. PSCO also indicates that the Supplement also establishes procedures for sectionalizing the USBR's Green Mountain Facilities and/or Hayden-Green Mountain 138 kV Transmission line in the event of an overload condition. In addition, PSCO indicates, the Supplement provides transmission service by the USBR to PSCO at the Loveland Boyd-East Sub and West Tap.

PSCO states that copies of the filing were served upon all parties and affected state commissions.

Anyone desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedures (18 CFR 1.8, 1.10). All such protests or petitions should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,

[Docket No. ER77-504]

PUBLIC SERVICE CO. OF COLORADO

Tariff Change

JULY 26, 1977.

Take notice that Public Service Company of Colorado (PSCO) on July 5, 1977 tendered for filing proposed changes in its FPC Electric Service Tariff. PSCO states that the proposed change is an Agreement between the Colorado-Ute Electric Association, Inc. (Colorado-Ute) and PSCO. PSCO further states that the Agreement supplements and will be operated consistent with the principles of the Power Purchase and Transmission Service Agreement between Colorado-Ute and PSCO, dated October 9, 1967, on file with the Commission under PSCO's FPC Rate Schedule No. 12.

PSCO indicates that the Agreement provides for the interconnection of elec-

trical facilities of Colorado-Ute and PSCO at PSCO's Boone Substation. PSCO further indicates that the interconnection is of mutual benefit in that it delays the necessity for each company to build addition 230 kV transmission line capacity between Midway Substation and Boone Substation.

PSCO requests waiver of the Commission's notice requirements to allow for an effective date of April 9, 1976.

PSCO states that copies of the filing were served upon all parties to the Agreement and the affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests or petitions should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriation action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP76-428]

SEA ROBIN PIPELINE CO.

Filing of Original Tariff Sheets

JULY 21, 1977.

Take notice that on July 6, 1977, Sea Robin Pipeline Company (Sea Robin) tendered for filing Original Sheet Nos. 235 through 258 to its FPC Gas Tariff, Original Volume No. 2, being a transportation agreement between Sea Robin and Mid Louisiana Gas Company dated June 14, 1976. It is proposed that these tariff sheets become effective on the date the facilities to connect East Cameron Block 335 are completed, and the transportation service certificated in Docket No. CP76-428 commences.

The Company states that copies of these tariff sheets have been mailed to Mid Louisiana Gas Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP76-428]

SEA ROBIN PIPELINE CO.

Filing of Original Tariff Sheets

JULY 21, 1977.

Take notice that on July 6, 1977, Sea Robin Pipeline Company (Sea Robin) tendered for filing Original Sheet Nos. 283 through 307 to its FPC Gas Tariff, Original Volume No. 2, being a transportation agreement between Sea Robin and United Gas Pipe Line Company dated June 11, 1976. It is proposed that these tariff sheets become effective on the date the facilities to connect East Cameron Block 335 are completed and the transportation service certificated in Docket No. CP76-428 commences.

The Company states that copies of these tariff sheets have been mailed to United Gas Pipe Line Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22513 Filed 8-4-77;8:45 am]

[Docket No. ER77-424]

SOUTHWESTERN PUBLIC SERVICE CO.

Rate Filing

JULY 27, 1977.

Take notice that on July 5, 1977, the Southwestern Public Service Company (Southwestern) of Amarillo, Texas, tendered for filing a new contract and rate schedule for electric power service to the City of Canadian, Canadian, Texas. Southwestern indicates that this service would be rendered through Southwestern's 115 kV and 69 kV transmission line to its connection with North Plains Electric Cooperative, Inc. (North Plains), from which point the power and energy would be wheeled over North Plains' 69 kV and 12.5 kV lines to connect with the City of Canadian's distribution system, the connection thereto being the metering point and point of service.

Southwestern states that Canadian is a partial-requirements customer and the new contract for firm power requires Canadian to negotiate firm power requirements one year in advance for better planning of high cost plant additions by Southwestern.

Southwestern states that the base cost of fuel adjustment is set at 9 mills per kWh and provides for a 4.4% loss adjustment to the point of the sale.

Southwestern requests the Commission to waive the 30 day notice requirement and make the proposed new rate effective on June 1, 1977.

Any person desiring to be heard or to protest said filing shall file with the Federal Power Commission, Washington, D.C. 20426, protests or petitions to intervene in accordance with the requirements of the Commission's Rules of Practice (18 CFR 1.8 or 1.10). All protests or petitions to intervene must be filed on or before August 12, 1977. All protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene in accordance with the Rules of Practice and Procedure. This filing is on file with the Commission and available for public inspection.

[Docket Nos. ER76-303 and ER76-399]

WISCONSIN ELECTRIC POWER CO. AND WISCONSIN MICHIGAN POWER CO.

Order Denying in Part and Granting in Part Petitions for Rehearing

JULY 26, 1977.

On April 29, 1977, this Commission issued an Order on Reconsideration in the above-captioned proceeding. In our order we determined that Wisconsin Michigan Power Company's (the Company's) service contracts with the Town of Florence, the City of New London and the City of Shawano (the Cities) permit the Company to file unilateral rate increases, but that such increases may not surpass the rate level of the Company's large user (industrial) retail rate. Applications for Rehearing of the order were filed on May 27, 1977, by the Company and on May 31, 1977, by the Cities.[1] On June 24, 1977, the Commission issued a Notice of Intent to Act. The Company filed on June 27, 1977, a motion requesting stay of its filing and refund obligations, as set forth in ordering paragraph (B) of the Order on Reconsideration, pending Commission action of the

[1] The Notice of Intent to Act, issued June 24, 1977, stated incorrectly that the Cities' Application was untimely filed. Thirty days after issuance of the Order on Reconsideration was May 29, which was a Sunday; May 30 was a legal holiday. Under Section 1.13 of the Commission's Rules of Practice and Procedure, therefore, the period for applications for rehearing ran through May 31.

applications for rehearing. The Company's motion was granted by order issued June 30, 1977. For the reasons set forth below, we shall deny the Company's application and shall grant in part and deny in part the Cities' application for rehearing.

REHEARING APPLICATION OF THE COMPANY

In its Application for Rehearing Wisconsin Michigan takes exception to the Commission's finding that the contracts in question impose as a ceiling on wholesale rates the industrial retail rate in effect at the time of the filing. The Company argues that the Commission erred in disregarding two contractual doctrines: (1) In a contract involving mutual promises the inability of one party to perform as promised, although through no fault of his own, constitutes a failure of consideration relieving the other party of his obligation to perform as reciprocally promised; and (2) a contract may be modified by a subsequent course of dealing between the parties.

The Company is reiterating an argument raised in its earlier Answer to Motion for Reconsideration[2] and dealt with in our Order on Reconsideration, issued April 29, 1977.[3] The assertion is that, since the contracts[4] with the petitioning Cities were entered into prior to the imposition of this Commission's jurisdiction over wholesale sales, the unforeseen superseding requirement of obtaining this Commission's approval of the Company's wholesale rate filings relieves the municipal customers, by operation of law, of their obligation to "automatically . . . accept" the retail industrial rate. Consequently, the Company reasons, Wisconsin Michigan is relieved of its reciprocal obligation to offer automatically to the municipal customers a rate equivalent to the industrial retail rate level.

In a case involving a contract clause very similar to that in the instant proceeding, the District of Columbia Circuit Court of Appeals addressed the impact on contract terms of a superseding regulatory authority. In *Anderson Power and Light* v. *F.P.C.* (which was consolidated with *Richmond Power and Light* v. *F.P.C.*), 481 F. 2d 490 (1973),[5] Indiana and Michigan Electric Company's (I&M's) contract with Anderson Power and Light (Anderson), a municipally owned electric power company, was entered into in 1957, before the Federal Power Commission's jurisdiction over the sales thereunder was established in 1965.[6] The contract provided, in pertinent part, that I&M would supply electric energy "at the rate and under the provisions of the regularly filed and published tariff selected by the customer (Anderson) and known as Tariff I.P. * * * as long as said tariff is in effect * * *."[7] Tariff I.P. was an industrial retail tariff on file with the Public Service Company of Indiana.[8]

When in 1972 I&M filed with the Federal Power Commission a new rate schedule purporting to increase Anderson's rates above the rate level of the then effective Tariff I.P., the Commission initially reasoned that, in light of its superseding jurisdiction, any references in the contract to the state regulatory commission should simply be read as references to the Federal Power Commission as the new "appropriate regulatory authority." The Commission accordingly interpreted the I&M-Anderson contract in terms of Section 205 of the Federal Power Act and denied motions to reject I&M's filing.

The court in Anderson, while finding fault with the Commission's conclusions, approved the approach: [9]

> The Commission seems to be saying that it is simply interpreting the contract, in light of changed circumstances, to accomplish what the parties intended. And we have no quarrel in principle with this approach to contract interpretation.[10]
>
> * * * * * *
>
> We think that if one is to construe the Anderson–I&M contract, in light of changed circumstances, to reflect as nearly as one can the intentions of the parties to the contract, the only possible result is to construe it as not permitting I&M to change the rate simply by filing a new tariff with the Federal Power Commission.

In interpreting the contract between I&M and Anderson, the court referred to the evident fact that, whether a rate filing is subject to state or federal jurisdiction, the filing is subject to review and approval by the appropriate regulatory commission: [11]

> The issue under Memphis is not whether the parties contemplated change by the appropriate regulatory authority, for *under the law every electric power contract must contemplate such change.* (Emphasis added.)

The court's observation in Anderson is consistent with our position that the changed circumstance of federal [12] rather than state [13] jurisdiction over Wisconsin Michigan's sales to Cities did not materially alter the requisite procedures, as they were understood and intended by the parties, regarding wholesale rate changes. These procedures inherently contemplated the intervening step, required by law, of regulatory review and approval. If, moreover, we are to construe the Cities' contracts with the Company so as best to effectuate, in light of changed circumstances, the intention of the parties, then we cannot jettison a key contractual element—rate parity—on the strength of the assertion, shown to be incorrect, that the change in regulatory jurisdiction rendered the Cities' promised performance impossible.

Rate parity was also a key feature in the I&M-Anderson contract. The court in Anderson observed: "The parties to both the Richmond and the Anderson contracts intended that the municipal buyers receive electricity under the same tariff that governed I&M's industrial retail customers." [14] In reference to the Richmond contract," the court made clear that the parties were perfectly free to impose as a ceiling on the wholesale rate the effective industrial retail rate level.[15]

> The accommodation reached in the contract serves both (parties') interests by permitting I&M to seek changes in its Tariff I P on file with the Public Service Commission of Indiana, but requiring that Richmond be served under the same tariff as that used by I&M for its own industrial retail customers. We see no reason why the integrity of this contractual undertaking is any less deserving of protection under the Act than one for a single fixed rate.

In both the Richmond and the Anderson cases the court's interpretation of the contracts preserved the rate parity concept intended by the contracting parties. In so doing, the court found the fact that Anderson's contract predated this Commission's jurisdiction to be of no substantive significance. Similarly, in

[2] The Cities' Motion for Reconsideration was filed July 14, 1976, in the instant dockets; Wisconsin Michigan's Answer was filed July 29, 1976.

[3] See *Discussion*, mimeo page 10.

[4] The contracts for the three Cities vary somewhat but effectuate the same result. Article III, Section 2 of the contract between the Company and New London, signed on June 21, 1949, states:

> It is hereby agreed and understood that should there be any revision and or change in said Rate VII approved by the Wisconsin Public Service Commission, at any time during the life of this contract, then the Distributor shall under this contract automatically receive and accept such revised rates.

The comparable sections of the contracts with Florence and Shawano are set forth in the Order on Reconsideration, issued April 29, 1977, mimeo page 7.

[11] 481 F. 2d 490, 499.

[12] Wisconsin Michigan's contract with Shawano was entered into in 1934; its contracts with New London and Florence were signed in 1949. In 1952 the Court of Appeals for the Seventh Circuit affirmed this Commission's assertion of jurisdiction over the sales made under these contracts. *Wisconsin Michigan Power Co.* v. *F.P.C.*, 197 F. 2d 472, cert. den. 345 U.S. 934 (1953).

[13] In Wisconsin Michigan, supra, the State of Wisconsin noted that it had in fact regulated the rates in question. 197 F. 2d 472, 479.

[14] Ibid at 501.

[15] The Richmond contract, though entered into after the Federal Power Commission obtained jurisdiction over the sales thereunder, was in all other pertinent respects identical to the Anderson contract. 481 F 2d 490, 498–499.

[16] 481 F. 2d 490, 497.

Opinion No. 432, this Commission concluded: [16]

> We are in accord with the Examiner's view that these agreements are not fixed rate contracts, since they plainly contemplate an escalation arrangment to maintain parity between the rates of the retail users and the wholesale rates.
>
> • • • • •
>
> The contracts as we construe them thus provide for an automatic contractual acceptance of a rate change, subject to the requirements of filing under Section 205 with FPC.
>
> In interpreting these contracts it should be remembered that many changes have intervened in the law and in the power economy since the execution of these contracts in the 1930's. It is not our purpose to reject rate increase filings by hyper-technical interpretation of contract provisions which clearly contemplated a procedure for rate adjustments. On the contrary, the effective exercise of the rate-making powers of this Commission will insure that contractual provisions for rate adjustments can be utilized by the seller in a manner fair to the purchaser.

Thus, the Commission supported the Company's claim [17] 13 years ago that the contracts contemplated parity between the wholesale and the industrial retail rate levels. We fail to see how it can be fair to the purchasers for the Company to disavow the parity provision 13 years later, when, having apparently outlived its usefulness as a floor to wholesale rates, the provision is ostensibly viewed by the Company as a vexatious ceiling.[18]

The Company's allegation that the Commission's Order on Reconsideration in this proceeding is inconsistent with our earlier contract interpretation ruling in Wisconsin Electric Power Company, order issued April 19, 1974, in Docket No. E–8619, is incorrect. Twice in the Order on Reconsideration (mimeo. pages 15, 17) we noted that the conclusion reached in the April 19, 1974 order was accurate as far as it went, but that it was incomplete. The order affirmed the Company's right to file unilateral rate changes, but it made no reference to the rate ceiling affirmed in Opinion No. 432; neither did the pleadings in Docket No. E–8619.

In the event that the Commission does not reverse its Order on Reconsideration on the grounds of failure of consideration, Wisconsin Michigan requests a hearing to develop the evidence on the parties' course of dealing subsequent to the issuance of Opinion No. 432. The Company's request is based on two arguments: (1) The Commission's order constituted an improper summary judgment; (2) in its Answer to Motion for Reconsideration the Company did not have enough time to develop and present the facts regarding the parties' dealings over the last ten years as a background to its legal arguments.

The Company notes that the Commission's conclusions, which were based not on evidence developed at hearing but on factual assertions in the pleadings, constitute summary judgment on the pleadings. The Company correctly states that summary judgment on the pleadings can be entered against it only if the Company's factual version is accepted in all respects. But the Company goes on to contend that summary judgment would not lie for even an "ultimate" conclusion if the conclusion is a "factual conclusion" and is disputed. Its authority is *Sears, Roebuck and Co.* v. *GSA*, No. 75–2127 at 5–8 (D.C. Cir. April 1, 1977). Wisconsin Michigan argues that the Commission has not assumed the accuracy of the Company's "factual conclusion" that the parties' conduct in the last ten years demonstrates that their contracts have been amended in the manner alleged by the Company.

In Sears, Roebuck the factual conclusion at issue was whether the appellant would be commercially harmed by the disclosure of information under the Freedom of Information Act. We believe the more pertnient precedent to be the District of Columbia Circuit's ruling in *Pennsylvania Gas and Water Company* v. *F.P.C.*, 463 F. 2d 1242 (1972), inasmuch as it deals specifically with this Commission's authority to grant summary judgment: [19]

> We find no conflict in fundamental facts calling for a hearing; we do find that the FPC has placed interpretations on and *drawn conclusions from the facts* which differ from those urged by Penn Gas, and that *the Commission's expertise entitled it to do so*, and that it has done so reasonably. (Emphasis added).

The Company's Answer to Motion for Reconsideration consists of nine pages of extensive factual presentation and legal argument plus 24 pages of appendices. The appendices contain: (A) Certain letters exchanged between Wisconsin Michigan and this Commission and from the Company to the Cities; (B) back-up computations for comparative billings of the industrial retail rate in effect in 1974 and the wholesale rate filed in Docket No. E–8619; and (C) similar computations for the industrial retail rate in 1975 and the wholesale rate filed in Docket No. ER76–303. Nowhere in its Answer did the Company suggest that its presentation was incomplete or request a hearing or more time in which to improve its case. Nor has it made any such request in the nearly 12 months which have passed since its Answer was filed.

In the concluding paragraph of its Answer Wisconsin Michigan requested that the Commission deny Cities' motion for reconsideration on the basis that the parties' conduct has modified their contracts in the manner alleged by the Company. In order to have made such a request, the Company must clearly have regarded its presentation as an adequate basis for the Commission to rule thereon.

Wisconsin Michigan points out that in our Order on Reconsideration (mimeo page 14) we remarked on the lack of certain information concerning the precise amount and timing of wholesale filings in relation to industrial retail filings. This circumstance does not, however, invalidate our ultimate conclusion. In the very next sentence we wrote (mimeo pages 14–15):

> But even if we find persuasive the Company's assertion that it no longer look to state approval of its industrial retail rate as the event which triggers an equivalent wholesale filing, the Company has not proven enough.
>
> • • • • •
>
> • • • even if the Company ceased to view the industrial retail rate level and the wholesale rate level as being in lock step, nevertheless it was bound by its contract to set the wholesale rates no higher than the industrial retail rate level.

Thus, even after we assumed the truth of the Company's assertion that it no longer regards the timing and levels of its retail and wholesale filings as being in lock step, we still concluded (contrary to the "ultimate factual conclusion" of the Company) that the parties' conduct had not evidenced a clear intent to dispense with the retail rate ceiling on wholesale rates. We therefore find that the conclusions in our Order on Reconsideration were based on sufficient information and that the order was a proper exercise of this Commission's authority.

REHEARING APPLICATION OF THE CITIES

The Cities request that the Commission modify its Order on Reconsideration to reject the filing in Docket No. ER76–303 with respect to Shawano and New London and to order refunds of all amounts collected under that filing in excess of the previous approved rate. Alternatively, the Cities request that the order be clarified to provide that the refunds ordered therein will be based on the Company's retail industrial rate in effect on November 28, 1975, the date on which the filing in Docket No. ER76–303 was tendered.

The Cities cite a number of cases as authority for their request that the Commission reject Wisconsin Michigan's filing with respect to Shawano and New London. But in three of the cases cited—*Mobile*,[20] *Sierra* [21] and *Sam Rayburn Dam Electric Cooperative* v. *F.P.C.*[22]—the contracts in question were found to be fixed-rate. Accordingly, any unilateral filing by the utility company would have been inconsistent and therefore invalid.

The Cities also cite Richmond (supra). As has been discussed in this order, Richmond (and Anderson) dealt with contracts which tied the wholesale rate to a given retail rate. The court found that I&M's filing which raised the wholesale rate over the retail rate level was inconsistent with its contractual obligations and should have been rejected.[23] We do not, however, read the final paragraph in the court's opinion as reaching the issue of which procedure this Commission must necessarily follow in excising improper rate levels in a Richmond-type filing. The contracts in the instant case give Wisconsin Michigan the right to make unilateral rate filings, but the contracts limit the amount of the rate change. We regard it as unnecessary to reject Wisconsin Michigan's entire filing with respect to Shawano and New London, when only that portion of the filed rate which surpasses the industrial retail rate in effect at the time of the wholesale filing is in violation of the contract restriction. We consequently affirm our Order on Reconsideration requiring the Company to refund to Shawano and New London that portion of the rate which has been found to exceed the contract restriction. We believe this to be the equitable remedy in light of the fact that the Cities did not properly identify and raise their contract restriction argument until several months after Wisconsin Michigan filed the rate change in Docket No. ER76-303.

The Cities do however raise a valid point in their alternative pleading. They note that the Order on Reconsideration is ambiguous as to the industrial retail rate level at which the Company must file its revised tariffs and consequently as to the amount of refunds payable to the Cities. As we held in our previous order, state approval of Wisconsin Michigan's industrial retail rate is the triggering event for the filing of a corresponding wholesale rate. We shall therefore amend finding paragraph (2) and ordering paragraph (B) of our Order on Reconsideration, issued April 29, 1977, to direct Wisconsin Michigan to file revised tariff sheets reflecting rates reduced to the level of the Company's industrial retail rate in effect as of November 28, 1975, and to make appropriate refunds (at 9 percent per annum interest) of any amounts in excess thereof collected after March 1, 1976.

The Commission finds: (1) Good cause exists to deny Wisconsin Michigan Power Company's application for rehearing of our Order on Reconsideration, issued April 29, 1977.

(2) Good cause exists to deny that part of the Cities' application for rehearing which requests the rejection of Wisconsin Michigan's filing in Docket No. ER76–303 as it pertains to the Cities of New London and Shawano.

(3) Good cause exists to grant that part of the Cities' application for rehearing which requests clarification of the Order on Reconsideration as to the industrial retail rate level at which the Company must file its revised tariffs and pay refunds. Finding Paragraph (2) of the Order on Reconsideration, issued April 29, 1977, should be amended to read:

> (2) It is proper and appropriate in the public interest that Wisconsin Michigan Power Company be directed to eliminate from the rates which became effective March 1, 1976, in Docket No. ER76–303, with respect to the Cities of New London and Shawano, that portion which is above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect on November 28, 1975.

The Commission orders: (A) Wisconsin Michigan Power Company's application for rehearing of the Order on Reconsideration, issued April 29, 1977, is hereby denied.

(B) That part of the Cities' application for rehearing which requests the rejection of Wisconsin Michigan's rate filing in Docket No. ER76–303 as it pertains to the Cities of New London and Shawano is hereby denied.

(C) That part of the Cities' application for rehearing which requests clarification as to the industrial retail rate level at which the Company must file its revised tariffs and pay refunds is hereby granted, and Finding Paragraph (2) of the Order on Reconsideration is hereby amended as set forth in Finding Paragraph (3), supra.

(D) Within 60 days of the date of issuance of this order, Wisconsin Michigan Power Company shall file revised tariff sheets reflecting reduced rates to the Cities of New London and Shawano consistent with our findings herein and shall make appropriate refunds at 9 percent per annum interest of any amounts collected after March 1, 1976, which are above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect on November 28, 1975.

(E) Wisconsin Michigan Power Company shall file a report with this Commission attesting to its compliance with the refund obligations imposed in Ordering Paragraph (D), supra, within 15 days of such compliance.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77–22514 Filed 8–4–77;8:45 am]

[16] 31 FPC 1445, 1449 (1964). The Opinion was not appealed.

[17] The Company's position is summarized in our Order on Reconsideration, mimeo page 11, footnote 11.

[18] The Supreme Court has written: But while it may be that the Commission may not normally impose upon a public utility a rate which would produce less than a fair return, it does not folow that the public utility may not itself agree by contract to a rate affording less than a fair return and that, if it does so, it is entitled to be relieved of its improvident bargain [citation omitted]. In such circumstances the sole concern of the Commission would seem to be whether the rate is so low as to adversely affect the public interest • • •. *F.P.C.* v. *Sierra Pacific Power Company*, 350 U.S. 348 (1955).

[Docket No. ER77–521]

ARIZONA PUBLIC SERVICE CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 21, 1977, Arizona Public Service Company (Company) tendered for filing proposed increased rates and charges for jurisdictional sales to six of its customers.[1] The filing would increase the Company's revenues by $937,638, based on the 12-month period ending December 31, 1976.[2] The Company proposes an effective date of September 1, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 21, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on July 21, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commisson order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until February 1, 1978, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77–519]

CLEVELAND ELECTRIC ILLUMINATING CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 20, 1977, Cleveland Electric Illuminating Company (Company) ten-

[1] Electrical District No. 3, Electrical District No. 7, Maricopa County Municipal Water Conservation District No. 1, Buckey Water Conservation and Drainage District, Electrical District No. 8, and Electrical District No. 1.

[2] Rate Schedule Designation to be provided to the Comapny by future letter.

dered for filing proposed modifications to the pooling agreement which contains increased rates and charges for short-term power and system capacity for members of the CAPCO Power Pool.[1] The amount of increase cannot be determined at this time.[2] The Company requests waiver of the notice requirements to permit an effective date of August 1, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unjust.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges in the agreement tendered by the Company on July 20, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges in the agreement tendered by the Company on July 20, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Waiver of the notice requirements is hereby granted.

(D) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until August 2, 1977, when they shall became effective subject to refund.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[Docket Nos. CI75-173, etc.]

GULF OIL CORP.

Order Approving Settlement Proposal

JULY 29, 1977.

Pursuant to Section 7(b) of the Natural Gas Act (15 U.S.C. § 717f(b)), Gulf Oil Corporation (Gulf) filed in the above-mentioned dockets applications (Docket Nos. CI75-173, CI77-131, CI77-149, CI77-199, CI77-255, and CI77-266) for Commission authorization to abandon sales of natural gas, in which Gulf proposed to terminate the present sales as certificated and instead deliver gas from the supplies involved to Texas Eastern Transmission Corporation (Texas Eastern) under Gulf's FPC Gas Rate Schedule No. 278.[1]

The above-entitled proceedings were consolidated and set for hearing by Commission orders issued February 28 and March 14, 1977. Pursuant to an order of the Presiding Administrative Law Judge issued April 28, 1977, a prehearing and settlement conference was held on June 14, 1977, during which Gulf presented a settlement proposal. The proposal was certified to the Commission by Presiding Administrative Law Judge Allen C. Lande on June 15, 1977. Notice of the certification of the settlement proposal was issued on June 22, 1977, and appeared in the FEDERAL REGISTER on June 30, 1977, at 42 FR 33370.

Under the terms of the settlement proposal, Gulf and the current pipeline purchasers will promptly execute short-term renewal contracts which will permit Gulf to collect the applicable renewal contract rate in accordance with the Commission's Regulations for the sales of gas involved in these proceedings. The renewal contracts will provide for a primary term to run until the conclusion of the proceedings in Docket Nos. CI77-95, et al.,[2] and any judicial review thereof, and thereafter the contracts will be in effect for successive secondary monthly terms, subject to termination by either party at the conclusion of the primary term. Upon Commission approval of the settlement proposal Gulf's abandonment applications will be withdrawn without prejudice. If Gulf prevails on its abandonment applications in Docket Nos. CI77-95, et al., then Gulf may terminate the short-term renewal contracts and refile its abandonment applications in the instant proceedings to be heard de novo. If Gulf does not prevail on its applications in Docket Nos. CI77-95, et al., then Gulf and the current pipeline purchasers will enter into new five-year-term renewal contracts if the short-term contracts are terminated.

No objections to the settlement proposal were raised at the prehearing and settlement conference. Written comments on the settlement proposal were filed by Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), Texas Eastern, Algonquin Gas Transmission Company (Algonquin) and the Commission Staff.

Texas Eastern and Algonquin briefly state their support of the settlement proposal.

In its comments, Michigan Wisconsin states that it remains strongly opposed to the original abandonment applications, but that it supports the terms of the settlement proposal in the belief that the public interest will best be served by avoiding the necessity of lengthy and possibly unnecessary proceedings in these dockets, "so long as gas continues to flow to the jurisdictional pipelines which have relied upon Gulf to provide the certificated service for which it has sought abandonment authorization in these proceedings," and so long as the pipelines preserve their right to oppose the abandonment applications in the event that they are refiled under the terms of the settlement proposal.

Staff also opposes the original abandonment applications, but states that it does not oppose the settlement proposal in view of the fact that the issues involved here are essentially similar to those involved in the proceedings in Docket Nos. CI77-95, et al., and in consideration of the possibility of eliminating the time and expense of holding hearings in these proceedings. Staff also emphasizes that "the language of the settlement proposal is to be interpreted to provide that Gulf may collect the Commission's renewal contract rate ceiling for continued sales under the prescribed renewal contracts only in accordance with the Commission's Regulations, and only if permitted by the Commission's Regulations and the Commission's interpretation of its Regulations."

As Staff points out, the settlement proposal submitted by Gulf would essentially serve to postpone the question of the need for a hearing and decision in these proceedings pending judicial review of Opinion No. 799, and would permit Gulf to collect a renewal contract rate in the interim for its continued sales to the present pipeline purchasers from the gas supplies involved. If Gulf does not prevail in a final decision in the other proceedings, it would not press further with the applications involved in these proceedings. If Gulf does ultimately prevail, however, it may refile the instant abandonment applications.

We agree with Michigan Wisconsin and Staff that the prospect of eliminating lengthy, costly, and possibly unnecessary proceedings is a significant factor favoring the adoption of the settlement proposal. Another significant factor is the fact that none of the parties

[1] Pennsylvania Power Co., Toledo Edison Co., Ohio Edison Co., and Duquesne Light Co. are the other members.

[2] Rate Schedule Designations to be provided to the Company by future letter.

[1] Gulf's FPC Gas Rate Schedule No. 278 includes a base contract that has been interpreted by the Commission to be a warranty contract. The warranty contract has been the subject of proceedings in Docket No. CI64-26. See Opinion No. 692, 51 F.P.C. 1340 (1974); Opinion No. 692-A, 52 F.P.C. 503 (1974); Opinion No. 780, issued October 15, 1976; and Opinion No. 780-A, issued December 9, 1976.

[2] Gulf filed similar applications for abandonment authorization in Docket Nos. CI77-95, et al., in which Gulf proposed to terminate presently-certificated sales and instead deliver the gas involved to Texas Eastern under the warranty contract. The Commission denied those abandonments in Opinion Nos. 799, issued May 10, 1977, and 799-A, issued July 6, 1977. Gulf has filed an appeal of Opinion Nos. 799 and 799-A in the U.S. Court of Appeals for the Third Circuit in *Gulf Oil Corp.* v. *F.P.C.*, No. 77-1893.

opposes the settlement proposal. No party alleges that it will suffer undue harm during the period that a final resolution of the proceedings in Docket Nos. CI77-95, et al., is pending, and consequently, we will approve the settlement proposal. Our approval of the settlement proposal is based on our understanding that Gulf will receive the renewal contract rate under the terms of the settlement proposal and the prescribed renewal contracts only if Gulf is otherwise entitled to collect such rate.

The Commission finds: The settlement proposal submitted by Gulf is in the public interest.

The Commission orders: The settlement proposal submitted by Gulf in the above-entitled proceedings on June 14, 1977, and certified to the Commission by Presiding Administrative Law Judge Allen C. Lande on June 15, 1977, is hereby approved.

By the Commission.

[Docket No. ER77-522]

KANSAS CITY POWER AND LIGHT CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 22, 1977, Kansas City Power and Light Company (Company) tendered for filing proposed increased rates and charges for jurisdictional sales to twelve of its customers.[1] The filing would increase the Company's revenues by $2,916,000.00, based on the 12-month period ending June 30, 1978.[2] The Company proposes an effective date of August 31, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges has not been shown to be justified and may be unjust, unreasonable, unduly preferential or discriminatory, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 22, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on July 22, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until January 31, 1978, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-388]

LAKE SUPERIOR DISTRICT POWER CO.

Order Granting Late Intervention

AUGUST 1, 1977.

On May 16, 1977, Lake Superior District Power Company (Lake Superior) submitted for filing proposed contracts for wholesale electric service to Medford Electric Utility and to the City of Wakefield. Notice of this filing was issued on June 6, 1977 with all protests, comments and petitions to intervene due on or before June 13, 1977.

On July 11, 1977, an untimely petition to intervene was filed by the Public Service Commission of Wisconsin.

Upon consideration of the late petition to intervene filed on behalf of this petitioner, the Commission finds that good cause exists to grant the petition to intervene.

The Commission finds: Participation by the above-named petitioner in this proceeding may be in the public interest and good cause exists for permitting such intervention.

The Commission orders: (A) The above-named petitioner is hereby permitted to intervene in this proceeding as hereinbefore discussed, subject to the Rules and Regulations of the Commission; *Provided, however,* That the participation of such intervenor shall be limited to matters affecting rights and interests specifically set forth in the petition to intervene; *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedule heretofore established for the orderly and expeditious disposition of the proceeding.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-211]

MT. CARMEL PUBLIC UTILITY CO.

Extension of Time

JULY 29, 1977

On July 27, 1977, Commission Staff filed a motion to extend the time for filing its response to the Village of Allendale, Illinois, Motion of July 18, 1977, to compel the Mt. Carmel Public Utility Company to comply with the Commission Order issued March 31, 1977, in the above designated docket.

Upon consideration, notice is hereby given that the date for filing responses to the July 18 Motion is extended to and including August 19, 1977.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22586 Filed 8-4-77;8:45 am]

[Docket No. ER77-511]

NEW YORK POWER POOL

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 11, 1977, the New York Power Pool (Pool) tendered for filing proposed superseding New York Power Pool Agreement containing increased rates and charges for Power Pool members.[1] The amount of increase or decrease involved cannot at this time be determined from the change in computation of rates filed by the Pool as it will depend on the mechanics of day-to-day operation.[2] The Pool proposes waiver of the notice requirements to permit an effective date of April 4, 1977. It also requests waiver of filing of statements A through O.

A preliminary review of Pool's filing indicates that the proposed increase in rates and charges has not been shown to be justified and may be unjust, unreasonable, unduly preferential or discriminatory, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Pool on July 11, 1977, as hereinafter ordered.

[1] Missouri Power and Light Company, City of Marshall, Mo., City of Armstrong, Mo., City of Higginsville, Mo., City of Salisbury, Mo., City of Slater, Mo., City of Gardener, Kan., City of Pomona, Kan., City of Prescott, Kan., Missouri Public Service Company, Coffey County Rural Electric Cooperative Association, Inc., United Electric Cooperative, Inc. (Formerly Sugar Valley Electric Cooperative Association, Inc.).

[2] Rate Schedule Designation to be provided to the Company by future letter.

[1] Participants in the Pool include Central Hudson Gas and Electric Corp., Consolidated Edison Co. of New York, Long Island Lighting Co., New York State Electric and Gas Corp., Niagara Mohawk Power Corp., Orange and Rockland Utilities, Inc., Rochester Gas and Electric Corp., Power Authority of the State of New York.

[2] Rate Schedule Designation to be provided to the Company by future letter.

The Commission orders: (A) The proposed increased rates and charges tendered by the Pool on July 11, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Pool.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Pool are hereby suspended and the use thereof deferred until April 5, 1977, when they shall become effective subject to refund.

(D) The Waiver of filing of Statements A through O by the Pool and Waiver of the notice requirements are hereby granted.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22588 Filed 8-4-77;8:45 am]

[Docket No. ER76-739]

PUBLIC SERVICE CO. OF INDIANA, INC.

Order Accepting Notice of Termination of Pooling Agreement for Filing, Granting Waiver of Notice Requirements, Instituting Investigation, Denying Motion To Suspend or To Reject and Granting Interventions

AUGUST 1, 1977.

On June 7, 1976, Public Service Company of Indiana, Inc. (PSCI), filed a notice terminating the Kentucky-Indiana Pool Planning and Operating (KIP) Agreement and all amendments and supplements thereto as of July 1, 1976. The KIP Agreement is presently on file at the Commission as PSCI Rate Schedule FPC No. 225. The instant notice purports to terminate only contractual planning functions pursuant to Section 6.01 of the Agreement. For the reasons hereinafter stated the Commission shall accept PSCI's Notice of Termination for filing, grant a waiver of the statutory thirty day notice requirement making such filing effective as of July 1, 1976, and institute an investigation pursuant to Sections 202, 206 and 307 of the Federal Power Act to determine if such termination is just and reasonable and consistent with the public interest.

Public notice of PSCI's filing was issued for publication in the FEDERAL REGISTER on July 28, 1976, with protests, petitions, or responses due on or before August 20, 1976. On August 20, 1976, the Electric and Water Plant Board of the City of Frankfort, Kentucky (Frankfort) filed a Petition to Intervene, a request for an investigation and motion requesting rejection of PSCI's filing or, in the alternative, suspension of its operation for five months pursuant to Section 205 of the Federal Power Act. On August 20, 1976, the Indiana Municipal Electric Association and the Cities and Towns of Bainbridge; Bargersville; Centerville; Covington; Darlington; Edinburg; Flora; Greendale; Greenfield; Hagerstown; Lawrenceburg Utilities, Lawrenceburg; Lebanon; Linton; Middletown; Paoli; Pendleton; Rising Sun; Rockville; Scottsburg; South Whitley; Thorntown; Tipton; Veedersburg; and the Town of Waynetown, all located in the State of Indiana (IMEA Cities), filed a Petition to Intervene and a request for investigation to determine whether PSCI's filing is in the public interest. Frankfort and IMEA Cities shall hereinafter be referred to as Municipal Intervenors.

Municipal Intervenors state that they are municipal electric utilities purchasing their power from members of KIP.[1] As a result, Municipal Intervenors state that they are likely to be adversely affected if PSCI's costs are increased or reliability of service decreased due to termination of KIP.[2] Frankfort itself states that since it is seeking to enter the bulk supply business, termination of KIP may adversely affect its opportunities to obtain bulk power supply, coordination, joint planning services and necessary support services in the KIP area. Municipal Intervenors also state that their interests are not represented by the persons now parties to the proceeding. Wherefore, Municipal Intervenors respectfully request that they be permitted to intervene in this proceeding.

In their petitions Municipal Intervenors state that PSCI has not supplied the specific information required by 18 C.F.R. § 35.13(a)[3] of the Commission's Regulations, and that the Commission would be "derelict" in carrying out its duties under Section 202(a) of the Act if it did not order an investigation. Frankfort separately requested by motion that the Commission either reject PSCI's filing as insufficient, or in the alternative, suspend its operation for five months pursuant to Section 205 of the Act pending the outcome of an investigation and hearing.

On September 3, 1976, KU and Indianapolis Power and Light Company (IP&L), filed late Petitions to Intervene and Answers in opposition to Municipal Intervenors' prior filings. KU and IP&L state that since they did not contest PSCI's right under the KIP Agreement to terminate joint planning functions, and since they assumed that no entity not a party to KIP had standing to challenge PSCI's action, they did not respond by the Commission's August 20, 1976, intervention deadline. KU and IP&L further state that they did not receive Municipal Intervenor's petitions until August 23, 1976. Accordingly, KU and IP&L respectfully request leave to intervene out of time. The Commission's review indicates that good cause exists to grant KU and IP&L intervention despite their petition being late filed.

On September 7, 1976, PSCI filed a response in opposition to Municipal Intervenors' Petitions to Intervene advancing substantially the same grounds advanced by KU and IP&L[4]. Together, the KIP Companies state that Municipal Intervenors' petitions, and attendant requests, are "substantive nullities" and should be rejected. In support thereof, the KIP Companies state that said intervenors have not demonstrated an interest, pursuant to Section 1.8 of the Commission's Regulations, sufficient to justify granting them intervention; that Frankfort's motion to reject or suspend PSCI's submittal is inappropriate because PSCI's filing does not modify or cancel current rate schedules on file with the Commission covering existing commitments for various transactions under KIP; and that the Commission has no authority under Section 202(a), Section 205 or any other provision of the Federal Power Act to order public utilities to engage in planning activities, to compel regional interconnection and coordination (or planning therefor); or to order the requested investigation and hearing.

The KIP Companies state that Municipal Intervenors are not members of KIP and will not be directly affected by termination of the joint planning functions of KIP. KU and IP&L separately state that since their interests in seeking to minimize costs are identical to Municipal Intervenors', said Intervenors' interests are adequately represented by KU and IP&L.

The KIP Companies further state that since PSCI's action affects only contractual planning functions, not rate schedules or rates and services thereunder, and since physical interconnections among the KIP Companies will remain intact, coincident with the fact that preexisting Interconnection and Pooling Agreements suspended during the effectiveness of KIP, will be reactivated upon its termination, Municipal Intervenor's action in the proceeding" as required by 18 C.F.R. § 1.8(b)(2).

In the sum, the KIP Companies view PSCI's submittal as an informational filing not subject to the requirements of 18 C.F.R. Part 35 governing changes in rate

[1] Frankfort is a total requirements customer of Kentucky Utilities Company (KU). IMEA Cities are total requirements customers of Public Service Company of Indiana, Inc.

[2] Presumably these allegations relate to the impact of PSCI's action on current KIP operations and on existing rate schedules covering transactions under KIP.

[3] By alleging the applicability of 18 C.F.R. § 35.13(a) and Section 205 of the Act, Municipal Intervenors have characterized PSCI's filing as a rate schedule change.

[4] PSCI, KU and IP&L shall hereinafter be referred to as the KIP Companies. East Kentucky Power Cooperative, Inc. is the forth member of KIP, is not a party to this proceeding and is excluded in the foregoing reference.

schedules, and therefore, not subject to rejection or suspension. They point out that KIP was entered into voluntarily consistent with the policy expressed in Section 202(a) of the Federal Power Act, and that the instant filing merely indicates the exercise of a contractual right reserved under the KIP Agreement. PSCI asserts that the KIP Companies' position is supported by the legislative history underlying Sections 202 and 205.

The Commission's review of the filing in this docket indicates that two basic issues exist: whether, pursuant to 18 C.F.R. § 1.8, Municipal Intervenors have standing to intervene and whether the Commission has authority to reject, suspend or institute an investigation regarding PSCI's termination of the joint planning functions of KIP.

The Commission concludes that Municipal Intervenors have met the requirements of 18 C.F.R. § 1.8 and that their intervention may be in the public interest. The Commission believes that as wholesale customers of the KIP companies, said intervenors may be directly affected by proven increased costs, decreased reliability or anticompetitive effects resulting from the instant termination.

Since the KIP Agreement is a rate schedule currently on file at the Commission[5] and since the KIP Companies' commitment to engage in planning, coordination and pooling is a service under that rate schedule, PSCI's June 7 filing purportedly terminating the service, is a rate schedule change within the meaning of Section 2.4 of the Commission's Regulations and is subject to the requirements of Section 205 of the Federal Power Act. Furthermore, PSCI's June 7 filing is the first step in terminating KIP in its entirety since PSCI stated therein that it "will submit notices of termination of the rate schedules attached to the KIP Agreement at the appropriate times." Since the foregoing attached rate schedules were entered into while the KIP Agreement planning provisions were in effect, the Commission's review indicates that customers purchasing electric power under these rate schedules might be required to bear increased costs or reduced reliability of service as a result of PSCI's filing. Consequently, the Commission has an obligation to determine if PSCI's filing is consistent with the standards of Section 205 and 206 of the Federal Power Act, and the Commission's Regulations thereunder.

PSCI's statement in its June 7 filing that contractual planning functions under KIP will terminate "as of July 1, 1976" does not meet the thirty day notice requirement of Section 205(d) of the Federal Power Act. Consequently, implicit in PSCI's filing is a request for waiver of such requirement which request is permitted by Sections 1.7(b), 1.14(a) and 35.11 of the Commission's Regulations. With regard thereto, the Commission notes that the June 7 filing merely purports to terminate the future planning functions of KIP, but does not address, or purport to change, rate schedules underlying KIP. Accordingly, the Commission concludes that good cause exists to waiver the aforesaid notice requirement under its Regulations and to grant PSCI's implicit request, thus assigning an effective date of July 1, 1976, to its June 7 filing.

Attached to PSCI's June 7 filing was a letter dated June 1, 1976, from PSCI's management to the other KIP members which stated the reasons for its actions: "(D)ue to the inability of the parties to agree: (i) Upon the terms and conditions for the inclusion of our two proposed nuclear generating units in the pool, (ii) upon revisions in the KIP Agreement that we feel are financially vital to our Company; and, (iii) upon operating procedures that are financially important to our Company, we have no alternative other than to terminate this KIP Agreement." The Commission shall accept these reasons as meeting the requirements of 18 C.F.R. 35.13(a) for filing purposes and shall accept PSCI's submittal for filing, giving it the effective date of July 1, 1976, stated above. Accordingly, Frankfort's motion requesting rejection of PSCI's filing shall be denied.

Commission review of Municipal Intervenors' request that PSCI's filing be suspended for five months pursuant to Section 205 of the Federal Power Act indicates that a grant of such request is neither warranted by the circumstances surrounding PSCI's filing, nor necessary to carry out Commission responsibilities to protect the public interest under the Act. Accordingly Frankfort's motion requesting a five month, suspension of PSCI's filing shall be denied.

Section 202(a) of the Federal Power Act mandates that "It shall be the duty of the Commission to promote and encourage such interconnection and coordination . . . ". The importance of encouraging coordinated planning and operation of bulk power supply systems has been a cornerstone of Commission policy for many years. In the 1964 National Power Survey, the Commission reviewed the various ways in which coordination can reduce the overall cost of power through savings in reduced reserve requirements, through utilization of larger and more economical bulk power supply facilities, and in other ways. The Commission concluded: "What is now needed is acceleration of the trend toward increasingly comprehensive coordination over expanding geographic areas." In the 1970 National Power Survey, the Commission stated: "The large increase in the electric power requirements anticipated during the next decade makes it imperative that electric utilities accelerate coordinated planning and operations in order to optimize the use of resources and to minimize the environmental impact of electric facilities."

The Commission has broad authority to consider public utility actions touching the "public interest" under all sections of the Federal Power Act, including Section 202(a). See *Gulf States Utilities* v. *F.P.C.*, 411 U.S. 747 (1973). Recognizing this authority and the possible harm to the public interest as a result of the termination of the planning function under the KIP Agreement, the Commission at its meeting of January 4, 1977, directed the staff to meet with representatives of the KIP Pool and representatives of the Municipal Intervenors. Among the matters mentioned for discussion were the reasons for the impending breakup of the pool, the possibilities for keeping the pool in being, the economic effects of termination of the members, and the alternatives available to pool members.

A Notice of Conference was issued on January 6, 1977, and on February 10, 1977, FPC's staff held the meeting, and reported to the Commission at the regular agenda meeting of May 18, 1977, that the information reluctantly elicited was not sufficient to get a clear understanding of the necessity for the termination and its future effects.

As a follow-up to the foregoing effort, the Commission directed staff to contact the East Central Area Commission Reliability Council (ECAR) to determine the impact of termination of KIP on power supply in the region. Staff contacted a number of ECAR officials and reported at the agenda meeting of June 29 that none of the officials contacted were familiar in any detail with the problems within KIP.

Subsequent contacts by Staff with officials of the Kentucky Public Service Commission and Eastern Kentucky Power Cooperative the smallest of the four KIP members, did not shed light on the basis or the public interest effects of PSCI's submittal.

Wherefore, the Commission shall order an investigation of the circumstances surrounding PSCI's filing in order to effectuate its Section 202(a) duties of protecting the public interest and promoting and encouraging voluntary interconnection and coordination. The importance of power pooling for the efficient planning and operation of power systems cannot be questioned thus making the impending breakup of the KIP power pool a matter of the utmost seriousness. It is not enough to know that the KIP members were unable to agree on the treatment of two nuclear units proposed to be built by PSCI. To effectuate its 202(a) responsibilities the Commission must know the extent of the efforts made to preserve the planning functions of this pool, the reasons why they could not be preserved, the alternatives available to pool members, and the extent to which the problems of this pool may be typical of other pools, since it may be that legislative proposals need to be formulated

[5] PSCI Rate Schedule FPC No. 225, filed pursuant to Section 205(c) of the Act. 18 C.F.R. § 35.2(b) defines a rate schedule as "a statement of (1) electric service as defined in paragraph (a) of this section (2) rates and charges for or in connection with that service, and (3) all classifications, practices, rules, regulations, or contracts which in any manner affect or relate to the aforementioned service, rates and charges."

or to allow the Commission to respond to Congressional inquiries on legislation now pending.[6] Certainly the Commission has the authority to investigate such matters for this purpose under Section 307.[7] In addition, the Commission needs to know the economic impact on the

Wherefore, the Commission's review indicates that PSCI's filing has not been shown to be in the public interest. Accordingly, the Commission shall accept PSCI's June 7 Notice of Termination for filing, grant a waiver of the statutory thirty day notice requirement making such filing effective as of July 1, 1976, and institute an investigation under Sections 202, 206, 307 and 311 of the Federal Power Act to determine if such termination is consistent with the public interest.

In order to expedite this investigation we shall order a pre-hearing conference at which a Presiding Administrative Law Judge shall set further procedural dates, establish procedures for expeditious discovery of the relevant facts, and receive the views of the parties on such other matters as affect the conduct of the investigation herein ordered.

The Commission finds: (1) Good cause exists to accept for filing PSCI's Notice of Termination filed herein on June 7, 1976, grant a waiver of the statutory thirty day notice requirement making such filing effective as of July 1, 1976, and deny Frankford's motion to reject the filing or to suspend its operation for five months.

(2) It is necessary and proper in the public interest and to aid in enforcement of the Federal Power Act that the Commission enter upon an investigation of the circumstances surrounding the termination of joint planning functions of the KIP Agreement.

(3) Good cause exists to grant the Petitions to Intervene of the Municipal Intervenors, KU and IP&L, as hereinafter ordered and conditioned.

The Commission orders: (A) Pursuant to the authority of the Federal Power Act, particularly Sections 202, 206, 307, and 311 thereof, and the Commission's Rules and Regulations, the Commission hereby institutes an investigation of the circumstances surrounding the termination of joint planning functions of the KIP Agreement.

(B) PSCI's June 7 submittal is hereby accepted for filing, the implicit request for waiver of notice requirements as permitted by Section 35.11 of the Commission's regulations is hereby granted, and the filing is hereby assigned an effective date of July 1, 1976.

(C) Frankfort's motion to reject PSCI's filing or to suspend its operation for five months, is hereby denied.

(D) A prehearing conference shall be held at 10 A.M., August 22, 1977, for the purpose of setting further procedural dates, establishing procedures for expeditious discovery of the relevant facts, and receiving the views of the parties on such other matters as affect the conduct of the investigation herein ordered.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the pre-hearing conference and at the later hearings, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies and limitations expressed in this order.

(F) Municipal Intervenors, KU and IP&L are hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in their respective Petitions to Intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(G) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22582 Filed 8-4-77;8:45 am]

[Docket No. CP77-513]

TENNESSEE GAS PIPELINE

Application

JULY 29, 1977.

Take notice that on July 20, 1977, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP77-513 an application pursuant to Section 7(c) of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation for two years of up to 2,000 Mcf of natural gas per day for Owens-Corning Fiberglas Corporation, an existing direct industrial customer of Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Owens-Corning owns and operates an industrial plant located in Anderson, South Carolina, where it utilizes natural gas in the manufacture of fiberglass products. In order to moderate the effects of curtailment imposed upon its system, Owens-Corning has entered into a contract with Kilroy Properties, Inc. (Kilroy) for the purchase by Owens-Corning of natural gas produced from the East Chatham Field Jackson Parish, Louisiana, it is indicated. It is stated that Owens-Corning would pay, for gas purchased from Kilroy, a total initial price of $2.00 per million Btu's, which price would escalate to $2.15 at the end of the 12-month period following initial deliveries under said contract. It is further stated that in order to make such gas available to it, Owens-Corning has made arrangements with Applicant and Transco for the transportation and delivery of such gas to Owens-Corning at its Anderson, South Carolina plant.

Applicant proposes (1) to receive from Kilroy at an interconnection of Applicant and Kilroy's facilities in Jackson Parish, Louisiana, up to a Maximum Daily Quantity (MDQ) of 2,000 Mcf, and (2) through the utilization of existing facilities, to transport and deliver to Transco for the account of Owens-Corning, equivalent daily volumes of natural gas, up to said MDQ, at an existing interconnection between Applicant and Transco's facilities in Acadia Parish, Louisiana or when required by operating conditions, at other mutually agreeable existing interconnections between the facilities of Applicant and Transco for a period of 2 years.

Applicant indicates that it has entered into a transportation contract dated July 15, 1977, with Owens-Corning and Transco, which contract provides that Applicant would receive into its pipeline facilities at its Main Line Valve 44 plus 9.7 miles near the East Chatham Field in Jackson Parish, Louisiana, such volumes as Owens-Corning would cause Kilroy to make available to Applicant and which determines its operating conditions would permit it to receive, up to the MDQ. It is stated that Applicant would transport and deliver equivalent quantities of gas to Transco for the account of Owens-Corning at Applicant's Main Line Valve 509 plus 3.5 miles in Acadia Parish, Louisiana, or at other mutually agreeable points.

It is indicated that Owens-Corning would pay Applicant each month for the proposed transportation service (1) a demand charge to be determined by multiplying 45.0 cents by the MDQ, less any demand charge credit provided therein, if applicable; and (2) a volume charge equal to 5.73 cents multiplied by (a) the total of the daily volumes delivered by Applicant during such month or (b) the number of days in said month multiplied by 66⅔ percent of the MDQ, whichever is greater, less any applicable annual minimum bill credit as provided therein.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22584 Filed 8-4-77;8:45 am]

[Docket Nos. CP69-82, CP72-34, and CP75-282]

TEXAS EASTERN TRANSMISSION CORP. AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Findings and Order Vacating and Partially Vacating Certificates of Public Convenience and Necessity

AUGUST 1, 1977.

On June 22, 1977, Texas Eastern Transmission Corporation (TETCO) filed petitions, with respect to orders issued pursuant to Section 7(c) of the Natural Gas Act, asking the Commission to (1) vacate in part the certificate issued in Docket No. CP69-82, (2) allow TETCO to withdraw its applications for certificates in Docket Nos. CP72-34 and CP75-282, and (3) vacate the certificates issued in Docket Nos. CP72-34 and CP75-282. Transcontinental Gas Pipe Line Corporation (Transco) joined TETCO in its petition in Docket No. CP75-282. The requests are more fully set forth in the petitions.

Docket No. CP69-82: Following a statutory hearing, the Commission issued, on May 6, 1969, authorization for a major expansion program involving an aggregate 330 miles of 36-inch pipeline loop, 193,500 compressor horsepower, and other facilities (41 FPC 596). The capacity increase was to have been constructed over a three-year period and would have totaled 229,506 Mcf per day (102,003 Mcf per day during 1969, 76,502 Mcf per day during 1970, and 51,001 Mcf per day during 1971) at a total estimated cost of $177,295,000. The order authorized sales increases to sole requirements customers aggregating 64,022 Mcf per day. The remaining capacity increase was reserved for emergency utilization pending acquisition of additional gas supplies. TETCO was to file for additional authorizations to make additional sales. All facilities were to be built by November 1, 1971. Later orders extended the time to December 31, 1976.

Only that portion of the facilities necessary to obtain a capacity increase of 64,022 Mcf per day, the quantity of additional sales authorized, was ever built. These consisted of approximately 92 miles of 36-inch loopline, 114,900 horsepower and minor appurtenant facilities at a cost of $51,900,000, as reported in a progress statement filed by TETCO March 2, 1970. TETCO now seeks an order that would (1) vacate that portion of the authorization relating to the remaining facilities consisting of 238 miles of 36-inch loop line, 78,400 horsepower and appurtenant facilities and (2) terminate proceedings in this docket.

After the certificate application was filed, the Public Service Commission of New York (PSC) filed a notice of intervention requesting a formal hearing in this docket. Because the request was prompted chiefly by TETCO's proposal to limit expanded first year service to its sole requirement customers, PSC withdrew the request after receiving assurances from TETCO that it intended to meet the increased needs of all customers regardless of whether they had other sources of supply. Since PSC withdrew its request for a formal hearing, no impediment remains to our granting TETCO's petition to vacate its certificate in part. In any event, PSC's objection to allocating a pipeline's incremental supply to full requirement customers is no longer relevant to this docket. TETCO has constructed only that portion of the new facilities necessary to handle the additional sales actually authorized. It has not sought authorization for any additional sales, nor has it constructed the facilities to handle its uncommitted capacity, even though the deadline of December 31, 1976, has passed. To reopen these proceedings is therefore unnecessary.

Docket No. CP72-34: After a statutory hearing in this docket, the Commission, on January 21, 1972, authorized the construction of a 4,500 horsepower addition to TETCO's Joaquin, Texas, compressor station within one year of the order (47 FPC 135). By later orders the time for such construction was extended to January 20, 1976. These facilities have not been constructed. In view of the gas shortage, TETCO no longer has need for the additional capacity and requests authorization to withdraw its application. TETCO also requests the Commission to vacate the order granting a certificate of public convenience and necessity issued in this matter.

The Commission does not consider it appropriate to allow TETCO to withdraw its application in this docket. The application was considered on the merits and a certificate issued. Furthermore, permission to withdraw the application would be superfluous in the face of an order vacating the certificate.

Docket No. CP75-282: By an order issued on June 4, 1975, the Commission, following a statutory hearing, authorized TETCO and Transcontinental Gas Pipe Line Corporation (Transco) to construct and operate facilities to exchange gas in Neuces County, Texas. The total cost of the interconnection was estimated to be $49,050. The facilities were to have been completed by June 6, 1976. Because they have been unable to secure the measuring station site at reasonable cost, Applicants do not intend to construct the interconnection. The gas supplies will continue to be delivered at another point.

TETCO and Transco request authority to withdraw their application and request the Commission to vacate the order issuing a certificate of public convenience and necessity in this matter.

For the reasons set forth above in the discussion of Docket No. CP72-34, the Commission does not consider permission to withdraw the application an appropriate form of relief.

The Commission finds: (1) The requests by Texas Eastern Transmission Corporation that the Commission partially vacate the certificate of public convenience and necessity issued in Docket No. CP69-82 and terminate those proceedings and that the Commission completely vacate the certificate issued in Docket No. CP72-34 are in the public interest and should be granted.

(2) The request by Texas Eastern Transmission Corporation and Transcontinental Gas Pipe Line Corporation that the Commission vacate the certificate of public convenience and necessity issued in Docket No. CP75-282 is in the public interest and should be granted.

(3) The requests by Texas Eastern Transmission Corporation that it be allowed to withdraw its applications in Docket Nos. CP72-34 and CP75-282 and by Transcontinental Gas Pipe Line Corporation that it be allowed to withdraw its application in Docket No. CP75-282 are not in the public interest and should not be granted.

The Commission orders: (A) The certificate of public convenience and necessity granted to Texas Eastern Transmission Corporation in Docket No. CP69-82 by Commission order of May 6, 1969, as amended, is vacated insofar as it applies to facilities authorized but not constructed as of December 31, 1976.

(B) The proceeding in Docket No. CP69-82 is terminated.

(C) The certificate of public convenience and necessity issued to Texas Eastern Transmission Corporation in Docket No. CP72-34 by Commission order of August 9, 1971, as amended, is vacated

---

[6] See e.g., H.R. 6831, National Energy Act; H.R. 6660, Electric Utility Act of 1977; H.R. 2615, Electric Utility Rate Reform and Regulatory Improvement Act; H.R. 2393, Federal Power Commission Reform Act of 1977; and H.R. 823, Electric Rate Regulatory Reform Act of 1977.

[7] Section 307 provides in part: "The Commission may investigate any * * * matters * * * in obtaining information to serve as a basis for recommending further legislation concerning matters to which this Act relates.".

(D) The certificate of public convenience and necessity issued to Texas Eastern Transmission Corporation and to Transcontinental Gas Pipe Line Corporation in Docket No. CP75-282 by Commission order of June 4, 1975, is vacated.

(E) The request by Texas Eastern Transmission Corporation that it be allowed to withdraw its application in Docket No. CP72-34 is denied.

(F) The request by Texas Eastern Transmission Corporation and by Transcontinental Gas Pipe Line Corporation that they be permitted to withdraw their application in Docket No. CP75-282 is denied.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA WAIVER PETITION NO. HS-77-9]

FORE RIVER RAILROAD CO.

Notice of Petition for Exemption From the Hours of Service Act

The Fore River Railroad Company has petitioned the Federal Railroad Administration pursuant to 45 U.S.C. 64a(e) for exemption, with respect to certain employees, from the Hours of Service Act, as amended, 45 U.S.C. 61-64(b).

Interested persons are invited to participate in this proceeding by submitting written data, views, or comments. Communications should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Attention: FRA Waiver Petition No. HS-77-9, Room 5101, 400 Seventh Street, S.W., Washington, D.C. 20590. Communications received before August 31, 1977, will be considered before final action is taken on this petition. All comments received will be available for examination by interested persons during business hours in Room 5101, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590.

Issued in Washington, D.C. on July 29, 1977.

DONALD W. BENNETT,
Chairman,
Railroad Safety Board.

[FR Doc.77-22530 Filed 8-4-77;8:45 am]

FEDERAL RESERVE SYSTEM

BANCO CENTRAL, S.A.

Order Approving Formation of Bank Holding Company

Banco Central, S.A., Madrid, Spain, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of the formation of a bank holding company through acquisition of all the voting shares of Banco Central y Economias ("Bank"), Hato Rey, Puerto Rico. Bank, a new bank organized under the laws of the Commonwealth of Puerto Rico, proposes to purchase assets and assume liabilities, including deposit liabilities, of Banco Economias, San German, Puerto Rico. Bank would be the successor to Banco Economias and, accordingly, the proposed acquistion of voting shares of Bank is treated in this Order as a proposed acquistion of voting shares of Banco Economias.

Notice of the application has been given to the Secretary of the Treasury of the Commonwealth of Puerto Rico, who has advised the Board that he has no objection to approval of the application. Published notice of the application has been dispensed with because of the emergency that exists.[1] The Act does not require such notice. The Board has considered the application and the comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, a Spanish commercial bank with total assets of approximately $8.5 billion and total deposits of approximately $7.2 billion, is the second largest commercial bank in Spain. Applicant has 1,181 offices, including six foreign branches, and nine representative offices. Applicant also plans to establish an agency in New York City.[2]

Banco Economias, the assets and liabilities of which Bank will acquire, is the sixth largest of 15 nongovernment-owned banking organizations operating in Puerto Rico, and holds deposits of approximately $199 million, or 4.1 percent of the total deposits in commercial banks in the Commonwealth of Puerto Rico.[3] Applicant does not now operate in Puerto Rico, and it does not appear that any meaningful competition would be eliminated as a result of the proposal. Consummation of the proposal should, in fact, have a salutary effect on competition by restoring Bank to a condition that will enable it to compete with other banking organizations in the market. Therefore, on the basis of the record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant are considered satisfactory and its future prospects appear favorable. Without consummation of this proposal, the financial resources and future prospects of Banco Economias would be considered poor, and if it is to continue as a viable banking institution it must be acquired by a sound and well-managed organization such as Applicant. Applicant will provide Bank with needed financial and managerial resources and will greatly improve its future prospects. These factors lend great weight toward approval. Considerations relating to the convenience and needs of the community to be served also lend weight toward approval, as the continuity of banking services by a locally-chartered institution would be maintained in areas now served by Banco Economias. It is the Board's judgment, therefore, that the proposed acquisition would be in the public interest and that the application should be approved.

Applicant appears to qualify, upon consummation of the proposed transaction, as a foreign bank holding company under section 225.4(g)(1) of Regulation Y, and as such it will be exempt from certain of the nonbanking prohibitions of the Act applicable to domestic bank holding companies. Specifically, a foreign bank holding company may, without the Board's prior approval, retain and acquire shares of any company that is not engaged, directly or indirectly, in any activities in the United States except those incidental to such company's international or foreign business. Applicant does not itself engage in any nonbanking activity in the United States and it does not own, directly or indirectly, more than five percent of the shares of any company located in the United States. Applicant is in the process of submitting information to clarify whether Board approval is necessary for the retention of shares it holds directly or indirectly in any foreign company on the basis of that company's direct activities in the United States. Under section 4(a)(2) of the Act, Applicant would have a two-year period from the time it becomes a bank holding company to secure such approval or to dispose of shares of any such company in excess of five percent.

On the basis of the record, the application is approved for the reasons summarized above, subject to the issuance of all necessary regulatory approvals for Bank to commence business as an insured bank. The transaction shall not be made before the thirtieth day after the effective date of this Order, or later than three months after the effective date of this Order unless such period is extended for good cause by the Board or the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Board of Governors,[4] effective July 1, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22531 Filed 8-4-77;8:45 am]

PREFERRED MANAGEMENT CO.

Correction

In F.R. document 77-18668 appearing at page 33379 of the issue for Thursday, June 30, 1977, footnote 2 should have read:

[2] Applicant also provides management consulting and investment advice to Bank and leases real and personal property to Bank. Upon consummation of the acquisition of additional shares of Bank by Applicant, these activities would be exempt from the prohibitions of § 4 and § 4(a)(2) of the Act (12 U.S.C. § 1843(a)(2)).

Board of Governors of the Federal Reserve System, August 1, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22532 Filed 8-4-77;8:45 am]

SUMMIT HOLDING CORP.

Formation of Bank Holding Company

Summit Holding Corporation, Tamarac, Florida, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of 90 per cent or more of the voting shares of Summit Bank, Tamarac, Florida. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. §1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than August 31, 1977.

Board of Governors of the Federal Reserve System, August 1, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22533 Filed 8-4-77;8:45 am]

[Docket No. TCR 76-126]

UNION FINANCIAL CORP.

Prior and Final Certifications Pursuant to the Bank Holding Company Tax Act of 1976

Union Financial Corporation, Denver, Colorado ("UFC") (formerly Stuarco Oil Company, Inc. ("Stuarco")), has requested a prior certification pursuant to § 6158(a) of the Internal Revenue Code (the "Code"), as amended by § 3(a) of the Bank Holding Company Tax Act of 1976 (the "Tax Act"), that its sales of various oil and gas properties during 1973 and 1974 were necessary or appropriate to effectuate the policies of § 4 of the Bank Holding Company Act (12 U.S.C. § 1843) ("BHC Act"). UFC has also requested a final certification pursuant to § 6158(c)(2) of the Code that UFC has (before the expiration of the period prohibited property is permitted to be held under the BHC Act by a bank holding company) disposed of all the property the disposition of which is necessary or appropriate to effectuate § 4 of the BHC Act.[1]

In connection with these requests, the following information is deemed relevant for purposes of issuing the requested certification:[2]

1. UFC is a corporation organized under the laws of the State of Colorado on March 25, 1966.

2. On August 28, 1969, UFC acquired ownership and control of 990 shares, representing 100 percent of the outstanding voting shares, of UNB Corporation, Denver, Colorado ("UNB").[3] On that date UNB owned and controlled 57,360 shares, representing 95.6 percent of the outstanding voting shares, of Union National Bank (later United Bank & Trust), Denver, Colorado ("Bank").

3. UFC became a bank holding company on December 31, 1970, as a result of the 1970 Amendments to the BHC Act, by virtue of its direct and indirect ownership and control at that time of more than 25 percent of the outstanding voting shares of UNB, and by virtue of its indirect ownership and control at that time, through UNB, of more than 25 percent of the outstanding voting shares of Bank, and it registered as such with the Board on July 2, 1971.[4] UFC would have been a bank holding company on July 7, 1970, if the BHC Act Amendments of 1970 had been in effect on such date, by virtue of its direct and indirect ownership and control on that date of more than 25 percent of the outstanding voting shares of UNB and Bank, respectively. At the time of each of the sales described in paragraph 4 below UFC directly and indirectly owned and controlled more than 25 percent of the outstanding voting shares of UNB and Bank, respectively.

4. On or about May 31, 1973, UFC sold substantially all of its drilling rigs and related equipment to Exeter Drilling Contractors, Denver, Colorado, for cash. On October 1, 1973, after receiving written bids, UFC sold substantially all of its producing oil and gas properties and its undeveloped oil and gas properties to the highest bidder, Terra Resources, Houston, Texas, for cash.[5] Shortly thereafter, various minor mineral interests were sold to the major stockholders of UFC at an appraised value of $23,000. Concurrently, certain other office furniture, fixtures, and leasehold improvements were sold to one of UFC's stockholders at an independently appraised value. All of the foregoing transactions were for cash.

5. On each of the dates set forth in paragraph 4, UFC held property acquired by it on or before July 7, 1970, the disposition of which was necessary or appropriate to effectuate § 4 of the BHC Act if UFC were to continue to be a bank holding company beyond December 31, 1980, which property was "prohibited property" within the meaning of §§ 6158(b)(1) and 1103(c) of the Code.

6. Neither UFC nor any subsidiary of UFC holds any interest in any of the purchasers of the property described in paragraph 4 (the "Purchasers"), or in any subsidiary of any of the Purchasers.

7. None of the Purchasers, or any subsidiary of any of the Purchasers, holds any interest in UFC or any subsidiary of UFC.

8. No officer, director (including honorary or advisory director) or employee with policy-making functions of UFC or any subsidiary of UFC also holds any such position with any of the Purchasers or any subsidiary of any of the Purchasers.

9. UFC does not control in any manner the election of a majority of the directors, or exercise a controlling influence over the management or policies, of any of the Purchasers or any subsidiary of any of the Purchasers.

10. UFC does not presently own or control any property the disposition of which would be necessary or appropriate to effectuate § 4 of the BHC Act if UFC were to remain a bank holding company beyond December 31, 1980.

On the basis of the foregoing information and other facts of record, it is hereby certified that:

(A) at the time of the sales described in paragraph 4 above, UFC was a qualified bank holding corporation, within the meaning of § 6158(f)(1) and subsection (b) of section 1103 of the Code, and satisfied the requirements of that subsection;

(B) the property sold by UFC as described in paragraph 4 above was "prohibited property" within the meaning of §§ 6158(f)(2) and 1103(c) of the Code;

(C) UFC has (before the expiration of the period prohibited property is permitted under the BHC Act to be held by a bank holding company) disposed of all of the property the disposition of which is necessary or appropriate to effectuate § 4 of the BHC Act.

This certification is based upon the representations made to the Board by UFC and upon the facts set forth above

---

[1] The Federal Deposit Insurance Corporation has asked the Board to act on this application as soon as possible for reasons related to the condition of Banco Economias.

[2] Banking data are as of December 31, 1976.

[3] Deposit and market data within Puerto Rico are as of June 30, 1976.

[4] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

[1] Pursuant to §§ 2(d)(2) and 3(e)(2) of the Tax Act, in the case of any sale that takes place on or before December 31, 1976 (the 90th day after the date of the enactment of the Tax Act), the certification described in § 6158(a) shall be treated as made before the sale, and the certification described in § 6158(c)(2) shall be treated as made before the close of the calendar year following the calendar year in which the last such sale occurred, if application for such certification was made before the close of December 31, 1976. UFC's application for such certification was postmarked December 31, 1976.

[2] This information derives from UFC's correspondence with the Board concerning its request for this certification, UFC's Registration Statment filed with the Board pursuant to the BHC Act, and other records of the Board.

[3] UNB engages in no other activity than the holding of Bank's stock.

[4] UNB similarly became a bank holding company on December 31, 1970, by virtue of its direct ownership and control of more than 25 percent of the outstanding voting shares of Bank, and it registered as such with the Board on December 30, 1971.

[5] In connection with its request for this certification, UFC submitted a copy of its Tax Return Schedule showing the oil and gas properties and leasehold equipment it sold during 1973-74. Those properties and equipment were located in the following States: Colorado, Nebraska, Wyoming, Texas, Oklahoma, Louisiana and Montana. In addition, pursuant to § 1102(d) of the Code, UFC submitted an itemization of all oil and gas leases and related property and equipment divested during the period 1970-1974.

In the event the Board should hereafter determine that facts material to this certification are otherwise than as represented by UFC, or that UFC has failed to disclose to the Board other material facts, it may revoke this certification.

By order of the Board of Governors acting through its General Counsel, pursuant to delegated authority (12 C.F.R. § 265.2(b)(3), effective July 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

REGIONAL PUBLIC ADVISORY PANEL ON ARCHITECTURAL AND ENGINEERING SERVICES

Notice of Meeting

"Pursuant to Public Law 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 4, August 26, 1977, from 9:30 a.m. to 4:00 p.m., Room 3E1, 1776 Peachtree St., NW, Atlanta, Georgia. The meeting will be devoted to the initial step of the procedures for screening and evaluating the qualifications of architect-engineers under consideration for selection to furnish professional services for the proposed Conversion and Renovation of the Miami, FL, USPO & Courthouse. The The meeting will be open to the Public."

Dated: July 22, 1977.

L. D. STROM,
Regional Administrator.

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR E-166]

SUPPLY AND PROCUREMENT

Elimination of Use of Cash Shopping Plates in GSA Self-Service Stores

1. *Purpose.* This bulletin provides advance notice to agencies that on or about October 1, 1977, GSA will discontinue the issuance and use of cash shopping plates.

2. *Expiration date.* This bulletin expires on December 31, 1977.

3. *Background.* For several years GSA has offered both cash and charge shopping plates for the convenience of agency personnel using GSA self-service stores. A recent review and analysis of this practice and expenses associated therewith disclosed that the cost of handling cash transactions compared unfavorably with that of handling charge transactions, and outweighed the benefits derived from providing a cash purchase capability. Consequently, GSA will discontinue the issuance of cash shopping plates and will not accept them for purchases of items at its self-service stores.

4. *Recommended actions.* Agencies should take action to inform their authorized holders of GSA self-service store cash shopping plates of the information in this bulletin and advise them to arrange for the issuance of a charge shopping plate, if needed. Futher, the holders of cash shopping plates should be advised to either destroy the plates or return them to the GSA regional office that issued them.

5. *Additional information.* Inquiries concerning the discontinuance of the use of cash shopping plates should be directed to the appropriate GSA regional retail services activity.

ROBERT P. GRAHAM,
Commissioner,
Federal Supply Service.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Notice of Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of September 1977:

NATIONAL ADVISORY MENTAL HEALTH COUNCIL

Date and time: September 7-9; 9:30 a.m.
Place: Conference Rooms G and H, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
Type of meeting: Open—September 7. Closed—Otherwise.
Contact: Mrs. Zelia Diggs, Room 11-101, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4333.

Purpose: The National Advisory Mental Health Council advises the Secretary, Department of Health, Education, and Welfare, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, regarding the policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research, training, and services in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and the amount of, these grants.
Agenda: On September 7, the meeting will be open for discussion of NIMH policy issues. These will incude current administrative, legislative and program developments. Otherwise, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code, and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

NATIONAL ADVISORY COUNCIL ON ALCOHOL ABUSE AND ALCOHOLISM

Date and time: September 19-20; 9:30 a.m.
Place: Conference Rooms G and H, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
Type of meeting: Open—September 19. Closed—September 20.
Contact: Rhoda L. Christensen, Parklawn Building, Room 16-86, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4703.
Purpose: Advises the Secretary, Department of Health, Education, and Welfare regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications submitted, evaluates these applications in terms of scientific merit and coherence with Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.
Agenda: September 19 will be devoted to a discussion of the Fiscal Year 1978 Budget, Status of Third Special Report to the U.S. Congress on Alcohol and Health, Progress Report on Intramural Research, Institute Goals and Priorities. Agenda items are subject to change as priorities dictate.

September 20, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code, and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

PSYCHIATRIC NURSING EDUCATION REVIEW COMMITTEE

Date and time: September 26; 9:00 a.m.
Place: Conference Room A, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
Type of meeting: Open Meeting.
Contact: Dr. M. Leah Gorman, Room 8C-06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4423.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to psychiatric nursing manpower development and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 a.m. to 3:00 p.m., on September 26, the meeting will be open for administrative announcements and discussion of review criteria in the light of new program initiatives and priorities of the Institute. Attendance by the public will be limited to space available.

PARAPROFESSIONAL MANPOWER DEVELOPMENT REVIEW COMMITTEE

Date and time: September 29-30, 9:00 a.m.
Place: Conference Room H, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
Type of meeting: Open Meeting.
Contact—Vernon R. James, Room 8C-02 Parklawn Building, 5600 Fishers Lane Rockville, Maryland 20857, 301-443-1333
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to paraprofessional manpower development and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 a.m. to 4:30 p.m., on September 29 and 30, the meeting will be open for administrative announcements and discussion of review criteria in the light of new program initiatives and priorities of the Institute. Attendance by the public will be limited to space available.

Substantive information may be obtained from the contact persons listed above.

The NIAAA Information Officer who will furnish summaries of the meeting and rosters of the committee members is Mr. Harry Bell, Associate Director, Office for Public Affairs, NIAAA, Room 6C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3306. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the Council members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3600.

Dated: August 1, 1977.

CAROLYN T. EVANS,
Committee Management Officer,
Alcohol, Drug Abuse, and Mental Health Administration.

[Docket No. 76F-0446]

E. I. DUPONT DE NEMOURS & CO.

Notice of Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The notice of filing pertaining to a petition (FAP 6B3243) submitted by E. I. duPont de Nemours & Co. proposing that the food additive regulations be amended to provide for the safe use of nylon 66 resins reinforced with calcium silicate intended to contact food is amended to provide that such regulation provide for the safe use of 3-(triethoxysilyl) propylamine.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-5690

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b)(5)), 72 Stat. 1786 (21 U.S.C. 348 (b)(5)), notice was given in the FEDERAL REGISTER of November 23, 1976 (41 FR 51655) that a petition (FAP 6B3243) had been filed by E. I. duPont de Nemours & Co., 1007 Market St., Wilmington, DE 19898, proposing that § 177.1500 Nylon resins (21 CFR 177.1500, formerly § 121.2502, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), be amended to provide for the safe use of nylon 66 resins reinforced with calcium silicate for use as articles or components of articles intended for repeated use in contact with nonacidic food.

Notice is given that, in addition, the petition proposes that such regulation provide for the safe use of 3-(triethoxysilyl) propylamine as a component of the reinforced nylon 66 resins.

Dated: July 25, 1977.

HOWARD R. ROBERTS,
Acting Director,
Bureau of Foods.

Food and Drug Administration

[Docket No. 76N-0245, DESI 5856]

PHENYTOIN AND PHENYTOIN SODIUM

Drug for Human Use; Drug Efficacy Study Implementation; Followup Notice

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice announces that all single entity non-controlled-release oral dosage forms of phenytoin or phenytoin sodium are new drugs and require approved abbreviated new drug applications (ANDA's) in order to market in interstate commerce. It also affirms that all combinations and controlled-release products are new drugs and require approved "full" new drug applications (NDA's).

DATES: Notice effective August 5, 1977.

ANDA's for single entity non-controlled-release products being marketed commercially on August 5, 1977, must be submitted by February 1, 1978.

Submissions in support of a claimed exemption from the new drug provisions of the Federal Food, Drug, and Cosmetic Act must be submitted by October 4, 1977.

ADDRESSES: Communications pursuant to this notice should be identified with the reference number DESI 5856 and FDA Docket Number 76N-0245, addressed to the attention of the office named below, the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD. 20857.

Original full new drug applications and supplements thereto: Division of Neuropharmacological Drug Products (HFD-120), Room 10B-45, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto: Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for protocols for bioavailability studies: Division of Biopharmaceutics (HFD-520), Bureau of Drugs.

Submissions concerning exemption from new drug provisions of the act: Hearing Clerk, Food and Drug Administration (HFC-20), Room 4-65.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD-32), Department of Health, Education, and Welfare, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857 (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice (DESI 5856, Docket No. 76N-0245) published in the FEDERAL REGISTER of July 29, 1976 (41 FR 31588), the Director of the Bureau of Drugs concluded that diphenylhydantoin (now officially named phenytoin) in oral form is regarded as a new drug (as defined in section 201(p) of the Federal Food, Drug, and Cosmetic Act (the "act")) and is effective for control of grand mal and psychomotor seizures. The notice stated that all persons who manufacture or distribute a drug product that is identical, related, or similar to a drug product named in the notice (as defined in 21 CFR 310.6) must have an approved new drug application as a condition to lawfully marketing that product. One phenytoin product was named in the notice: Dilantin (oral) Suspension (NDA 8-792) held by Parke, Davis & Co., Joseph Campau Ave. at the River, Detroit, MI 48232.

Just prior to this notice, the Food and Drug Administration (FDA) had published a revision of a booklet entitled "Holders of Approved New Drug Applications for Drugs Presenting Actual or Potential Bioequivalence Problems" (Department of Health, Education, and Welfare Publication No. (FDA)-76-3009 dated June 1976); because of the color of its cover, it has become known as the "Blue Book." It identified phenytoin as a drug presenting an actual or potential bioequivalence problem and listed two firms that are holders of approved new drug applications for phenytoin oral suspension. The Blue Book stated that phenytoin sodium capsules were related drugs and indicated that no new drug application had been approved for this dosage form. The Blue Book also stated that as of June 1976 a new drug application was not required for marketing phenytoin sodium capsules. The Blue Book statement that a new drug application is not required as a condition for marketing phenytoin sodium capsules is rescinded and superseded by this DESI notice.

Because of the discrepancies between the Blue Book and the DESI notice, questions have arisen whether FDA considers phenytoin tablets, capsules, phenytoin sodium capsules, or other dosage forms of phenytoin, to be related to the phenytoin oral suspension identified in the DESI notice and therefore a new drug requiring an approved new drug application for marketing. The purpose of this notice is to resolve these questions.

The legal status and conditions for marketing such products are discussed below.

I. SINGLE ENTITY NON-CONTROLLED-RELEASE ORAL FORMS OF PHENYTOIN OR PHENYTOIN SODIUM INTENDED FOR USE FOR THE CONTROL OF GRAND MAL AND PSYCHOMOTOR SEIZURES:

A. *Legal status.* Such products are regarded as new drugs as defined in section 201(p) of the act, and subject to the requirements of section 505 of the act, for the following reasons:

1. The Food and Drug Administration is not aware of a past finding by experts that any such product is generally recognized as safe and effective.

2. The finding of an actual or potential bioavailability/bioequivalence problem precludes a finding that such products are generally recognized as safe and effective. The finding that such problems exist was published in the FEDERAL REGISTER of June 20, 1975 (40 FR 26168).

3. The July 29, 1976 DESI notice referenced 21 CFR 310.6 concerning drug products which may be identical, related, or similar to phenytoin oral suspension. The last sentence quoted from 21 CFR 310.6(a) emphasizes that the scope of the phrase "identical, related, or similar" depends on the extent to which conclusions that a reviewed drug is effective or ineffective may be applied to other non-reviewed drugs. Paragraph (b) expands on this to say:

Where experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs would conclude that the findings in a drug efficacy notice of opportunity for hearing concerning effectiveness are applicable to an identical, related, or similar drug product, such product is affected by the notice.

The Director concludes that the finding of effectiveness for phenytoin oral suspension is also applicable to other single entity non-controlled-release oral dosage forms of phenytoin and phenytoin sodium, provided such dosage forms fulfill bioavailability/bioequivalence requirements. Accordingly, such products are subject to the ANDA provisions of the July 29, 1976 DESI notice, as amended by this notice.

B. *Conditions for marketing.* The DESI notice stated that approval of a new drug application must be obtained prior to marketing any product covered by the notice that was not subject to an approved or effective new drug application on July 29, 1976, and, for products covered by such applications, a supplemental application containing certain data was required. The notice also indicated that an abbreviated new drug application (21 CFR 314.1(f)) would be accepted to fulfill this requirement. The notice did not indicate that such applications or supplements must contain data to show that the drug is biologically available in the formulation marketed or proposed to be marketed. Because phenytoin is currently identified by FDA as a drug with an actual or potential bioequivalence problem, the DESI notice of July 29, 1976 is hereby amended to require bioavailability data as part of the applications or supplements. Protocols for bioavailability studies are available upon request from the Division of Biopharmaceutics (HFD-520), Bureau of Drugs.

The DESI notice did not address the conditions for continuing to market a product covered by the notice that was not then subject to an approved or effective new drug application. Because the FDA has not previously identified these products as new drugs, because phenytoin is medically necessary for the treatment of epilepsy, and because appropriate bioavailability studies must be completed and submitted as part of the abbreviated new drug applications in order to evaluate the safety and effectiveness of these products, any single entity, non-controlled-release oral dosage form of phenytoin or phenytoin sodium intended to control grand mal and psychomotor seizures that was marketed commercially on August 5, 1977 may continue to be marketed without an approved new drug application until May 2, 1978, provided that (1) on or before February 1, 1977 the sponsor submits an abbreviated new drug application to FDA for the product and that (2) FDA does not issue a nonapprovable letter regarding such application. The Food and Drug Administration believes that this allows the manufacturer adequate time to conduct the appropriate scientific studies and to prepare and submit the required application, as well as allowing FDA sufficient time to review and evaluate these applications. This special provision for continuation of marketing, which applies only to products marketed on or before the publication of this notice, is consistent with the District Court's order in *Hoffmann-LaRoche, Inc. v. Weinberger*, 425 F. Supp. 890 (D.D.C., 1975), reprinted in the FEDERAL REGISTER of September 22, 1975 (40 FR 43531) and March 2, 1976 (41 FR 9001).

II. COMBINATION *NON-CONTROLLED-RELEASE* ORAL DOSAGE FORMS OF PHENYTOIN OR PHENYTOIN SODIUM AND ONE OR MORE OTHER ACTIVE INGREDIENTS INTENDED TO CONTROL GRAND MAL AND PSYCHOMOTOR SEIZURES.

A. *Legal status.* Such products are regarded as new drugs as defined in section 201(p) of the act, and subject to the requirements of section 505 of the act, for the following reasons:

1. Single-entity products containing phenytoin or phenytoin sodium are regarded as new drugs, as discussed above. It follows then that such a drug in combination with other drug(s) is also a new drug. 21 CFR 310.3(h)(1).

2. The Food and Drug Administration is not aware of a past finding by experts that any combination containing phenytoin or phenytoin sodium is generally recognized as safe and effective.

3. The new drug status of a combination product is not necessarily dependent upon the new drug status of any of its active ingredients. Even if one or more of the individual drug substances were not new, the combination of them could create a "new drug". 21 CFR 310.3(h)(2). Past experience of FDA has established that combining two or more active ingredients, each of which is safe and effective for a particular indication, may result in a product which is either less safe, or less effective, or both. For this reason, FDA has determined that the combination of two or more drugs, even ones that individually are generally recognized as safe and effective, cannot create a combination that is always and immediately recognizable as safe and effective. The agency, therefore, has required that new combinations have separate NDA's containing evidence demonstrating the safety and effectiveness of the combination product. In addition, FDA has established a policy regarding fixed combination drugs that requires that each component make a contribution to the claimed effects and that the dosage of each be such that the combination is safe and effective for a significant patient population. 21 CFR 300.50 and 314.1(c)(2), item 12.c. The Food and Drug Administration is not aware of any combination containing phenytoin or phenytoin sodium that meets these requirements, except those already approved in full new drug applications. No combination containing phenytoin or phenytoin sodium was reviewed in the Drug Efficacy Study.

For these reasons, together with the bioavailability/bioequivalence problems with the single entity product, the Director concludes that the finding of effectiveness for the oral suspension form of phenytoin is not applicable under 21 CFR 310.6 to phenytoin or phenytoin sodium in combination with one or more other active ingredients. Accordingly, the DESI notice of July 29, 1976 does not authorize an ANDA for any combination. Further, FDA does not have in its files sufficient publicly available data and information to justify a conclusion that the requirements for safety and effectiveness data in a full NDA can be waived and ANDA's allowed. However, the fact that FDA does not waive any of the requirements of an NDA for a particular product does not necessarily mean that an applicant must conduct his own preclinical and clinical studies regarding safety and effectiveness. An applicant may be able to include in his application published articles and other publicly available data and information that provide an adequate basis for approval of the application.

B. *Conditions for marketing.* Prior approval of a full NDA is a requirement for marketing any combination product containing phenytoin or phenytoin sodium and one or more other active ingredients that is intended to control grand mal and psychomotor seizures. The Food and Drug Administration is not aware of a significant patient population requiring treatment with a combination product. Patients now being treated with combination drugs may continue to be treated with the single entity components. The Food and Drug Administration does not believe that any such fixed combination is "medically necessary" under the order in *Hoffmann-LaRoche* cited above and thus will not permit marketing to continue pending completion of the necessary clinical studies and approval of a full NDA. However, those products which are subjects of requests for hearing pursuant to the July 29, 1976 notice may continue to be marketed pending a ruling on a hearing request.

Regulatory action is to be taken with respect to such combinations under Category IV of Compliance Policy Guide 7132C.08—Marketed New Drugs Without Approved NDA's or ANDA's. The FEDERAL REGISTER of September 23, 1976 (41 FR 41770) gave notice of the availability of this document.

III. CONTROLLED-RELEASE ORAL DOSAGE FORMS OF PHENYTOIN OR PHENYTOIN SODIUM EITHER AS A SINGLE ENTITY OR IN COMBINATION WITH ONE OR MORE OTHER ACTIVE INGREDIENTS INTENDED FOR USE FOR THE CONTROL OF GRAND MAL OR PSYCHOMOTOR SEIZURES.

A. *Legal status.* Such products are regarded as new drugs as defined in section 201(p) of the act, and subject to the requirements of section 505 of the act for the following reasons:

1. Single entity non-controlled-release forms of phenytoin and phenytoin sodium and combinations of these drugs with one or more other active ingredients are new drugs as discussed in sections I and II above.

2. Any controlled-release dosage form that contains a quantity of active ingredients which is not generally recognized as safe for administration as a single dose is regarded as a new drug. 21 CFR 200.31. Further, the newness of a dosage, or method or duration of administration, may cause a product to be regarded as a new drug. 21 CFR 310.3(h)(5).

3. The Food and Drug Administration is not aware of a past finding by experts that any controlled-release product containing phenytoin or phenytoin sodium, whether it contains a single active ingredient or a combination of ingredients, is generally recognized as safe and effective.

4. No single entity or combination controlled-release products containing phenytoin or phenytoin sodium were reviewed in the Drug Efficacy Study. Any controlled-release claim for products containing phenytoin or phenytoin sodium, because of bioavailability/bioequivalence problems and the long half-life of the drug, requires studies to establish the precise nature of the claim. For these reasons and reasons discussed in section II above, the Director concludes that the finding of effectiveness for the single entity oral suspension is not applicable under 21 CFR 310.6 to any controlled-release product, and that the July 29, 1976 notice does not authorize ANDA's for such products.

B. *Conditions for marketing.* Prior approval of a full NDA is a requirement for marketing any controlled-release product containing phenytoin or phenytoin sodium. All controlled-release dosage forms containing these drugs known to FDA to be marketed without an approved NDA have been removed from the market as a result of regulatory action by the agency.

IV. "GRANDFATHER" STATUS.

The Food and Drug Administration is not aware of any phenytoin products on the market that can qualify either for the "grandfather" exemption from the new drug requirements of section 505 of the act contained in section 201(p) of the act for products marketed prior to June 25, 1938, or for the "grandfather" exemption from the effectiveness standards otherwise applicable to new drugs contained in section 107(c) of the Drug Amendments of 1962. Parke, Davis & Co. has marketed Dilantin (phenytoin sodium) Capsules for many years without an approved new drug application, contending that the product was so "grandfathered". At the time of publication of the Blue Book, the "grandfather" issue with respect to phenytoin sodium capsules had not been resolved, but subsequently Parke, Davis & Co. waived its claims and submitted an abbreviated new drug application (ANDA 84-349) for Dilantin Capsules containing 30 milligrams and 100 milligrams phenytoin sodium per capsule that was approved August 27, 1976. No other firm has claimed exemption from section 505 of the act under the "grandfather" clauses. A person may not claim exempt status for his product merely because an identical, related, or similar product may be entitled to such an exemption. The Food and Drug Administration has long maintained that approval of applications under section 505 of the act approves only the products named in the application; likewise, an exemption from the application requirements of section 505 of the act applies only to the particular products that meet all of the requirements for an exemption. If any manufacturer believes his product is entitled to an exemption from the new drug provisions of the act, he may file on or before October 4, 1977 documentation in support of the contention. The

requirements governing such a submission are contained in 21 CFR 314.200(e)(2). Failure to submit such documentation shall constitute a waiver of all claims to exemption under section 201(p). Such submissions shall be filed in quintuplicate, identified with FDA Docket Number 76N-0245 and directed to the Hearing Clerk (address given above).

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: July 29, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

Public Health Service

ADMINISTRATOR, HEALTH SERVICES ADMINISTRATION

Delegations of Authority

Notice is hereby given that pursuant to the authority delegated to the Assistant Secretary for Health on July 29, 1974, (39 F.R. 32171) by the Secretary of Health, Education, and Welfare, the Assistant Secretary for Health on July 25, 1977 made the following delegations of authority under the Health Maintenance Organization Act of 1973 (Public Law 93-222) to the Administrator, Health Services Administration. Unless otherwise noted, the citations below refer to sections of the Public Health Service Act, as amended by Public Law 93-222:

1. Authority under Section 1303 to authorize grants and contracts for feasibility surveys;

2. Authority under Section 1304 to authorize grants and contracts and to make loan guarantees for planning and for initial development costs;

3. Authority under Section 1305 to make loans and loan guarantees for initial operation costs;

4. Authority under Section 6 of Public Law 93-222 for provision of health services for Indians and domestic agricultural migratory and seasonal workers;

5. Authority under Section 1308.

Except for the authority (a) to waive the Secretary's right of recovery under Sections 1308(a)(2)(A) and 1308(b)(3); (b) to sell loans and guarantee such loans under Section 1308(c); (c) to issue notes or other obligations under Section 1308(d); and (d) to sell assets under Section 1308(e), the authorities delegated herein may be redelegated by the Administrator, Health Services Administration. A redelegation by the Administrator, Health Services Administration, or the bureau director acting as his designee, of authority to make loans and to guarantee loans shall contain the provision that the approval of loans and loan guarantees may be made only with the concurrence of the appropriate loan officer except where written authorization to approve the loans and loan guarantees is given by the Administrator, Health Services Administration, or the bureau director acting as his designee.

The Assistant Secretary for Health's delegation of March 19, 1975, (40 F.R. 15118-15119) to the Administrator, Health Services Administration, has been superseded.

Dated: July 25, 1977.

R. MOURE,
Executive Officer,
Public Health Service.

REGIONAL HEALTH ADMINISTRATORS AND ADMINISTRATOR, HEALTH RESOURCES ADMINISTRATION

Delegations of Authority

Notice is hereby given that pursuant to the authority delegated to the Assistant Secretary for Health on May 22, 1975, (40 F.R. 25079) by the Secretary of Health, Education, and Welfare, the Assistant Secretary for Health on July 25, 1977 made the following delegations of authority under Part B of Title VI of the Public Health Service Act (42 U.S.C. 291j-1 *et seq.*) concerning loan guarantees and loans for modernization and construction of hospitals and other medical facilities. The Assistant Secretary for Health's delegation of April 5, 1976, (41 F.R. 17807-17808) to the Regional Health Administrators and the Administrator, Health Resources Administration, has been superseded.

1. To the Regional Health Administrators, the authority to enter into agreements to make loans and to guarantee loans; the authority to make such loans and to guarantee such loans; the authority to modify the terms and conditions of such agreements, loans, and loan guarantees; the authority to carry out the responsibilities of the Secretary under such agreements, loans, and loan guarantees, except for the authority to waive the Secretary's right of recovery under Sections 623(e)(1) and 627(d) of the Act; and the authority to afford State agencies an opportunity for a hearing and to conduct such hearings under Section 623(c) of the Act. These authorities may be redelegated by the Regional Health Administrators with further redelegation prohibited. A redelegation by any Regional Health Administrator of authority to make loans and to guarantee loans shall contain the provision that the approval of loans and loan guarantees may be made only with the concurrence of the appropriate loan officer except where written authorization to approve the loans and loan guarantees is given by the Regional Health Administrator.

2. To the Administrator, Health Resources Administration, the authority delegated to the Assistant Secretary for Health under Part B of Title VI of the Public Health Service Act, except the authority to enter into agreements to make loans and to guarantee loans; the authority to make such loans and to guarantee such loans; the authority to modify the terms and conditions of such agreements, loans, and loan guarantees; the authority to carry out the responsibilities of the Secretary under such agreements, loans, and loan guarantees; and the authority to afford State agencies an opportunity for a hearing and to conduct such hearings under Section 623(c) of the Act. This delegation includes the authority to waive the Secretary's right of recovery under Sections 623(e)(1) and 627(d) of the Act. These authorities may be redelegated, except for the authority to issue notes or other obligations under Section 626(b) of the Act; to sell loans and guarantee such loans under Sections 627(b) and 627(c) of the Act; and to waive the Secretary's right of recovery under Sections 623(e) and 627(d) of the Act.

Dated: July 25, 1977.

R. MOURE,
Executive Officer,
Public Health Service.

The area described contains 4,934.33 acres.

The Bureau of Land Management desires that the lands be withdrawn and reserved to assure protection of public values, including wildlife habitat, outdoor recreation and other public purposes. The wildlife habitat values for upland game birds are of particular importance.

On or before September 6, 1977, all persons who wish to submit comments, suggestions or objections in connection with the proposed withdrawal may present their views to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, Notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, Federal Building, 550 West Fort Street, Post Office Box 042, Boise Idaho 83724 within 30 days of date of publication of this notice. Notice of the public hearing will be published in the FEDERAL REGISTER giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16B.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn and reserved as requested. The determination of the Secretary on the application will be published in the FEDERAL REGISTER.

The above described lands are temporarily segregated from the operation of the public land laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Room 398, Federal Building, 550 West West Fort Street, Post Office Box 042, Boise, Idaho 83724

VINCENT S. STROBEL,
Chief, Branch of
L & M Operations.

Office of the Secretary

TRANS-ALASKA PIPELINE SYSTEM CRITIQUE

Meeting

Notice is hereby given that the Department of the Interior, as part of its review responsibilities, will conduct a Trans-Alaska Pipeline System (TAPS) critique session on August 18 and 19 in Anchorage, Alaska.

TAPS is the largest privately-funded construction project in U.S. history to date. It is the intention of the Department to assess how well the terms and conditions attached to the use of public lands have served their purpose, and how future use of public lands for similar purposes might be benefited by the experience gained in the construction of this project.

Among the objectives of the critique will be:

(1) To determine the effectiveness of the Stipulations between the U.S. Government and the pipeline owners for the Agreement and Grant of Right-of-Way for TAPS construction;

(2) To pinpoint positive aspects of the Stipulations in respect to environmental impact abatement during the use of public land, while identifying areas of inadequacy in the Stipulations for better results, if any, in future pipeline or other projects requiring extensive use of Federal land;

(3) To consider the effectiveness of the organization used for Federal and State roles;

(4) To assess the effectiveness of the Federal-State agreement;

(5) To consider the question of balance between government and private interests in the monitoring efforts.

The critique will be conducted in a workshop format. Topics to be treated are the technical, environmental, socioeconomic, and governmental administrative aspects of TAPS.

Participants in the critique will be representatives of concerned Federal agencies, Alaska State and local officials, the Alaska congressional delegation, relevant congressional committees, Alyeska and its oil company owners, environmental organizations, labor unions, business and civic organizations in Alaska, the Alaskan Federation of Natives and other native organizations, and academic groups.

The public is invited to attend the critique. The daily sessions will begin at 9 a.m. on the campus of the University of Alaska, 2651 Providence Drive, Anchorage, Alaska 99504. Space will be limited and will be available on a first-come-first-served basis. Persons desiring to attend should contact Terry Adlhock, Room 3425, U.S. Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240, telephone: 202-343-2036, or the Alaska Pipeline Office, 808 E St., Anchorage, Alaska 99501, Telephone: 907-272-3422, specifying which of the workshop sessions they wish to attend.

GARY J. WICKS,
